BIOPOLYMER MIXTURES

Organisers: S. E. Harding, S. E. Hill and J. R. Mitchell

The 56th meeting in the Easter School Series, organised by the University of Nottingham's Faculty of Agricultural and Food Sciences will be on the topic of Biopolymer Mixtures. It will be held over the period of 19–21 September 1994.

Subjects to be addressed will include:

- Biopolymer Interactions in Dilute Solutions
- Thermodynamics of Polymer Phase Separation
- Glassy State Behaviour of Biopolymer Mixtures
- Chemical Interactions Between Biopolymers
- Hydration of Biopolymer Mixtures at Low Water Content
- Mixed Biopolymers at Interfaces
- Mixed Gels
- Biopolymer Diffusion in Polymer Gels
- Rheology of Biopolymer Composites

The school will consist of invited presentations, poster presentations and discussion sessions.
