

Subject Index of Volume 326

Acceptor, enzyme

Synthesis and enzymatic evaluation of modified acceptors of recombinant blood group A and B glycosyltransferases 1

2-Acetamido-2,4-dideoxy-4-fluoro-D-galactopyranose derivatives

Synthesis of 4-deoxy-4-fluoro analogues of 2-acetamido-2-deoxy-D-glucose and 2-acetamido-2-deoxy-D-galactose and their effects on cellular glycosaminoglycan biosynthesis 250

2-Acetamido-2,4-dideoxy-4-fluoro-D-glucopyranose derivatives

Synthesis of 4-deoxy-4-fluoro analogues of 2-acetamido-2-deoxy-D-glucose and 2-acetamido-2-deoxy-D-galactose and their effects on cellular glycosaminoglycan biosynthesis 250

Affinity to monomeric units of substrates

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Alditols

The solvent-free thermal dehydration of tetrutols on zeolites 241

Allergy

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

All-trans zigzag conformation

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

AMB99C

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1 \rightarrow 4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Amylases

Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130

Amylopectin

Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130

5,6-Anhydro-D-galactose, protected

Synthesis of 5-thio-L-altrose 323

1,2-Anhydro sugar

A facile synthesis of 1-(5'-O-acetyl-3'-O-benzyl- β -D-xylofuranosyl)thymidine: a potentially viable intermediate for the preparation of the anti-AIDS drugs, AZT and D4T 235

Anhydro sugars

Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81

Antibodies

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

Bound conformation

Determination of the solution conformation of D-glucodihydroacrose, a high-affinity inhibitor bound to glucoamylase by transferred NOE NMR spectroscopy 50

[But-2-en-1-yl]quinoxalin-2(1H)one

Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34

Carbohydrates

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

¹³C–¹³C coupling

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

Cellulose

Synthesis, control of substitution pattern and phase transitions of 2,3-di-O-methylcellulose 67

Characteristic of active sites

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Chitin

Physicochemical behaviour of chitin gels 295

Chitosan

Physicochemical behaviour of chitin gels 295

Chondroitin 4- and 6-sulfate

Syntheses of chondroitin 4- and 6-sulfate pentasaccharide derivatives having a methyl β -D-glucopyranosiduronic acid at the reducing end 88

Cluster structure

Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130

Conformation

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1 \rightarrow 4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Molecular dynamics simulations of cyclohenicosakis-[(1 \rightarrow 2)- β -D-glucosyl-henicosapyranosyl], a cyclic (1 \rightarrow 2)- β -D-glucan (a 'cyclosophoraose') of DP 21 227

Conformation and configuration

The synthesis and structure of the derivatives of 2-deoxy-2-hydroxyimino-D-lyxo-hexopyranosyl-L-cysteine and -thiophenol 151

Conformation: 5,6-Dideoxy-5,6-epithio-L-altrose, protected

Synthesis of 5-thio-L-altrose 323

Core

The structure of the core part of *Proteus penneri* strain 16 lipopolysaccharide 185

Crystallization

Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130

Crystal structure

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

Cyclic (1 \rightarrow 2)- β -D-glucan

Molecular dynamics simulations of cyclohenicosakis-[(1 \rightarrow 2)- β -D-glucosyl-henicosapyranosyl], a cyclic (1 \rightarrow 2)- β -D-glucan (a 'cyclosophoraose') of DP 21 227

Cyclodextrins

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Cyclomaltooligosaccharides

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Cyclosophoraose

Molecular dynamics simulations of cyclohenicosakis-[(1→2)- β -D-*gluco*-henicosapyranosyl], a cyclic (1→2)- β -D-glucan (a 'cyclosophoraose') of DP 21 227

Degradation analysis

Synthesis, control of substitution pattern and phase transitions of 2,3-di-*O*-methylcellulose 67

2-Deoxy-2-hydroxyimino sugars

The synthesis and structure of the derivatives of 2-deoxy-2-hydroxyimino-D-*lyxo*-hexopyranosyl-L-cysteine and -thiophenol 151

D-Gluco-dihydroacarbose

Determination of the solution conformation of D-*gluco*-dihydroacarbose, a high-affinity inhibitor bound to glucoamylase by transferred NOE NMR spectroscopy 50

2,3-Dihydrofuro[2,3-*b*]quinoxaline

Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34

Disaccharide

Novel 4-thiogalactofuranosyl-containing disaccharides with nitrogen in the interglycosidic linkage 145

Distribution

Characterization of non-esterified galacturonic acid sequences in pectin with endopolygalacturonase 120

D,L-Threitol

The solvent-free thermal dehydration of tetritols on zeolites 241

Dot blots

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

D-[U-¹³C]sucrose

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

Dynamics

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Endopolygalacturonase

Characterization of non-esterified galacturonic acid sequences in pectin with endopolygalacturonase 120

Enzyme

Synthesis and enzymatic evaluation of modified acceptors of recombinant blood group A and B glycosyltransferases 1

Enzyme specificity

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Epithio sugars

Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81

Erythritol

The solvent-free thermal dehydration of tetritols on zeolites 241
exo-Anomeric effect

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Exopolysaccharide

Structural elucidation of the viscous exopolysaccharide produced by *Lactobacillus helveticus* Lb161 113

Force field

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Furanose–pyranose equilibria

Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81

1-Galactosamide bolaamphiphile

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

Glucoamylase

Determination of the solution conformation of D-*gluco*-dihydroacarbose, a high-affinity inhibitor bound to glucoamylase by transferred NOE NMR spectroscopy 50

Glucosidase

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Glucosyltransferase

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

Glycosaminoglycans

Syntheses of chondroitin 4- and 6-sulfate pentasaccharide derivatives having a methyl β -D-glucopyranosiduronic acid at the reducing end 88

Synthesis of 4-deoxy-4-fluoro analogues of 2-acetamido-2-deoxy-D-glucose and 2-acetamido-2-deoxy-D-galactose and their effects on cellular glycosaminoglycan biosynthesis 250

Glycosidase inhibitor

Determination of the solution conformation of D-*gluco*-dihydroacarbose, a high-affinity inhibitor bound to glucoamylase by transferred NOE NMR spectroscopy 50

Glycosidase inhibitors

Syntheses of sugar-related trihydroxyazepanes from simple carbohydrates and their activities as reversible glycosidase inhibitors 22

Glycosyltransferase

Synthesis and enzymatic evaluation of modified acceptors of recombinant blood group A and B glycosyltransferases 1

Heteroanalogues

Novel 4-thiogalactofuranosyl-containing disaccharides with nitrogen in the interglycosidic linkage 145

HF/6-31G*

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

HPAEC

Characterization of non-esterified galacturonic acid sequences in pectin with endopolygalacturonase 120

Human blood group

Synthesis and enzymatic evaluation of modified acceptors of recombinant blood group A and B glycosyltransferases 1

Hydrazinolysis

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

Hydrogen-bond network

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

Isomaltase

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Kink conformation

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

Lactobacillus helveticus

Structural elucidation of the viscous exopolysaccharide produced by *Lactobacillus helveticus* Lb161 113

L-Ascorbic acid

Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34

Layered assembly

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

L-Cysteine and thiophenol derivatives

The synthesis and structure of the derivatives of 2-deoxy-2-hydroxyimino-D-lyxo-hexopyranosyl-L-cysteine and -thiophenol 151

Lectins

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

LPS

The structure of the core part of *Proteus penneri* strain 16 lipopolysaccharide 185

Maize

Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130

Maltase

Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264

Maltose

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

2-Methoxytetrahydrofuran

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

2-Methoxytetrahydropyran

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Methylation

Synthesis, control of substitution pattern and phase transitions of 2,3-di-O-methylcellulose 67

Methyl ester

Characterization of non-esterified galacturonic acid sequences in pectin with endopolygalacturonase 120

MM3

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Modeling

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Molecular dynamics

Molecular dynamics simulations of cyclohenicosakis-[(1→2)- β -D-glucosyl-henicosapyranosyl], a cyclic (1→2)- β -D-glucan (a 'cyclodextrin') of DP 21 227

Molecular mechanics

Computational studies on carbohydrates: in vacuo studies using a revised AMBER force field, AMB99C, designed for α -(1→4) linkages 194

Computational studies on carbohydrates: solvation studies on maltose and cyclomaltooligosaccharides (cyclodextrins) using a DFT/ab initio-derived empirical force field, AMB99C 210

Molecular sieves

The solvent-free thermal dehydration of tetritols on zeolites 241

Monosaccharide oximes

Schiff bases or glycosylamines: crystal and molecular structures of four derivatives of D-mannose 104

Monosaccharide semicarbazide derivatives

Schiff bases or glycosylamines: crystal and molecular structures of four derivatives of D-mannose 104

Mucin

Analysis of pigeon intestinal mucin allergens using a novel dot blot assay 43

Mutan

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

Mutansucrase

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

N-arylmannopyranosylamines

Schiff bases or glycosylamines: crystal and molecular structures of four derivatives of D-mannose 104

Nigerooligosaccharide

Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98

NMR

Structural elucidation of the viscous exopolysaccharide produced by *Lactobacillus helveticus* Lb161 113

Synthesis, control of substitution pattern and phase transitions of 2,3-di-O-methylcellulose 67

NMR spectroscopy

Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277

Non-additivity

A QM/MM analysis of the conformations of crystalline sucrose moieties 305

Nucleoside

A facile synthesis of 1-(5'-O-acetyl-3'-O-benzyl- β -D-xylofuranosyl)thymidine: a potentially viable intermediate for the preparation of the anti-AIDS drugs, AZT and D4T 235

Oligosaccharide mimics

Synthesis of glycosyl(thio)ureido sugars via carbodiimides and their conformational behaviour in water 161

Oligosaccharides

Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277

Oxidation

Sucrose tricarboxylate by sonocatalysed TEMPO-mediated oxidation 176

Pectin

Characterization of non-esterified galacturonic acid sequences in pectin with endopolygalacturonase 120

- Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277
- Penicillium daleae*
- Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277
- Pentasaccharide
- Syntheses of chondroitin 4- and 6-sulfate pentasaccharide derivatives having a methyl β -D-glucopyranosiduronic acid at the reducing end 88
- Phase transition
- Synthesis, control of substitution pattern and phase transitions of 2,3-di-*O*-methylcellulose 67
- Physical gels
- Physicochemical behaviour of chitin gels 295
- Pig intestinal sucrase
- Hydrolysis of low-molecular-weight oligosaccharides and oligosaccharide alditols by pig intestinal sucrase/isomaltase and glucosidase/maltase 264
- Plant cell wall
- Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277
- Polysaccharides
- Physicochemical behaviour of chitin gels 295
- Proteus*
- The structure of the core part of *Proteus penneri* strain 16 lipopolysaccharide 185
- Proteus penneri*
- The structure of the core part of *Proteus penneri* strain 16 lipopolysaccharide 185
- Pseudooligosaccharides
- Synthesis of glycosyl(thio)ureido sugars via carbodiimides and their conformational behaviour in water 161
- Pyrazole
- Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34
- Pyrazolo[2,3-*b*]quinoxaline
- Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34
- Quinoxalin-2(1*H*)one
- Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34
- Rhamnogalacturonan II
- Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277
- Schiff bases
- Schiff bases or glycosylamines: crystal and molecular structures of four derivatives of D-mannose 104
- Simple carbohydrates
- Syntheses of sugar-related trihydroxyazepanes from simple carbohydrates and their activities as reversible glycosidase inhibitors 22
- Simulated annealing
- Molecular dynamics simulations of cyclohenicosakis-[(1 \rightarrow 2)- β -D-glucopyranosyl], a cyclic (1 \rightarrow 2)- β -D-glucan (a 'cyclophoraose') of DP 21 227
- S. N*-Acetals
- Novel 4-thiogalactofuranosyl-containing disaccharides with nitrogen in the interglycosidic linkage 145
- Starch mutant
- Relationship between branching density and crystalline structure of A- and B-type maize mutant starches 130
- Streptococcus sobrinus*
- Nigerooligosaccharide acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I 98
- Substitution pattern
- Synthesis, control of substitution pattern and phase transitions of 2,3-di-*O*-methylcellulose 67
- Sucrose
- Sucrose tricarboxylate by sonocatalysed TEMPO-mediated oxidation 176
- Sugar
- A QM/MM analysis of the conformations of crystalline sucrose moieties 305
- Sugar carbodiimides
- Synthesis of glycosyl(thio)ureido sugars via carbodiimides and their conformational behaviour in water 161
- Sugar thioureas
- Synthesis of glycosyl(thio)ureido sugars via carbodiimides and their conformational behaviour in water 161
- Sugar ureas
- Synthesis of glycosyl(thio)ureido sugars via carbodiimides and their conformational behaviour in water 161
- Swelling
- Physicochemical behaviour of chitin gels 295
- Syneresis
- Physicochemical behaviour of chitin gels 295
- Synthesis
- Synthesis and enzymatic evaluation of modified acceptors of recombinant blood group A and B glycosyltransferases 1
- TEMPO
- Sucrose tricarboxylate by sonocatalysed TEMPO-mediated oxidation 176
- Thermal dehydration
- The solvent-free thermal dehydration of tetritols on zeolites 241
- 6-Thio-D-galactose derivatives
- Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81
- 6-Thio-D-glucose derivatives
- Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81
- 4-Thiogalactofuranose
- Novel 4-thiogalactofuranosyl-containing disaccharides with nitrogen in the interglycosidic linkage 145
- Thioglycosides
- The synthesis and structure of the derivatives of 2-deoxy-2-hydroxyimino-D-lyxo-hexopyranosyl-L-cysteine and -thiophenol 151
- 5-Thio-L-altrose
- Synthesis of 5-thio-L-altrose 323
- 6-Thio-L-idose derivatives
- Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81
- Thio sugar
- Synthesis of 5-thio-L-altrose 323
- Thio sugars
- Action of acid on 6-thio-hexose derivatives. Synthesis of 1,6-epithio-hexofuranoses 81
- Transferred NOE NMR spectroscopy
- Determination of the solution conformation of D-glucodihydroacarbose, a high-affinity inhibitor bound to glucoamylase by transferred NOE NMR spectroscopy 50
- (2,4,6-Trichlorophenyl)hydrazone
- Isolation and identification of the intermediates during pyrazole formation of some carbohydrate hydrazone derivatives 34
- Trihydroxy azepanes
- Syntheses of sugar-related trihydroxyazepanes from simple carbohydrates and their activities as reversible glycosidase inhibitors 22

Ultrasound

Sucrose tricarboxylate by sonocatalysed TEMPO-mediated oxidation 176

Uronic acids

Sucrose tricarboxylate by sonocatalysed TEMPO-mediated oxidation 176

Viscous

Structural elucidation of the viscous exopolysaccharide produced by *Lactobacillus helveticus* Lb161 113

Wine

Structural characterization of the pectic polysaccharide rhamnogalacturonan II: evidence for the backbone location of the aceric acid-containing oligoglycosyl side chain 277

X-ray

Molecular structures and hydrogen-bond networks in crystals of synthetic 1-D-galactosamide bolaamphiphiles 56

X-ray crystallography

Schiff bases or glycosylamines: crystal and molecular structures of four derivatives of D-mannose 104

X-ray diffraction

The synthesis and structure of the derivatives of 2-deoxy-2-hydroxyimino-D-*lyxo*-hexopyranosyl-L-cysteine and -thiophenol 151

Xylose

A facile synthesis of 1-(5'-O-acetyl-3'-O-benzyl- β -D-xylofuranosyl)thymidine: a potentially viable intermediate for the preparation of the anti-AIDS drugs, AZT and D4T 235

Zeolites

The solvent-free thermal dehydration of tetritols on zeolites 241
