

Subject Index of Volume 327

- α 1-Acid glycoprotein
Interaction between carbohydrate residues of α ₁-acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333
- Amphiphiles
Liquid crystals based on fluorinated carbohydrates 169
- Amylolysis
Substituent distribution in highly branched dextrans from methylated starches 423
- Amylopectin potato starch
Substituent distribution in highly branched dextrans from methylated starches 423
- 1,4-Anhydroerythritol
A combined X-ray and NMR study of borate esters of furanoidic cis-1,2-diols 287
- Anomerization
New α -selective thermal glycosylation of acetyl-protected 2-acetamido-2-deoxy- β -D-glucopyranosyl diphenylphosphinate 341
- Anticancer
Fluorinated nucleosides 87
- Antiviral
Fluorinated nucleosides 87
- Apple
Different action patterns for apple pectin methylesterase at pH 7.0 and 4.5 385
- Arabinogalactan-proteins
Characterization of an arabinogalactan-protein isolated from pressed juice of *Echinacea purpurea* by precipitation with the β -glucosyl Yariv reagent 497
- Bifidobacterium bifidum*
The efficient enzymatic synthesis of *N*-acetylglucosamine in an organic co-solvent 377
- Biological properties
Carbohydrate- and related polyol-derived fluorosurfactants: an update 147
- Borate esters
A combined X-ray and NMR study of borate esters of furanoidic cis-1,2-diols 287
- Bordetella pertussis*
Synthesis of a spacer-containing disaccharide fragment of *Bordetella pertussis* lipopolysaccharide 261
- Branching
Substituent distribution in highly branched dextrans from methylated starches 423
- Calcofluor White
Interaction between carbohydrate residues of α ₁-acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333
- Carbohydrate
End-group determination of oligosaccharides: a gas chromatography–mass spectrometry/mass spectrometry method for distinguishing between all D-aldohexoses and D-ketohexoses 463
- Carbohydrates
Interaction between carbohydrate residues of α ₁-acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333
Liquid crystals based on fluorinated carbohydrates 169
- Cartilage
¹³C NMR relaxation studies on cartilage and cartilage components 439
- C-Difluoromethylene carbohydrates
C-Difluoromethylene-containing, C-trifluoromethyl and C-perfluoroalkyl carbohydrates. Synthesis by carbohydrate transformation or building block methods 119
- Cellulose
Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345
- C-Glycosidation
Glycosyl fluorides in glycosidations 15
- C-Glycoside
Glycosyl fluorides in glycosidations 15
- CGTase
Glycosyl fluorides in enzymatic reactions 27
- Chemoenzymatic reactions
Glycosyl fluorides in enzymatic reactions 27
- Chondroitin sulfate
¹³C NMR relaxation studies on cartilage and cartilage components 439
- ¹³C NMR
¹³C NMR relaxation studies on cartilage and cartilage components 439
NMR spectra of fluorinated carbohydrates 185
- Complex permittivity
Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219
- Conformation
Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1→3)-D-glucan from *Lentinus edodes* in aqueous solution 431
- C-Perfluoroalkyl carbohydrates
C-Difluoromethylene-containing, C-trifluoromethyl and C-perfluoroalkyl carbohydrates. Synthesis by carbohydrate transformation or building block methods 119
- C-Trifluoromethyl carbohydrates
C-Difluoromethylene-containing, C-trifluoromethyl and C-perfluoroalkyl carbohydrates. Synthesis by carbohydrate transformation or building block methods 119
- Cyclodextrin
Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219
- Cyclomaltooligosaccharide
Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219
- DAST-reaction
Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

Degradation

Synergy between enzymes from *Aspergillus* involved in the degradation of plant cell wall polysaccharides 401

Deoxyfluoro sugars

Liquid crystals based on fluorinated carbohydrates 169

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

 α -(1 \rightarrow 3)-D-Glucan

Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* in aqueous solution 431

Dielectric loss

Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219

Diphenylphosphinate

New α -selective thermal glycosylation of acetyl-protected 2-acetamido-2-deoxy- β -D-glucopyranosyl diphenylphosphinate 341

Disaccharides, conformation

An improved model for calculating the optical rotation of simple saccharides 447

Disaccharides, optical rotation

An improved model for calculating the optical rotation of simple saccharides 447

Dissipation factor

Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219

 β -D-Mannopyranosyl fluoride

Simultaneous detection of different glycosidase activities by ^{19}F NMR spectroscopy 395

Echinacea purpurea

Characterization of an arabinogalactan-protein isolated from pressed juice of *Echinacea purpurea* by precipitation with the β -glucosyl Yariv reagent 497

Electrophilic addition

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

End-group determination

End-group determination of oligosaccharides: a gas chromatography–mass spectrometry/mass spectrometry method for distinguishing between all D-aldohehexoses and D-ketohexoses 463

endo-Polygalacturonase

Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321

Enzymic modification

Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B891 411

ESIMS/MS

Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321

exo-Polygalacturonase

Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321

Exopolysaccharide

Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B891 411

 ^{18}F -Labelled carbohydrates

Preparation of fluorine-18 labelled sugars and derivatives and their application as tracer for positron-emission-tomography 107

Fluorescence

Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* in aqueous solution 431

Fluorescence anisotropy

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333

Fluorescence titration

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333

Fluorinated carbohydrates

NMR spectra of fluorinated carbohydrates 185

Fluorinated colloids

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

Fluorinated nucleosides

Fluorinated nucleosides 87

Fluorinated sugars

Fluorinated nucleosides 87

Fluorinated synthons

C-Difluoromethylene-containing, C-trifluoromethyl and C-perfluoroalkyl carbohydrates. Synthesis by carbohydrate transformation or building block methods 119

Fluorination

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

Fluorination for sugar anomer position

Methods of synthesis of glycosyl fluorides 5

Fluorination procedures

Methods of synthesis of glycosyl fluorides 5

Fluorination reagents

Methods of synthesis of glycosyl fluorides 5

Fluorocarbons

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

Fluorocompound

Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223

 ^{19}F NMR

NMR spectra of fluorinated carbohydrates 185

 ^{19}F NMR spectroscopy

Simultaneous detection of different glycosidase activities by ^{19}F NMR spectroscopy 395

Galactolipid

Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223

Galactosylceramide

Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223

Gas chromatography–mass spectrometry

End-group determination of oligosaccharides: a gas chromatography–mass spectrometry/mass spectrometry method for distinguishing between all D-aldohehexoses and D-ketohexoses 463

Glucose carrier

Synthesis and biological studies of glycosyl dopamine derivatives as potential antiparkinsonian agents 353

 β -Glucosyl Yariv reagent

Characterization of an arabinogalactan-protein isolated from pressed juice of *Echinacea purpurea* by precipitation with the β -glucosyl Yariv reagent 497

Glycals

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

Glycoconjugate

Synthesis of a spacer-containing disaccharide fragment of *Bordetella pertussis* lipopolysaccharide 261

- Glycodesilylation
 Synthesis of α -galactosylated fragments related to the core-structure of the GPI anchor of *Trypanosoma brucei* 367
- Glycosaminoglycans
¹³C NMR relaxation studies on cartilage and cartilage components 439
- Glycosidase
 Glycosyl fluorides in enzymatic reactions 27
- Glycosidases
 Simultaneous detection of different glycosidase activities by ¹⁹F NMR spectroscopy 395
 Transglycosylation reactions with a crude culture filtrate from *Thermoascus aurantiacus* 483
- α -Glycoside
 New α -selective thermal glycosylation of acetyl-protected 2-acetamido-2-deoxy- β -D-glucopyranosyl diphenylphosphinate 341
- Glycosides
 Synthesis and biological studies of glycosyl dopamine derivatives as potential antiparkinsonian agents 353
- Glycosylation
 New α -selective thermal glycosylation of acetyl-protected 2-acetamido-2-deoxy- β -D-glucopyranosyl diphenylphosphinate 341
- Glycosyl fluoride
 Glycosyl fluorides in glycosidations 15
- Glycosyl fluorides
 Simultaneous detection of different glycosidase activities by ¹⁹F NMR spectroscopy 395
 Transglycosylation reactions with a crude culture filtrate from *Thermoascus aurantiacus* 483
- Glycosyl transfer
 Glycosyl fluorides in enzymatic reactions 27
- Glycosyl transferases
 Glycosyl fluorides in enzymatic reactions 27
- Glycosynthase
 Glycosyl fluorides in enzymatic reactions 27
- Gp120
 Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223
- GPI anchor
 Synthesis of α -galactosylated fragments related to the core-structure of the GPI anchor of *Trypanosoma brucei* 367
- Guanosine
 A combined X-ray and NMR study of borate esters of furanoidic cis-1,2-diols 287
- Hehre mechanism
 Glycosyl fluorides in enzymatic reactions 27
- HIV
 Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223
- ¹H NMR
 NMR spectra of fluorinated carbohydrates 185
- Homogeneous acetylation
 Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345
- Host–guest interaction
 Formation of unexpected substitution patterns in sulfonylbutylation of cyclomaltoheptaose promoted by host–guest interaction 269
- HPAEC–PAD/UV
 Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293
- Hyaluronan
¹³C NMR relaxation studies on cartilage and cartilage components 439
- Study on TEMPO-mediated selective oxidation of hyaluronan and the effects of salt on the reaction kinetics 455
- Immobilized β -galactosidase
 The efficient enzymatic synthesis of *N*-acetylglucosamine in an organic co-solvent 377
- Interchain and intrachain distributions
 Different action patterns for apple pectin methylesterase at pH 7.0 and 4.5 385
- Intramolecular cyclization
 Michael reactions on conformationally flexible methyl 3-*C*-nitrohex-2-enopyranoside derivatives 489
- Intrinsic viscosity
 Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1→3)-D-glucan from *Lentinus edodes* in aqueous solution 431
- IR spectroscopy
 Study on TEMPO-mediated selective oxidation of hyaluronan and the effects of salt on the reaction kinetics 455
- JIM5
 Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309
- JIM7
 Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309
- Lactococcus lactis* subsp. *cremoris*
 Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B891 411
- Lentinus edodes*
 Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1→3)-D-glucan from *Lentinus edodes* in aqueous solution 431
- Liposome
 Synthesis of single- and double-chain fluorocarbon and hydrocarbon galactosyl amphiphiles and their anti-HIV-1 activity 223
- Liquid crystals
 Liquid crystals based on fluorinated carbohydrates 169
- LM5
 Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309
- MALDIMS
 Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293
 Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321
- Mannopyranosides
 An improved model for calculating the optical rotation of simple saccharides 447
- β -Mannosidase
 Transglycosylation reactions with a crude culture filtrate from *Thermoascus aurantiacus* 483
- Mechanism-based inhibitors
 Glycosyl fluorides in enzymatic reactions 27
- Mechanism of acetylation
 Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345

Mechanism of action

Different action patterns for apple pectin methylesterase at pH 7.0 and 4.5 385

Medical application

Preparation of fluorine-18 labelled sugars and derivatives and their application as tracer for positron-emission-tomography 107

Mesogens

Liquid crystals based on fluorinated carbohydrates 169

Methylated starches

Substituent distribution in highly branched dextrans from methylated starches 423

Methyl β -D-ribofuranoside

A combined X-ray and NMR study of borate esters of furanoidic cis-1,2-diols 287

Microwave

Complex permittivities of cyclomaltooligosaccharides (cyclodextrins) over microwave frequencies to 26 GHz 219

Molecular weight

Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* in aqueous solution 431

Monoclonal antibodies

Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309

Monosaccharide analysis

End-group determination of oligosaccharides: a gas chromatography–mass spectrometry/mass spectrometry method for distinguishing between all D-aldohehexoses and D-ketohexoses 463

Monosaccharides, optical rotation

An improved model for calculating the optical rotation of simple saccharides 447

N-Acetyl-D-glucosamine

New α -selective thermal glycosylation of acetyl-protected 2-acetamido-2-deoxy- β -D-glucopyranosyl diphenylphosphinate 341

N-acetylactosamine

The efficient enzymatic synthesis of *N*-acetylactosamine in an organic co-solvent 377

Neurologically active compounds

Synthesis and biological studies of glycosyl dopamine derivatives as potential antiparkinsonian agents 353

Neurotransmitter

Synthesis and biological studies of glycosyl dopamine derivatives as potential antiparkinsonian agents 353

N-F reagents

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

Nitro sugar

Michael reactions on conformationally flexible methyl 3-*C*-nitrohex-2-enopyranoside derivatives 489

NMR

NMR spectra of fluorinated carbohydrates 185

Nylon powder

The efficient enzymatic synthesis of *N*-acetylactosamine in an organic co-solvent 377

O-Glycosidation

Glycosyl fluorides in glycosidations 15

O-Glycoside

Glycosyl fluorides in glycosidations 15

Oligosaccharide

End-group determination of oligosaccharides: a gas chromatography–mass spectrometry/mass spectrometry method for distinguishing between all D-aldohehexoses and D-ketohexoses 463

Optical rotation, calculational model

An improved model for calculating the optical rotation of simple saccharides 447

Organic co-solvents

The efficient enzymatic synthesis of *N*-acetylactosamine in an organic co-solvent 377

Oxidation kinetics

Study on TEMPO-mediated selective oxidation of hyaluronan and the effects of salt on the reaction kinetics 455

PAM1

Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309

Pectic epitopes

Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309

Pectin

Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293

Analysis of pectic epitopes recognised by hybridoma and phage display monoclonal antibodies using defined oligosaccharides, polysaccharides, and enzymatic degradation 309

Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321

Synergy between enzymes from *Aspergillus* involved in the degradation of plant cell wall polysaccharides 401

Pectin lyase

Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293

Pectin methylesterase

Different action patterns for apple pectin methylesterase at pH 7.0 and 4.5 385

Pectin methyl esterase

Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293

Pectin methyl-esterase

Quantification of the amount of galacturonic acid residues in blocksequences in pectin homogalacturonan by enzymatic fingerprinting with exo- and endo-polygalacturonase II from *Aspergillus niger* 321

Pectinolytic enzymes

Synergy between enzymes from *Aspergillus* involved in the degradation of plant cell wall polysaccharides 401

Perfluoroalkyl(ated) amphiphiles

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

Perfluoroalkyl(ated) carbohydrates

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

(Per)fluorosurfactants

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

Polyfluoroalkylated sugars

Liquid crystals based on fluorinated carbohydrates 169

Polygalacturonase

Analysis of different de-esterification mechanisms for pectin by enzymatic fingerprinting using endopectin lyase and endopolygalacturonase II from *A. Niger* 293

Positron-emission-tomography

Preparation of fluorine-18 labelled sugars and derivatives and their application as tracer for positron-emission-tomography 107

p-Toluenesulfonyl chloride

Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345

Pyridine

Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345

Rate of reaction

Homogeneous esterification of cellulose in the lithium chloride–*N,N*-dimethylacetamide solvent system: effect of temperature and catalyst 345

Rearrangements

Synthesis of deoxyfluoro sugars from carbohydrate precursors 47

Red-edge excitation spectra

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333

Regioselectivity

Formation of unexpected substitution patterns in sulfonylbutylation of cyclomaltoheptaose promoted by host–guest interaction 269

Relaxation

^{13}C NMR relaxation studies on cartilage and cartilage components 439

Rhamnopyranosides

An improved model for calculating the optical rotation of simple saccharides 447

Self-aggregation

Carbohydrate- and related polyol-derived fluorosurfactants: an update 147

Sialic acids

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and saturating concentrations of Calcofluor White. A fluorescence study 333

 $\text{S}_{\text{N}}2'$ reaction

Michael reactions on conformationally flexible methyl 3-*C*-nitrohex-2-enopyranoside derivatives 489

Structural analysis

Characterization of an arabinogalactan-protein isolated from pressed juice of *Echinacea purpurea* by precipitation with the β -glucosyl Yariv reagent 497

Structural characterisation and enzymic modification of the exopolysaccharide produced by *Lactococcus lactis* subsp. *cremoris* B891 411

Substituent distribution

Substituent distribution in highly branched dextrans from methylated starches 423

Substitution pattern

Determination of the substituent distribution in *O*-sulfonylbutyl-(1 \rightarrow 4)-glucans 275

Formation of unexpected substitution patterns in sulfonylbutylation of cyclomaltoheptaose promoted by host–guest interaction 269

Sulfonylbutyl cyclomaltoheptaoses

Determination of the substituent distribution in *O*-sulfonylbutyl-(1 \rightarrow 4)-glucans 275

Formation of unexpected substitution patterns in sulfonylbutylation of cyclomaltoheptaose promoted by host–guest interaction 269

Synthesis of (4'-fluorosulfonyl)butylethers of glucose

Determination of the substituent distribution in *O*-sulfonylbutyl-(1 \rightarrow 4)-glucans 275

TEMPO

Study on TEMPO-mediated selective oxidation of hyaluronan and the effects of salt on the reaction kinetics 455

The Michael reaction

Michael reactions on conformationally flexible methyl 3-*C*-nitrohex-2-enopyranoside derivatives 489

Thermoascus aurantiacus Miede

Transglycosylation reactions with a crude culture filtrate from *Thermoascus aurantiacus* 483

Transglycosylation

Glycosyl fluorides in enzymatic reactions 27

Transglycosylation reactions with a crude culture filtrate from *Thermoascus aurantiacus* 483

Trypanosoma brucei

Synthesis of α -galactosylated fragments related to the core-structure of the GPI anchor of *Trypanosoma brucei* 367

Urea

Effects of urea and sodium hydroxide on the molecular weight and conformation of α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* in aqueous solution 431

Vaccine

Synthesis of a spacer-containing disaccharide fragment of *Bordetella pertussis* lipopolysaccharide 261

Xylan

Synergy between enzymes from *Aspergillus* involved in the degradation of plant cell wall polysaccharides 401

Xylanolytic enzymes

Synergy between enzymes from *Aspergillus* involved in the degradation of plant cell wall polysaccharides 401
