

Subject Index of Volume 324

Acyl chlorides

Syntheses of amphiphilic glycosylamides from glycosyl azides without transient reduction to glycosylamines 97

Albizia julibrissin

Two diastereomeric saponins with cytotoxic activity from *Albizia julibrissin* 182

Ammonium galactarate

Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45

Anomerization

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Azidation, stereoselective

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Barium galactarate monohydrate

Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45

Blood groups A and B

Enzymatic synthesis of blood group A and B trisaccharide analogues 161

Calcium galactarate tetrahydrate

Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45

6-C-Alkyl carbohydrate

A new 6-C-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66

Carbon–carbon bond

A new 6-C-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66

Carboxymethylation

Synthesis and preliminary characterisation of charged derivatives and hydrogels from scleroglucan 116

Ceramide structure

Complete 1H and ^{13}C NMR assignment of mono-sulfated galactosylceramides with four types of ceramides from human kidney 218

Ce^{3+} –saccharide complexes

Lanthanide–saccharide chemistry: synthesis and characterisation of $Ce(III)$ –saccharide complexes 30

C-Glycosides

Unexpected formation of glycals upon attempted C-alkylation of protected glycosylacetynes 210

Chelation

Preparation of some starch-based neutral chelating agents 189

Chelation by saccharide molecules

Lanthanide–saccharide chemistry: synthesis and characterisation of $Ce(III)$ –saccharide complexes 30

Chemoenzymatic synthesis

A short, stereoselective synthesis of *neo*-inositol 200

Chitin

A simple preparation of half N-acetylated chitosan highly soluble in water and aqueous organic solvents 268

Chitosan

A simple preparation of half N-acetylated chitosan highly soluble in water and aqueous organic solvents 268

7-Chloro and 7-methyl analogues

Synthesis and 1H NMR studies of 3-(D-*erythro*-glycerol-1-yl)-1*H*-pyrazolo[3,4-*b*]quinoxaline and its 7-chloro and 7-methyl analogues 1

Chromium

The reduction of Cr^{VI} to Cr^{III} by the α and β anomers of D-glucose in dimethyl sulfoxide. A comparative kinetic and mechanistic study 127

^{13}C -Labeling

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the O-specific polysaccharide of *Shigella dysenteriae* type 1 53

Complex

Preparation and characterisation of copper(II) hyaluronate 275

Conformation

Conformational studies of the glycopeptide Ac-Tyr-[Man₂GlcNAc- β -(1 \rightarrow 4)GlcNAc- β -(1 \rightarrow N⁶)]-Asn-Leu-Thr-Ser-OBz and the constituent peptide and oligosaccharide 242

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the O-specific polysaccharide of *Shigella dysenteriae* type 1 53

Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231

Synthesis and preliminary characterisation of charged derivatives and hydrogels from scleroglucan 116

Copper(II) hyaluronate

Preparation and characterisation of copper(II) hyaluronate 275

Cyclic sulfate

A new 6-C-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66

Cyclitols

A short, stereoselective synthesis of *neo*-inositol 200

α -Cyclodextrin

Topography of the 1:1 α -cyclodextrin–nitromethane inclusion complex 141

Cyclohexadienediol

A short, stereoselective synthesis of *neo*-inositol 200

cyclo-Triphosphate

A one-step phosphorylation of D-aldoheptoses and D-aldoheptoses with inorganic *cyclo*-triphosphate 10

Cytotoxicity

Two diastereomeric saponins with cytotoxic activity from *Albizia julibrissin* 182

β -D-Aldopyranosyl 1-triphosphate

A one-step phosphorylation of D-aldoheptoses and D-aldoheptoses with inorganic *cyclo*-triphosphate 10

- d-Character for the unpaired electron in Ce^{3+}
Lanthanide–saccharide chemistry: synthesis and characterisation of Ce(III)–saccharide complexes 30
- Degree of N-acetylation
A simple preparation of half N-acetylated chitosan highly soluble in water and aqueous organic solvents 268
- Deoxy galactoside
Hydrolytic activity of α -galactosidases against deoxy derivatives of *p*-nitrophenyl α -D-galactopyranoside 107
- Diastereomer
Two diastereomeric saponins with cytotoxic activity from *Albizia julibrissin* 182
- 2',6'-Di-*O*-benzyl-2,3:5,6:3',4'-tri-*O*-isopropylidenelactose dimethyl acetal
Selective deprotection of 2',6'-di-*O*-benzyl-2,3:5,6:3',4'-tri-*O*-isopropylidenelactose dimethyl acetal 204
- 1,3-Dithiane
A new 6-*C*-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66
- Dry state
Preparation of some starch-based neutral chelating agents 189
- Enantioselective HPLC
Synthesis and silica-based immobilization of monofunctionalized cyclomaltoheptaose derivatives for enantioselective HPLC 75
- Enzymes
Enzymatic synthesis of blood group A and B trisaccharide analogues 161
- Enzymic modification
Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B39 170
- Epitope specificity
Bivalency and epitope specificity of a high-affinity IgG3 monoclonal antibody to the *Streptococcus* Group A carbohydrate antigen. Molecular modeling of a Fv fragment 17
- Erwinia chrysanthemi*
Extracellular polysaccharide of *Erwinia chrysanthemi* A350 and ribotyping of *Erwinia chrysanthemi* spp. 255
- EXAFS
Preparation and characterisation of copper(II) hyaluronate 275
- Exopolysaccharide
Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B39 170
- Extracellular polysaccharide
Extracellular polysaccharide of *Erwinia chrysanthemi* A350 and ribotyping of *Erwinia chrysanthemi* spp. 255
- FT-IR
Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45
- Galactaric acid
Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45
- α -Galactosidase
Hydrolytic activity of α -galactosidases against deoxy derivatives of *p*-nitrophenyl α -D-galactopyranoside 107
- Galactosyl sulfate
Complete 1H and ^{13}C NMR assignment of mono-sulfated galactosylceramides with four types of ceramides from human kidney 218
- Glucose anomers
The reduction of Cr^{VI} to Cr^{III} by the α and β anomers of D-glucose in dimethyl sulfoxide. A comparative kinetic and mechanistic study 127
- Glycals
Unexpected formation of glycals upon attempted C-alkylation of protected glycosylacetates 210
- Glycopeptides
Conformational studies of the glycopeptide Ac-Tyr-[Man₅-GlcNAc- β -(1 \rightarrow 4)GlcNAc- β -(1 \rightarrow N⁶)]-Asn-Leu-Thr-Ser-OBz and the constituent peptide and oligosaccharide 242
- Glycosylacetates
Unexpected formation of glycals upon attempted C-alkylation of protected glycosylacetates 210
- Glycosylamides
Syntheses of amphiphilic glycosylamides from glycosyl azides without transient reduction to glycosylamines 97
- Glycosylation
Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231
- Glycosyl azides
Syntheses of amphiphilic glycosylamides from glycosyl azides without transient reduction to glycosylamines 97
- Glycosyltransferases
Enzymatic synthesis of blood group A and B trisaccharide analogues 161
- Group A *Streptococcus* polysaccharide
Bivalency and epitope specificity of a high-affinity IgG3 monoclonal antibody to the *Streptococcus* Group A carbohydrate antigen. Molecular modeling of a Fv fragment 17
- Half N-acetylated chitosan
A simple preparation of half N-acetylated chitosan highly soluble in water and aqueous organic solvents 268
- 1H and ^{13}C NMR
Complete 1H and ^{13}C NMR assignment of mono-sulfated galactosylceramides with four types of ceramides from human kidney 218
- Heavy-metal sorption
Preparation of some starch-based neutral chelating agents 189
- Heptasaccharide
Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231
- High-performance size-exclusion chromatography
Size-exclusion chromatography study of the molecular-weight distribution of γ -irradiated pullulan 283
- Homology modeling
Bivalency and epitope specificity of a high-affinity IgG3 monoclonal antibody to the *Streptococcus* Group A carbohydrate antigen. Molecular modeling of a Fv fragment 17
- IgG3 monoclonal antibody
Bivalency and epitope specificity of a high-affinity IgG3 monoclonal antibody to the *Streptococcus* Group A carbohydrate antigen. Molecular modeling of a Fv fragment 17
- Immobilized chiral stationary phases
Synthesis and silica-based immobilization of monofunctionalized cyclomaltoheptaose derivatives for enantioselective HPLC 75
- Inositols
A short, stereoselective synthesis of *neo*-inositol 200
- γ -Irradiated pullulan
Size-exclusion chromatography study of the molecular-weight distribution of γ -irradiated pullulan 283
- Julibroside J₁
Two diastereomeric saponins with cytotoxic activity from *Albizia julibrissin* 182
- Julibroside J₉
Two diastereomeric saponins with cytotoxic activity from *Albizia julibrissin* 182

Lactococcus lactis subsp. *cremoris*

Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B39 170

Lanthanum galactarate 6.5 hydrate

Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45

Lewis^x

Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231

Lipid A

Synthesis and biological activities of lipid A-type pyranocarboxylic acid derivatives 225

Long-range proton–proton coupling constant

Complete 1H and ^{13}C NMR assignment of mono-sulfated galactosylceramides with four types of ceramides from human kidney 218

LPS antagonist

Synthesis and biological activities of lipid A-type pyranocarboxylic acid derivatives 225

Melamine

Preparation of some starch-based neutral chelating agents 189

Metal-ion-induced ^{13}C NMR shifts

Lanthanide–saccharide chemistry: synthesis and characterisation of Ce(III)–saccharide complexes 30

2-Methoxypropene

Selective deprotection of 2',6'-di-*O*-benzyl-2,3:5,6:3',4'-tri-*O*-isopropylidenelactose dimethyl acetal 204

Methyl mannofuranoside

A new 6-*C*-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66

Migration of TBDMS group

Synthesis and silica-based immobilization of monofunctionalized cyclomaltoheptaose derivatives for enantioselective HPLC 75

Molecular weight

A simple preparation of half N-acetylated chitosan highly soluble in water and aqueous organic solvents 268

Molecular-weight distribution

Size-exclusion chromatography study of the molecular-weight distribution of γ -irradiated pullulan 283

Monofunctionalized cyclomaltoheptaose (β -cyclodextrin) derivatives

Synthesis and silica-based immobilization of monofunctionalized cyclomaltoheptaose derivatives for enantioselective HPLC 75

Multivalent interactions

Bivalency and epitope specificity of a high-affinity IgG3 monoclonal antibody to the *Streptococcus* Group A carbohydrate antigen. Molecular modeling of a Fv fragment 17

Mycobacterium vaccae

Isolation and identification of poly- α -(1 \rightarrow 4)-linked 3-*O*-methyl-D-mannopyranose from a hot-water extract of *Mycobacterium vaccae* 38

neo-Inositol

A short, stereoselective synthesis of *neo*-inositol 200

N-glycosylation

Conformational studies of the glycopeptide Ac-Tyr-[Man₂GlcNAc- β -(1 \rightarrow 4)GlcNAc- β -(1 \rightarrow N⁶)]-Asn-Leu-Thr-Ser-OBz and the constituent peptide and oligosaccharide 242

Nitromethane inclusion complex

Topography of the 1:1 α -cyclodextrin–nitromethane inclusion complex 141

NMR spectroscopy

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the O-specific polysaccharide of *Shigella dysenteriae* type 1 53

Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231

Octasaccharide

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the O-specific polysaccharide of *Shigella dysenteriae* type 1 53

Optical rotation

Phase separation in the mixture of schizophyllan and poly(ethylene oxide) in aqueous solution driven by a specific interaction between the glucose side chain and poly(ethylene oxide) 136

Oxonium ions

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Phase separation

Phase separation in the mixture of schizophyllan and poly(ethylene oxide) in aqueous solution driven by a specific interaction between the glucose side chain and poly(ethylene oxide) 136

Phosphorylation

A one-step phosphorylation of D-aldoheptoses and D-allopentoses with inorganic *cyclo*-triphosphate 10

Poly(ethylene oxide)

Phase separation in the mixture of schizophyllan and poly(ethylene oxide) in aqueous solution driven by a specific interaction between the glucose side chain and poly(ethylene oxide) 136

Poly- α -(1 \rightarrow 4)-3-*O*-methyl mannopyranose

Isolation and identification of poly- α -(1 \rightarrow 4)-linked 3-*O*-methyl-D-mannopyranose from a hot-water extract of *Mycobacterium vaccae* 38

Polysaccharide modification

Synthesis and preliminary characterisation of charged derivatives and hydrogels from scleroglucan 116

Potassium galactarate

Sugar interaction with metal ions. FT-IR study on the structure of crystalline galactaric acid and its K^+ , NH_4^+ , Ca^{2+} , Ba^{2+} , and La^{3+} complexes 45

Protein–polysaccharide complex

Isolation and identification of poly- α -(1 \rightarrow 4)-linked 3-*O*-methyl-D-mannopyranose from a hot-water extract of *Mycobacterium vaccae* 38

Pseudo-*C*-disaccharide

A new 6-*C*-alkylation from an alkyl mannofuranoside 5,6-cyclic sulfate 66

Pyranocarboxylic acid

Synthesis and biological activities of lipid A-type pyranocarboxylic acid derivatives 225

Pyrazolo[3,4-*b*]quinoxaline

Synthesis and 1H NMR studies of 3-(D-*erythro*-glycerol-1-yl)-1*H*-pyrazolo[3,4-*b*]quinoxaline and its 7-chloro and 7-methyl analogues 1

Quinoxaline

Synthesis and 1H NMR studies of 3-(D-*erythro*-glycerol-1-yl)-1*H*-pyrazolo[3,4-*b*]quinoxaline and its 7-chloro and 7-methyl analogues 1

Redox mechanism

The reduction of Cr^{VI} to Cr^{III} by the α and β anomers of D-glucose in dimethyl sulfoxide. A comparative kinetic and mechanistic study 127

Restrained molecular dynamics

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the O-specific polysaccharide of *Shigella dysenteriae* type 1 53

Ribotyping

Extracellular polysaccharide of *Erwinia chrysanthemi* A350 and ribotyping of *Erwinia chrysanthemi* spp. 255

ROESY

Conformational studies of the glycopeptide Ac-Tyr-[Man₅GlcNAc-β-(1 → 4)GlcNAc-β-(1 → N⁶)]-Asn-Leu-Thr-Ser-OBz and the constituent peptide and oligosaccharide 242

Saintpaulia

Extracellular polysaccharide of *Erwinia chrysanthemi* A350 and ribotyping of *Erwinia chrysanthemi* spp. 255

Schizophyllan

Phase separation in the mixture of schizophyllan and poly(ethylene oxide) in aqueous solution driven by a specific interaction between the glucose side chain and poly(ethylene oxide) 136

Selective isopropylidenation

Selective deprotection of 2',6'-di-*O*-benzyl-2,3:5,6:3',4'-tri-*O*-isopropylidenelactose dimethyl acetal 204

Selective *O*-deisopropylidenation

Selective deprotection of 2',6'-di-*O*-benzyl-2,3:5,6:3',4'-tri-*O*-isopropylidenelactose dimethyl acetal 204

Shigella dysenteriae type 1

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the *O*-specific polysaccharide of *Shigella dysenteriae* type 1 53

Simulated annealing

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the *O*-specific polysaccharide of *Shigella dysenteriae* type 1 53

Solubility

A simple preparation of half *N*-acetylated chitosan highly soluble in water and aqueous organic solvents 268

Specific interaction

Phase separation in the mixture of schizophyllan and poly(ethylene oxide) in aqueous solution driven by a specific interaction between the glucose side chain and poly(ethylene oxide) 136

SSEA-1

Synthesis and NMR study of a heptasaccharide, epitope of the stage-specific embryonic antigen-1 (SSEA-1) 231

Stannic chloride catalysis

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Starch

Preparation of some starch-based neutral chelating agents 189

Staudinger reaction

Syntheses of amphiphilic glycosylamides from glycosyl azides without transient reduction to glycosylamines 97

Structural analysis

Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B39 170

Structure

Extracellular polysaccharide of *Erwinia chrysanthemi* A350 and ribotyping of *Erwinia chrysanthemi* spp. 255

Substrate specificity

Hydrolytic activity of α-galactosidases against deoxy derivatives of *p*-nitrophenyl α-D-galactopyranoside 107

Synthesis

Hydrolytic activity of α-galactosidases against deoxy derivatives of *p*-nitrophenyl α-D-galactopyranoside 107

Isolation and identification of poly-α-(1 → 4)-linked 3-*O*-methyl-D-mannopyranose from a hot-water extract of *Mycobacterium vaccae* 38

TEMPO-mediated oxidation

Synthesis and preliminary characterisation of charged derivatives and hydrogels from scleroglucan 116

Thiourea

Preparation of some starch-based neutral chelating agents 189

TNFα production

Synthesis and biological activities of lipid A-type pyranocarboxylic acid derivatives 225

TOCSY

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the *O*-specific polysaccharide of *Shigella dysenteriae* type 1 53

1,2-trans Glycofuranosyl azides, synthesis

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Trimethylsilyl triflate catalysis

Studies on the origin of stereoselectivity in the synthesis of 1,2-trans glycofuranosyl azides 149

Triphenylphosphine

Syntheses of amphiphilic glycosylamides from glycosyl azides without transient reduction to glycosylamines 97

Trisaccharide analogs

Enzymatic synthesis of blood group A and B trisaccharide analogues 161

T-ROESY

NMR spectroscopy, molecular dynamics, and conformation of a synthetic octasaccharide fragment of the *O*-specific polysaccharide of *Shigella dysenteriae* type 1 53

Ugi four-component condensation

Synthesis and preliminary characterisation of charged derivatives and hydrogels from scleroglucan 116

Urea

Preparation of some starch-based neutral chelating agents 189

UV-Vis

Preparation and characterisation of copper(II) hyaluronate 275
