

CARBOHYDRATE RESEARCH, VOL. 149 (1986)

SUBJECT INDEX

- α -(2 \rightarrow 6)-2-Acetamido-2-deoxy- β -D-glucoside sialyltransferase in various tissues, 85
- Acetobacter xylinum*, guanyl oligonucleotides activator of cellulose synthase in, 101
- N-Acetyl- β -D-galactosaminyltransferase from human kidney, 171
- N-Acetylgalactosaminyltransferases from chemically transformed guinea pig cells, synthesis of globoside and Forssman glycolipid by, 119
- N-Acetyl- β -D-glucosaminyltransferases related to mucin-type glycoproteins, 241
- Antigenicity of the lipopolysaccharide from a rough mutant of *Vibrio cholerae* Ogawa, the effect of removal of D-fructose on the, 293
- Aspergillus niger*, glucosyltransferase of, 137
- Alpha-amylase of *B. subtilis*, hydrolysis of amylopectin by the, 379
- α -D-Altropyransides, methyl 3-deoxy-3-diallylamino-, abnormal conformations of, 458
- Amylopectin, hydrolysis of, by the alpha-amylase of *B. subtilis*, 379
- 3,6-Anhydrohexose phenylosazones, a new method for the synthesis of, C5
- Antibodies, monoclonal, to soluble, human galactosyltransferase, 23
- Bacteriophage depolymerization in the structural investigation of the capsular polysaccharide from *Klebsiella* serotype K3, 411
- B Gene-encoded glucosyltransferase, UDP-N-acetyl-D-galactosamine as a donor substrate for, 149
- Biosynthesis of glycogen in the liver, (1 \rightarrow 4)- α -D-glucan-protein in, 35
- Bovine milk D-galactosyltransferases, modulation by various phosphatidylethanolamines of, 47
- Brain, rat, sialyltransferase from, 209
- Calculations for oligosaccharides: a comparison of methods and a strategy of calculation, conformational-energy, 389
- Carbohydrates, use of nicotinium dichromate as a new cheap reagent for high-yielding large-scale oxidation of, C1
- Cellulose synthase in *Acetobacter xylinum*, guanyl oligonucleotide as activator of, 101
- Circular dichroism spectra of some model compounds related to D-glucopyranose and D-galactopyranose, 299
- Comparative analysis of the behaviour of gellan gum (S-60) and welan gum (S-130) in dilute aqueous solution, 425
- Concanavalin A, binding of glycopeptides on, 65
- Conformations, abnormal, of methyl 3-deoxy-3-diallylamino- α -D-altropyranosides, 458
- Conformational-energy calculations for oligosaccharides: a comparison of methods and a strategy of calculation, 389
- 2-Decanamido-2-deoxy derivative of disaccharides, synthesis of, 464
- 1-Deoxy-1-[(2,2-diacilylvinyl)amino]-D-fructoses, synthesis and glycosidation of, 329
- 3-Deoxyoctitols, g.l.c.-m.s. of partially methylated and acetylated derivatives of, 263
- Dextran, controlled-molecular-weight, synthesis with dextran sucrose of, 433
- Dextranucrase, acceptor reaction with maltose and oligosaccharides of, 433
- 3,6-Di-O-methyl-D-glucose, synthesis of, C13
- Disaccharides bearing lipophilic chain, synthesis of, 464
- Dolichyl-mannosyl-phosphate-synthase-characterization of mannosyl-transfer reactions catalyzed by, 199
- Effect of removal of D-fructose on the antigenicity of the lipopolysaccharide from a rough mutant of *Vibrio cholerae* Ogawa, 293
- Fibroblasts, RSV-transformed, galactosyltransferase in, 225
- Forssman glycolipid, synthesis by chemically transformed guinea pig cells of, 119
- α -(1 \rightarrow 2)-L-Fucosyltransferase of human trachea, properties of, 253
- Fungal D-glucosyltransferase, glycoprotein nature and antigenicity of, 137
- β -D-Galactosaminyltransferase, N-acetyl-, from human kidney, 171
- D-Galactose, 6-O-octyl-, synthesis of, 464
- α -(2 \rightarrow 3)- β -D-Galactoside sialyltransferases in various tissues, 85
- D-Galactosyltransferase, bovine milk, modulation by various phosphatidylethanolamines of, 47
- Galactosyltransferase, human milk, monoclonal antibodies to, 23
- Galactosyltransferase in RSV-transformed fibroblast, 225
- GDP-L-fucose: β -D-galactoside α -(1 \rightarrow 2)-L-fucosyltransferase of human trachea, properties of, 253

- Gellan gum (S-60) and Welan gum (S-130) in dilute aqueous solution, comparative analysis of the behavior of, 425
- G.l.c.-m.s. of partially methylated and acetylated derivatives of 3-deoxyoctitols, 263
- Globoside containing an α -D-GalpNAc group (1 \rightarrow 3)-linked, synthesis by chemically transformed guinea pig cells of, 119
- (1 \rightarrow 4)- α -D-Glucan-protein in glycogen biosynthesis by the liver, 35
- (1 \rightarrow 3)- β -D-Glucan synthetases, effect of papulacandin B on, 13
- β -D-Glucosaminyltransferases, *N*-acetyl-, related to mucin-type glycoproteins, 241
- D-Glucose 3,6-di-*O*-methyl, synthesis of, c13
- D-Glucosyltransferase, fungal, glycoprotein nature and antigenicity of, 137
- D-Glucuronic acid, tri-D-xylo-4-*O*-methyl-, structure of, 318
- Glycoconjugates, study of the geometrical shape of the lipid-bound sugar chain of a, 309
- Glycogen, liver, (1 \rightarrow 4)- α -D-glucan-protein in the biosynthesis of, 35
- Glycopeptides binding on lectin columns, 65
- Glycoprotein-processing perturbation affects neurotoxin-responsive Na⁺ channel, 185
- Glycosaminoglycans, diagnosis of mucopolysaccharidoses by ¹H-n.m.r. spectroscopy of, 471
- Glycosidation and synthesis of 1-deoxy-1-[(2,2-diacetylvinyl)amino]-D-fructoses, 329
- Glycoside synthesis, a novel promoter for the efficient construction of 1,2-*trans* linkages in, using thioglycosides as glycosyl donors, c9
- Glycosyl fluorides, synthesis of oligosaccharides using Lewis acids and, 347
- Glycosylated human interleukin-2, secretion by recombinant mammalian cell lines of, 443
- Glycosyltransferase, B-gene-encoded, UDP-N-acetyl-D-galactosamine as a donor substrate for, 149
- Glycosyltransferases. Early history, development and future prospects, 1
- Guanyl oligonucleotide as activator of cellulose synthase in *Acetobacter xylinum*, 101
- Heptose/3-deoxy-D-manno-2-octulosonic acid region (inner core) of the lipopolysaccharide from *Salmonella minnesota* rough mutants, methylation analysis of the, 279
- Human glycosylated interleukin-2, secretion by recombinant mammalian cell lines of, 443
- Hyaluronic acid in moderately concentrated solutions, structural properties of, 363
- Hydrolysis of amylopectin by the α -amylase of *B. subtilis*, 379
- Identification and quantification of methyl ester groups in methylated sugar acids and phosphates by g.l.c.-m.s. after alkaline transesterification with sodium ethoxide, 451
- Interleukin-2, human, glycosylated, secretion by recombinant mammalian cell lines of, 443
- Kidney, human, *N*-acetyl- β -D-galactosaminyltransferase from, 171
- Klebsiella* K3 capsular polysaccharide, structure, 411
- Lewis acids, synthesis of oligosaccharides using glycosyl fluorides and, 347
- Lipophilic chain, synthesis of disaccharides bearing a, 464
- Lipopolysaccharide from a rough mutant of *Vibrio cholerae* Ogawa, the effect of removal of D-fructose on the antigenicity of the, 293
- Lipopolysaccharide from *Salmonella minnesota* rough mutants, methylation analysis of the heptose 3-deoxy-D-manno-2-octulosonic acid region (inner core) of the, 279
- Liposaccharide, geometrical shape of sugar chain of a, 309
- Maltose, as acceptor in the synthesis of dextran by action of dextranucrase, 433
- Mannosyl-transfer reactions catalyzed by dolichyl-mannosyl-phosphate-synthase, 199
- Masking effect of sialic acid groups, reconstitution by the action of sialyltransferases of, 59
- Methyl 3-deoxy-3-diallylamino- α -D-altropyranosides, abnormal conformations of, 458
- Methyl ester groups in methylated sugar acids and phosphates, identification and quantification of, by g.l.c.-m.s. after alkaline transesterification with sodium ethoxide, 451
- 4-*O*-Methyl-D-glucuronic acid, tri-D-xylo-, structure of, 319
- Methylated and acetylated derivatives of 3-deoxyoctitols, g.l.c.-m.s. of partially, 263
- Methylated sugar acids and phosphates, identification and quantification of methyl ester groups in, by g.l.c.-m.s. after alkaline transesterification with sodium ethoxide, 451
- Methylation analysis of the heptose 3-deoxy-D-manno-2-octulosonic acid region (inner core) of the lipopolysaccharide from *Salmonella minnesota* rough mutants, 279
- Model compounds related to D-glucopyranose and D-galactopyranose, circular dichroism spectra of some, 299
- Monoclonal antibodies to soluble, human milk galactosyltransferase, 23

- Mucin-type glycoproteins, *N*-acetyl- β -D-glucosaminyltransferases related to, 241
- Mucopolysaccharidoses, diagnosis by ^1H -n.m.r. spectroscopy of glycosaminoglycans of, 471
- Mycobacterium leprae*, synthesis of a hapten component of, C13
- Neurotoxin-responsive Na^+ channel, effect of perturbation of glycoprotein processing on, 185
- New method for the synthesis of 3,6-anhydrohexose phenylosazones, C5
- Nicotinium dichromate: a new cheap reagent for high-yielding large-scale oxidation of carbohydrates, C1
- ^1H -N.m.r. spectroscopy of glycosaminoglycans, diagnosis of mucopolysaccharidoses by, 471
- Novel promoter for the efficient construction of 1,2-*trans* linkages in glycoside synthesis, using thioglycosides as glycosyl donors, C9
- Oligosaccharides: a comparison of methods and a strategy of calculation, conformational-energy calculations, 389
- Oligosaccharides, as acceptor in the synthesis of dextran by action of dextranucrase, 433
- Oligosaccharides, synthesis using glycosyl fluorides and Lewis acids of, 347
- Oxidation of carbohydrates, use of nicotinium dichromate as a new cheap reagent for high-yielding large-scale, C1
- Phospholiposaccharide, geometrical shape of sugar chains of a, 309
- Polysaccharide of *Klebsiella* K3, capsular, structure, 411
- Phosphatidylethanolamines, modulation of bovine milk D-galactosyltransferase by, 47
- Papaulcandin B, effect on (1 \rightarrow 3)- β -D-glucan synthetases of, 13
- Phaseolus vulgaris* erythroagglutinin, binding of glycopeptides on, 65
- Rat brain sialyltransferase, 209
- Reduction, regiospecific, of sucrose at 6', 6, 455
- Ricinus communis* agglutinin, binding of glycopeptides on, 65
- RSV-transformed fibroblast, galactosyltransferase in, 225
- Sialic acid groups reconstitution by the action of sialyltransferases of the masking effect of, 59
- Sialyltransferases from rat brain, 209
- Sialyltransferases, α -(2 \rightarrow 3)- β -D-galactoside and α -(2 \rightarrow 6)-2-acetamido-2-deoxy- β -D-glucoside, in regenerating rat liver and other tissues, 85
- Sialyltransferases, reconstitution of the masking effect of sialic acid groups on sialidase-treated erythrocytes by the action of, 59
- Sialyltransferases, reconstitution of the masking effect of sialic acid groups on sialidase-treated erythrocytes by the action of, 59
- Sodium channel, neurotoxin-responsive, effect of perturbation of glycoprotein processing on, 185
- Solution properties of hyaluronic acid at various moderate concentrations, 363
- Spectra of some model compounds related to D-glucopyranose and D-galactopyranose, circular dichroism, 299
- Structural properties of hyaluronic acid in moderately concentrated solutions, 363
- Sucrose, regiospecific reduction at 6,6' of, 455
- Synthase, dolichyl-mannosyl-phosphate-, mannosyl-transfer reactions catalyzed by, 199
- Synthesis and glycosidation of 1-deoxy-1-[(2,2-diacetylvinyl)amino]-D-fructoses, 329
- Synthesis of 3,6-anhydrohexose phenylosazones, a new method for the, C5
- Synthetases of (1 \rightarrow 3)- β -D-glucan, effect of papulacandin B on, 13
- Trachea, human, epithelial, α -(1 \rightarrow 2)-L-fucosyltransferase properties of, 253
- Tri-D-xylo-4-O-methyl-D-glucuronic acid, structure of, 319
- UDP *N*-acetyl-D-galactosamine as a donor substrate for the B gene-encoded glycosyltransferase, 149
- Welan gum (S-130) in dilute aqueous solution, comparative analysis of the behavior of gellan gum (S-60) and, 425
