

# Errata

A.P. Gunning, T.J. McMaster & V.J. Morris (1993). Scanning tunnelling microscopy of xanthan gum. *Carbohydrate Polymers*, **21**, 47–51.

The following amendments should be made to this paper:

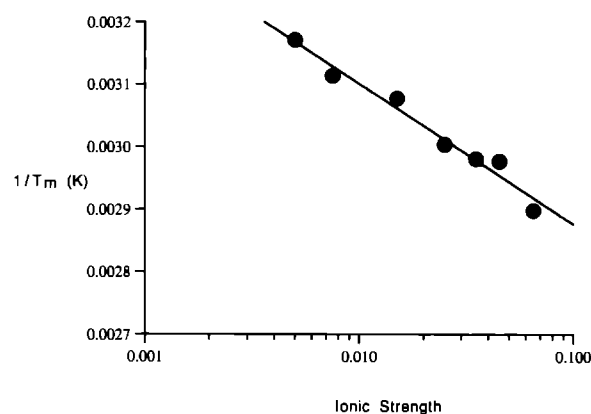

The first reference to Fig. 1 in the third paragraph of the introduction should be deleted.

The labels in Fig. 1 should be changed such that 1(c) and (d) become 1(e) and (f) and 1(e) and (f) become 1(c) and (d).

The reference to Fig. 1(c) on page 50 should now be to Fig. 1(e).

D.F. Zhan, M.J. Ridout, G.J. Brownsey & V.J. Morris (1993). Xanthan–locust bean gum interactions and gelation. *Carbohydrate Polymers*, **21**, 53–58.

Figure 2 in this paper was incorrect and should be as below:

**Fig. 2.** Dependence of the order–disorder transition temperature ( $T_m$ ) of xanthan on the level of added NaCl.

The corresponding text (pp. 55–56) should read:

This was achieved in practice by using added salt concentrations of 0, 0.02 and 0.4 M NaCl, for which  $T_g$  is constant (46–50°C), and  $T_m = 45$ , 60 and 115°C (estimated from Fig. 2), respectively.
