

Carbohydrate Polymers

Papers Published in 1986

Contents of Volume 6

Number 1

Studies of the Interaction of Methanol with Pectin in Aqueous Solution. <i>I. G. Plashchina, M. G. Semenova, Yu L. Slovokhotov, Yu T. Struchkov, E. E. Braudo, V. B. Tolstoguzov (USSR) and G. I. Ignatov (Bulgaria)</i>	1
Studies of the Gel Formation of κ -Carrageenan Above the Coil-Helix Transition Temperature Range. <i>I. G. Plashchina, I. R. Muratalieva, E. E. Braudo and V. B. Tolstoguzov (USSR)</i>	15
Interactions between Cyclodextrins and Cell-Membrane Phospholipids. <i>J. Szejtli, T. Cserháti and M. Szögyi (Hungary)</i>	35
Structural and Rheological Properties of the Extracellular Polysaccharides from <i>Bacillus polymyxa</i> . <i>J. K. Madden, I. C. M. Dea and D. C. Steer (UK)</i>	51
Summaries of UK Patent Applications.	75
Book Reviews	81

Number 2

Solid State ^1H -NMR Study of β -Cyclodextrin-Water Complexes. <i>I. Furó, I. Pócsik, K. Tompa, Á. Stadler-Szóke and J. Szejtli (Hungary)</i>	85
Comparative Depolymerization of Xanthan Gum by Ultrasonic and Enzymic Treatments. Rheological and Structural Properties. <i>M. Milas, M. Rinaudo and B. Tinland (France)</i>	95
Effect of Anthraquinones on Endwise Degradation of Hydrocellulose in Relation to Alkaline Pulping. <i>Irving I. Ziderman and Janine Belayche (Israel)</i>	109
The Relationship of the Crystal Structure of Amylose Polymorphs to the Structure of the Starch Granule. <i>D. L. Wild and J. M. V. Blanshard (UK)</i>	121
The Incompatibility of Concentrated Aqueous Solutions of Dextran and Amylose and its Effect on Amylose Gelation. <i>M. T. Kalichevsky, P. D. Orford and S. G. Ring (UK)</i>	145
^{13}C -NMR Investigations of Synthetic Branched Polysaccharides. <i>Kei Matsuzaki, Iwao Yamamoto, Takaya Sato, Koji Enomoto, Tokiji Kawamura and Hidefumi Hirai (Japan)</i>	155

Number 3

Distribution of Methoxyl Groups in Pectins. <i>J. A. de Vries, M. Hansen, J. Søderberg, P.-E. Glahn and J. K. Pedersen (Denmark)</i>	165
Charge-Induced Order-Disorder Transition in an Ionic Polysaccharide Derived from Schizophyllan. <i>Guy Muller (France)</i>	177
Gel Permeation Chromatography and the Mark-Houwink Relation for Pectins with Different Degrees of Esterification. <i>H. Anger and G. Berth (German Democratic Republic)</i>	193
The Alkali-Soluble Galactomannan-Like Oligosaccharides from the Seed of <i>Gleditsia triacanthos</i> . <i>M. N. Mazzini and A. S. Cerezo (Argentina)</i>	203
A Polymer Physico-Chemical Approach to the Study of Commercial Starch Hydrolysis Products (SHPs). <i>Harry Levine and Louise Slade (USA)</i>	213
Summaries of UK Patent Applications.	245

Number 4

Using Carboxymethylated Cassava (<i>Manihot</i>) Wastes as Thickeners for Latex Paint. <i>T. O. Odozi, R. O. Dore, O. Akaranta and A. E. Hart (Nigeria)</i>	249
Gel-Permeation Studies on Xanthan-Galactomannan Interactions. <i>Norman W. H. Cheetham, Barry V. McCleary, Grace Teng, Felicia Lum and Maryanto (Australia)</i>	257
Non-Equilibrium Melting of Amylose-V Complexes. <i>C. G. Biliaderis, C. M. Page and T. J. Maurice (Canada)</i>	269
Hydration Studies of Wheat Starch, Amylopectin, Amylose Gels and Bread by Proton Magnetic Resonance. <i>S. Wynne-Jones and J. M. V. Blanshard (UK)</i>	289
A Soluble Chromogenic Substrate for the Assay of $(1 \rightarrow 3)(1 \rightarrow 4)\text{-}\beta\text{-D-Glucanase}$ (Lichenase). <i>B. V. McCleary (Australia)</i>	307
Book Review	319

Number 5

Concentration Regimes in Xanthan Gum Solutions Deduced from Flow and Viscoelastic Properties. <i>G. Cuvelier and B. Launay (France)</i>	321
Deformation and Fracture of Wheat, Corn and Rice Starch Gels in Lubricated and Bonded Uniaxial Compression. <i>D. D. Christianson, E. M. Casiraghi (Italy) and E. B. Bagley (USA)</i>	335
Substitution Reactions of Galactomannans in Organic Media. <i>A. E. Manzi and A.S. Cerezo (Argentina)</i>	349
Calibration and Application of High-Performance Size Exclusion Columns for Molecular Weight Distribution of Pectins. <i>H. A. Deckers, C. Olieman, F. M. Rombouts and W. Pilnik (The Netherlands)</i>	361

Research into Changes of Pectic Substances in Apricots and Peaches Processed by Osmotic Dehydration. <i>Elisabetta Forni, Danila Torreggiani, P. Battiston and A. Polesello (Italy)</i>	379
---	-----

Research Note

An X-Ray Method to Analyse the Elastic Nature of Fibrous Materials — Azimuthal Scan of Diatropic Powder Diffraction Data for Cellulosic Fibres. <i>A. R.Kalyanaraman (India)</i>	395
Summaries of UK Patent Applications.	403

Number 6

Structure of Curdlan that is Resistant to $(1 \rightarrow 3)\beta$ -D-Glucanase. <i>Fumi Takahashi, Tokuya Harada, Atsuo Koreeda and Akira Harada (Japan)</i>	407
A Comparison Between the Hot and Cold Water Soluble Fractions of Two Locust Bean Gum Samples. <i>S. E. Gaisford, S. E. Harding, J. R. Mitchell and T. D. Bradley (UK)</i>	423
Molecular Weight Characterization of Starch and Modified Starches as Tricarbanilate Derivatives. <i>Richard Helm, Raymond A. Young, Roger McPherson and Robert Klem (USA)</i>	443
On the Effects of Surface Active Agents on the Gelatinization of Starch — a Calorimetric Investigation. <i>A.-C. Eliasson (Sweden)</i>	463
Molecular Weight of Scleroglucan and other Extracellular Microbial Polysaccharides by Size-exclusion Chromatography and Low Angle Laser Light Scattering. <i>D. Lecacheux, Y. Mustiere, R. Panaras and G. Brigand (France)</i>	477
Research Note	
On a Polycarboxylate Derived from Guar. <i>Mariella Dentini and Vittorio Crescenzi (Italy)</i>	493
