

CARBOHYDRATE RESEARCH, VOL. 144 (1985)

SUBJECT INDEX

- 2-Acetamido-2-deoxy- α -D-galactopyranoside, 8-methoxycarbonyl *O*- β -D-galactopyranosyl, 45
- 1-(*S*)-Acetoxy-3-[6(*R*)-*O*-benzyl-1,2:3,4-di-*O*-isopropylidene - α - D - galactopyranos - 6 - yl]-1-(methyl 2,3,4-tri-*O*-benzyl-6-deoxy- β -D-galactopyranosid-6-yl)propyne, synthesis, crystal structure, and conformation of, 183
- 3'-Acetoxy-3'-bromo- and -2'-chloro-3'-deamino daunorubicin analogs, synthesis and antitumor activity of, 305
- N*-Acetylneuraminic acid, synthesis of tetrasaccharide containing, 205
- N*-Acetylneuraminic acid, synthesis of trisaccharide-synthetic block containing, 205
- N*-Acylkansosamine, 4,6-dideoxy-4-[(*R*)-2-methoxypropanamido]-3-*C*-methyl-2-*O*-methyl-L-mannopyranose, by chemical synthesis, c15
- Alginates, identification of carboxylic acids formed on alkaline degradation of, 241
- Alkaline degradation of alginates to carboxylic acids, 241
- Alkyl 1,2-orthoacetates of D-glucopyranose and D-galactopyranose, synthesis of, 137
- Allylic rearrangement of 6-deoxyglycals, 331
- 3-Amino-3-deoxy- α -D-mannopyranosyl α -D-mannopyranoside, 77
- 1-DL-Anhydro-*myo*-inositol, synthesis of, 148
- Anomeric acetyl group in substituted hexopyranoses, a new efficient method for hydrolysis of the, 342
- P-Antigen tetrasaccharide (globotetraose), synthesis of the methyl and 1-octyl glycosides of the, 231
- α -L-Arabinofuranosidase from *Dichomitus squalens*, productions, purification, and properties of an, 113
- Aryl 4-thio- and 1,4-dithio-xylobiosides, synthesis of, 33
- Carbohydrates, cereal, new approaches to research on (*book review*), c22
- Carbohydrates, use of *N*-methylbis(trifluoroacetamide) to prepare trifluoroacetates for g.l.c. of, 177
- Carboxylic acids, alkaline degradation of alginates to, 241
- Chemical structure and anti-complementary activity of plant polysaccharides, relationship between, 101
- Chemistry of pyrazole-type dianhydrophenylosazones, a contribution to the, 71
- Chitosan, preparation of acetylated derivatives of modified chito-oligosaccharides by the depolymerisation with nitrous acid of partially *N*-acetylated, 338
- Conduritol B epoxide, synthesis of, 148
- Conjugates, carbohydrate, synthesis with 2,4,6-trichloro-1,3,5-triazine of, 23
- Contribution to the chemistry of pyrazole-type dianhydrophenylosazones, 71
- Core of *N*-glycoproteins, synthesis of branched pentasaccharide, part of, 57
- Core structure of the antibiotic oligostatin, synthesis of a, 155
- Crystal and molecular structures of methyl 2,3-anhydro-4-deoxy- α -DL-ribo- and - α -DL-*lyxo*-hexopyranosides, 13
- Crystal structure and synthesis of a higher carbon sugar, 183
- Crystal structure of isobutyl 2,3,4-tri-*O*-acetyl-1-thio- β -D-xylopyranoside, the 197
- Daunorubicin, 2'-bromo- and 2'-chloro-3'-acetoxy-3'-deamino analogs, synthesis and antitumor activity of, 305
- Degradation of D-galacturonic acid with alkali, oxidative and non-oxidative, 93
- Dehydration products from α -D-glucosaccharinic acid, formation of acid-catalysed, 163
- 6-Deoxyglycals, acylation of, 317
- 6-Deoxyglycals, allylic rearrangement of, 331
- 6-Deoxyglycals, silylation of, 325
- Depolymerisation of partially *N*-acetylated chitosan with nitrous acid, preparation of acetylated derivatives of modified chito-oligosaccharides by the, 338
- Dichomitus squalens*, production, purification, and properties of an α -L-arabinofuranosidase from, 113
- 1,4-Dithioxylobioside, aryl, synthesis of, 33
- E.i.- and c.i.-mass spectrometry of peracetylated methyl glycosides of and peracetylated alditols from 2-amino-2,4-dideoxy- and 3-amino-3,4-DL-pentopyranoses, 127

- Endo-(1→4)- β -D-xylanose from *Polyporus tulipiferae* (*Irpex lacteus*), a rapid procedure for the purification of an, 346
- Formation of acid-catalysed dehydration products from α -D-glucosiosaccharinic acid, 163
- L-Fucal, acylation of, 317
- Fucose-binding proteins of *Lotus tetragonolobus*, a re-examination of the isolectin components of the, 297
- Furanosides, glucosylation with 6'-chloro-6'-deoxysucrose and immobilized *Protaminobacter rubrum* of, c6
- D-Galactopyranose, alkyl, 1,2-orthoacetate, synthesis of, 137
- 3-O- β -D-Galactopyranosyl-D-galactose, synthesis of, 45
- (1→3)-O- β -D-Galactopyranosyl-(1→3)-, synthesis of, 45
- D-Galactose, 3-O- β -D-galactopyranosyl-, synthesis of, 45
- D-Galacturonic acid with alkali, oxidative and non-oxidative degradation of, 93
- Glucanase from *Trichoderma harzianum*, investigations of an industrial β -D-, 277
- α -D-Glucosiosaccharinic acid, formation of acid-catalysed dehydration products from, 163
- D-Glucopyranose, alkyl 1,2-orthoacetate, synthesis of, 137
- Glucosylation of furanosides with 6'-chloro-6'-deoxysucrose and *Protaminobacter rubrum*, c6
- Glycals, 6-deoxy-, allylic rearrangement of, 331
- Glycals, 6-deoxy-, silylation of, 325
- Glycopeptides, hydrazinolysis-N-reacetylation of, 1
- Glycoprotein hydrazinolysis-N-reacetylation of, 1
- N-Glycoproteins, synthesis of branched pentasaccharide, part of the core of, 57
- Glycosides of the P-antigen tetrasaccharide (globotetraose), synthesis of the methyl and 1-octyl, 231
- Group E *Streptococcus*, polysaccharide of, 289
- 2'-Halogenodaunorubicin analogs, 3'-acetoxy-3'-deamino-, synthesis and antitumor activity of, 305
- Hexakis(2,3,6-tri-O-methyl)cyclomaltotetraose, the host-guest orientation in the inclusion complex of *p*-nitrophenol with, c9
- Host-guest orientation in the inclusion complex of hexakis(2,3,6-tri-O-methyl)cyclomaltotetraose with *p*-nitrophenol in aqueous solution, c9
- Hydrazinolysis-N-reacetylation of glycopeptides and glycoproteins, 1
- Hydrolysis of the anomeric acetyl group in substituted hexopyranoses, a new efficient method for, 342
- Inclusion complex of hexakis(2,3,6-tri-O-methyl)cyclomaltotetraose with *p*-nitrophenol in aqueous solution, the host-guest orientation in the, c9
- Industrial β -D-glucanase from *Trichoderma harzianum*, investigations of an, 277
- myo-Inositol, 1-DL-1,2-anhydro-, synthesis of, 148
- Investigations of an industrial β -D-glucanase from *Trichoderma harzianum*, 277
- Isolectin components of the fucose-binding proteins of *Lotus tetragonolobus*, a re-examination of the, 297
- Klebsiella* K26 capsular polysaccharide, oligosaccharides from, by bacteriophage degradation, 251
- Klebsiella* K79 capsular polysaccharide, structure, 263
- α -D-Mannopyranoside, 3-amino-3-deoxy- α -D-mannopyranosyl, synthesis of, 77
- α -D-Mannopyranosyl, -3-amino-3-deoxy- α -D-mannopyranoside, synthesis of, 77
- Methyl 2,3-anhydro-4-deoxy- α -DL-ribo- and - α -DL-lyxo-hexopyranosides, crystal and molecular structures of, 13
- N-Methylbis(trifluoroacetamide), trifluoroacetylation of carbohydrates for g.l.c. using, 177
- New approaches to research on cereal carbohydrates (*book review*), c22
- New, efficient method for hydrolysis of the anomeric acetyl group in substituted hexopyranoses, 342
- N.m.r. of starches, solid state ^{13}C -c.p.-m.a.s., c1
- ^{13}C -N.m.r. spectroscopy, a working manual with exercises (*book review*), c19
- Nonoxidative and oxidative alkaline degradation of pectic acid, 87
- Oligosaccharides, (1→6)- β -D-galacto-, and related compounds, systematic chemical synthesis of, c12
- Oligosaccharides, methyl glycosides of some, synthesis of, 169
- Oligostatin, synthesis of a core structure of the antibiotic, 155
- 1,2-Orthoacetates, alkyl, of D-glucopyranose and D-galactopyranose, synthesis of, 137
- Oxidative and non-oxidative degradation of D-galacturonic acid with alkali, 93
- Pectic acid, monoxidative and oxidative alkaline degradation of, 87
- Pentasaccharide, branched, part of core of N-glycoproteins, synthesis of, 57
- DL-Pentopyranoses, 2-amino-2,4-dideoxy-, and 3-amino-3,4-dideoxy-, peracetylated methyl

- glycosides of, and alditols from, e.i.- and c.i.- mass spectrometry of, 127
- Plant polysaccharides, relationship between chemical structure and anti-complementary activity of, 101
- Polyporus tulipiferae* (*Irpex lacteus*), a rapid procedure for the purification of an endo-(1→4)- β -D-xylanase from, 346
- Polysaccharide of *Klebsiella* K26, oligosaccharides from, by bacteriophage degradation, 251
- Polysaccharide of *Klebsiella*, K79, capsular, structure, 263
- Preparation of acetylated derivatives of modified chito-oligosaccharides by the depolymerisation of partially *N*-acetylated chitosan with nitrous acid, 338
- Production, purification, and properties of an α -L-arabinofuranosidase from *Dichomitus squalens*, 113
- Protaminobacter rubrum*, glucosylation of furanosides by, c6
- Pyrazole-type dianhydrophenylosazones, a contribution to the chemistry of, 71
- Rapid procedure for the purification of an endo-(1→4)- β -D-xylanase from *Polyporus tulipiferae* (*Irpex lacteus*), 346
- Re-examination of the isolectin components of the fucose-binding proteins of *Lotus tetragonolobus*, 297
- Relationship between chemical structure and anti-complementary activity of plant polysaccharides, 101
- L-Rhamnal, acylation of, 317
- α -L-Rhamnose units, structure of streptococcus polysaccharide containing, 289
- Silylation of 6-deoxyglycals, 325
- Solid state ^{13}C -c.p.-m.a.s. n.m.r. of starches, c1
- Starches, solid state ^{13}C -c.p.-m.a.s. n.m.r. of, c1
- Streptococcus*, group E, polysaccharide of, 289
- Structural assignment of *N*-acylkansosamine, 4,6-dideoxy-4-[(*R*)-2-methoxypropanamido]-3-C-methyl-2-*O*-methyl-L-mannopyranose, by chemical synthesis, c15
- Structures of methyl 2,3-anhydro-4-deoxy- α -DL-ribo- and - α -DL-lyxo-hexopyranosides, crystal and molecular, 13
- Sucrose, 6'-chloro-6'-deoxy-, glucosylation of furanosides by, c6
- Synthesis, crystal structure, and conformation of 1(*S*)-acetoxy-3-[6(*R*)-*O*-benzyl-1,2:3,4-di-*O*-isopropylidene- α -D-galactopyranos-6-yl]-1-(methyl 2,3,4-tri-*O*-benzyl-6-deoxy- β -D-galactopyranosid-6-yl)propyne, 183
- Synthesis of a core structure of the antibiotic oligostatin, 155
- Synthesis of some oligosaccharide methyl glycosides, 169
- Synthesis of the methyl and 1-octyl glycosides of the P-antigen tetrasaccharide (globotetraose), 231
- Synthesis, the structural assignment of *N*-acylkansosamine, 4,6-dideoxy-4-[(*R*)-2-methoxypropanamido]-3-C-methyl-2-*O*-methyl-L-mannopyranose, by chemical, c15
- Systematic, chemical synthesis of (1→6)- β -D-galacto-oligosaccharides and related compounds, c12
- Tetrasaccharide, synthesis of *N*-acetylneuraminic acid-containing, 205
- 4-Thioxylobioside, aryl, synthesis of, 33
- 1,3,5-Triazine, 2,4,6-trichloro-, synthesis of carbohydrate conjugates with, 23
- 2,4,6-Trichloro-1,3,5-triazine, synthesis of carbohydrate conjugates with, 23
- Trifluoroacetylation of carbohydrates for g.l.c., using *N*-methylbis(trifluoroacetamide), 177
- D-Xylanoses, fungal, synthesis of effects of, 33
- β -D-Xylopyranoside, isobutyl 2,3,4-tri-*O*-acetyl-1-thio, the crystal structure of, 197
