

Subject Index of Volume 318

Acetalation

Synthesis and reactions of 1,5- and 1,3-dialkyl-(D-manno-pentitol-1-yl)-1*H*-1,2,4-triazole nucleosides derived from 1-(chloroalkyl)-1-aza-2-azoniaallene salts 67

3-Acetamido-3,6-dideoxy-D-glucose

Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146

α_1 -Acid glycoprotein

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 193

Acidic polysaccharides

Cartilage degradation by hyaluronate lyase and chondroitin ABC lyase: a MALDI-TOF mass spectrometric study 116

Active-latent

Active-latent glycosylation strategy toward Lewis X pentasaccharide in a form suitable for neoglycoconjugate syntheses 75

Acylic C-nucleosides

Synthesis and reactions of 1,5- and 1,3-dialkyl-(D-manno-pentitol-1-yl)-1*H*-1,2,4-triazole nucleosides derived from 1-(chloroalkyl)-1-aza-2-azoniaallene salts 67

Amphiphilic cyclodextrins

Cholesteryl-cyclodextrins: synthesis and insertion into phospholipid membranes 82

3,6-Anhydro-L-galactose

Anhydrous mercaptolysis of agar: an efficient preparation of 3,6-anhydro-L-galactose diethyl dithioacetal 154

Anomeric azides

Synthesis and structural studies of anomeric 2,3,4,6-tetra-O-acetyl-5-thio-D-glucopyranosyl azides 91

Antithrombotic

An improved synthesis of an umbelliferyl 5-thioxylopyranoside, precursor of the antithrombotic drug Iliparil 162

Arabinogalactans

Scope and limitation of the application of the (methoxydimethyl)methyl group in the synthesis of 2'-O-, 6'-O- and 2',6'-di-O-(α -L-arabinofuranosyl)- β -D-galactopyranosyl-(1 \rightarrow 6)-D-galactoses 98

Asymmetric synthesis

Synthesis of 3-C-(methyl β -D-xylofuranosid-3-yl)-5-phenyl-1,2,4-oxadiazole 157

Calcofluor white

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 193

Carbohydrates

D-Tagatose derivatives from D-fructose by a facile epimerisation procedure 167

Carbohydrates, spatial organization

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 193

Carbonates

Esterification of unprotected sucrose with acid chlorides in

aqueous medium: kinetic reactivity versus acyl- or alkoxycarbonyl-group migrations 52

Cartilage

Cartilage degradation by hyaluronate lyase and chondroitin ABC lyase: a MALDI-TOF mass spectrometric study 116

Cartilage components

Molecular dynamics of a tetrasaccharide subunit of chondroitin 4-sulfate in water 1

Chloral acetals

D-Tagatose derivatives from D-fructose by a facile epimerisation procedure 167

Chondroitin ABC lyase

Cartilage degradation by hyaluronate lyase and chondroitin ABC lyase: a MALDI-TOF mass spectrometric study 116

Chondroitin sulfate

Molecular dynamics of a tetrasaccharide subunit of chondroitin 4-sulfate in water 1

C-Nucleoside

Synthesis of 5-hydroxy-2-(β -D-ribofuranosyl)pyran-4-one from a pyranulose glycoside 180

Conformational analysis

Molecular dynamics of a tetrasaccharide subunit of chondroitin 4-sulfate in water 1

Solvent-dependent conformational behaviour of lipochitoligosaccharides related to Nod factors 10

Cumulenes

Synthesis and reactions of 1,5- and 1,3-dialkyl-(D-manno-pentitol-1-yl)-1*H*-1,2,4-triazole nucleosides derived from 1-(chloroalkyl)-1-aza-2-azoniaallene salts 67

Cycloadditions

Synthesis and reactions of 1,5- and 1,3-dialkyl-(D-manno-pentitol-1-yl)-1*H*-1,2,4-triazole nucleosides derived from 1-(chloroalkyl)-1-aza-2-azoniaallene salts 67

D-Fructose

D-Tagatose derivatives from D-fructose by a facile epimerisation procedure 167

D-Glucose

Enzyme modification of starch granules: in situ reaction of glucoamylase to give complete retention of D-glucose inside the granule 129

Dimerization

Scope and limitation of the application of the (methoxydimethyl)methyl group in the synthesis of 2'-O-, 6'-O- and 2',6'-di-O-(α -L-arabinofuranosyl)- β -D-galactopyranosyl-(1 \rightarrow 6)-D-galactoses 98

Dimerization and interconversion of DL-glyceraldehyde and 1,3-dihydroxyacetone

Investigation of DL-glyceraldehyde-dihydroxyacetone interconversion by FTIR spectroscopy 20

Diphosphate analogues

Syntheses of inhibitors for the enzyme thymidine 5'-diphosphate-glucose-4,6-dehydratase (EC 4.2.1.46) 38

Dissociation

Investigation of DL-glyceraldehyde–dihydroxyacetone interconversion by FTIR spectroscopy 20

Distribution

Investigation of the non-esterified galacturonic acid distribution in pectin with endopolygalacturonase 135

Dithioacetal

Anhydrous mercaptolysis of agar: an efficient preparation of 3,6-anhydro-L-galactose diethyl dithioacetal 154

Dog milk

Occurrence of an unusual lactose sulfate in dog milk 123

D-Tagatose

D-Tagatose derivatives from D-fructose by a facile epimerisation procedure 167

dTDP-Glucose-4,6-dehydratase (EC 4.2.1.46)

Syntheses of inhibitors for the enzyme thymidine 5'-diphosphate-glucose-4,6-dehydratase (EC 4.2.1.46) 38

Echinacea purpurea

Scope and limitation of the application of the (methoxydimethyl)methyl group in the synthesis of 2'-O-, 6'-O- and 2',6'-di-O-(α -L-arabinofuranosyl)- β -D-galactopyranosyl-(1 \rightarrow 6)-D-galactoses 98

Endopolygalacturonase

Investigation of the non-esterified galacturonic acid distribution in pectin with endopolygalacturonase 135

Enzyme inhibitors

Competitive inhibitors of yeast phosphoglucose isomerase: synthesis and evaluation of new types of phosphorylated sugars from the synthon D-arabinonolactone-5-phosphate 110

Epimerisation

D-Tagatose derivatives from D-fructose by a facile epimerisation procedure 167

Esters

Esterification of unprotected sucrose with acid chlorides in aqueous medium: kinetic reactivity versus acyl- or alkyloxycarbonyl-group migrations 52

Fluorescence intensity quenching

Interaction between calcofluor white and carbohydrates of α_1 -acid glycoprotein 193

Fluoroalkyl and fluoroaryl glycosides

A convenient synthesis of fluoroalkyl and fluoroaryl glycosides using Mitsunobu conditions 171

Formation of D-glucose inside the granule

Enzyme modification of starch granules: in situ reaction of glucoamylase to give complete retention of D-glucose inside the granule 129

FTIR analysis

Investigation of DL-glyceraldehyde–dihydroxyacetone interconversion by FTIR spectroscopy 20

Gel-permeation chromatography

Control of enzymatic degradation of hyaluronan by divalent cations 26

Glycosylation

A convenient synthesis of fluoroalkyl and fluoroaryl glycosides using Mitsunobu conditions 171

Active–latent glycosylation strategy toward Lewis X pentasaccharide in a form suitable for neoglycoconjugate syntheses 75

An improved synthesis of an umbelliferyl 5-thioxylopyranoside, precursor of the antithrombotic drug Iliparcil 162

HPLC

Investigation of the non-esterified galacturonic acid distribution in pectin with endopolygalacturonase 135

Hyaluronan

Control of enzymatic degradation of hyaluronan by divalent cations 26

Hyaluronidase

Control of enzymatic degradation of hyaluronan by divalent cations 26

Hydration

Molecular dynamics of a tetrasaccharide subunit of chondroitin 4-sulfate in water 1

Hydroxamic acids

Competitive inhibitors of yeast phosphoglucose isomerase: synthesis and evaluation of new types of phosphorylated sugars from the synthon D-arabinonolactone-5-phosphate 110

Isocarbonucleoside

Synthesis of 3-C-(methyl β -D-xylofuranosid-3-yl)-5-phenyl-1,2,4-oxadiazole 157

Lactose 3'-sulfate

Occurrence of an unusual lactose sulfate in dog milk 123

Lewis X

Active–latent glycosylation strategy toward Lewis X pentasaccharide in a form suitable for neoglycoconjugate syntheses 75

Lipopolysaccharide

Structure and cross-reactivity of the O-antigen of *Proteus vulgaris* O8 186

Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146

MALDI-TOF mass spectrometry.

Cartilage degradation by hyaluronate lyase and chondroitin ABC lyase: a MALDI-TOF mass spectrometric study 116

Mercaptolysis

Anhydrous mercaptolysis of agar: an efficient preparation of 3,6-anhydro-L-galactose diethyl dithioacetal 154

(Methoxydimethyl)methyl ethers

Scope and limitation of the application of the (methoxydimethyl)methyl group in the synthesis of 2'-O-, 6'-O- and 2',6'-di-O-(α -L-arabinofuranosyl)- β -D-galactopyranosyl-(1 \rightarrow 6)-D-galactoses 98

Methyl ester

Investigation of the non-esterified galacturonic acid distribution in pectin with endopolygalacturonase 135

Migration

Esterification of unprotected sucrose with acid chlorides in aqueous medium: kinetic reactivity versus acyl- or alkyloxycarbonyl-group migrations 52

Mitsunobu reaction

A convenient synthesis of fluoroalkyl and fluoroaryl glycosides using Mitsunobu conditions 171

Molecular dynamics

Molecular dynamics of a tetrasaccharide subunit of chondroitin 4-sulfate in water 1

Solvent-dependent conformational behaviour of lipochitoligosaccharides related to Nod factors 10

Neighboring-group participation effect

Synthesis of 3-C-(methyl β -D-xylofuranosid-3-yl)-5-phenyl-1,2,4-oxadiazole 157

4-Nitrophenyl thioglycoside

Active–latent glycosylation strategy toward Lewis X pentasaccharide in a form suitable for neoglycoconjugate syntheses 75

NMR

Synthesis and structural studies of anomeric 2,3,4,6-tetra-O-acetyl-5-thio-D-glucopyranosyl azides 91

NMR data

Occurrence of an unusual lactose sulfate in dog milk 123

- NMR spectroscopy
Cholesteryl-cyclodextrins: synthesis and insertion into phospholipid membranes 82
- Nodulation factors
Solvent-dependent conformational behaviour of lipochitoligosaccharides related to Nod factors 10
- Nuclear magnetic resonance
Solvent-dependent conformational behaviour of lipochitoligosaccharides related to Nod factors 10
- Nucleoside diphosphate
Syntheses of inhibitors for the enzyme thymidine 5'-diphosphate-glucose-4,6-dehydratase (EC 4.2.1.46) 38
- O-Acetylation
Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146
- O-Antigen
Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146
- Oligosaccharides
Scope and limitation of the application of the (methoxydimethyl)methyl group in the synthesis of 2'-O-, 6'-O- and 2',6'-di-O-(α -L-arabinofuranosyl)- β -D-galactopyranosyl-(1 \rightarrow 6)-D-galactoses 98
- Oligosaccharide structure
Occurrence of an unusual lactose sulfate in dog milk 123
- O-Specific polysaccharide
Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146
- O-Specific polysaccharide structure
Structure and cross-reactivity of the O-antigen of *Proteus vulgaris* O8 186
- Pectin
Investigation of the non-esterified galacturonic acid distribution in pectin with endopolygalacturonase 135
- Pentasaccharide
Active-latent glycosylation strategy toward Lewis X pentasaccharide in a form suitable for neoglycoconjugate syntheses 75
- Perfusion anion-exchange chromatography
Control of enzymatic degradation of hyaluronan by divalent cations 26
- Phosphoglucose isomerase
Competitive inhibitors of yeast phosphoglucose isomerase: synthesis and evaluation of new types of phosphorylated sugars from the synthon D-arabinonolactone-5-phosphate 110
- Phospholipid bilayers
Cholesteryl-cyclodextrins: synthesis and insertion into phospholipid membranes 82
- Proteus vulgaris*
Structure and cross-reactivity of the O-antigen of *Proteus vulgaris* O8 186
Structure of a new acidic O-antigen of *Proteus vulgaris* O22 containing O-acetylated 3-acetamido-3,6-dideoxy-D-glucose 146
- Pyran-4-one
Synthesis of 5-hydroxy-2-(β -D-ribofuranosyl)pyran-4-one from a pyranulose glycoside 180
- Pyranulose glycoside
Synthesis of 5-hydroxy-2-(β -D-ribofuranosyl)pyran-4-one from a pyranulose glycoside 180
- Pyridazin-4-one
Synthesis of 5-hydroxy-2-(β -D-ribofuranosyl)pyran-4-one from a pyranulose glycoside 180
- Serological cross-reactivity
Structure and cross-reactivity of the O-antigen of *Proteus vulgaris* O8 186
- Spacer-modified nucleobases
Syntheses of inhibitors for the enzyme thymidine 5'-diphosphate-glucose-4,6-dehydratase (EC 4.2.1.46) 38
- Starch granules
Enzyme modification of starch granules: in situ reaction of glucoamylase to give complete retention of D-glucose inside the granule 129
- Sucrose
Esterification of unprotected sucrose with acid chlorides in aqueous medium: kinetic reactivity versus acyl- or alkoxycarbonyl-group migrations 52
- Sugar nitrile
Synthesis and reactions of 1,5- and 1,3-dialkyl-(D-manno-pentitol-1-yl)-1*H*-1,2,4-triazole nucleosides derived from 1-(chloroalkyl)-1-aza-2-azoniaallene salts 67
- Sugar phosphates
Competitive inhibitors of yeast phosphoglucose isomerase: synthesis and evaluation of new types of phosphorylated sugars from the synthon D-arabinonolactone-5-phosphate 110
- Synthesis
Synthesis of 5-hydroxy-2-(β -D-ribofuranosyl)pyran-4-one from a pyranulose glycoside 180
- Testicular hyaluronate lyase
Cartilage degradation by hyaluronate lyase and chondroitin ABC lyase: a MALDI-TOF mass spectrometric study 116
- 5-Thio-D-glucopyranose
Synthesis and structural studies of anomeric 2,3,4,6-tetra-O-acetyl-5-thio-D-glucopyranosyl azides 91
- 5-Thioxyloside
An improved synthesis of an umbelliferyl 5-thioxylopyranoside, precursor of the antithrombotic drug Iliparil 162
- trans*-Enediol
Investigation of DL-glyceraldehyde-dihydroxyacetone interconversion by FTIR spectroscopy 20
- X-ray crystal structure
Synthesis and structural studies of anomeric 2,3,4,6-tetra-O-acetyl-5-thio-D-glucopyranosyl azides 91
- X-ray scattering
Cholesteryl-cyclodextrins: synthesis and insertion into phospholipid membranes 82
- Xylosyl 1,2,4-oxadiazole derivatives
Synthesis of 3-C-(methyl β -D-xylofuranosid-3-yl)-5-phenyl-1,2,4-oxadiazole 157
- Zinc oxide
An improved synthesis of an umbelliferyl 5-thioxylopyranoside, precursor of the antithrombotic drug Iliparil 162
