

Contents of Volume 4

Number 1

Editorial	1
Changes in the Structure of Apple Pectic Substances during Ripening and Storage. <i>J. A. de Vries, A. G. J. Voragen, F. M. Rombouts and W. Pilnik (The Netherlands)</i>	3
<i>N</i> -2'-Acetoxybenzoyl Derivatives of Chitosan, <i>N</i> -Desulphated Heparin and 2-Amino-2-deoxy-D-glucose. <i>Shigehiro Hirano and Yasuo Ohe (Japan)</i>	15
Structural Characterisation of Thermoreversible Anionic Polysaccharide Gels by Their Elastoviscous Properties. <i>E. E. Braudo, I. G. Plashchina and V. B. Tolstoguzov (USSR)</i>	23
Specific Interaction of Aniline Blue with (1 → 3)-β-D-Glucan. <i>Peter J. Wood and R. G. Fulcher (Canada)</i>	49
Some Recent Observations on the Retrogradation of Amylose. <i>M. J. Miles, V. J. Morris and S. G. Ring (UK)</i>	73
Summaries of UK Patent Applications	79
Book Review	83

Number 2

A Comparative Study of Laboratory Methods for the Preparation of Arabic Acid. <i>E. Balabanova-Radonova (Bulgaria) and P. Khristova (Sudan)</i>	85
Comparison of the Structural Features of Apple and Citrus Pectic Substances. <i>J. A. de Vries, F. M. Rombouts, A. G. J. Voragen and W. Pilnik (The Netherlands)</i>	89
On the Reaction of Potato Starch with Isocyanates. <i>Ernst W. H. Asveld, Eize J. Stamhuis and Geert E. H. Joosten (The Netherlands)</i>	103
Apple Juice Pectic Substances. <i>X. Rouau and J.-F. Thibault (France)</i>	111

Study on the Retrogradation of Starch. I. Particle Size and its Distribution of Amylose Retrograded from Aqueous Solutions. <i>Shinichi Kitamura, Susumu Yoneda and Takashi Kuge (Japan)</i>	127
Chelating Derivatives of Chitosan Obtained by Reaction with Ascorbic Acid. <i>Riccardo A. A. Muzzarelli, Fabio Tanfani and Monica Emanuelli (Italy)</i>	137
Short Communication	
The Effect of Pyruvate on Xanthan Solution Properties. <i>I. H. Smith, K. C. Symes, C. J. Lawson and E. R. Morris (UK)</i>	153
Book Reviews	159

Number 3

Single Crystals of Amylose with a Low Degree of Polymerization. <i>A. Buleon, F. Duprat, F. P. Booy and H. Chanzy (France)</i>	161
Correlation of the Perceived Texture of Random Coil Polysaccharide Solutions with Objective Parameters. <i>E. R. Morris, R. K. Richardson and L. J. Taylor (UK)</i>	175
Structural Investigations on the Non-starchy Polysaccharides of Apples. <i>G. O. Aspinall and H. K. Fanous (Canada)</i>	193
Characteristics and Specificity of the Interaction of a Fluorochrome from Aniline Blue (Siroflour) with Polysaccharides. <i>N. A. Evans, P. A. Hoyne and B. A. Stone (Australia)</i>	215
Summaries of UK Patent Applications	231
Book Review	235

Number 4

Alginate Block Structure in Phaeophyceae from Nova Scotia: Variation with Species, Environment and Tissue-type. <i>J. S. Craigie (Canada), E. R. Morris, D. A. Rees and D. Thom (UK)</i>	237
Interaction Properties of D-Galactose-Depleted Guar Galactomannan Samples. <i>B. V. McCleary (Australia), I. C. M. Dea, J. Windust and D. Cooke (UK)</i>	253
Structural Investigations on the Non-starchy Polysaccharides of Oat Bran. <i>G. O. Aspinall and R. C. Carpenter (Canada)</i>	271
Viscometric and Potentiometric Study of High-methoxyl Pectins in the Presence of Sucrose. <i>F. Michel, J.-F. Thibault and J.-L. Doublier (France)</i>	283
Absolute Molecular Weight and Molecular Weight Distribution of Guar by Size Exclusion Chromatography and Low-angle Laser Light Scattering. <i>B. R. Vijayendran and T. Bone (USA)</i>	299

Research Note

X-Ray Photoelectron Spectroscopic Study of Wood Lignins. <i>A. J. Varma (India)</i>	315
Book Reviews	319

Number 5

Use of Trifluoroacetic Acid to Prepare Cellodextrins. <i>R. E. Wing and S. N. Freer (USA)</i>	323
Preparation and Solution Properties of Pullulan Fractions as Standard Samples for Water-Soluble Polymers. <i>K. Kawahara, K. Ohta, H. Miyamoto and S. Nakamura (Japan)</i>	335
Theoretical Studies on the Conformations of Higher Gangliosides. <i>K. Veluraja and V. S. R. Rao (India)</i>	357
XM-6: A New Gel-forming Bacterial Polysaccharide. <i>B. A. Nisbet, I. W. Sutherland, I. J. Bradshaw, M. Kerr, E. R. Morris and W. A. Shepperson (UK)</i>	377
Summaries of UK Patent Applications	395

Number 6

The Effect of Lintnerisation on Wheat and Potato Starch Granules. <i>A. H. Muhr, J. M. V. Blanshard and D. R. Bates (UK)</i>	399
Small-angle Neutron Scattering Studies of Starch Granule Structure. <i>J. M. V. Blanshard, D. R. Bates, A. H. Muhr (UK), D. L. Worcester (France) and J. S. Higgins (UK)</i>	427
The Effect of Alginate Inclusion on the Extrusion Behaviour of Soya. <i>D. Berrington, A. Imeson, D. A. Ledward, J. R. Mitchell and J. Smith (UK)</i>	443
Influence of the Charge Density on the Solution Behaviour of Polycarboxylates Derived from the Polysaccharide Schleroglucan. <i>A. Gamini, V. Crescenzi and R. Abruzzese (Italy)</i>	461

Research Note

Photoelectron Spectroscopic Studies of Cellulose, Starch and their Oxidation Products, in Powdered Form. <i>A. J. Varma (India)</i>	473
---	-----
