

CARBOHYDRATE RESEARCH, VOL. 78 (1980)

SUBJECT INDEX

- Acetyl-CoA: 2-amino-2-deoxy- α -D-glucoside *N*-acetyltransferase, a ^3H -labelled trisaccharide from heparin as substrate for, 249
- Acid-catalyzed monoacetalation of two 3-deoxyhexitols, 243
- Acid-catalysed solvolysis of glycofuranosides, the effect of complexing with calcium ion on the, 53
- 2-*O*-Acyl-1-*O*-sulfonyl-D-galactopyranose derivatives, use in the synthesis of β -D-galactopyranosides of, 267
- Advances, in carbohydrate chemistry and biochemistry (*book review*), C26
- Aldonolactones, β -elimination in, 61
- Alkyl β -D-xylopyranosides, binding to β -D-xylosidase from *Bacillus pumilus* PRL12 of, 317
- Allylic aminations and alkylations, palladium-catalyzed, of an unsaturated sugar acetate, C11
- Amylopectin, effect of cyclodextrin glycosyltransferase on, 147
- Amylose, effect of cyclodextrin glycosyltransferase on, 147
- 2,5-Anhydro-1-deoxy-1-(6-aminopurin-9-yl)- and -1-(pyrimidin-1-yl)-D-mannitols, synthesis of, 195
- Anhydro linkage, the formation in sucrose of a 2,1', C21
- Binding of *n*-alkyl β -D-xylopyranosides and 1-thio- β -D-xylopyranosides to β -D-xylosidase from *Bacillus pumilus* PRL B12, 163
- Binding of alkyl β -D-xylopyranosides, containing branched-chain, cyclic, and substituted aglycon groups, to β -D-xylosidase from *Bacillus pumilus* PRL B12, 317
- Bromine oxidation of 1,2-*O*-isopropylidene- α -D-glucofuranose and sucrose, 257
- Carbon-chain extension through C-1 of 2-deoxyaldose dithioacetal derivatives, a route to 1,3-dideoxy-2-ketoses *via*, 295
- Cellulose impregnated with tungstate, the rapid resolution of mixtures of carbohydrates by t.l.c. on, 365
- Chains having a diamond-like backbone, helical parameters of infinite polymer, 89
- Chalcone, oxidation of 1,2-*O*-isopropylidene- α -D-glucofuranose derivatives with, 25
- Chemistry of the *O*-glycosidic bond: formation and cleavage (*book review*)
- Chlorosulphonyloxy group at C-2 in sucrose and methyl α -D-glucopyranoside derivatives, the first replacement by chlorine of a, 173
- Complexing of glycofuranosides with calcium ion, and its effect on their acid-catalysed solvolysis, 53
- Configuration of the acetal carbon atom of pyruvic acid acetals in some bacterial polysaccharides, 127
- Conformations of β -gentiobiose by empirical force-field calculations, 215
- Cyclodextrin glycosyltransferase (cyclizing) of *Klebsiella pneumoniae*, 133, 147
- Deamination of 2-amino-2-deoxyhexitols and of their per-*O*-methylated derivatives with nitrous acid, 275
- 2-Deoxyaldoses, carbon-chain extension through C-1 of dithioacetal derivatives of, 295
- Deoxy-D-*arabino*-hexose, synthesis of 2-deoxy-D-*lyxo*-hexose and 2-, 61
- Deoxyhexitols, acid-catalysed monoacetalation of two 3-, 243
- Deoxy-D-*lyxo*-hexose and 2-deoxy-D-*arabino*-hexose, synthesis of 2-, 61
- Dicarbonyl compounds, the reaction of 2-amino-2-deoxyheptoses with cyclic β -, 17
- Dideoxysucrose, synthesis of 6,6'-dihalo and 6,6'-diamino derivatives of 6,6'-, 185
- 1,3-Diphenyl-2-propen-1-one, oxidation of 1,2-*O*-isopropylidene- α -D-glucofuranose derivatives with, 25
- Dithian-2-yluracil nucleosides and their conversion into nucleoside derivatives, synthesis of 2- (and 6-), 33
- Elimination in aldonolactones, β -, 61
- First replacement of a chlorosulphonyloxy group by chlorine at C-2 in methyl α -D-glucopyranoside and sucrose derivatives, 173
- Force-field calculations, conformations of β -gentiobiose by empirical, 215
- Formation of a 2,1'-anhydro linkage in sucrose, C21

- D-Fructose, in aqueous solution, laser-Raman spectra of, 225
- Fusion-reaction, acid-catalyzed, with indazole, a systematic study of the influence of the nature and stereochemistry of D-aldopentofuranoses, and the effect of the substituent at C-2, in the, 285
- β -D-Galactopyranosides, synthesis of, use of 2-O-acyl-1-O-sulfonyl-D-galactose derivatives in, 267
- D-Galactose, 6-amino-6-deoxy-, 6-¹⁵N, the synthesis and n.m.r. spectroscopy of, 1
- Gangliosides, mono- and di-sialo-, biosynthesis from gangliotetraosylceramide of, 327
- Gangliotetraosylceramide, biosynthesis of gangliosides from, 327
- General synthesis of model glycoproteins: coupling of alkenyl glycosides to proteins, using reductive ozonolysis followed by reductive amination with sodium cyanoborohydride, C1
- Gentiobiose, conformations of β -, by empirical force-field calculations, 215
- α -D-Glucofuranose, 1,2-O-isopropylidene, oxidation with chalcone of derivatives of, 25
- Glycofuranosides, the effect of complexing with calcium ion on the acid-catalysed solvolysis of, 53
- (1 \rightarrow 4)- α -D-Glucopyranosyl chains, effect of cyclodextrin glycosyltransferase on, 133
- Glycoprotein, lubricating, of bovine synovial fluid, structure of, 79
- Glycoproteins, model, a general synthesis of, C1
- Glycosides, alkenyl, coupling of, to proteins, using reductive ozonolysis followed by reductive amination with sodium cyanoborohydride, C1
- Glycosyltransferase, cyclodextrin, cyclizing, of *Klebsiella pneumoniae* M 5 al, 133
- Glycosyltransferase, cyclodextrin, cyclizing, of *Klebsiella pneumoniae* M 5 al (1 \rightarrow 4)- α -D-glucopyranosyl chains, effect of cyclodextrin glycosyltransferase on, 147
- Gulopyranosiduronic acids, synthesis of methyl α - and β -D-, 368
- Helical parameters of infinite polymer chains having a diamond-like backbone, application to homopolysaccharides and cyclic oligosaccharides of, 89
- Heparin, a ³H-labelled trisaccharide from, as substrate for acetyl-CoA: 2-amino-2-deoxy- α -D-glucoside N-acetyltransferase, 249
- Heptoses, 2-amino-2-deoxy-, the reaction of β -dicarbonyl compounds with, 17
- Hexitols, 2-amino-2-deoxy-, and their per-O-methylated derivatives, deamination of, with nitrous acid, 275
- Hexose, 2-deoxy-D-arabino-, ("2-deoxy-D-glucose"), oxidation of, by alkaline hydrogen peroxide, C7
- Human T-lymphocytes, sialoglycoprotein of, 341
- 2-Ketoses, 1,3-dideoxy-, a route to, 295
- Klebsiella pneumoniae* M 5 al, cyclodextrin glycosyltransferase (cyclizing) of, 133, 147
- Laser-Raman spectra of D-fructose in aqueous solution, 225
- Lectin-like activity from *Persea americana*, 349
- Lipopolysaccharide from *Yersina enterocolitica* Yc 128, structural studies of the O-specific side-chains of the, 212
- Lipopolysaccharide, structural studies of the O-specific side-chains of the *Shigella sonnei* phase 1, 119
- T-Lymphocytes, human, sialoglycoprotein of, 341
- D-Mannitol, 2,5-anhydro-1-deoxy-1-(6-amino-pyrimidin-9-yl)- and -1-(pyrimidin-1-yl)-, synthesis of, 195
- Methyl α - and β -D-gulopyranosiduronic acids, synthesis of, 368
- Methylation with methyl trifluoromethanesulfonate in trimethyl phosphate, 372
- Monoacetalation of two 3-deoxyhexitols, acid-catalysed, 243
- Neuraminic acid, a new approach to the synthesis of α -ketosides of 5-N-acetyl-D-, 190
- New approach to the synthesis of α -ketosides of 5-N-acetyl-D-neuraminic acid, 190
- Nucleosides and their conversion into nucleoside derivatives, synthesis of 2- (and 6-)dithian-2-yluracil, 33
- Nucleoside synthesis: a systematic study of the influence of the nature and stereochemistry of D-aldopentofuranoses, and the effect of the substituent at C-2, in the acid-catalyzed fusion-reaction with indazole, 285
- Nucleosides, synthesis of homoanalogues of α -D-arabinofuranosyl-, 195
- Oligosaccharide chains of LGP-I, structure of, 79
- Osazones, 3,6-anhydro-, of higher monosaccharides, characterization and anomeric configuration, C15
- Oxidation of 2-deoxy-D-arabino-hexose ("2-deoxy-D-glucose") by alkaline hydrogen peroxide, C7
- Oxidation of 1,2-O-isopropylidene- α -D-glucofuranose and sucrose with bromine, 257

- Palladium-catalyzed allylic aminations and alkylations of an unsaturated sugar acetate, C11
- Pentofuranoses, 5-(aminoacyl)amino-, unsaturated, synthesis and antitumor activity of cytosine and adenine nucleosides of, 67
- Persea americana*, lectin-like activity from, 349
- Polyethers, synthesis of some, and their interaction with sodium and potassium cations, 205
- Polymer chains having a diamond-like backbone, application to homopolysaccharides and cyclic oligosaccharides of the helical parameters of infinite, 89
- Polysaccharide, capsular, of *Klebsiella* serotype K44, structural investigation of the, 305
- Polysaccharide from *Streptococcus pneumoniae* type 1, structural studies of the capsular, 111
- Polysaccharides, the configuration of the acetal carbon atom of pyruvic acid acetals in some bacterial, 127
- Progress in industrial microbiology (*book review*), C25
- Pyridine nucleosides, stereospecific synthesis of a novel series of, 235
- Pyruvic acid acetals in some bacterial polysaccharides, the configuration of the acetal carbon atom of, 127
- Reaction of 2-amino-2-deoxyheptoses with cyclic β -dicarbonyl compounds, 17
- Shigella sonnei* phase I lipopolysaccharide, structural studies of the O-specific side-chains of the, 119
- Sialogangliosides, mono- and di-, biosynthesis from gangliotetraosylceramide of, 327
- Sialoglycoprotein of human T-lymphocytes, 341
- Sodium and potassium cations, synthesis of some polyethers from carbohydrate derivatives and their interaction with, 205
- Starch, effect of cyclodextrin glycosyltransferase on, 147
- Stereospecific synthesis of a novel series of pyridine nucleosides, 235
- Streptococcus pneumoniae* type 1, structural studies of the capsular polysaccharide from, 111
- Structural investigation of the capsular polysaccharide of *Klebsiella* serotype K44, 305
- Structural studies of the capsular polysaccharide from *Streptococcus pneumoniae* type 1, 111
- Structural studies of the O-specific side-chains of the lipopolysaccharide from *Yersinia enterocolitica* Yc 128, 212
- Structural studies of the O-specific side-chains of the *Shigella sonnei* phase I lipopolysaccharide, 119
- Studies on 3,6-anhydro-osazones of higher monosaccharides: characterization and anomeric configuration, C15
- Sucrose and 1,2-O-isopropylidene- α -D-glucofuranose, bromine oxidation of, 257
- Sucrose and methyl α -D-glucopyranoside derivatives, the first replacement of a chlorosulphonyloxy group by chlorine at C-2 in, 173
- Sucrose, synthesis of 6,6'-dideoxy-6,6'-dihalosucroses and 6,6'-diamino-6,6'-dideoxy-, 185
- Sucrose, the formation of a 2,1'-anhydro linkage in, C21
- Sugars, protected or unprotected, synthesis of conjugates with luminescent probes, C4
- 1-O-Sulfonyl-D-galactose derivatives, 2-O-acyl-, use in the synthesis of β -D-galactopyranosides of, 267
- Synovial fluid, bovine, structure of glycoproteins of, 79
- Synthesis and antitumor activity of cytosine and adenine nucleosides of unsaturated 5-(aminoacyl)aminopentofuranoses, 67
- Synthesis and n.m.r. spectroscopy of derivatives of 6-amino-6-deoxy-D-galactose-6-¹⁵N, 1
- Synthesis of 2- (and 6-)dithian-2-yluracil nucleosides and their conversion into nucleoside derivatives, 33
- Synthesis of a novel series of pyridine nucleosides, stereospecific, 235
- Synthesis of 6,6'-dideoxy-6,6'-dihalosucroses and conversion of 6,6'-dichloro-6,6'-dideoxy-sucrose hexa-acetate into 6,6'-diamino-6,6'-dideoxysucrose, 185
- Synthesis of α -ketosides of 5-N-acetyl-D-neuraminic acid, a new approach to the, 190
- Synthesis of luminescent probe-sugar conjugates of either protected or unprotected sugars, C4
- Synthesis of methyl α - and β -D-gulopyranosiduronic acids, 368
- Synthesis of some polyethers from carbohydrate derivatives and related compounds, and their interaction with sodium and potassium cations, 205
- T.l.c. on cellulose impregnated with tungstate, the rapid resolution of mixtures of carbohydrates by, 365
- Trifluoromethanesulfonate, methyl, as agent of methylation, 372
- Trimethyl phosphate, as solvent for methylation, 372
- Trisaccharide from heparin, a ³H-labelled, as substrate for acetyl-CoA: 2-amino-2-deoxy- α -D-glucoside N-acetyltransferase, 249
- Tungstate, the rapid resolution of mixtures of carbohydrates by t.l.c. on cellulose impregnated with, 365

Xylopyranosides, binding to β -D-xylosidase from *Bacillus pumilus* PRL B12 of *n*-alkyl β -D-xylopyranosides and 1-thio- β -D-, 163

Xylosidase from *Bacillus pumilus* PRL B12, binding of *n*-alkyl β -D-xylopyranosides and 1-thio- β -D-xylopyranosides to β -D-, 163

Xylosidase from *Bacillus pumilus* PRL B12, binding of alkyl β -D-xylopyranosides to β -D-, 317

Yersinia enterocolitica Yc 128, structural studies of the O-specific chains of the lipopolysaccharide from, 212
