

Subject Index of Volume 314

Acetolysis

An efficient route to per-*O*-acetylated hexofuranoses 79

Acetylation

An efficient route to per-*O*-acetylated hexofuranoses 79

α_1 -Acid glycoprotein

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 169

Acidic medium

Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157

Affinity

p-Aminophenyl β -cellobioside as an affinity ligand for exo-type cellulases 245

Alpha amylase

Raw starch degradation by the non-raw starch-adsorbing bacterial alpha amylase of *Bacillus* sp. IMD 434 251

1-Amino-1-deoxy-D-glucitol

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

2-Amino-2-deoxy glycosides

Access to tetrachlorophthalimide-protected ethyl 2-amino-2-deoxy-1-thio- β -D-glucopyranosides 273

2-(2-Aminoethoxy)ethanol

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

Anomerisation

Syntheses of glycosylamides as glycolipid analogs 13

Antithrombotic agents

Chemical interconversions of 4-cyanophenyl 1,5-dithio- β -D-xylopyranoside (Beciparcel®): structural modification at the C-4 position 161

Archaeobacteria

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

Asymmetric synthesis

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxyidonojirimycin (1,5-dideoxy-1,5-imino-D- and L-idoitol) via furoisoxazoline-3-aldehydes 25

BF₃

Decyl and dodecyl β -D-fructofuranosides 267

Binding loop mutant

Glucoamylase mutants with decreased K_m -values for C-6 substituted isomaltosides 127

Calcofluor white

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 169

Carbohydrate

A comparison and chemometric analysis of several molecular mechanics force fields and parameter sets applied to carbohydrates 141

Carbohydrates, spatial organization

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 169

Catalytic reaction

An unprecedented access to trifluoromethylthiosugar derivatives from thiocyanate precursors upon treatment with trifluoromethyltrimethylsilane 37

Cellobiohydrolase

p-Aminophenyl β -cellobioside as an affinity ligand for exo-type cellulases 245

Chain length

Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221

Chemical modification

Enhancement of pH-stability of a low molecular mass endoglucanase from *Fusarium oxysporum* by protein pegylation 95

Chondroitin sulfates

Multigram syntheses of the disaccharide repeating units of chondroitin 4- and 6-sulfates 283

Core oligosaccharide

Structural heterogeneity of the sialic-acid-containing oligosaccharides from the lipopolysaccharide of *Hafnia alvei* strain 2 as detected by FAB/MS studies 201

Corn starch

Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221

Cyclodextrin affinity chromatography

Raw starch degradation by the non-raw starch-adsorbing bacterial alpha amylase of *Bacillus* sp. IMD 434 251

1-Deoxy-ido-nojirimycin

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxyidonojirimycin (1,5-dideoxy-1,5-imino-D- and L-idoitol) via furoisoxazoline-3-aldehydes 25

1-Deoxynojirimycin

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxyidonojirimycin (1,5-dideoxy-1,5-imino-D- and L-idoitol) via furoisoxazoline-3-aldehydes 25

D-Galacturonic acid esters

Synthesis of the two monomethyl esters of the disaccharide 4-*O*- α -D-galacturonosyl-D-galacturonic acid and of precursors for the preparation of higher oligomers methyl uronated in definite sequences 189

D-Glucopyranosides

Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177

1,5-Dideoxy-1,5-iminohexitols

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxydonojirimycin (1,5-dideoxy-1,5-imino-D- and L-iditol) via furoisoxazoline-3-aldehydes 25

Diethers

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

Di-mannosyl-cyclomaltoheptaose

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Dimethylacetamide

A concise synthesis of *neo*-inositol 277

1,3-Dipolar cycloaddition

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxydonojirimycin (1,5-dideoxy-1,5-imino-D- and L-iditol) via furoisoxazoline-3-aldehydes 25

Disaccharide acylation

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

Dithio sugars

Chemical interconversions of 4-cyanophenyl 1,5-dithio- β -D-xylopyranoside (Beciparil®): structural modification at the C-4 position 161

1,5-Dithioxylosides

Chemical interconversions of 4-cyanophenyl 1,5-dithio- β -D-xylopyranoside (Beciparil®): structural modification at the C-4 position 161

Endoglucanase

Enhancement of pH-stability of a low molecular mass endoglucanase from *Fusarium oxysporum* by protein pegylation 95

Enzymatic method

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Escherichia coli

Synthesis and serological characterization of L-glycero- α -D-mannoheptopyranose-containing di- and tri-saccharides of the non-reducing terminus of the *Escherichia coli* K-12 LPS core oligosaccharide 85

Exopolysaccharide

Structure of an extracellular polysaccharide produced by *Lactobacillus rhamnosus* strain C83 211

FABMS

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Structural heterogeneity of the sialic-acid-containing oligosaccharides from the lipopolysaccharide of *Hafnia alvei* strain 2 as detected by FABMS studies 201

Fluorescence intensity quenching

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 169

Force field

A comparison and chemometric analysis of several molecular mechanics force fields and parameter sets applied to carbohydrates 141

Fructose

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

Fructosides

Decyl and dodecyl β -D-fructofuranosides 267

Functional food

α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101

Furanosides

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

 β -Galactosidase

α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101

Gelatinization heat treatment

Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221

Glucosamine

Access to tetrachlorophthalimide-protected ethyl 2-amino-2-deoxy-1-thio- β -D-glucopyranosides 273

Glycolipid analog

Syntheses of glycosylamides as glycolipid analogs 13

Glycosaminoglycans

Multigram syntheses of the disaccharide repeating units of chondroitin 4- and 6-sulfates 283

Glycosidation

Decyl and dodecyl β -D-fructofuranosides 267

Glycosylamide

Syntheses of glycosylamides as glycolipid analogs 13

Glycosylamine

Syntheses of glycosylamides as glycolipid analogs 13

Glycosylation

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

Hafnia alvei

Structural heterogeneity of the sialic-acid-containing oligosaccharides from the lipopolysaccharide of *Hafnia alvei* strain 2 as detected by FABMS studies 201

Hexosaminidase inhibitors

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

HPLC

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Human faecal flora

Unsaturated oligogalacturonic acids are generated by in vitro treatment of pectin with human faecal flora 237

Hydrates

Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177

Immunomodulator

Syntheses of glycosylamides as glycolipid analogs 13

Inversion

A concise synthesis of *neo*-inositol 277

Jack bean α -mannosidase

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Lactobacillus

Structure of an extracellular polysaccharide produced by *Lactobacillus rhamnosus* strain C83 211

Lactulose

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

- Ligand**
p-Aminophenyl β -cellobioside as an affinity ligand for exo-type cellulases 245
- Lipopolysaccharide**
 Structural heterogeneity of the sialic-acid-containing oligosaccharides from the lipopolysaccharide of *Hafnia alvei* strain 2 as detected by FABMS studies 201
- Liquid crystals**
 Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177
- Long-chain alkyl**
 Decyl and dodecyl β -D-fructofuranosides 267
- Lyase**
 NMR spectroscopic characterisation of oligosaccharides from two *Ulva rigida* ulvan samples (Ulvales, Chlorophyta) degraded by a lyase 1
- Lyotropic and thermotropic liquid crystals**
 Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65
- Mechanism**
 Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157
- Methyl-6*R*-C-methyl-, -6*R*-C-ethyl-, and -6*R*-C-isopropyl- α -isomaltosides**
 Glucoamylase mutants with decreased K_m -values for C-6 substituted isomaltosides 127
- Moisture content**
 Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221
- Molecular mechanics**
 A comparison and chemometric analysis of several molecular mechanics force fields and parameter sets applied to carbohydrates 141
- myo-Inositol**
 A concise synthesis of *neo*-inositol 277
- N*-bromosuccinimide**
 Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157
- neo-Inositol**
 A concise synthesis of *neo*-inositol 277
- NMR**
 Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115
 NMR spectroscopic characterisation of oligosaccharides from two *Ulva rigida* ulvan samples (Ulvales, Chlorophyta) degraded by a lyase 1
- NMR spectroscopy**
 Structure of an extracellular polysaccharide produced by *Lactobacillus rhamnosus* strain C83 211
- Non-raw starch-adsorbing**
 Raw starch degradation by the non-raw starch-adsorbing bacterial alpha amylase of *Bacillus* sp. IMD 434 251
- Non-reducing galacto-oligosaccharides**
 α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101
- O-antigens**
 Conformational differences among mono- and oligosaccharide fragments of the O-specific polysaccharides of *Vibrio cholerae* O1 revealed by circular dichroism 135
- Oligogalactosylated glucoses**
 α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101
- Oligogalacturonic acids**
 Unsaturated oligogalacturonic acids are generated by in vitro treatment of pectin with human faecal flora 237
- Oligosaccharides**
 NMR spectroscopic characterisation of oligosaccharides from two *Ulva rigida* ulvan samples (Ulvales, Chlorophyta) degraded by a lyase 1
- Oligosaccharide synthesis**
 Multigram syntheses of the disaccharide repeating units of chondroitin 4- and 6-sulfates 283
- Oxidation**
 Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157
- p*-Aminophenyl β -cellobioside**
p-Aminophenyl β -cellobioside as an affinity ligand for exo-type cellulases 245
- PCA**
 A comparison and chemometric analysis of several molecular mechanics force fields and parameter sets applied to carbohydrates 141
- Pd(II) catalysis**
 Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157
- Pectate lyase**
 Unsaturated oligogalacturonic acids are generated by in vitro treatment of pectin with human faecal flora 237
- Pectin fermentation**
 Unsaturated oligogalacturonic acids are generated by in vitro treatment of pectin with human faecal flora 237
- Pectins**
 Synthesis of the two monomethyl esters of the disaccharide 4-*O*- α -D-galacturonosyl-D-galacturonic acid and of precursors for the preparation of higher oligomers methyl uronated in definite sequences 189
- Per-*O*-acylated hexofuranoses**
 An efficient route to per-*O*-acetylated hexofuranoses 79
- pH-Stability**
 Enhancement of pH-stability of a low molecular mass endoglucanase from *Fusarium oxysporum* by protein pegylation 95
- Polyethylene glycol**
 Enhancement of pH-stability of a low molecular mass endoglucanase from *Fusarium oxysporum* by protein pegylation 95
- Polysaccharides**
 Conformational differences among mono- and oligosaccharide fragments of the O-specific polysaccharides of *Vibrio cholerae* O1 revealed by circular dichroism 135
 Synthesis and serological characterization of L-glycero- α -D-mannoheptopyranose-containing di- and tri-saccharides of the non-reducing terminus of the *Escherichia coli* K-12 LPS core oligosaccharide 85
- Primary structure analysis**
 α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101
- Protein-carbohydrate interactions**
 Glucoamylase mutants with decreased K_m -values for C-6 substituted isomaltosides 127
- Raw starch-digesting**
 Raw starch degradation by the non-raw starch-adsorbing bacterial alpha amylase of *Bacillus* sp. IMD 434 251

Reducing sugars

Kinetics and mechanism of Pd(II) catalysed oxidation of D-arabinose, D-xylose and D-galactose by *N*-bromosuccinimide in acidic solution 157

Regioselectivity

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

Retrogradation

Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221

Separation

Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177

Short-chain fatty acids

Unsaturated oligogalacturonic acids are generated by in vitro treatment of pectin with human faecal flora 237

Sialic acid

Structural heterogeneity of the sialic-acid-containing oligosaccharides from the lipopolysaccharide of *Hafnia alvei* strain 2 as detected by FABMS studies 201

Structural analysis

Structure of an extracellular polysaccharide produced by *Lactobacillus rhamnosus* strain C83 211

Substrate specificity

Glucamylase mutants with decreased K_m -values for C-6 substituted isomaltosides 127

Subtilisin

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

Sugar chain extension

Synthesis and serological characterization of L-glycero- α -D-mannoheptopyranose-containing di- and tri-saccharides of the non-reducing terminus of the *Escherichia coli* K-12 LPS core oligosaccharide 85

Sugars with nitrogen replacing ring oxygen

Total syntheses of (+)- and (–)-1-deoxynojirimycin (1,5-dideoxy-1,5-imino-D- and L-glucitol) and of (+)- and (–)-1-deoxydonojirimycin (1,5-dideoxy-1,5-imino-D- and L-iditol) via furoisoxazoline-3-aldehydes 25

Sugar thiocyanates

An unprecedented access to trifluoromethylthiosugar derivatives from thiocyanate precursors upon treatment with trifluoromethyltrimethylsilane 37

Syntheses

Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177

Tetrachlorophthalimide

Access to tetrachlorophthalimide-protected ethyl 2-amino-2-deoxy-1-thio- β -D-glucopyranosides 273

1,3,4,6-Tetra-*O*-acetyl-2-amino-2-deoxy- β -D-glucose

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

Thioglycosides

Access to tetrachlorophthalimide-protected ethyl 2-amino-2-deoxy-1-thio- β -D-glucopyranosides 273

Synthesis of the two monomethyl esters of the disaccharide 4-*O*- α -D-galacturonosyl-D-galacturonic acid and of precursors for the

preparation of higher oligomers methyl uronated in definite sequences 189

Transesterification

Subtilisin-catalyzed esterification of di- and oligosaccharides containing a D-fructose moiety 259

Transgalactosylation

α -D-Glcp-(1 \leftrightarrow 1)- β -D-Galp-containing oligosaccharides, novel products from lactose by the action of β -galactosidase 101

Trichomonas vaginalis

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

Trifluoromethylthiosugars

An unprecedented access to trifluoromethylthiosugar derivatives from thiocyanate precursors upon treatment with trifluoromethyltrimethylsilane 37

Trifluoromethyltrimethylsilane

An unprecedented access to trifluoromethylthiosugar derivatives from thiocyanate precursors upon treatment with trifluoromethyltrimethylsilane 37

Tri-mannosyl-cyclomaltoheptaose

Isolation and characterization of di- and tri-mannosyl-cyclomaltoheptaoses (β -cyclodextrins) produced by reverse action of α -mannosidase from jack bean 115

Tubules

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

Ulvan

NMR spectroscopic characterisation of oligosaccharides from two *Ulva rigida* ulvan samples (Ulvales, Chlorophyta) degraded by a lyase 1

Ulva rigida

NMR spectroscopic characterisation of oligosaccharides from two *Ulva rigida* ulvan samples (Ulvales, Chlorophyta) degraded by a lyase 1

Ureido and thioureido derivatives

Synthesis and biological evaluation of ureido and thioureido derivatives of 2-amino-2-deoxy-D-glucose and related aminoalcohols as *N*-acetyl- β -D-hexosaminidase inhibitors 47

Vesicles

Synthesis and liquid-crystalline properties of novel archaeal diether-type glycolipids possessing one or two furanosyl units 65

Vibrio cholerae

Conformational differences among mono- and oligosaccharide fragments of the O-specific polysaccharides of *Vibrio cholerae* O1 revealed by circular dichroism 135

Waxy maize starch

Effects of moisture content and different gelatinization heating temperatures on retrogradation of waxy-type maize starches 221

X-ray

Preparation of alkyl α - and β -D-glucopyranosides, thermotropic properties and X-ray analysis 177

Xylosides

Chemical interconversions of 4-cyanophenyl 1,5-dithio- β -D-xylopyranoside (Beciparcel®): structural modification at the C-4 position 161
