

Subject Index of Volume 313

Acarbose

Transglycosylation reactions of *Bacillus stearothermophilus* maltogenic amylase with acarbose and various acceptors 235

Acceptor reaction

Transglycosylation reactions of *Bacillus stearothermophilus* maltogenic amylase with acarbose and various acceptors 235

Acetate

Authentic standards for the reductive-cleavage method: the positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-L-arabinitol 181

Acetobacter xylinum

The mechanism of *Acetobacter xylinum* cellulose biosynthesis: direction of chain elongation and the role of lipid pyrophosphate intermediates in the cell membrane 125

Alditols

Separation and detection of sugars and alditols on thin layer chromatograms 135

Aldose reductase

The use of fluoro- and deoxy-substrate analogs to examine binding specificity and catalysis in the enzymes of the sorbitol pathway 247

Aldoses

Separation and detection of sugars and alditols on thin layer chromatograms 135

Alkylations

Mechanism of silver (I) oxide mediated *O*-alkylation of 2,4-di-*O*-acyl-*myo*-inositol 1,3,5-orthoformates: effect of solvent and silver halide on the nature of the intermediates involved 55

4-Amino-4-deoxy-L-arabinose (L-Ara4N)

Isolation and characterisation of disodium (4-amino-4-deoxy- β -L-arabinopyranosyl)-1 \rightarrow 8)-D-*glycero*- α -D-*talo*-oct-2-ulopyranosylonate)-(2 \rightarrow 4)-(methyl 3-deoxy-D-*manno*-oct-2-ulopyranosid)onate from the lipopolysaccharide of *Burkholderia cepacia* 21

Aminoglycoside antibiotic

Copper(II) binding to tobramycin: potentiometric and spectroscopic studies 265

Anhydroalditols

Authentic standards for the reductive-cleavage method: the positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-L-arabinitol 181

1,5-Anhydro-L-arabinitol

Authentic standards for the reductive-cleavage method: the positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-L-arabinitol 181

Antigen

Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15

Apiose

Synthesis, separation and NMR spectral analysis of methyl apiofuranosides 189

Bacterial spore cortex repeating units

Synthesis and characterisation of muramic acid 1',2-lactam- β -(1 \rightarrow 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1

Barley alpha amylase

Influence of pH on the hydrolysis of *p*-nitrophenyl maltodextrins by alpha-amylase 2 from malted barley 139

Benzoyl

Authentic standards for the reductive-cleavage method: the positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-L-arabinitol 181

Burkholderia cepacia

Isolation and characterisation of disodium (4-amino-4-deoxy- β -L-arabinopyranosyl)-1 \rightarrow 8)-D-*glycero*- α -D-*talo*-oct-2-ulopyranosylonate)-(2 \rightarrow 4)-(methyl 3-deoxy-D-*manno*-oct-2-ulopyranosid)onate from the lipopolysaccharide of *Burkholderia cepacia* 21

Capability for

Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91

Carbohydrates

Synthesis of an *N*-glucoasparagine analog as a building block for a V3-loop glycopeptide from GP120 of HIV-I 107

Cellulose acetate-propionate

Analysis of the positions of substitution of acetate and propionate groups in cellulose acetate-propionate by the reductive-cleavage method 29

Cellulose synthase

The mechanism of *Acetobacter xylinum* cellulose biosynthesis: direction of chain elongation and the role of lipid pyrophosphate intermediates in the cell membrane 125

Chloral acetals

Non-conventional epimerisation and functionalisation of quinic acid and shikimic acid methyl esters 49

3-*C*-(Hydroxymethyl)-D-*glycero*-aldotetrose

Synthesis, separation and NMR spectral analysis of methyl apiofuranosides 189

¹³C-labelling experiment

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

Colour dilution analysis, Colour dilution factor

Characterization of the most intense coloured compounds from Maillard reactions of pentoses by application of colour dilution analysis 203

Coloured compounds

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

Characterization of the most intense coloured compounds from Maillard reactions of pentoses by application of colour dilution analysis 203

Conformational analysis

Synthesis and characterisation of muramic acid 1',2-lactam- β -(1 \rightarrow 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1

Copper(II) complexes

Copper(II) binding to tobramycin: potentiometric and spectroscopic studies 265

Cyclitols

Mechanism of silver (I) oxide mediated *O*-alkylation of 2,4-di-*O*-acyl-*myo*-inositol 1,3,5-orthoformates: effect of solvent and silver halide on the nature of the intermediates involved 55

Non-conventional epimerisation and functionalisation of quinic acid and shikimic acid methyl esters 49

Cyclofructins

Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91

Deoxyaldosuloses

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

3-Deoxy-D-manno-oct-2-ulonic acid (Kdo)

Isolation and characterisation of disodium (4-amino-4-deoxy- β -L-arabinopyranosyl)-1 \rightarrow 8)-D-*glycero*- α -D-*talo*-oct-2-ulopyranosylonate)-(2 \rightarrow 4)-(methyl 3-deoxy-D-manno-oct-2-ulopyranosid)onate from the lipopolysaccharide of *Burkholderia cepacia* 21

Deoxysugars

The use of fluoro- and deoxy-substrate analogs to examine binding specificity and catalysis in the enzymes of the sorbitol pathway 247

D-Fructose

Formation of pyridinium betaines by reaction of hexoses with primary amines 117

Towards improving the utility of ketoses as organic raw materials 69

D-Glucose

Formation of pyridinium betaines by reaction of hexoses with primary amines 117

D-Glycero-D-talo-Oct-2-ulonic acid (Ko)

Isolation and characterisation of disodium (4-amino-4-deoxy- β -L-arabinopyranosyl)-1 \rightarrow 8)-D-*glycero*- α -D-*talo*-oct-2-ulopyranosylonate)-(2 \rightarrow 4)-(methyl 3-deoxy-D-manno-oct-2-ulopyranosid)onate from the lipopolysaccharide of *Burkholderia cepacia* 21

Dialkyl squarate

Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15

Diastereomers

Synthesis and NMR studies of methyl 3-*O*-[(*R*)- and (*S*)-1-carboxyethyl]- α -D-glucos-, galactos- and mannos- pyranosides 157

Diastereomer separation

Convenient preparation of chiral ethylenediamine linked to D-glucose 175

Direction of cellulose elongation

The mechanism of *Acetobacter xylinum* cellulose biosynthesis: direction of chain elongation and the role of lipid pyrophosphate intermediates in the cell membrane 125

Electrostatic potential profiles

Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91

Epimerisation

Non-conventional epimerisation and functionalisation of quinic acid and shikimic acid methyl esters 49

Esterification of sialic residues

Matrix-assisted laser desorption/ionization mass spectrometry of neutral and acidic oligosaccharides with collision-induced dissociation 145

Ester localization

Analysis of the positions of substitution of acetate and propionate groups in cellulose acetate-propionate by the reductive-cleavage method 29

Ethylenediamine

Convenient preparation of chiral ethylenediamine linked to D-glucose 175

Extracellular β -D-glucans

Structural studies of the extracellular β -D-glucans from *Phytophthora parasitica* Dastur 261

Fluorosugars

The use of fluoro- and deoxy-substrate analogs to examine binding specificity and catalysis in the enzymes of the sorbitol pathway 247

6-Formyl-1-alkylpyridinium-3-olate

Formation of pyridinium betaines by reaction of hexoses with primary amines 117

Fructosyltransferase

Structure of the enzymatically synthesized fructan inulin 165

4-(2-Furyl)-7-[(2-furyl)methylidene]-2-hydroxy-2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one

Characterization of the most intense coloured compounds from Maillard reactions of pentoses by application of colour dilution analysis 203

Galactosyltransferase

Antibody recognition of epitopes on wild-type and mutant β -(1 \rightarrow 4)-galactosyltransferase-1 37

Glucose

Convenient preparation of chiral ethylenediamine linked to D-glucose 175

Glycolaldehyde

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

Glycopeptides

Synthesis of an *N*-glucoasparagine analog as a building block for a V3-loop glycopeptide from GP120 of HIV-I 107

Glycosyl-transferase

Antibody recognition of epitopes on wild-type and mutant β -(1 \rightarrow 4)-galactosyltransferase-1 37

Glyoxal

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

Golgi

Antibody recognition of epitopes on wild-type and mutant β -(1 \rightarrow 4)-galactosyltransferase-1 37

HIV

Synthesis of an *N*-glucoasparagine analog as a building block for a V3-loop glycopeptide from GP120 of HIV-I 107

Human AGP

Matrix-assisted laser desorption/ionization mass spectrometry of neutral and acidic oligosaccharides with collision-induced dissociation 145

Immunogen

Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15

- Inclusion complexation**
 Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91
- Inositol**
 Mechanism of silver(I) oxide mediated *O*-alkylation of 2,4-di-*O*-acetyl-*myo*-inositol 1,3,5-orthoformates: effect of solvent and silver halide on the nature of the intermediates involved 55
- Intermediate chemicals from sugars**
 Towards improving the utility of ketoses as organic raw materials 69
- Inulin**
 Structure of the enzymatically synthesized fructan inulin 165
- Isoacarbouse**
 Transglycosylation reactions of *Bacillus stearothermophilus* maltogenic amylase with acarbose and various acceptors 235
- Isomaltulose**
 Towards improving the utility of ketoses as organic raw materials 69
- Ketose-derived building blocks**
 Towards improving the utility of ketoses as organic raw materials 69
- Light scattering**
 Structure of the enzymatically synthesized fructan inulin 165
- Lipophilicity patterns**
 Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91
- Lipopolysaccharide**
 Isolation and characterisation of disodium (4-amino-4-deoxy- β -L-arabinopyranosyl)-1 \rightarrow 8)-D-*glycero*- α -D-*talo*-oct-2-ulopyranosylate)-(2 \rightarrow 4)-(methyl 3-deoxy-D-*manno*-oct-2-ulopyranosid)onate from the lipopolysaccharide of *Burkholderia cepacia* 21
- Lipopolysaccharides**
 Studies of alkaline mediated phosphate migration in synthetic phosphoethanolamine L-*glycero*-D-*manno*-heptoside derivatives 193
- L-Sorbose**
 Towards improving the utility of ketoses as organic raw materials 69
- Maillard reaction**
 Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215
 Characterization of the most intense coloured compounds from Maillard reactions of pentoses by application of colour dilution analysis 203
 Formation of pyridinium betaines by reaction of hexoses with primary amines 117
- MALDI-CID**
 Matrix-assisted laser desorption/ionization mass spectrometry of neutral and acidic oligosaccharides with collision-induced dissociation 145
- Maltogenic amylase**
 Transglycosylation reactions of *Bacillus stearothermophilus* maltogenic amylase with acarbose and various acceptors 235
- Maltoheptaose**
 Matrix-assisted laser desorption/ionization mass spectrometry of neutral and acidic oligosaccharides with collision-induced dissociation 145
- Methyl apiofuransides**
 Synthesis, separation and NMR spectral analysis of methyl apiofuransides 189
- Methylation**
 Structure of the O-specific polysaccharide from *Pseudoalteromonas elyakovii* sp. nov. CMM 162 61
- Methyl glucosides**
 Synthesis and NMR studies of methyl 3-*O*-[(*R*)- and (*S*)-1-carboxyethyl]- α -D-gluc-, galacto- and manno- pyranosides 157
- Methyl quinate**
 Non-conventional epimerisation and functionalisation of quinic acid and shikimic acid methyl esters 49
- Methyl shikimate**
 Non-conventional epimerisation and functionalisation of quinic acid and shikimic acid methyl esters 49
- Microbial cellulose synthesis**
 The mechanism of *Acetobacter xylinum* cellulose biosynthesis: direction of chain elongation and the role of lipid pyrophosphate intermediates in the cell membrane 125
- Mimetics**
 Synthesis of an *N*-glucoasparagine analog as a building block for a V3-loop glycopeptide from GP120 of HIV-I 107
- Modified maltodextrin hydrolysis**
 Influence of pH on the hydrolysis of *p*-nitrophenyl maltodextrins by alpha-amylase 2 from malted barley 139
- Molecular geometries of**
 Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91
- Molecular modeling**
 Cyclofructins with six to ten β -(1 \rightarrow 2)-linked fructofuranose units: Geometries, electrostatic profiles, lipophilicity patterns, and potential for inclusion complexation 91
- Monoclonal antibodies**
 Antibody recognition of epitopes on wild-type and mutant β -(1 \rightarrow 4)-galactosyltransferase-1 37
- Monosaccharide derivatives**
 Synthesis and NMR studies of methyl 3-*O*-[(*R*)- and (*S*)-1-carboxyethyl]- α -D-gluc-, galacto- and manno- pyranosides 157
- Muramic acid**
 Synthesis and characterisation of muramic acid 1',2-lactam- β -(1 \rightarrow 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1
- Muramic acid 1',2-lactam derivatives**
 Synthesis and characterisation of muramic acid 1',2-lactam- β -(1 \rightarrow 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1
- Neighboring group effects**
 Mechanism of silver(I) oxide mediated *O*-alkylation of 2,4-di-*O*-acetyl-*myo*-inositol 1,3,5-orthoformates: effect of solvent and silver halide on the nature of the intermediates involved 55
- Neoglycoconjugate**
 Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15
- NMR spectroscopy**
 Structure of the O-specific polysaccharide from *Pseudoalteromonas elyakovii* sp. nov. CMM 162 61
 Synthesis and characterisation of muramic acid 1',2-lactam- β -(1 \rightarrow 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1
- Non-enzymatic browning**
 Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215
- One-electron shifts**
 The mechanism of saccharide osotriazole formation 255

Osazone

The mechanism of saccharide osotriazole formation 255

Osotriazole

The mechanism of saccharide osotriazole formation 255

Pentoses

Characterization of precursors and elucidation of the reaction pathway leading to a novel coloured 2*H*,7*H*,8*aH*-pyrano[2,3-*b*]pyran-3-one from pentoses by quantitative studies and application of ¹³C-labelling experiments 215

pH effects

Influence of pH on the hydrolysis of *p*-nitrophenyl maltodextrins by alpha-amylase 2 from malted barley 139

Phosphate migration

Studies of alkaline mediated phosphate migration in synthetic phosphoethanolamine L-*glycero*-D-*manno*-heptoside derivatives 193

Phytophthora parasitica Dastur

Structural studies of the extracellular β-D-glucans from *Phytophthora parasitica* Dastur 259

p-Nitrophenyl maltodextrins

Influence of pH on the hydrolysis of *p*-nitrophenyl maltodextrins by alpha-amylase 2 from malted barley 139

Positional isomers

Authentic standards for the reductive-cleavage method: the positional isomers of partially methylated and acetylated or benzoylated 1,5-anhydro-L-arabinitol 181

Pseudoalteromonas elyakovii sp. nov.

Structure of the O-specific polysaccharide from *Pseudoalteromonas elyakovii* sp. nov. CMM 162 61

Pulse and chase reactions

The mechanism of *Acetobacter xylinum* cellulose biosynthesis: direction of chain elongation and the role of lipid pyrophosphate intermediates in the cell membrane 125

Pyridinium betaine

Formation of pyridinium betaines by reaction of hexoses with primary amines 117

Reductive cleavage

Analysis of the positions of substitution of acetate and propionate groups in cellulose acetate–propionate by the reductive-cleavage method 29

Ribonuclease B

Matrix-assisted laser desorption/ionization mass spectrometry of neutral and acidic oligosaccharides with collision-induced dissociation 145

Silver(I) oxide

Mechanism of silver(I) oxide mediated *O*-alkylation of 2,4-di-*O*-acyl-*myo*-inositol 1,3,5-orthoformates: effect of solvent and silver halide on the nature of the intermediates involved 55

Smith degradation

Structure of the O-specific polysaccharide from *Pseudoalteromonas elyakovii* sp. nov. CMM 162 61

Solid phase synthesis

Synthesis of an *N*-glucoasparagine analog as a building block for a V3-loop glycopeptide from GP120 of HIV-I 107

Sorbitol dehydrogenase

The use of fluoro- and deoxy-substrate analogs to examine binding

specificity and catalysis in the enzymes of the sorbitol pathway 247

Sorbitol pathway

The use of fluoro- and deoxy-substrate analogs to examine binding specificity and catalysis in the enzymes of the sorbitol pathway 247

Starch

Preferential solvent interactions and the dissolution of the B-type crystalline polymorph of starch in aqueous solutions 225

Strecker degradation

Formation of pyridinium betaines by reaction of hexoses with primary amines 117

Streptococcus mutans

Structure of the enzymatically synthesized fructan inulin 165

Structural analysis

Studies of alkaline mediated phosphate migration in synthetic phosphoethanolamine L-*glycero*-D-*manno*-heptoside derivatives 193

Substrate specificity

The use of fluoro- and deoxy-substrate analogs to examine binding specificity and catalysis in the enzymes of the sorbitol pathway 247

Sugar phosphates

Studies of alkaline mediated phosphate migration in synthetic phosphoethanolamine L-*glycero*-D-*manno*-heptoside derivatives 193

Surface plasmon resonance

Antibody recognition of epitopes on wild-type and mutant β-(1 → 4)-galactosyltransferase-1 37

Synergistic antibody binding

Antibody recognition of epitopes on wild-type and mutant β-(1 → 4)-galactosyltransferase-1 37

Thin-layer chromatography

Separation and detection of sugars and alditols on thin-layer chromatograms 135

Tobramycin

Copper(II) binding to tobramycin: potentiometric and spectroscopic studies 265

Transglycosylation

Transglycosylation reactions of *Bacillus stearothermophilus* maltogenic amylase with acarbose and various acceptors 235

Vaccine

Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15

Vibrio cholerae

Studies towards neoglycoconjugates from the monosaccharide determinant of *Vibrio cholerae* O:1, serotype Ogawa using the diethyl squarate reagent 15

X-ray crystallography

Convenient preparation of chiral ethylenediamine linked to D-glucose 175

X-ray structure

Synthesis and characterisation of muramic acid 1',2-lactam-β-(1 → 4)-D-glucosamine derivatives related to repeating units of bacterial spore cortex 1
