

Contents of Volume 3

Number 1, 1983

Bacterial Biosynthesis of Cellulose from D-Glucose or Glycerol Precursors Labelled with Deuterium. <i>B. F. Chumpitazi-Hermoza, D. Gagnaire and F. R. Taravel (France)</i>	1
High Resolution Nuclear Magnetic Resonance Studies of Nigeran. <i>Klaus Bock (Denmark), Didier Gagnaire, Michel Vignon and Marc Vincendon (France)</i>	13
Modified Xanthan — Its Preparation and Viscosity. <i>I. J. Bradshaw, B. A. Nisbet, M. H. Kerr and I. W. Sutherland (UK)</i>	23
Effect of Alkali Pretreatment on the Rheological Properties of Concentrated Agar-Agar Gels. <i>Katsuyoshi Nishinari and Mineo Watase (Japan)</i>	39
Chitin and Its Derivatives: New Trends of Applied Research. <i>Riccardo A. A. Muzzarelli (Italy)</i>	53
Summaries of UK Patent Applications	77
Book Reviews	
<i>Annual Reports of Fermentation Processes</i> . Volume 4. Edited by G. T. Tsao. Academic Press, New York, 1981 (Reviewed by John F. Kennedy and Charles A. White)	83
<i>Economic Microbiology</i> . Volume 5: Microbial Enzymes and Bioconversions. Edited by A. H. Rose. Academic Press, London. 1981. (Reviewed by John F. Kennedy and Charles A. White)	84

Number 2, 1983

Macromolecular Modifications of Manioc Starch Components by Extrusion-Cooking with and without Lipids. <i>P. Colonna and C. Mercier (France)</i>	87
--	----

Binding of Methylene Blue to Alginate: Effect of Acid Treatment on Metachromasy. <i>Gilbert R. Seely and Richard R. Knotts (USA)</i> .	109
Rheological Studies of Specific Cation Forms of Kappa Carrageenan Gels. <i>V. J. Morris and G. R. Chilvers (UK)</i>	129
Water-Soluble (1 → 3), (1 → 4)- β -D-Glucans from Barley (<i>Hordeum vulgare</i>) Endosperm. I. Physicochemical Properties. <i>J. R. Woodward, D. R. Phillips and G. B. Fincher (Australia)</i>	143
Summaries of UK Patent Applications	157
Book Review	
<i>Enzyme Inhibitors</i> . Edited by U. Brodbeck. Verlag Chemie, Weinheim, 1981 (Reviewed by Charles A. White and John F. Kennedy)	159

Number 3, 1983

Electron Microscopy Study of the Enzymic Hydrolysis of <i>Valonia</i> Cellulose. <i>H. Chanzy and B. Henrissat (France)</i>	161
Theoretical Studies on the Conformation of Monosialogangliosides and Disialogangliosides. <i>K. Veluraja and V. S. R. Rao (India)</i>	175
Structural Features of the Neutral Sugar Side Chains of Apple Pectic Substances. <i>J. A. de Vries, C. H. den Uijl, A. G. J. Voragen, F. M. Rombouts and W. Pilnik (The Netherlands)</i>	193
Water-Soluble (1 → 3), (1 → 4)- β -D-Glucans from Barley (<i>Hordeum vulgare</i>) Endosperm. II. Fine Structure. <i>J. R. Woodward, G. B. Fincher and B. A. Stone (Australia)</i>	207
Affinity Chromatography of Arabinogalactan-Proteins. <i>I. G. Andrew (New Zealand) and B. A. Stone (Australia)</i>	227
Summaries of UK Patent Applications	239
Book Review	
<i>Colloids in Food</i> . By E. Dickinson and G. Stainsby, Applied Science Publishers Ltd, London, 1982 (Reviewed by J. M. V. Blanshard)	243

Number 4, 1983

Distribution of Methoxyl Groups in Apple Pectic Substances. <i>J. A. de Vries, F. M. Rombouts, A. G. J. Voragen and W. Pilnik (The Netherlands)</i>	245
---	-----

<i>Aspergillus niger</i> Endopolygalacturonase: 3 – Action Pattern on Polygalacturonic Acid. <i>Jean-François Thibault (France)</i>	259
Solution Properties of a New Polyelectrolyte Derived from the Polysaccharide Scleroglucan. <i>V. Crescenzi, A. Gamini, G. Paradossi and G. Torri (Italy)</i>	273
X-ray Diffraction Data for (1→3)- α -D-Glucan Triacetate. <i>Kozo Ogawa, Keizo Okamura, Toshifumi Yui, Takehiko Watanabe and Ken'ichi Takeo (Japan)</i>	287
Water-soluble (1→3),(1→4)- β -D-Glucans from Barley (<i>Hordeum vulgare</i>) Endosperm. III. Distribution of Cellotriosyl and Cello-tetraosyl Residues. <i>R. G. Staudte, J. R. Woodward, G. B. Fincher and B. A. Stone (Australia)</i>	299
Summaries of UK Patent Applications	313
Book Review	
<i>Bioactive Carbohydrates: in Chemistry, Biochemistry & Biology.</i> By J. F. Kennedy and C. A. White. Ellis Horwood Ltd (John Wiley & Sons Ltd), Chichester, 1983 (Reviewed by J. M. V. Blanshard)	315
Contents of Volume 3	317
