

Subject Index of Volume 335

- MM3
Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261
- Abequose
Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261
- Acetyl group
Acetyl substitution of the O-specific polysaccharide caryophyllan from the phenol phase of *Pseudomonas* (*Burkholderia*) *caryophylli* 205
- Aldose bisulfite compounds
Structure and solution equilibria of D-glucose and D-mannose sulfite adducts 1
- Alginate lyase
Cloning, sequence analysis and expression of *Pseudoalteromonas elyakovii* IAM 14594 gene (*alyPEEC*) encoding the extracellular alginate lyase 11
- Alkali metal ions
Interaction of metal ions with *N*-glycosylamines: isolation and characterization of the products of 4,6-*O*-benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine with different metal ions 151
- Alkaline earth metal ions
Interaction of metal ions with *N*-glycosylamines: isolation and characterization of the products of 4,6-*O*-benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine with different metal ions 151
- 3-(2-Aminoethylthio)propyl sugars
Synthesis of a set of di- and tri-sulfated galabioses 167
- Aminooligosaccharide
Two butylated aminooligosaccharides isolated from the culture filtrate of *Streptomyces luteogriseus* 127
- Annulated pyranosides
Synthesis and transformations of new annulated pyranosides using the Pauson–Khand reaction 71
- α Anomer
Synthesis of a set of di- and tri-sulfated galabioses 167
- β Anomer
Synthesis of a set of di- and tri-sulfated galabioses 167
- Anthranilic acid
Interaction of metal ions with *N*-glycosylamines: isolation and characterization of the products of 4,6-*O*-benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine with different metal ions 151
- Antibiotics
(Chemo)enzymatic synthesis of dTDP-activated 2,6-dideoxysugars as building blocks of polyketide antibiotics 23
- Assignments, NMR
The structure of a polysaccharide from infectious strains of *Burkholderia cepacia* 45
- Bacterial enzymes
Cloning, sequence analysis and expression of *Pseudoalteromonas elyakovii* IAM 14594 gene (*alyPEEC*) encoding the extracellular alginate lyase 11
- Bromine oxidation
Synthesis of 3-hexuloses from 1,2:5,6-di-*O*-isopropylidenehexitols 141
- Burkholderia cepacia*
The structure of a polysaccharide from infectious strains of *Burkholderia cepacia* 45
- Butyatin M03
Two butylated aminooligosaccharides isolated from the culture filtrate of *Streptomyces luteogriseus* 127
- Butyatin M13
Two butylated aminooligosaccharides isolated from the culture filtrate of *Streptomyces luteogriseus* 127
- Carbocycles by Ferrier-II reaction
Synthesis and transformations of new annulated pyranosides using the Pauson–Khand reaction 71
- Caryophyllose
Acetyl substitution of the O-specific polysaccharide caryophyllan from the phenol phase of *Pseudomonas* (*Burkholderia*) *caryophylli* 205
- Cerebroside sulfate
The aglycone of sulfogalactolipids can alter the sulfate ester substitution position required for hsc70 recognition 91
- Channel structure
Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33
- Chemical shift
Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101
- Chiral discrimination
Combinatorial evaluation of the chiral discrimination of permethylated carbohydrates using fast-atom bombardment mass spectrometry 275
- Cloning
Cloning, sequence analysis and expression of *Pseudoalteromonas elyakovii* IAM 14594 gene (*alyPEEC*) encoding the extracellular alginate lyase 11
- Combinatorial evaluation
Combinatorial evaluation of the chiral discrimination of permethylated carbohydrates using fast-atom bombardment mass spectrometry 275
- Computer
Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101
- Conformational analysis
Structure and solution equilibria of D-glucose and D-mannose sulfite adducts 1
- Core
Structural analysis of the core region of the lipopolysaccharides from eight serotypes of *Klebsiella pneumoniae* 291
- β -Cyclodextrin
The dimeric complex of cyclomaltoheptaose with 1,14-tetradecanedioic acid. Comparison with related complexes 213

Database

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

5,7-Diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids, synthesis
Synthesis and NMR spectroscopy of nine stereoisomeric 5,7-diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids 221

2,4-Diacetamido-2,4,6-trideoxyhexoses

Synthesis and NMR spectroscopy of nine stereoisomeric 5,7-diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids 221

DIBALH

DIBALH mediated reduction of the acetal moiety on perhydrofuro[2,3-*b*]pyran derivatives 63

Digitoxose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Dimeric inclusion complex

The dimeric complex of cyclomaltoheptaose with 1,14-tetradecanedioic acid. Comparison with related complexes 213

3,6-Di-*O*-galloyl-D-glucose

Synthesis of gallotannins 245

Di-*O*-isopropylidenehexitols

Synthesis of 3-hexuloses from 1,2:5,6-di-*O*-isopropylidenehexitols 141

2D method

Structural determination of an exocellular mannan from *Rhodotorula mucilaginosa* YR-2 using ab initio assignment of proton and carbon NMR spectra 133

dTDP- β -L-olivose

(Chemo)enzymatic synthesis of dTDP-activated 2,6-dideoxysugars as building blocks of polyketide antibiotics 23

dTDP- α -D-olivose

(Chemo)enzymatic synthesis of dTDP-activated 2,6-dideoxysugars as building blocks of polyketide antibiotics 23

Enzymatic degradation

The structure of a polysaccharide from infectious strains of *Burkholderia cepacia* 45

Exopolysaccharide, structure

The structure of a polysaccharide from infectious strains of *Burkholderia cepacia* 45

Extensin

The effect of peptide–pectin interactions on the gelation behaviour of a plant cell wall pectin 115

FAB mass spectrometry

Combinatorial evaluation of the chiral discrimination of permethylated carbohydrates using fast-atom bombardment mass spectrometry 275

Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33

Fucose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Furanose forms of aldoses

Structure and solution equilibria of D-glucose and D-mannose sulfite adducts 1

Furo[2,3-*b*]pyrans

DIBALH mediated reduction of the acetal moiety on perhydrofuro[2,3-*b*]pyran derivatives 63

Galabiose

Synthesis of a set of di- and tri-sulfated galabioses 167

Galactomannan

A water-soluble galactomannan from the seeds of *Phoenix dactylifera* L. 297

 β -(1 \rightarrow 4)-Galactosyltransferase

Thiosugar nucleotide analogues: synthesis of uridine 5'-(2,3,6-tri-*O*-acetyl-4-*S*-acetyl-4-thio- α -D-galactopyranosyl diphosphate) 159

Gallotannin

Synthesis of gallotannins 245

Gelation

The effect of peptide–pectin interactions on the gelation behaviour of a plant cell wall pectin 115

Glycosidation

Synthesis and biological activity of 4',8-dihydroxyisoflavon-7-yl D-hexopyranosides 283

Glycosylation effect

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

Haemophilus influenzae

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

Hanessian–Hullar transformation

Synthesis and transformations of new annulated pyranosides using the Pauson–Khand reaction 71

Herbicide

Synthesis of hydantocidin and C-2-thioxo-hydantocidin 147

3-Hexuloses

Synthesis of 3-hexuloses from 1,2:5,6-di-*O*-isopropylidenehexitols 141

HPAEC

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

Hydantocidin

Synthesis of hydantocidin and C-2-thioxo-hydantocidin 147

Hydroxamic acids

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronohydroxamic acid 195

Hydroxylamine

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronohydroxamic acid 195

Hydroxyproline-rich glycoprotein

The effect of peptide–pectin interactions on the gelation behaviour of a plant cell wall pectin 115

Iota-carrageenan

Three-dimensional structure of the sodium salt of iota-carrageenan 181

Isoflavone

Synthesis and biological activity of 4',8-dihydroxyisoflavon-7-yl D-hexopyranosides 283

Junction zone

Three-dimensional structure of the sodium salt of iota-carrageenan 181

Klebsiella pneumoniae

Structural analysis of the core region of the lipopolysaccharides from eight serotypes of *Klebsiella pneumoniae* 291

Lactones

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronohydroxamic acid 195

LC–ESIMS

Two butylated aminooligosaccharides isolated from the culture filtrate of *Streptomyces luteogriseus* 127

Legionaminic acid

Synthesis and NMR spectroscopy of nine stereoisomeric 5,7-diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids 221

Lipopolysaccharide

Acetyl substitution of the O-specific polysaccharide caryophyllan from the phenol phase of *Pseudomonas (Burkholderia) caryophylli* 205

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

Lipopolysaccharide components

Synthesis and NMR spectroscopy of nine stereoisomeric 5,7-diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids 221

LPS

Structural analysis of the core region of the lipopolysaccharides from eight serotypes of *Klebsiella pneumoniae* 291

Macrolides

(Chemo)enzymatic synthesis of dTDP-activated 2,6-dideoxysugars as building blocks of polyketide antibiotics 23

Mannan

Structural determination of an exocellular mannan from *Rhodotorula mucilaginosa* YR-2 using ab initio assignment of proton and carbon NMR spectra 133

Mass spectrometry

Synthesis of 3-hexuloses from 1,2:5,6-di-*O*-isopropylidenehexitols 141

Metal–ion interaction

Interaction of metal ions with *N*-glycosylamines: isolation and characterization of the products of 4,6-*O*-benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine with different metal ions 151

Molecular mechanics

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Monosaccharides

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronehydroxamic acid 195

5-*N*-Acetyl neuraminic acid

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

Neuraminidase

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

NMR

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

Structural determination of an exocellular mannan from *Rhodotorula mucilaginosa* YR-2 using ab initio assignment of proton and carbon NMR spectra 133

NMR spectroscopy

Structure and solution equilibria of D-glucose and D-mannose sulfite adducts 1

Nucleotide deoxysugars

(Chemo)enzymatic synthesis of dTDP-activated 2,6-dideoxysugars as building blocks of polyketide antibiotics 23

4,6-*O*-Benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine

Interaction of metal ions with *N*-glycosylamines: isolation and characterization of the products of 4,6-*O*-benzylidene-*N*-(*o*-carboxyphenyl)- β -D-glucopyranosylamine with different metal ions 151

4,6-*O*-Ethylidene- β -D-glucopyranosylamine

Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33

3-*O*-Galloyl-D-glucose

Synthesis of gallotannins 245

6-*O*-Galloyl-D-glucose

Synthesis of gallotannins 245

Opportunistic pathogen

The structure of a polysaccharide from infectious strains of *Burkholderia cepacia* 45

PAD

A rapid and sensitive procedure for determination of 5-*N*-acetyl neuraminic acid in lipopolysaccharides of *Haemophilus influenzae*: a survey of 24 non-typeable *H. influenzae* strains 251

Paratose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Pauson–Khand reaction

Synthesis and transformations of new annulated pyranosides using the Pauson–Khand reaction 71

Pectin

The effect of peptide–pectin interactions on the gelation behaviour of a plant cell wall pectin 115

Permethylated carbohydrates

Combinatorial evaluation of the chiral discrimination of permethylated carbohydrates using fast-atom bombardment mass spectrometry 275

Phoenix dactylifera

A water-soluble galactomannan from the seeds of *Phoenix dactylifera* L. 297

Poly-L-lysine

The effect of peptide–pectin interactions on the gelation behaviour of a plant cell wall pectin 115

Polysaccharide

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

Prediction

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

Pseudaminic acid

Synthesis and NMR spectroscopy of nine stereoisomeric 5,7-diacetamido-3,5,7,9-tetraoxynon-2-ulonic acids 221

Pseudoalteromonas elyakovii

Cloning, sequence analysis and expression of *Pseudoalteromonas elyakovii* IAM 14594 gene (*alyPEEC*) encoding the extracellular alginate lyase 11

Pseudomonas (Burkholderia) caryophylli

Acetyl substitution of the O-specific polysaccharide caryophyllan from the phenol phase of *Pseudomonas (Burkholderia) caryophylli* 205

[3]Pseudorotaxane

The dimeric complex of cyclomaltoheptaose with 1,14-tetradecanedioic acid. Comparison with related complexes 213

Quinovose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Reductive cleavage of benzylidene acetals

DIBALH mediated reduction of the acetal moiety on perhydrofuro[2,3-*b*]pyran derivatives 63

Regio-selective sulfation

Synthesis of a set of di- and tri-sulfated galabioses 167

Rhamnose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Rhodotorula mucilaginosa

Structural determination of an exocellular mannan from *Rhodotorula mucilaginosa* YR-2 using ab initio assignment of proton and carbon NMR spectra 133

Ring puckering

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Saccharide–Schiff bases

Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33

S-Alkylthiopentitols

Efficient syntheses of 1-*S*-alkyl-1-thio-L-ribitols, D-lyxitols and L-xylitols from D-pentono-1,4-lactones 55

S-Alkylthiopentonolactones

Efficient syntheses of 1-*S*-alkyl-1-thio-L-ribitols, D-lyxitols and L-xylitols from D-pentono-1,4-lactones 55

Seed and cell wall

A water-soluble galactomannan from the seeds of *Phoenix dactylifera* L. 297

Sequence analysis

Cloning, sequence analysis and expression of *Pseudoalteromonas elyakovii* IAM 14594 gene (*alyPEEC*) encoding the extracellular alginate lyase 11

Single crystal XRD

Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33

Soluble glycolipid analog

The aglycone of sulfogalactolipids can alter the sulfate ester substitution position required for hsc70 recognition 91

Stereoselective synthesis

Synthesis and biological activity of 4',8-dihydroxyisoflavon-7-yl D-hexopyranosides 283

Streptomyces luteogriseus

Two butylated aminooligosaccharides isolated from the culture filtrate of *Streptomyces luteogriseus* 127

Stress protein

The aglycone of sulfogalactolipids can alter the sulfate ester substitution position required for hsc70 recognition 91

Structural determination

Structural determination of an exocellular mannan from *Rhodotorula mucilaginosa* YR-2 using ab initio assignment of proton and carbon NMR spectra 133

Structure

Computer-assisted structural analysis of regular glycopolymers on the basis of ^{13}C NMR data 101

Sugar nucleotides

Thiosugar nucleotide analogues: synthesis of uridine 5'-(2,3,6-tri-*O*-acetyl-4-*S*-acetyl-4-thio- α -D-galactopyranosyl diphosphate) 159

Sulfatide

The aglycone of sulfogalactolipids can alter the sulfate ester substitution position required for hsc70 recognition 91

Sulfogalactose isomers

The aglycone of sulfogalactolipids can alter the sulfate ester substitution position required for hsc70 recognition 91

Synthesis of spiro-hydantoin

Synthesis of hydantocidin and *C*-2-thioxo-hydantocidin 147

1,14-Tetradecanedioic acid

The dimeric complex of cyclomaltoheptaose with 1,14-tetradecanedioic acid. Comparison with related complexes 213

Thio sugars

Thiosugar nucleotide analogues: synthesis of uridine 5'-(2,3,6-tri-*O*-acetyl-4-*S*-acetyl-4-thio- α -D-galactopyranosyl diphosphate) 159

Three-dimensional structure

Three-dimensional structure of the sodium salt of iota-carrageenan 181

Tridentate binding core

Synthesis, characterisation and crystal structures of Schiff bases from the reaction of 4,6-*O*-ethylidene- β -D-glucopyranosylamine with substituted salicylaldehydes 33

3,4,6-Tri-*O*-galloyl-D-glucose

Synthesis of gallotannins 245

Tyvelose

Modeling of deoxy- and dideoxyaldohexopyranosyl ring puckering with MM3(92) 261

Unprotected bromolactones

Efficient syntheses of 1-*S*-alkyl-1-thio-L-ribitols, D-lyxitols and L-xylitols from D-pentono-1,4-lactones 55

Water, reactions in

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronohydroxamic acid 195

X-ray crystal structure

A convenient preparation of aldonohydroxamic acids in water and crystal structure of L-erythronohydroxamic acid 195

X-ray diffraction

Three-dimensional structure of the sodium salt of iota-carrageenan 181

X-Ray structure

Structure and solution equilibria of D-glucose and D-mannose sulfite adducts 1
