

## CARBOHYDRATE RESEARCH, VOL. 133 (1984)

## SUBJECT INDEX

- 2-Acetamido-2-deoxy-D-galacturonamide and 2-deoxy-2-formamido-D-galacturonic acid identification of, as new constituents of *Pseudomonas aeruginosa* lipopolysaccharides, c12
- 2-Acetamido-2-deoxy- $\beta$ -D-glucopyranosyl residues, synthesis of glycopeptides containing, 207
- Aldos-2-uloses, rearrangement of, to aldonic acids, effect of calcium ion on, 329
- Aldosylamines, acylated, influence of benzoylation on the mass spectra of, 199
- 2-Amino-2-deoxy-D-mannose and 2-amino-2-deoxy-D-mannuronic acid,  $\beta$ -linked, synthesis of oligosaccharides containing, c1
- Antigenic determinant of *Salmonella* serogroup B. Synthesis of a trisaccharide glycoside for use as an artificial antigen, 333
- Antigenicity and extractability of its lipopolysaccharide, the effect of formalin-killing of *Pasteurella multocida* on the, 83
- Application of p.m.r. spectroscopy in the sequencing of oligosaccharides containing 1-carboxyethylidene substituents, 125
- Arabinogalactan-protein, from the gum exudate of *Acacia robusta*, structural studies of an, 105
- D-arabino-Ascorbic acid, dehydro-, some quinoxaline derivatives from, 324
- Carbohydrate-protein linkage region of chondroitin 4-sulphate, isolation of oligosaccharides from the, using trifluoroacetolysis, 75
- Carbohydrates, separation of, by l.c. in an aqueous silica gel column, 157
- Carbohydrates, some cyclic ethers as model compounds for, far-u.v. circular-dichroism spectra of, at 145–220 nm, 152
- Cellobiose and maltose in solution, a comparison of calculated and experimental data for the conformational states of, 1
- $^{13}\text{C}$  Chemical shift dependence on the spatial interaction of protons and its application in structural and conformational studies of oligo- and poly-saccharides, 173
- Chondroitin 4-sulphate, isolation of oligosaccharides from the carbohydrate-protein linkage region by trifluoroacetolysis of, 75
- $\alpha$ -Chymotrypsin-sensitive polymer, enzymic synthesis of oligosaccharides on, 339
- Conformational and dynamic differences between *N. meningitidis* serogroup B and C polysaccharides, using n.m.r. spectroscopy and molecular mechanics calculations, 59
- Conformational states of cellobiose and maltose in solution: a comparison of calculated and experimental data, 1
- Convenient synthesis of 6'-C-substituted  $\beta$ -maltose heptaacetates and of panose, a, 135
- Cord-factor analogs: synthesis of 6,6'-di-O-mycoloyl- and -corynomycoloyl-( $\alpha$ -D-galactopyranosyl  $\alpha$ -D-galactopyranoside), 53
- Cyclic polysaccharide, structural identification of the enterobacterial common-antigen as a, 95
- Degradation of chondroitin 4-sulphate by trifluoroacetolysis: isolation of oligosaccharides from the carbohydrate-protein linkage region, 75
- 4-Deoxy-4-fluoro-D-[6- $^3\text{H}$ ]glucose, synthesis of, 168
- Dependence of  $^{13}\text{C}$  chemical shifts on the spatial interaction of protons, and its application in structural and conformational studies of oligo- and poly-saccharides, 173
- Effect of calcium ion on rearrangement of aldoses-2-uloses to aldonic acids, 329
- Effect of formalin-killing of *Pasteurella multocida* on the antigenicity and extractability of its lipopolysaccharide, the, 83
- Endo-(1 $\rightarrow$ 4)- $\beta$ -D-glucanases from *Sclerotium rolfsii*, purification, substrate specificity, and mode of action, 297
- Enterobacterial common-antigen, assignment of a cyclic polysaccharide structure to the, 95
- Erythritol, 3-C-(hydroxymethyl)- and 3-C-methyl-, synthesis of, 235
- Far-u.v. circular-dichroism spectra, at 145–220 nm, of some cyclic ethers as model compounds for carbohydrates, 152
- 4-Fluoro-D-[6- $^3\text{H}$ ]glucose, 4-deoxy-, synthesis of, 168

- Fourier-transform infrared, vibrational circular dichroism of sugars. A spectra-structure correlation, 163
- D-Fructose in solution, the vibrational spectrum and structure of, 313
- Furanoid rings, influence of the orientation of hydroxyl groups on the puckering modes of, 187
- $\alpha$ -D-Galactopyranoside,  $\alpha$ -D-galactopyranosyl, 6,6'-di-*O*-corynomycoloyl-, synthesis of, 53
- $\alpha$ -D-Galactopyranoside,  $\alpha$ -D-galactopyranosyl, 6,6'-di-*O*-mycoloyl-, synthesis of, 53
- $\beta$ -D-Glucanases, endo-, from *Sclerotium rolfssii*, purification, substrate specificity, and mode of action of, 297
- D-Glucitol, 2,3,4,6-tetra-*O*-acetyl-1,5-anhydro-5-deoxy-5-*C*-[(*R*)-ethylphosphinyl]-, formation of, 45
- $\alpha$ , $\beta$ -D-Glucopyranoses, 1,2,3,4,6-penta-*O*-acetyl-5-deoxy-5-*C*-[(*R*,*S*)-ethylphosphinyl]-, an improved synthesis of, 45
- $\beta$ -D-Glucopyranoside, methyl 4,6-*O*-benzylidene-, regioselective alkylation, benzylation, and *p*-toluenesulfonylation of, 147
- 4-*O*- $\beta$ -D-Glucopyranosyl- $\beta$ -D-glucopyranosyl residue, synthesis of glycopeptides containing, 207
- 4-*O*-(4- $\alpha$ -D-Glucopyranosyloxy-4-methoxybutyl)- $\alpha$ -D-glucopyranoside, synthesis of methyl, as a modified oligosaccharide for studying the interactions of carbohydrates with multisite proteins, 247
- $\beta$ -D-Glucopyranosyl residues, synthesis of glycopeptides containing, 207
- O*-( $\beta$ -D-Glucopyranosyl 3-sulfate)-(1 $\rightarrow$ 6)-*O*- $\alpha$ -D-mannopyranosyl-(1 $\rightarrow$ 2)-*O*- $\alpha$ -D-glucopyranosyl-(1 $\rightarrow$ 1)-2,3-di-*O*-phytanyl-*sn*-glycerol, synthesis of, 219
- D-Glucose, aqueous solutions of, viscosities of concentrated solutions of sodium and potassium acetates in, 15
- D-[6-<sup>3</sup>H]Glucose, 4-deoxy-4-fluoro-, synthesis of, 168
- Glycolipids and a glycolipid sulfate, synthesis of two purple-membrane, 219
- Glycopeptides containing 2-acetamido-2-deoxy- $\beta$ -D-glucopyranosyl,  $\beta$ -D-glucopyranosyl, and 4-*O*- $\beta$ -D-glucopyranosyl-D-glucopyranosyl residues, synthesis of, 207
- Glycosides, anomeric, acetylated, infrared-spectral characteristics of some, 25
- Hexopyranosides, 2,3- and 3,4-anhydro-, having a methyl branch on the oxirane ring, synthesis of, and reactions with some methylcuprate reagents, 255
- 3-*C*-(Hydroxymethyl)erythritol, synthesis of, 235
- Improved synthesis of 1,2,3,4,6-penta-*O*-acetyl-5-deoxy-5-*C*-[(*R*,*S*)-ethylphosphinyl]- $\alpha$ , $\beta$ -D-glucopyranoses, and formation of 2,3,4,6-tetra-*O*-acetyl-1,5-anhydro-5-deoxy-5-*C*-[(*R*)-ethylphosphinyl]-D-glucitol, an, 45
- Influence of benzylation on the mass spectra of acylated aldostylamines, 199
- Influence of the orientation of hydroxyl groups on the puckering modes of furanoid rings, 187
- Infrared-spectral characteristics of some acetylated, anomeric glycosides, 25
- muco*-Inositol, 3-(adenin-9-yl)-3-deoxy-1,5,6-tri-*O*-(methylsulfonyl)-, synthesis of, 33
- Inositols, nucleoside-, 33
- Kinetics and mechanism of oxidation of maltose and lactose by TI(III) in acidic media, 319
- Lipopolysaccharide from an avirulent strain (M4S) of *Pseudomonas solanacearum*, structural studies of the O-antigen of the, 289
- Lipopolysaccharides of *Pseudomonas aeruginosa* and *Shigella boydii*, sialic acids of a new type from the, c5
- Liquid chromatography in an aqueous silica gel column, for separation of carbohydrates, 157
- Lycotetraose, synthesis of, 275
- Maltose and cellobiose in solution, a comparison of calculated and experimental data for the conformational states of, 1
- Maltose and lactose, the kinetics and mechanism of oxidation of, by TI(III) in acidic media, 319
- $\beta$ -Maltose, 6'-*C*-substituted, heptaacetates, a convenient synthesis of, 135
- D-Mannose, 2-amino-2-deoxy-,  $\beta$ -linked, synthesis of oligosaccharides containing, c1
- D-Mannuronic acid, 2-amino-2-deoxy-,  $\beta$ -linked, synthesis of oligosaccharides containing, c1
- 3-*C*-Methylerythritol, synthesis of, 235
- Methyl 4-*O*-(4- $\alpha$ -D-glucopyranosyloxy-4-methoxybutyl)- $\alpha$ -D-glucopyranoside, a modified oligosaccharide for studying the interactions of carbohydrates with multisite proteins, 247
- N. meningitidis* serogroup B and C polysaccharides, conformational and dynamic differences between, using n.m.r. spectroscopy and molecular mechanics calculations, 59
- Non-destructive determination of the monosaccharide composition and the structure of the O-specific polysaccharide of *Pseudomonas cepacia*, c9
- Nucleocyclitols. Synthesis of 3-(adenin-9-yl)-3-deoxy-1,5,6-tri-*O*-(methylsulfonyl)-*muco*-inositol, 33

- Oligosaccharide for studying the interactions of carbohydrates with multisite proteins, synthesis of a modified, 247
- Oligosaccharides, containing (1-carboxyethylidene) substituents, application of p.m.r. spectroscopy in the sequencing of, 125
- Oligosaccharides, enzymic synthesis on  $\alpha$ -chymotrypsin-sensitive polymer of, 339
- Orientation of hydroxyl groups, influence of the, on the puckering modes of furanoid rings, 187
- Oxidation of maltose and lactose by Tl(III) in acidic media, the kinetics and mechanism of, 319
- Panose, a convenient synthesis of, 135
- Pasteurella multocida* on the antigenicity and extractability of its lipopolysaccharide, the effect of formalin-killing of, 83
- Polymer,  $\alpha$ -chymotrypsin-sensitive, enzymic synthesis of oligosaccharides on, 339
- Polysaccharide of *Pseudomonas cepacia*, non-destructive determination of the monosaccharide composition and structure of the O-specific, c9
- Polysaccharides, conformational and dynamic differences between *N. meningitidis* serogroup B and C, using n.m.r. spectroscopy and molecular mechanics calculations, 59
- Polysaccharide, structural identification of the enterobacterial common-antigen as a cyclic, 95
- Pseudomonas aeruginosa* and *Shigella boydii*, sialic acids of a new type from the lipopolysaccharides of, c5
- Pseudomonas aeruginosa* immunotype 1 antigen, identification of the new sugars 2-acetamido-2-deoxy-D-galacturonamide and 2-deoxy-2-formamido-D-galacturonic acid as constituents of the, c12
- Pseudomonas cepacia*, non-destructive determination of the monosaccharide composition and structure of the O-specific polysaccharide of, c9
- Pseudomonas solanacearum*, structural studies of the O-antigen of the lipopolysaccharide from an avirulent strain (M4S) of, 289
- Regioselective alkylation, benzylation, and *p*-toluenesulfonylation of methyl 4,6-*O*-benzylidene- $\beta$ -D-glucopyranoside, 147
- Salmonella*, serogroup B, antigenic determinant of, 333
- Sclerotium rolsfii*, purification, substrate specificity, and mode of action of endo-(1 $\rightarrow$ 4)- $\beta$ -D-glucanases from, 297
- Separation of carbohydrates by l.c. in an aqueous, silica gel column, 157
- Sialic acids of a new type from the lipopolysaccharides of *Pseudomonas aeruginosa* and *Shigella boydii*, c5
- Some quinoxaline derivatives from dehydro-D-arabino-ascorbic acid, 324
- Structural and conformational studies of oligo- and poly-saccharides, dependence of  $^{13}\text{C}$  chemical shifts on the spatial interaction of protons and its application in, 173
- Structural studies of an arabinogalactan-protein from the gum exudate of *Acacia robusta*, 105
- Structural studies of the O-antigen of the lipopolysaccharide from an avirulent strain (M4S) of *Pseudomonas solanacearum*, 289
- Structural studies of the *Pseudomonas aeruginosa* immunotype 1 antigen, containing the new sugar constituents 2-acetamido-2-deoxy-D-galacturonamide and 2-deoxy-2-formamido-D-galacturonic acid, c12
- Structure of D-fructose in solution, the vibrational spectrum and, 313
- Sugars, Fourier-transform infrared vibrational circular dichroism of, a structure-spectra correlation, 163
- Synthesis of 2,3-anhydro- and 3,4-anhydrohexopyranosides having a methyl branch on the oxirane ring, and their reactions with some lithium methylcuprate reagents, 255
- Synthesis of lycotetraose, 275
- Synthesis of two purple-membrane glycolipids and *O*-( $\beta$ -D-glucopyranosyl 3-sulfate)-(1 $\rightarrow$ 6)-*O*- $\alpha$ -D-mannopyranosyl-(1 $\rightarrow$ 2)-*O*- $\alpha$ -D-glucopyranosyl-(1 $\rightarrow$ 1)-2,3-di-*O*-phytanil-*sn*-glycerol, 219
- Trisaccharide, glycoside of, synthesis of a, for use as an artificial antigen, 333
- Vibrational spectrum and structure of D-fructose in solution, 313
- Viscosities of concentrated solutions of sodium and potassium acetates in aqueous solutions of D-glucose, 15
