(Cancer Cell 19, 697–699; June 14, 2011)

An incorrect and confusing descriptive phrase, *MAPK-stimulated*, was inadvertently included in this article. In column 3 on page 698, the sentence beginning on line 19 should have read as follows: “Thus, *PTEN* loss can lead to repression of AR signaling on two levels: upstream suppression of HER kinase, and suppression/subversion of AR-mediated transcription through increased expression of transcriptional coregulators and a histone methyltransferase (Figure 1).” The author apologizes for any inconvenience or confusion that may have been caused by this error.
