

CARBOHYDRATE RESEARCH, VOL. 137 (1985)

SUBJECT INDEX

- N*-Acetylneuraminic acid-containing disaccharide, synthesis of, 63
- Amino sugar-containing oligo- and poly-saccharides, a method for monitoring elution profiles during the chromatography of, 239
- Analysis of linkage positions in D-glucopyranosyl residues by the reductive-cleavage method, 183
- 2,5-Anhydro-6-*O*-benzyl-3,4-*O*-isopropylidene-D-*altro*-hexitol, electrophile-mediated cyclizations of 6-*O*-benzyl-1,2-dideoxy-3,4-*O*-isopropylidene-D-*ribo*-hex-1-enitol to derivatives of, 89
- Antigen from *Eubacterium saburreum* strain L 13, identification of a new type of biopolymer as the cell-wall, 197
- Application of high-performance liquid chromatography to a study of branching in dextrans, 1
- α -L-Arabian, stereospecific synthesis of a (1 \rightarrow 5)-, C1
- Asialo-G_{M1} and G_{M2}, synthesis of tetra- and trisaccharide units of, 39
- Bacterial lipopolysaccharides: structure, synthesis, and biological activities (*book review*), C4
- 6-*O*-Benzyl-1,2-dideoxy-3,4-*O*-isopropylidene-D-*ribo*-hex-1-enitol to derivatives of 2,5-anhydro-6-*O*-benzyl-3,4-*O*-isopropylidene-D-*altro*-hexitol, electrophile-mediated cyclizations of, 89
- Biophysical methods in food research (*book review*), C17
- Blood coagulant factors, effect of sulfated derivatives of chitosan on some, 205
- Carbohydrates, protection and deprotection reactions of, tetrafluoroboric acid as an efficient catalyst in, 282
- Cell-wall antigen from *Eubacterium saburreum* strain L 13, a new type of biopolymer, 197
- Cell walls of plants, rhamnogalacturonan in, 111
- Cell walls of suspension-cultured tobacco (*Nicotiana tabacum*) cells, a galactoglucomannan from, 173
- Chitosan, effect on some blood coagulant factors of sulfated derivatives of, 205
- Chromatography of amino sugar-containing oligo- and poly-saccharides, a method for monitoring elution profiles during the, 239
- Chromatography to a study of branching in dextrans, application of high-performance liquid, 1
- Concanavalin A, interactions of α -D-glucans with, 151
- Crystal structure of anhydrous α,α -trehalose at -150° , 21
- 6-Deoxy and 6'-deoxy derivatives of methyl 4-*O*- α -D-galactopyranosyl- β -D-galactopyranoside, synthesis of, 270
- Detailed study of the acetalation of D-mannitol with acetone-sulfuric acid, 276
- Determination of the position of acetic and sulfuric esters in glycosphingolipids by two-dimensional proton-nuclear magnetic resonance spectroscopy, 244
- Dextrans, application of high-performance liquid chromatography to a study of branching in, 1
- Disaccharide containing *N*-acetylneuraminic acid and 2-acetamido-2-deoxy-D-galactose, synthesis of, 63
- Disodium pentasilicate (Na₂Si₅O₁₁·*x*CH₃OH·*y*H₂O) in methanol-water solutions, isomerization of D-glucose by, 99
- Effect of sulfated derivatives of chitosan on some blood coagulant factors, 205
- Electrophile-mediated cyclizations of 6-*O*-benzyl-1,2-dideoxy-3,4-*O*-isopropylidene-D-*ribo*-hex-1-enitol to derivatives of 2,5-anhydro-6-*O*-benzyl-3,4-*O*-isopropylidene-D-*altro*-hexitol, 89
- Enzyme from *Bacillus coagulans*, hydrolytic action on various maltosides by an, 217
- Eubacterium saburreum* strain L 13, identification of a new type of biopolymer as the cell-wall antigen from, 197
- O*-(5-*O*-Feruloyl- α -L-arabinofuranosyl)-(1 \rightarrow 3)-*O*- β -D-xylopyranosyl-(1 \rightarrow 4)-D-xylopyranose as a component of *Zea* shoot cell-walls, 139
- Flavobacterium heparinum*, substrate specificity of heparan sulphate lyase and heparin lyase from, 227
- Galactoglucomannan from cell walls of suspension-cultured tobacco (*Nicotiana tabacum*) cells, 173
- 4-*O*- β -D-Galactopyranosyl-3-*O*-methyl-D-glucose, synthesis of, 265
- G_{M1} and G_{M2}, asialo, synthesis of tetra and trisaccharide units of, 39
- α -D-Glucans, interactions of Concanavalin A with, 151
- α,β -D-Glucopyranose, pentakis-*O*-(3-carboxypropionyl) penta-D-glucos-6-yl pentaester, C14
- D-Glucopyranosyl residues, linkage positions in,

- analysis of, by the reductive-cleavage method, 183
- D-Glucose by disodium pentasilicate ($\text{Na}_2\text{Si}_2\text{O}_7 \cdot x\text{CH}_3\text{OH} \cdot y\text{H}_2\text{O}$) in methanol-water solutions, isomerization of, 99
- Glycosphingolipids by two-dimensional proton-nuclear magnetic resonance spectroscopy, determination of the position of acetic and sulfuric esters in, 244
- Gums, for the food industry 2 (*book review*), c19
- Heparan sulphate lyase and heparin lyase from *Flavobacterium heparinum*, substrate specificity of, 227
- Human milk: sialylated lacto-*N*-fucopentaoses I and II, structure of two new oligosaccharides isolated from, 127
- Hydrolytic action on various maltosides by an enzyme from *Bacillus coagulans*, 217
- Identification by mass spectrometry of *N*-(1-deoxyhexitol-1-yl)amino acids, reference compounds for the nonenzymic glycosylation of proteins, 31
- Infrared investigations of sucrose in aqueous solutions, 253
- Interactions of Concanavalin A with α -D-glucans, 151
- Intramolecular hydrogen-bonding in phenyl mono-, di-, and tri-*O*-methyl- β -D-glucopyranosides, 13
- Isolation and identification of *O*-(5-*O*-feruloyl- α -L-arabinofuranosyl)-(1 \rightarrow 3)-*O*- β -D-xylopyranosyl-(1 \rightarrow 4)-D-xylopyranose as a component of *Zea* shoot cell-walls, 139
- Isomerization of D-glucose by disodium pentasilicate ($\text{Na}_2\text{Si}_2\text{O}_7 \cdot x\text{CH}_3\text{OH} \cdot y\text{H}_2\text{O}$) in methanol-water solutions, 99
- Lipid A, synthesis of two analogues of *Rhodococcus vannielii*, c4
- Lipopolysaccharides, bacterial, the structure, synthesis, and biological activities of (*book review*), c20
- Maltosides by an enzyme from *Bacillus coagulans*, hydrolytic action on various, 217
- D-Mannitol, acetalation of, with acetone-sulfuric acid, a detailed study of the, 276
- D-Mannopentaose, a model linear, synthesis of, for the nonreducing-end sequence of the cell-surface D-mannan of *Escherichia coli*, *Candida albicans*, and *Saccharomyces cerevisiae*, 79
- Method for monitoring elution profiles during the chromatography of amino sugar-containing oligo- and poly-saccharides, 239
- Methyl 4-*O*- α -D-galactopyranosyl- β -D-galactopyranoside, synthesis of 6- and 6'-deoxy derivatives of, 270
- O*-Methyl- β -D-glucopyranosides, intramolecular hydrogen-bonding in phenyl mono-, di-, and tri-, 13
- 6-*O*-Methyl-D-glucose, a practical synthesis of, 259
- 3-*O*-Methyl-lactose (4-*O*- β -D-galactopyranosyl-3-*O*-methyl-D-glucose), synthesis of, 265
- Neuraminic acid, *N*-acetyl, synthesis of disaccharide containing, 63
- Nonenzymic glycosylation of proteins, identification by mass spectrometry of *N*-(1-deoxyhexitol-1-yl)amino acids, reference compounds for the 31
- Nutrients, megacaloric parenteral, c14
- Oligosaccharides isolated from human milk: sialylated lacto-*N*-fucopentaoses, structure of two new, 127
- Pectic polysaccharides, 111
- Pentaerythritol, tetrakis-*O*-(3-carboxypropionyl) tetra-D-glucos-6-yl tetraester, c14
- Phenyl mono-, di-, and tri-*O*-methyl- β -D-glucopyranosides, intramolecular hydrogen-bonding in, 13
- Plant cell walls, primary, rhamnogalacturonan in, 111
- Polysaccharide produced by *Rhizobium trifolii* Bart A, structure of the acidic exocellular, 167
- Polysaccharides of *Shigella flexneri*, synthesis of the basic chain of the *O*-specific, c8
- Polysaccharides, pectic, 111
- Practical synthesis of 6-*O*-methyl-D-glucose, 259
- Proteins, identification by mass spectrometry of *N*-(1-deoxyhexitol-1-yl) amino acids, reference compounds for the nonenzymic glycosylation of, 31
- Reductive-cleavage method, for analysis of linkage in D-glucopyranosyl residues, 183
- Rhamnogalacturonan I in plant cell walls, 111
- Rhamnogalacturonan I, structure of, 111
- Rhizobium trifolii* Bart A, structure of the acidic exocellular polysaccharide produced by, 167
- Rhodococcus vannielii* Lipid A, synthesis of two analogues of, c4
- Shigella flexneri*, synthesis of the basic chain of the *O*-specific polysaccharides of, c8
- Stabilisers, for the food industry 2 (*book review*), c19
- Stereospecific synthesis of a (1 \rightarrow 5)- α -L-arabinan, c1
- Structure of the acidic, exocellular polysaccharide produced by *Rhizobium trifolii* Bart A, 167

- Structure of two new oligosaccharides isolated from human milk: sialylated lacto-*N*-fucopentaoses I and II, 127
- Substrate specificity of heparan sulphate lyase and heparin lyase from *Flavobacterium heparinum*, 227
- Sucrose, in aqueous solutions, infrared investigations of, 253
- Synthesis of a (1→5)- α -L-arabinan, stereospecific, C1
- Synthesis of a model, linear D-mannopentaose for the non-reducing-end sequence of the cell-surface D mannan of *Escherichia coli*, *Candida albicans*, and *Saccharomyces cerevisiae*, 79
- Synthesis of 6- and 6'-deoxy derivatives of methyl 4-*O*- α -D-galactopyranosyl- β -D-galactopyranoside, 270
- Synthesis of 4-*O*- β -D-galactopyranosyl-3-*O*-methyl-D-glucose, 265
- Synthesis of 6-*O*-methyl-D-glucose, a practical, 259
- Synthesis of the basic chain of the O-specific polysaccharides of *Shigella flexneri*, C8
- Synthesis of two analogues of *Rhodocromium vannielii* Lipid A, C4
- Tetra- and tri-saccharide units of asialo-G_{M1} and -G_{M2}, synthesis of, 39
- Tetrafluoroboric acid, an efficient catalyst in carbohydrate protection and deprotection reactions, 282
- Tobacco (*Nicotiana tabacum*) cells, a galactoglucomannan from cell walls of suspension-cultured, 173
- α,α -Trehalose, anhydrous, the crystal structure of, at -150°, 21
- Two-dimensional proton-nuclear magnetic resonance spectroscopy, determination of the position of acetic and sulfuric esters in glycosphingolipids by, 244
- Zea* shoot cell-walls, isolation and identification of *O*-(5-*O*-feruloyl- α -L-arabinofuranosyl)-(1→3)-*O*- β -D-xylopyranosyl-(1→4)-D-xylopyranose as a component of, 139
