

# CARBOHYDRATE POLYMERS

## An International Journal Devoted to Scientific and Technological Aspects of Industrially Important Polysaccharides

*Carbohydrate Polymers* covers the study and exploitation of the industrial applications of carbohydrate polymers in areas such as food, textiles, paper, wood, adhesives, pharmaceuticals, oil field applications and industrial chemistry. Topics include:

- \* studies of structure and properties
- \* biological and industrial development
- \* analytical methods
- \* chemical and microbiological modifications
- \* interactions with other materials

In addition to original research papers the journal publishes review articles and also welcomes contributions to its News and Views section, which reports on academic and industrial development in the field and includes patent and literature surveys.
