

CARBOHYDRATE RESEARCH, VOL. 120 (1983)

SUBJECT INDEX

- (1 \rightarrow 3)-2-Acetamido-2-deoxy- β -D-glucopyranosyltransferase to β -D-galactopyranosyl-(1 \rightarrow 4)-saccharide in human serum, 251
- N-Acetylglucosaminyltransferase in human serum, 251
- N-Acetyl-D-glucosaminyltransferases, separation by liquid chromatography of substrates and products of four, 3
- Antibodies, mouse hybridoma, against human milk fat globules, 293
- Antibody recognition of α -sialosyl and α -L-fucosyl groups in double-branched structure, 143
- BHK cell-line, ricin-resistant, hybrid, sialylated N-glycans from, 215
- Biosynthesis of a D-glucosyl polyisoprenyl diphosphate in particulate preparations of *Micrococcus lysodeikticus*, 159
- Blood-group I activity of poly(glycosyl)-ceramides, 113
- Blood-group M and N glycopeptides, reactivity with lectins of glycosidase-treated, 315
- Blood-group-specific glycoprotein, distribution of carbohydrate chains on the peptide core of, 85
- Capsular polysaccharide from *E. coli* O6:K14:H31, structure of, 131
- Carbohydrate moiety of glycoproteins, synthesis of a nona- and an undeca-saccharide that form part of the complex type of, 17
- Ceramides, polyglycosyl, structure and blood-group I activity of, 113
- Cytotoxic T cells, mouse, fractionation by lectins of, 269
- 3-Deoxy-D-manno-octulosonic acid (KDO)-containing polysaccharide from *E. coli* O6:K14:H31, structure of, 131
- 6,6-Di-C-methyl- β -D-galactopyranoside, methyl, synthesis and conformational properties of, 43
- Erythrocytes, human, senescent, glycopeptide from, 55
- Escherichia coli*, carbohydrate specificity of the surface lectin of, 235
- Escherichia coli*, structure of capsular polysaccharide K14 from, 131
- F.a.b., negative-ion mass spectrometry of mycobacterial polysaccharide and lipopolysaccharides, 95
- α -L-Fucopyranosyl-(1 \rightarrow 3)-2-acetamido-2-deoxy-D-glucose structure, characterization in the neutral glycopeptides from human neuroblastoma cells of, 197
- α -L-Fucosyl groups, recognition by antibody in double-branched, structure of, 143
- β -D-Galactopyranoside, methyl 6,6-di-C-methyl-, synthesis and conformational properties of, 43
- D-Galactosyl-binding proteins, synthesis of probes for, 43
- β -D-Galp-(1 \rightarrow 4)- β -D-GlcpNAc-(1 \rightarrow 6), recognition by mouse hybridoma antibodies of the structure, 293
- D-Glucan, water-insoluble, streptococcal structure of, 77
- D-Glucosyl polyisoprenyl diphosphate in particulate preparations of *Micrococcus lysodeikticus*, biosynthesis of a, 159
- N-Glycans, hybrid, sialylated, from ricin-resistant BHK cell-line, 215
- Glycolipid having double-branched structure terminating with α -sialosyl and α -L-fucosyl groups, recognition by antibody of, 143
- Glycopeptide from human senescent erythrocytes, 55
- Glycopeptides, blood-group M and N, glycosidase-treated, reactivity with lectins of, 315
- Glycopeptides, high-mannose type, binding to pokeweed Pa-2 lectin of, 283
- Glycopeptides, neutral, from human neuroblastoma cells, characterization of, 197
- Glycoproteins, mucus-type, lipids from rat small intestine associated with, 67
- Glycoproteins, specific method for the fragmentation of the polypeptide chain of, 85
- Human serum, N-acetylglucosaminyltransferase in, 251
- Klebsiella pneumoniae*, carbohydrate specificity of the surface lectin of, 235
- Lactosamine, N-acetyl-, poly-, interaction of pokeweed mitogen with carbohydrate chains, 187

- Lectin of pokeweed, Pa-2, binding of high-mannose-type glycopeptides to, 283
- Lectins, fractionation of mouse cytotoxic T cells by, 269
- Lectins, reactivity of blood-group M and N, glycosidase-treated peptides with, 315
- Lectins, surface, of *E. Coli*, *K. pneumoniae*, and *S. typhimurium*, carbohydrate specificity of, 235
- Lipids associated with rat small-intestinal mucus glycoproteins, 67
- Lipopolysaccharide of *S. flexneri*, synthesis of branched β -L-rhamnose-containing oligosaccharides from the, 25
- Lipopolysaccharides from piocin 103-sensitive and -resistant *Neisseria gonorrhoeae*, 171
- Lymphoma cell-lines, immunosensitive and immunoresistant, moloney virus-induced, studies on the possible chemical, immunochemical and morphological differences at the cell surfaces of, 303
- Mass spectrometry, fast negative-ion, of mycobacterial polysaccharide and lipopolysaccharides, 95
- O-Methyl-D-glucose polysaccharide and lipopolysaccharides, mycobacterial fast mass spectrometry of, 95
- Micrococcus lysodeikticus*, biosynthesis of a D-glucosyl polyisoprenyl diphosphate in particulate preparations of, 159
- Mouse hybridoma antibodies, recognition of the structure β -D-Galp-(1 \rightarrow 4)- β -D-GlcNAc-(1 \rightarrow 6) by, 293
- Mucus glycoproteins, rat small intestine, lipids associated with, 67
- Neisseria gonorrhoeae*, lipopolysaccharides from piocin 103-sensitive and -resistant, 171
- Neuroblastoma cells, human, characterization of neutral glycopeptides from, 197
- Oligosaccharide glycosides, separation by liquid chromatography of, 3
- Oligosaccharides that form part of the complex type of carbohydrate moiety of glycoproteins, synthesis of, 17
- Piocin 103-sensitive and -resistant *Neisseria gonorrhoeae*, lipopolysaccharides from, 171
- Pokeweed mitogen, interaction of poly(N-acetyl-lactosamine)-type carbohydrate chains with, 187
- Pokeweed Pa-2 lectin, immobilized, binding of high-mannose type glycopeptides to, 283
- Poly(N-acetyl-lactosamine)-type carbohydrate chains, interaction of pokeweed mitogen with, 187
- Poly(glycosyl)ceramides, structure and blood group I activity, 113
- Polypeptide chain of glycoproteins, specific method for the fragmentation of, 85
- β -L-Rhamnose, branched-oligosaccharides from the lipopolysaccharide of *S. flexneri*, synthesis of, 25
- Ricin-resistant BHK cell-line, hybrid, sialylated N-glycans from, 215
- Salmonella typhimurium*, carbohydrate specificity of the surface lectin of, 235
- Senescent erythrocytes, human, glycopeptide from, 55
- Shigella flexneri*, synthesis of branched β -L-rhamnose-containing oligosaccharides from the lipopolysaccharide of, 25
- α -Sialosyl groups, recognition by antibody in double-branched, structure of, 143
- Streptococcal, water-insoluble D-glucan, structure of, 77
- Studies on the possible chemical, immunochemical and morphological differences at the cell surfaces of immunosensitive and immunoresistant, moloney virus induced, lymphoma cell-lines, 303
- Synthesis of a nona- and an undeca-saccharide that form part of the complex type of carbohydrate moiety of glycoproteins, 17
- T Cells of mouse, cytotoxic fraction by lectins of, 269
- Transferases, N-acetyl-D-glucosaminyl-, involved in mucin synthesis, separation of substrates and products of, 3
- Water-insoluble D-glucan, streptococcal structure of, 77
