

Subject Index of Volume 333

- Aldose–ketose isomerization
Substrate-dependent chemoselective aldose–aldose and aldose–ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303
- Amine
Substrate-dependent chemoselective aldose–aldose and aldose–ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303
- Antibacterial activity
Synthesis and antibacterial activities of quaternary ammonium salt of chitosan 1
- L-Arabinitol-based polyamide
Synthesis of L-arabinitol and xylitol monomers for the preparation of polyamides. Preparation of an L-arabinitol-based polyamide 95
- Arabinogalactan–protein
Purification and characterization of a β -glucuronidase from *Aspergillus niger* 27
Structural features of arabinogalactan–proteins from the fruit of *Lycium chinense* Mill. 79
- Aspergillus niger*
Purification and characterization of a β -glucuronidase from *Aspergillus niger* 27
- Azasugar
Synthesis of an aza analogue of 2-deoxy-D-ribofuranose and its homologues 115
- Azidotrimethylsilane
Reaction of D-glycals with azidotrimethylsilane 153
- Bacterial polysaccharide structure
Structure of the O-specific polysaccharide of *Citrobacter braakii* O7a,3b,1c 335
- Bacteriophage
Depolymerization of the capsular polysaccharide from *Vibrio cholerae* O139 by a lyase associated with the bacteriophage JA1 263
- Bifunctional carbohydrate-based monomers
Synthesis of L-arabinitol and xylitol monomers for the preparation of polyamides. Preparation of an L-arabinitol-based polyamide 95
- Biological activity
Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313
- Biotin labeling
Biotin labeling of the symbiotically important succinoglycan oligosaccharides of *Rhizobium meliloti* for identification of putative plant receptors 73
- Brown seaweed
Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281
- Calcium
Substrate-dependent chemoselective aldose–aldose and aldose–ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303
- Carbodiimide
Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47
- Carbohydrates
Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313
- Carbon dioxide
Origin and significance of the production of carbon dioxide during the ozonization of ^{13}C -labeled D-glucose at different pH values 233
- 1,2-Carbon shift
Substrate-dependent chemoselective aldose–aldose and aldose–ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303
- Carrageenan
Structural analysis of *Gigartina pistillata* carrageenans (Gigartinales, Rhodophyta) 271
- ^{13}C – ^{13}C coupling
Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ^{13}C -labeled sucrose 19
- C-2 epimerization
Substrate-dependent chemoselective aldose–aldose and aldose–ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303
- Ceramide
Structural analysis of a new glycosphingolipid from the lipopolysaccharide-lacking bacterium *Sphingomonas adhaesiva* 87
- Ceric ammonium nitrate
A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339
- Chain elongation
Chemoenzymatic synthesis of 2-chloro-4-nitrophenyl β -maltoheptaoside acceptor-products using glycogen phosphorylase b 129
- Chemical structure
Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281
- Chitosan
Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137
Synthesis and antibacterial activities of quaternary ammonium salt of chitosan 1
- Circular dichroism spectra
Formation and structure of a complex of sucrose with cobalt(III)bis(phenanthroline) 185
- Citrobacter braakii*
Structure of the O-specific polysaccharide of *Citrobacter braakii* O7a,3b,1c 335
- ^{13}C -labeled glucose
Origin and significance of the production of carbon dioxide during the ozonization of ^{13}C -labeled D-glucose at different pH values 233
- ^{13}C NMR
High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159

- Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137
- Structural analysis of *Gigartina pistillata* carrageenans (Gigartinales, Rhodophyta) 271
- C-Nucleoside analogues
- Synthesis of derivatives of C-nucleoside analogues using 'push-pull' functionalized monosaccharides 197
- Colitose
- Structure of a colitose-containing O-specific polysaccharide of the marine bacterium *Pseudoalteromonas tetraodonis* IAM 14160^T 41
- Complexation
- Formation and structure of a complex of sucrose with cobalt(III)bis(phenanthroline) 185
- Crystal structure
- The crystal structure of the 1:1 inclusion complex of β -cyclodextrin with squaric acid 145
- β -Cyclodextrin
- The crystal structure of the 1:1 inclusion complex of β -cyclodextrin with squaric acid 145
- X-ray structure of β -cyclodextrin-2,7-dihydroxy-naphthalene-4.6 H₂O: an unusually distorted macrocycle 251
- Depolymerisation
- Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137
- Dextran
- Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ¹³C-labeled sucrose 19
- Dextranucrase
- Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ¹³C-labeled sucrose 19
- 5,7-Diacetamido-3,5,7,9-tetra-deoxy-L-glycero-L-manno-non-2-ulonic acid
- Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetra-deoxy-L-glycero-L-manno-non-2-ulonic acid 241
- 2,7-Dihydroxynaphthalene
- X-ray structure of β -cyclodextrin-2,7-dihydroxy-naphthalene-4.6 H₂O: an unusually distorted macrocycle 251
- Electrospray-ionization mass spectrometry (ESIMS)
- Mild tagging procedures for the structural analysis of glycans 59
- Endotoxin
- A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339
- Synthesis of lipid A type pyran carboxylic acids with ether chains and their biological activities 203
- Enzymatic synthesis
- High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159
- Erwinia* spp.
- Extracellular polysaccharides of modified strains of *Erwinia* spp. 295
- Escherichia coli*
- Structural studies of the O-polysaccharide from the *Escherichia coli* O77 lipopolysaccharide 179
- Extracellular polysaccharide
- Extracellular polysaccharides of modified strains of *Erwinia* spp. 295
- Fluorosugars
- The identification of the catalytic nucleophiles of two β -galactosidases from glycoside hydrolase family 35 7
- D-Fructose
- D-Fructose–L-sorbose interconversions. Access to 5-thio-D-fructose and interaction with the D-fructose transporter, GLUT5 327
- Fucans
- Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281
- Fucoidans
- Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281
- Fungi
- Structure of a cell wall polysaccharide isolated from *Hypocrea gelatinosa* 173
- Galactofuranosidase inhibitors
- Synthesis of β -D-galactofuranosyl nucleoside analogues. A new type of β -D-galactofuranosidase inhibitor 123
- Galactooligosaccharides
- Purification and characterization of a β -glucuronidase from *Aspergillus niger* 27
- Galactosidase
- The identification of the catalytic nucleophiles of two β -galactosidases from glycoside hydrolase family 35 7
- Galacturonic acid
- Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47
- Gigartina pistillata*
- Structural analysis of *Gigartina pistillata* carrageenans (Gigartinales, Rhodophyta) 271
- Glucal
- Reaction of D-glycals with azidotrimethylsilane 153
- Glucose oxidation
- Origin and significance of the production of carbon dioxide during the ozonization of ¹³C-labeled D-glucose at different pH values 233
- Glucosides
- Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313
- Glucosyltransferase
- Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ¹³C-labeled sucrose 19
- β -Glucuronidase
- Purification and characterization of a β -glucuronidase from *Aspergillus niger* 27
- GLUT5
- D-Fructose–L-sorbose interconversions. Access to 5-thio-D-fructose and interaction with the D-fructose transporter, GLUT5 327
- Glycogen phosphorylase b
- Chemoenzymatic synthesis of 2-chloro-4-nitrophenyl β -maltoheptaoside acceptor-products using glycogen phosphorylase b 129
- Glycosaminoglycan (GAG)
- Mild tagging procedures for the structural analysis of glycans 59
- Glycosidases
- The identification of the catalytic nucleophiles of two β -galactosidases from glycoside hydrolase family 35 7
- Glycosidation
- Stereoselective synthesis of 2-S-ethyl(phenyl)-2-thio- β -glucopyranosides via 1,2-migration and concurrent glycosidation of ethyl(phenyl) 2,3-orthoester-1-thio- α -mannopyranosides 105
- Glycosphingolipid
- Structural analysis of a new glycosphingolipid from the lipopolysaccharide-lacking bacterium *Sphingomonas adhaesiva* 87
- Glycosyl azide
- Reaction of D-glycals with azidotrimethylsilane 153
- Gram-negative bacteria
- A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339

¹H and ¹³C NMR

Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313

Heptopyranos-6-ulose

Synthesis of derivatives of C-nucleoside analogues using 'push-pull' functionalized monosaccharides 197

Hexokinase

High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159

¹H NMR

Crystal structure of N-(tri-O-acetyl- α -D-xylopyranosyl)pyridinium bromide 257

Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137

HPLC

Mild tagging procedures for the structural analysis of glycans 59

1,2-Hydride shift

Substrate-dependent chemoselective aldose-aldose and aldose-ketose isomerizations of carbohydrates promoted by a combination of calcium ion and monoamines 303

7-Hydroxycoumarylhydroxylamine derivatives

Mild tagging procedures for the structural analysis of glycans 59

Hypocrea gelatinosa

Structure of a cell wall polysaccharide isolated from *Hypocrea gelatinosa* 173

Imidazoles

Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313

Imidazolidine-2-thion derivatives

Synthesis of β -D-galactofuranosyl nucleoside analogues. A new type of β -D-galactofuranosidase inhibitor 123

4-Imidazoline

Synthesis of β -D-galactofuranosyl nucleoside analogues. A new type of β -D-galactofuranosidase inhibitor 123

Iminosugar

Synthesis of an aza analogue of 2-deoxy-D-ribofuranose and its homologues 115

Inclusion complex

The crystal structure of the 1:1 inclusion complex of β -cyclodextrin with squaric acid 145

X-ray structure of β -cyclodextrin-2,7-dihydroxy-naphthalene-4,6 H₂O: an unusually distorted macrocycle 251

Isothiocyanate

Synthesis of β -D-galactofuranosyl nucleoside analogues. A new type of β -D-galactofuranosidase inhibitor 123

Isotopic analysis

Origin and significance of the production of carbon dioxide during the ozonization of ¹³C-labeled D-glucose at different pH values 233

Kdo

A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339

Ketosidic cleavage

A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339

Labeling

The identification of the catalytic nucleophiles of two β -galactosidases from glycoside hydrolase family 35 7

Lipid A

Synthesis of lipid A type pyran carboxylic acids with ether chains and their biological activities 203

Lipopolysaccharide

Structural studies of the O-polysaccharide from the *Escherichia coli* O77 lipopolysaccharide 179

Structure of the O-specific polysaccharide of *Citrobacter braakii* O7a,3b,1c 335

Lossen rearrangement

Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47

LPS-agonist

Synthesis of lipid A type pyran carboxylic acids with ether chains and their biological activities 203

LPS-antagonist

Synthesis of lipid A type pyran carboxylic acids with ether chains and their biological activities 203

Lyase

Depolymerization of the capsular polysaccharide from *Vibrio cholerae* O139 by a lyase associated with the bacteriophage JA1 263

Lycium chinense Mill.

Structural features of arabinogalactan-proteins from the fruit of *Lycium chinense* Mill. 79

MALDI-TOF MS

Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137

Maltooligosaccharide series

Chemoenzymatic synthesis of 2-chloro-4-nitrophenyl β -maltoheptaoside acceptor-products using glycogen phosphorylase b 129

Mannan

Structure of the O-specific polysaccharide of *Citrobacter braakii* O7a,3b,1c 335

'Masked' 3-C-aminomethyl sugars

Synthesis of an aza analogue of 2-deoxy-D-ribofuranose and its homologues 115

Mass spectrometry

Depolymerization of the capsular polysaccharide from *Vibrio cholerae* O139 by a lyase associated with the bacteriophage JA1 263

The identification of the catalytic nucleophiles of two β -galactosidases from glycoside hydrolase family 35 7

3-Methoxy-benzylhydroxylamine derivatives

Mild tagging procedures for the structural analysis of glycans 59

Methylation

Structure of a colitose-containing O-specific polysaccharide of the marine bacterium *Pseudoalteromonas tetraodonis* IAM 14160^T 41

Methyl esterification

Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47

1,2-Migration

Stereoselective synthesis of 2-S-ethyl(phenyl)-2-thio- β -glucopyranosides via 1,2-migration and concurrent glycosidation of ethyl(phenyl) 2,3-orthoester-1-thio- α -mannopyranosides 105

MUC5AC

Studies of acceptor site specificities for three members of UDP-GalNAc:N-acetylgalactosaminyltransferases by using a synthetic peptide mimicking the tandem repeat of MUC5AC 165

Mucin

Studies of acceptor site specificities for three members of UDP-GalNAc:N-acetylgalactosaminyltransferases by using a synthetic peptide mimicking the tandem repeat of MUC5AC 165

Mutan

Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ¹³C-labeled sucrose 19

Mutansucrase

Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ¹³C-labeled sucrose 19

Nitrous acid

Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137

NMR

Structural studies of the O-polysaccharide from the *Escherichia coli* O77 lipopolysaccharide 179

NMR spectra

Formation and structure of a complex of sucrose with cobalt(III)bis(phenanthroline) 185

NMR spectroscopy

Depolymerization of the capsular polysaccharide from *Vibrio cholerae* O139 by a lyase associated with the bacteriophage JA1 263

Structure of a cell wall polysaccharide isolated from *Hypocrea gelatinosa* 173

O-Antigen

A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339

Oct-6-enopyranurononitrile

Synthesis of derivatives of C-nucleoside analogues using 'push-pull' functionalized monosaccharides 197

D-glycero-D-talo-2-Octulopyranosonic acid

A very efficient method to cleave Lipid A and saccharide components in bacterial lipopolysaccharides 339

O-Glycosylation

Studies of acceptor site specificities for three members of UDP-GalNAc:*N*-acetylgalactosaminyltransferases by using a synthetic peptide mimicking the tandem repeat of MUC5AC 165

Oligosaccharide

Biotin labeling of the symbiotically important succinoglycan oligosaccharides of *Rhizobium meliloti* for identification of putative plant receptors 73

Optically active polyamide

Synthesis of L-arabinitol and xylitol monomers for the preparation of polyamides. Preparation of an L-arabinitol-based polyamide 95

Organic synthesis

Synthesis and anticancer activity of novel chiral D-glucose derived bis-imidazoles and their analogs 313

2,3-Orthoester

Stereoselective synthesis of 2-*S*-ethyl(phenyl)-2-thio- β -glucopyranosides via 1,2-migration and concurrent glycosidation of ethyl(phenyl) 2,3-orthoester-1-thio- α -mannopyranosides 105

O-specific polysaccharide

Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetradeoxy-L-glycero-L-manno-non-2-ulonic acid 241

Structure of the O-specific polysaccharide of *Citrobacter braakii* O7a,3b,1c 335

Oxime formation

Mild tagging procedures for the structural analysis of glycans 59

 α -Oxoketene-*S,S*-acetals

Synthesis of derivatives of C-nucleoside analogues using 'push-pull' functionalized monosaccharides 197

Ozone

Origin and significance of the production of carbon dioxide during the ozonization of ^{13}C -labeled D-glucose at different pH values 233

Pectins

Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47

Phosphoglucomutase

High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159

Polycondensation reaction

Synthesis of L-arabinitol and xylitol monomers for the preparation of polyamides. Preparation of an L-arabinitol-based polyamide 95

Polypeptide *N*-acetylgalactosaminyltransferase (GaNTase)

Studies of acceptor site specificities for three members of UDP-GalNAc:*N*-acetylgalactosaminyltransferases by using a synthetic peptide mimicking the tandem repeat of MUC5AC 165

Polysaccharide

Structure of a colitose-containing O-specific polysaccharide of the marine bacterium *Pseudoalteromonas tetraodonis* IAM 14160^T 41

Polysaccharides

Structure of a cell wall polysaccharide isolated from *Hypocrea gelatinosa* 173

Proteus vulgaris

Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetradeoxy-L-glycero-L-manno-non-2-ulonic acid 241

Pseudaminic acid

Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetradeoxy-L-glycero-L-manno-non-2-ulonic acid 241

'Push-pull' butadienes

Synthesis of derivatives of C-nucleoside analogues using 'push-pull' functionalized monosaccharides 197

Pyridinium salt

Crystal structure of *N*-(tri-*O*-acetyl- α -D-xylopyranosyl)pyridinium bromide 257

Quaternary ammonium salt

Synthesis and antibacterial activities of quaternary ammonium salt of chitosan 1

Reductive amination

Synthesis of an aza analogue of 2-deoxy-D-ribofuranose and its homologues 115

Reductive hydroxyamination

Mild tagging procedures for the structural analysis of glycans 59

Rhodophyta

Structural analysis of *Gigartina pistillata* carrageenans (Gigartinales, Rhodophyta) 271

Ribotyping

Extracellular polysaccharides of modified strains of *Erwinia* spp. 295

(3*R*,4*R*)-4-(Hydroxymethyl)pyrrolidin-3-ol

Synthesis of an aza analogue of 2-deoxy-D-ribofuranose and its homologues 115

Sargassum stenophyllum

Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281

Selective cleavage

Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetradeoxy-L-glycero-L-manno-non-2-ulonic acid 241

Size-exclusion chromatography

Preparation and characterisation of oligosaccharides produced by nitrous acid depolymerisation of chitosans 137

L-Sorbose

D-Fructose–L-sorbose interconversions. Access to 5-thio-D-fructose and interaction with the D-fructose transporter, GLUT5 327

Specific degradation

Specific degradation of pectins via a carbodiimide-mediated Lossen rearrangement of methyl esterified galacturonic acid residues 47

Sphingomonas adhaesiva

Structural analysis of a new glycosphingolipid from the lipopolysaccharide-lacking bacterium *Sphingomonas adhaesiva* 87

Squaric acid

The crystal structure of the 1:1 inclusion complex of β -cyclodextrin with squaric acid 145

Streptococcus sobrinus

Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ^{13}C -labeled sucrose 19

Streptomycin

Extracellular polysaccharides of modified strains of *Erwinia* spp. 295

Structure

Extracellular polysaccharides of modified strains of *Erwinia* spp. 295

Succinoglycan

Biotin labeling of the symbiotically important succinoglycan oligosaccharides of *Rhizobium meliloti* for identification of putative plant receptors 73

D-[U- ^{13}C]sucrose

Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ^{13}C -labeled sucrose 19

Sucrose glucosyltransferase

Dextran acceptor reaction of *Streptococcus sobrinus* glucosyltransferase GTF-I as revealed by using uniformly ^{13}C -labeled sucrose 19

Sugars

Formation and structure of a complex of sucrose with cobalt(III)bis(phenanthroline) 185

Sulfated heteropolysaccharides

Structural studies on fucoidans from the brown seaweed *Sargassum stenophyllum* 281

Symbiotic signal

Biotin labeling of the symbiotically important succinoglycan oligosaccharides of *Rhizobium meliloti* for identification of putative plant receptors 73

Synthesis

Synthesis and antibacterial activities of quaternary ammonium salt of chitosan 1

2-Thio- β -glucopyranoside

Stereoselective synthesis of 2-*S*-ethyl(phenyl)-2-thio- β -glucopyra-

nosides via 1,2-migration and concurrent glycosidation of ethyl(phenyl) 2,3-orthoester-1-thio- α -mannopyranosides 105

Thiohydantoin

Synthesis of β -D-galactofuranosyl nucleoside analogues. A new type of β -D-galactofuranosidase inhibitor 123

TNF α production inhibitor

Synthesis of lipid A type pyran carboxylic acids with ether chains and their biological activities 203

Transglycosylation

Chemoenzymatic synthesis of 2-chloro-4-nitrophenyl β -maltoheptaoside acceptor-products using glycogen phosphorylase b 129

Purification and characterization of a β -glucuronidase from *Aspergillus niger* 27

Triflic acid solvolysis

Structure of the acidic O-specific polysaccharide from *Proteus vulgaris* O39 containing 5,7-diacetamido-3,5,7,9-tetradeoxy-L-glycero-L-manno-non-2-ulonic acid 241

UDP-GalNAc

Studies of acceptor site specificities for three members of UDP-GalNAc:*N*-acetylgalactosaminyltransferases by using a synthetic peptide mimicking the tandem repeat of MUC5AC 165

UDPG pyrophosphorylase

High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159

Uridine diphosphoglucose

High yielding one-pot enzyme-catalyzed synthesis of UDP-glucose in gram scales 159

Vibrio cholerae

Depolymerization of the capsular polysaccharide from *Vibrio cholerae* O139 by a lyase associated with the bacteriophage JA1 263

X-ray crystallography

Crystal structure of *N*-(tri-*O*-acetyl- α -D-xylopyranosyl)pyridinium bromide 257

X-ray structure

X-ray structure of β -cyclodextrin-2,7-dihydroxy-naphthalene-4,6 H_2O : an unusually distorted macrocycle 251
