

CARBOHYDRATE RESEARCH, VOL. 150 (1986)

SUBJECT INDEX

- 6-Amino-1,5-anhydro-6-deoxy- and 2-amino-1,5-anhydro-2-deoxy-D-glucitol, synthesis of some derivatives of, 121
- p*-Aminophenyl β -D-ribofuranoside 3-(D-ribose-5-yl phosphate), synthesis of, 285
- 2,3-Anhydride derived from sucrose, preparation and ring-opening reactions of a, 53
- 1,5-Anhydro-D-glucitol, synthesis of some derivatives of 6-amino-6-deoxy- and 2-amino-2-deoxy, 121
- Antigenic determinants from glycopeptidolipid antigens, synthesis of tetrasaccharides related to the, 133
- O-Antigen from *Vibrio cholerae* O:21, structural studies of the, 213
- Arabinoxylans from barley endosperm walls, studies of some, 290
- Barley endosperm walls, studies of some arabinoxylans from, 290
- Biantennary glycan-chain of human chorionic gonadotropin of a patient with choriocarcinoma, synthesis of a heptasaccharide hapten related to an anomalous, 91
- Branched tetrasaccharide with dioxo-type spacer-arms, synthesis of a, related to the repeating unit of *Streptococcus pneumoniae* type XIV polysaccharide, 199
- Capsular polysaccharide K40 antigen from *Escherichia coli* O8:K40:H9, structure of the serine-containing, 233
- Chiral macrocyclic compounds from lactose derivatives, 103
- Chitosan, effect on lipoprotein lipase activity of rabbit plasma after intravenous injection of sulphated derivatives, 295
- Conformations of heptitols, role of C,O versus O,O parallel 1,3-interactions in determining the, 7
- Daunosamine and ristosamine, syntheses of, 111
- Deoxyinososes, direct synthesis of 6-oxabicyclo[3.2.1]octane derivatives from, 151
- Determinant of enterobacterial common antigen, trisaccharide, synthesis of, 63
- Determination of the structure of a fucose-containing trisaccharide monophosphate isolated from human pregnancy urine, 273
- Direct synthesis of 6-oxabicyclo[3.2.1]octane derivatives from deoxyinososes, 151
- Effect of sulphated derivatives of chitosan on lipoprotein lipase activity of rabbit plasma after their intravenous injection, 295
- Enterobacterial common antigen, synthesis of the trisaccharide determinant of, 63
- Fucose-containing trisaccharide monophosphate isolated from human pregnancy urine, determination of the structure of a, 273
- β -D-Galactosyltransferase from human milk, structure identification of the sugar chains of, 241
- Glycoprotein of *Bacillus stearothermophilus* strain NRS 2004/3a, structure of a rhamnan from the surface-layer, 265
- Granular, cold-water-soluble starch gives a V-type, X-ray diffraction pattern, c5
- Gum arabic, structural studies of, the exudate polysaccharide from *Acacia senegal*, 221
- Hepta-saccharide hapten related to an anomalous biantennary glycan-chain of human chorionic gonadotropin of a patient with choriocarcinoma, synthesis of a, 91
- Heptitol conformations revisited: C,O versus O,O parallel 1,3-interactions, 7
- Heptoses, new syntheses of D- and L-glycero-D-manno-, 163
- Human milk, structure identification of the sugar chains of β -D-galactosyltransferase from, 241
- Human pregnancy urine, determination of the structure of a fucose-containing trisaccharide monophosphate isolated from, 273
- 1,3-Interactions in determining the conformations of heptitols, the role of C,O versus O,O parallel, 7
- Isomerism about the C-5-C-6 bond of 6-O-trityl derivatives of aldohexopyranoses, rotational, and of analogs of D-galactopyranose modified at C-4, 23
- Macrocyclic compounds from lactose derivatives, synthesis of chiral, 103
- D-Mannose 6-phosphate residues, synthesis of D-mannosyl-disaccharides containing, c1
- D-Mannosyl-disaccharides containing D-mannose 6-phosphate residues, synthesis of, c1
- Milk, human, structure identification of the sugar chains of β -D-galactosyltransferase from, 241

- New syntheses of D- and L-*glycero*-D-manno-heptoses, 163
- Oligomers of D-galactose, synthesis of β -(1 \rightarrow 3)-linked, by the use of "standardized intermediates", 173
- Osmylation of olefinic sugars, the synthesis of some seven-carbon sugars *via* the, 35
- 6-Oxabicyclo[3.2.1]octane derivatives, direct synthesis from deoxyinososes of, 151
- Oligosaccharide oxazolines, new procedure for, c7
- Oxazolines of oligosaccharides, new procedure for, c7
- 6-Phosphoric ester of D-mannose residues, synthesis of D-mannosyl-disaccharides containing, c1
- Polysaccharide (gum arabic) from *Acacia senegal*, structural studies of the exudate, 221
- Preparation and ring-opening reactions of a 2,3-anhydride derived from sucrose, 53
- Repeating unit of the lipopolysaccharide isolated from *Pseudomonas maltophilia*, synthesis of the tetrasaccharide, 187
- Rhamnan from the surface-layer glycoprotein of *Bacillus stearothermophilus* strain NRS 2004/3a, structure of a, 265
- β -D-Ribofuranoside 3-(D-ribose-5-yl phosphate), synthesis of *p*-aminophenyl, 285
- Rotational isomerism about the C-5-C-6 bond of 6-O-trityl derivatives of aldohexopyranoses, and of analogs of D-galactopyranose modified at C-4, 23
- Serine-containing capsular polysaccharide K40 antigen from *Escherichia coli* O8:K40:H9, structure of the, 233
- Seven-carbon sugars, the synthesis of some, *via* the osmylation of olefinic sugars, 35
- Stach, granular cold-water-soluble, gives a V-type X-ray diffraction pattern, c5
- Stereocontrolled routes to *cis*-hydroxyamino sugars, and syntheses of daunosamine and ristosamine, 111
- Streptococcus pneumoniae* type XIV polysaccharide: synthesis of a repeating branched tetrasaccharide with dioxo-type spacer-arms, 199
- Structural studies of gum arabic, the exudate polysaccharide from *Acacia senegal*, 221
- Structural studies of the O-antigen from *Vibrio cholerae* O:21, 213
- Structure of a rhamnan from the surface-layer glycoprotein of *Bacillus stearothermophilus* strain NRS 2004/3a, 265
- Structure of the serine-containing capsular polysaccharide K40 antigen from *Escherichia coli* O8:K40:H9, 233
- Studies of some arabinoxylans from barley endosperm walls, 290
- Sucrose, preparation and ring-opening reactions of a 2,3-anhydride derived from, 53
- Sulphated derivatives of chitosan, effect on lipoprotein lipase activity of rabbit plasma after intravenous injection of, 295
- Syntheses of daunosamine and ristosamine, 111
- Syntheses of D- and L-*glycero*-D-manno-heptoses, new, 163
- Synthesis of a branched tetrasaccharide with dioxo-type spacer-arms, related to the repeating unit of *Streptococcus pneumoniae* type XIV polysaccharide, 199
- Synthesis of a heptasaccharide hapten related to an anomalous biantennary glycan-chain of human chorionic gonadotropin of a patient with choriocarcinoma, 91
- Synthesis of *p*-aminophenyl β -D-ribofuranoside 3-(D-ribose-5-yl phosphate), 285
- Synthesis of chiral macrocyclic compounds from lactose derivatives, 103
- Synthesis of β -(1 \rightarrow 3)-linked oligomers of D-galactose by the use of "standardized intermediates", 173
- Synthesis of some derivatives of 6-amino-1,5-anhydro-6-deoxy-D-glucitol and 2-amino-1,5-anhydro-2-deoxy-D-glucitol, 121
- Synthesis of some seven-carbon sugars *via* the osmylation of olefinic sugars, 35
- Synthesis of tetrasaccharides related to the antigenic determinants from the glycopeptidolipid antigens of serovars 9 and 25 in the *Mycobacterium avium*-*M. intracellulare*-*M. scrofulaceum* serocomplex, 133
- Synthesis of the tetrasaccharide repeating-unit of the lipopolysaccharide isolated from *Pseudomonas maltophilia*, 187
- Tetrasaccharides related to the antigenic determinants from glycopeptidolipid antigens, synthesis of, 133
- The assembly of oligosaccharides from "standardized intermediates": β -(1 \rightarrow 3)-linked oligomers of D-galactose, 173
- Tetrasaccharide repeating-unit of the lipopolysaccharide isolated from *Pseudomonas maltophilia*, synthesis of the, 187
- Trisaccharide determinant of enterobacterial common antigen, synthesis of, 63
- 6-O-Trityl derivatives of aldohexopyranoses, rotational isomerism about the C-5-C-6 bond of, and of analogs of D-galactopyranose modified at C-4, 23
- Vibrio cholerae* O:21, structural studies of the O-antigen from, 213
