

Subject Index of Volume 336

Acid sugars

Sugar complexes with metal²⁺ ions: thermodynamic parameters of associations of Ca²⁺, Mg²⁺ and Zn²⁺ with galactaric acid 55

1,4-Anhydro-2-phenylselenenyl-pentitols

Synthesis of erythro and threo furanoid glycals from 1- and 2-phenylselenenyl-carbohydrate derivatives 83

1,6-Anhydrosugars

Syntheses of imido-substituted glycosans and their photocyclisation towards highly functionalised heterotricycles 271

Anti-D-galacturonic acid antibodies

Antibodies with specificities for D-xylose and for D-galacturonic acid residues of flaxseed polysaccharides 195

Antigen

Synthesis of a hexasaccharide that relates to the arabinogalactan epitope 99

Synthesis of an L-rhamnose tetrasaccharide, the common and major structure of the repeating unit of the O-antigenic polysaccharide of a strain of *Klebsiella pneumoniae* and *Pseudomonas holci* 229

Anti-Xa activity

Generation of anti-factor Xa active, 3-O-sulfated glucosamine-rich sequences by controlled desulfation of oversulfated heparins 283

Anti-D-xylose antibodies

Antibodies with specificities for D-xylose and for D-galacturonic acid residues of flaxseed polysaccharides 195

Arabinogalactan

Synthesis of a hexasaccharide that relates to the arabinogalactan epitope 99

Arabinogalactans

Synthesis of the α -L-Araf-(1→2)- β -D-Galp-(1→6)- β -D-Galp-(1→6)-[α -L-Araf-(1→2)]- β -D-Galp-(1→6)-D-Gal hexasaccharide as a possible repeating unit of the cell-cultured exudates of *Echinacea purpurea* arabinogalactan 107

Arachniotus

Chemical structure of a polysaccharide isolated from the cell wall of *Arachniotus verruculosus* and *A. ruber* 325

Ascophyllum nodosum

A fucoidan fraction from *Ascophyllum nodosum* 155

Azepanediones

Syntheses of imido-substituted glycosans and their photocyclisation towards highly functionalised heterotricycles 271

2-Azidophospholane

Synthesis of novel deoxy λ^5 phospho sugar nucleosides: 1,3-dipolar cycloaddition of an azidophospholane with alkynes 257

Azocanediones

Syntheses of imido-substituted glycosans and their photocyclisation towards highly functionalised heterotricycles 271

Bacterial polysaccharide

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

Biphasic reactions

Preparation of acetylated pyranoid glycals from glycosyl halides

by chromium(II) complexes under aqueous biphasic conditions 225

Bleach

Facile nitroxide-mediated oxidations of D-glucose to D-glucaric acid 75

Branched-hexasaccharide

Synthesis of the α -L-Araf-(1→2)- β -D-Galp-(1→6)- β -D-Galp-(1→6)-[α -L-Araf-(1→2)]- β -D-Galp-(1→6)-D-Gal hexasaccharide as a possible repeating unit of the cell-cultured exudates of *Echinacea purpurea* arabinogalactan 107

Brown alga

A fucoidan fraction from *Ascophyllum nodosum* 155

Calcium binding

Enzymatically and chemically de-esterified lime pectins: characterisation, polyelectrolyte behaviour and calcium binding properties 117

Canonical description

LINUCS: LInear Notation for Unique description of Carbohydrate Sequences 1

Carbohydrate

Synthesis of a hexasaccharide that relates to the arabinogalactan epitope 99

Carbohydrates

An efficient and stereoselective synthesis of β -D-Arap-(1→2)- β -D-Galp-(1→3)- β -D-Galp-(1→4)- α -D-Manp, a tetrasaccharide fragment of *Leishmania major* lipophosphoglycan 243

Carbohydrate sequence

LINUCS: LInear Notation for Unique description of Carbohydrate Sequences 1

CGTase

Trapping of a covalent enzyme intermediate in the reaction of *Bacillus macerans* cyclomaltodextrin glucanyltransferase with cyclomaltohexaose 47

Chemical composition

Structural analyses of the lipopolysaccharides from *Chlamydomonas psittaci* strain 6BC and *Chlamydomonas pneumoniae* strain Kajaani 6 213

Chemical modification

Chemical modifications of the (1→3)- α -D-glucan from spores of *Ganoderma lucidum* and investigation of their physicochemical properties and immunological activity 127

Chemotaxonomy

Chemical structure of a polysaccharide isolated from the cell wall of *Arachniotus verruculosus* and *A. ruber* 325

Chlamydomonas pneumoniae

Structural analyses of the lipopolysaccharides from *Chlamydomonas psittaci* strain 6BC and *Chlamydomonas pneumoniae* strain Kajaani 6 213

Chlamydomonas psittaci

Structural analyses of the lipopolysaccharides from *Chlamydomonas psittaci* strain 6BC and *Chlamydomonas pneumoniae* strain Kajaani 6 213

Chromium(II) complexes

Preparation of acetylated pyranoid glycals from glycosyl halides by chromium(II) complexes under aqueous biphasic conditions 225

Conformation

¹H NMR studies of hydroxy protons of the V[β-Gal(1 → 3)-α-GalNAc(1 → O)]THPGY glycopeptide 319

Crystal structure

Two stereoisomeric 3¹,2¹¹-anhydro-α-cyclodextrins: a molecular dynamics and crystallographic study 297

Cycloamylose

An orthorhombic crystal form of cyclohexaicosaoose, CA26:32.59 H₂O: comparison with the triclinic form 141

Cyclohexaicosaoose

An orthorhombic crystal form of cyclohexaicosaoose, CA26:32.59 H₂O: comparison with the triclinic form 141

Cyclomaltodextrin glucanyltransferase

Trapping of a covalent enzyme intermediate in the reaction of *Bacillus macerans* cyclomaltodextrin glucanyltransferase with cyclomaltohexaoose 47

Cyclomaltodextrins

Trapping of a covalent enzyme intermediate in the reaction of *Bacillus macerans* cyclomaltodextrin glucanyltransferase with cyclomaltohexaoose 47

2D compressibility

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

De-esterification

Enzymatically and chemically de-esterified lime pectins: characterisation, polyelectrolyte behaviour and calcium binding properties 117

Degree of substitution

Preparation and characterisation of fluorescent chitosans using 9-anthraldehyde as fluorophore 291

2-Deoxy-2-trichloroacetamido-D-glucose

Study of glycosylation with *N*-trichloroacetyl-D-glucosamine derivatives in the syntheses of the spacer-armed pentasaccharides sialyl lacto-*N*-neotetraose and sialyl lacto-*N*-tetraose, their fragments, and analogues 13

Di-*N*-acetyl-β-D-glucosaminyl-cyclomaltoheptaose (βCD)

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl-β-D-glucosaminyl)cyclomaltoheptaose (*n* = 2, 3, and 4) and 6-*O*-[6-*O*-(*N*-acetyl-β-D-glucosaminyl)-*N*-acetyl-β-D-glucosaminyl]cyclomaltoheptaose 203

1,3-Dipolar cycloaddition

Synthesis of polyhydroxyindolizidines from 5,6-dihydro-2*H*-pyran-2-one 315

1,3-Dipolar cycloaddition, X-ray crystallography, Absolute configuration

Synthesis of novel deoxy λ⁵ phospho sugar nucleosides: 1,3-dipolar cycloaddition of an azidophospholane with alkynes 257

Disordered water chain

An orthorhombic crystal form of cyclohexaicosaoose, CA26:32.59 H₂O: comparison with the triclinic form 141

Double bond formation

Synthesis of erythro and threo furanoid glycals from 1- and 2-phenylselenenyl-carbohydrate derivatives 83

Echinacea purpurea

Synthesis of the α-*L*-Araf-(1 → 2)-β-D-Galp-(1 → 6)-β-D-Galp-(1 → 6)-[α-*L*-Araf-(1 → 2)]-β-D-Galp-(1 → 6)-D-Gal hexasaccharide as a possible repeating unit of the cell-cultured exudates of *Echinacea purpurea* arabinogalactan 107

Enzymatic degradation

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl-β-D-glucosaminyl)cyclomaltoheptaose (*n* = 2, 3, and

4) and 6-*O*-[6-*O*-(*N*-acetyl-β-D-glucosaminyl)-*N*-acetyl-β-D-glucosaminyl]cyclomaltoheptaose 203

Enzyme mechanism

Trapping of a covalent enzyme intermediate in the reaction of *Bacillus macerans* cyclomaltodextrin glucanyltransferase with cyclomaltohexaoose 47

Epitope

Synthesis of a hexasaccharide that relates to the arabinogalactan epitope 99

Fibronectin

¹H NMR studies of hydroxy protons of the V[β-Gal(1 → 3)-α-GalNAc(1 → O)]THPGY glycopeptide 319

Flaxseed polysaccharides

Antibodies with specificities for D-xylose and for D-galacturonic acid residues of flaxseed polysaccharides 195

Fluorescent chitosans

Preparation and characterisation of fluorescent chitosans using 9-anthraldehyde as fluorophore 291

Fruit juices

Rapid analysis of sugars in fruit juices by FT-NIR spectroscopy 63

FT-NIR spectroscopy

Rapid analysis of sugars in fruit juices by FT-NIR spectroscopy 63

Fucoidan

A fucoidan fraction from *Ascophyllum nodosum* 155

Fungi

Chemical structure of a polysaccharide isolated from the cell wall of *Arachniotus verruculosus* and *A. ruber* 325

Galactaric acid

Sugar complexes with metal²⁺ ions: thermodynamic parameters of associations of Ca²⁺, Mg²⁺ and Zn²⁺ with galactaric acid 55

Ganoderma lucidum

Chemical modifications of the (1 → 3)-α-D-glucan from spores of *Ganoderma lucidum* and investigation of their physicochemical properties and immunological activity 127

(1 → 3)-α-D-Glucan

Chemical modifications of the (1 → 3)-α-D-glucan from spores of *Ganoderma lucidum* and investigation of their physicochemical properties and immunological activity 127

Glucaric acid

Facile nitroxide-mediated oxidations of D-glucose to D-glucaric acid 75

D-Glucose prodrugs

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

Glucuronic acid

Preparative route to glucuronyl donors bearing temporary protecting group at O-3 via 6,3-lactonisation by Bz₂O or Piv₂O 309

Glucuronyl donors

Preparative route to glucuronyl donors bearing temporary protecting group at O-3 via 6,3-lactonisation by Bz₂O or Piv₂O 309

Glycals

Preparation of acetylated pyranoid glycals from glycosyl halides by chromium(II) complexes under aqueous biphasic conditions 225

Glycal synthesis

Synthesis of erythro and threo furanoid glycals from 1- and 2-phenylselenenyl-carbohydrate derivatives 83

Glycobioinformatics

LINUCS: LInear Notation for Unique description of Carbohydrate Sequences 1

Glycodatabase

LINUCS: LInear Notation for Unique description of Carbohydrate Sequences 1

Glycopeptide

¹H NMR studies of hydroxy protons of the V[β-Gal(1 → 3)-α-GalNAc(1 → O)]THPGY glycopeptide 319

Glycosylation

An efficient and stereoselective synthesis of β-D-Arap-(1 → 2)-β-D-Galp-(1 → 3)-β-D-Galp-(1 → 4)-α-D-Manp, a tetrasaccharide fragment of *Leishmania major* lipophosphoglycan 243

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Heparin oversulfation/desulfation

Generation of anti-factor Xa active, 3-*O*-sulfated glucosamine-rich sequences by controlled desulfation of oversulfated heparins 283

Hetero sugars

Synthesis of novel deoxy λ⁵ phospho sugar nucleosides: 1,3-dipolar cycloaddition of an azidophospholane with alkynes 257

HIV

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

HPLC

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl-β-D-glucosaminyl)cyclomaltoheptaose (*n* = 2, 3, and 4) and 6-*O*-[6-*O*-(*N*-acetyl-β-D-glucosaminyl)-*N*-acetyl-β-D-glucosaminyl]cyclomaltoheptaose 203

Hydrophobic channel

An orthorhombic crystal form of cyclohexaicosose, CA26-32.59 H₂O: comparison with the triclinic form 141

7-Hydroxylentiginosine

Synthesis of polyhydroxyindolizidines from 5,6-dihydro-2*H*-pyran-2-one 315

Hydroxy protons

¹H NMR studies of hydroxy protons of the V[β-Gal(1 → 3)-α-GalNAc(1 → O)]THPGY glycopeptide 319

3¹,2¹¹-Anhydro-α-cyclodextrin

Two stereoisomeric 3¹,2¹¹-anhydro-α-cyclodextrins: a molecular dynamics and crystallographic study 297

2¹,3¹-(2¹*S*)-Anhydro-α-cyclodextrin

Two stereoisomeric 3¹,2¹¹-anhydro-α-cyclodextrins: a molecular dynamics and crystallographic study 297

Imidate

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Imides

Syntheses of imido-substituted glycosans and their photocyclisation towards highly functionalised heterotricycles 271

Immunological activity

Chemical modifications of the (1 → 3)-α-D-glucan from spores of *Ganoderma lucidum* and investigation of their physicochemical properties and immunological activity 127

Indinavir

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

Interfacial behaviour

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Intrinsic viscosities

Preparation and characterisation of fluorescent chitosans using 9-anthraldehyde as fluorophore 291

Kinetic hydrolytic resolution

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Lactonisation

Preparative route to glucuronyl donors bearing temporary protecting group at O-3 via 6,3-lactonisation by Bz₂O or Piv₂O 309

LC-MS

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl-β-D-glucosaminyl)cyclomaltoheptaose (*n* = 2, 3, and 4) and 6-*O*-[6-*O*-(*N*-acetyl-β-D-glucosaminyl)-*N*-acetyl-β-D-glucosaminyl]cyclomaltoheptaose 203

Lipopolysaccharide

Structural analyses of the lipopolysaccharides from *Chlamydomonas psittaci* strain 6BC and *Chlamydomonas pneumoniae* strain Kajaani 6 213

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

Metal complexes

Sugar complexes with metal²⁺ ions: thermodynamic parameters of associations of Ca²⁺, Mg²⁺ and Zn²⁺ with galactaric acid 55

MIP ethers

Synthesis of the α-L-Araf-(1 → 2)-β-D-Galp-(1 → 6)-β-D-Galp-(1 → 6)-[α-L-Araf-(1 → 2)]-β-D-Galp-(1 → 6)-D-Gal hexasaccharide as a possible repeating unit of the cell-cultured exudates of *Echinacea purpurea* arabinogalactan 107

Molecular dynamics

Two stereoisomeric 3¹,2¹¹-anhydro-α-cyclodextrins: a molecular dynamics and crystallographic study 297

Monolayers

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Multivariate analysis

Rapid analysis of sugars in fruit juices by FT-NIR spectroscopy 63

N-(5-Bromo-2-hydroxybenzylidene-4,6-*O*-ethylidene-β-D-glucopyranosylamine

Synthesis, characterization and the first crystal structure of the Zn(II) complex of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 249

Nelfinavir

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

Neoglycosyl ceramides

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

Nitroxide

Facile nitroxide-mediated oxidations of D-glucose to D-glucaric acid 75

NMR

¹H NMR studies of hydroxy protons of the V[β-Gal(1 → 3)-α-GalNAc(1 → O)]THPGY glycopeptide 319

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl-β-D-glucosaminyl)cyclomaltoheptaose (*n* = 2, 3, and 4) and 6-*O*-[6-*O*-(*N*-acetyl-β-D-glucosaminyl)-*N*-acetyl-β-D-glucosaminyl]cyclomaltoheptaose 203

NMR analysis

Generation of anti-factor Xa active, 3-*O*-sulfated glucosamine-rich sequences by controlled desulfation of oversulfated heparins 283

NMR spectroscopy

Chemical structure of a polysaccharide isolated from the cell wall of *Arachniotus verruculosus* and *A. ruber* 325

NMR-based identification of cell wall anionic polymers of *Spirillum yamanashiensis* VKM Ac-1993^T 237

n-Propanol inclusion complex

Two stereoisomeric 3¹,2¹¹-anhydro-α-cyclodextrins: a molecular dynamics and crystallographic study 297

Nucleoside analogues, Bromohydrins

Synthesis of novel deoxy λ⁵ phospho sugar nucleosides: 1,3-dipolar cycloaddition of an azidophospholane with alkynes 257

O-Antigen

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

4,6-*O*-Ethylidene- β -D-glucopyranosylamine

Synthesis, characterization and the first crystal structure of the Zn(II) complex of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 249

4,6-*O*-Ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine

Synthesis, characterization and the first crystal structure of the Zn(II) complex of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 249

Oligomers

An efficient and stereoselective synthesis of β -D-Arap-(1 \rightarrow 2)- β -D-Galp-(1 \rightarrow 3)- β -D-Galp-(1 \rightarrow 4)- α -D-Manp, a tetrasaccharide fragment of *Leishmania major* lipophosphoglycan 243

Oligosaccharide

Synthesis of an L-rhamnose tetrasaccharide, the common and major structure of the repeating unit of the O-antigenic polysaccharide of a strain of *Klebsiella pneumoniae* and *Pseudomonas holci* 229

3-*O*-Methylmannose

NMR-based identification of cell wall anionic polymers of *Spirilliplanes yamanashiensis* VKM Ac-1993^T 237

3-*O*-Sulfation

Generation of anti-factor Xa active, 3-*O*-sulfated glucosamine-rich sequences by controlled desulfation of oversulfated heparins 283

Parasites

An efficient and stereoselective synthesis of β -D-Arap-(1 \rightarrow 2)- β -D-Galp-(1 \rightarrow 3)- β -D-Galp-(1 \rightarrow 4)- α -D-Manp, a tetrasaccharide fragment of *Leishmania major* lipophosphoglycan 243

Pectin

Enzymatically and chemically de-esterified lime pectins: characterisation, polyelectrolyte behaviour and calcium binding properties 117

Pectin methyl esterase

Enzymatically and chemically de-esterified lime pectins: characterisation, polyelectrolyte behaviour and calcium binding properties 117

Phospha sugars

Synthesis of novel deoxy λ^5 phospha sugar nucleosides: 1,3-dipolar cycloaddition of an azidophospholane with alkynes 257

Photochemistry

Syntheses of imido-substituted glycosans and their photocyclisation towards highly functionalised heterotricycles 271

Phytopathogen

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

Polyelectrolyte

Enzymatically and chemically de-esterified lime pectins: characterisation, polyelectrolyte behaviour and calcium binding properties 117

Polysaccharides

Chemical structure of a polysaccharide isolated from the cell wall of *Arachnion verruculosus* and *A. ruber* 325

Porcine trehalase

Syntheses and activities as trehalase inhibitors of *N*-arylglucosylamines derived from fluorinated anilines 79

Positional isomer

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl- β -D-glucosaminyl)cyclomaltoheptaose ($n = 2, 3$, and 4) and 6-*O*-[6-*O*-(*N*-acetyl- β -D-glucosaminyl)-*N*-acetyl- β -D-glucosaminyl]cyclomaltoheptaose 203

Primary alcohol oxidation

Facile nitroxide-mediated oxidations of D-glucose to D-glucaric acid 75

Protease inhibitors

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

Pseudomonas syringae

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

Regioselective reaction

Synthesis of a hexasaccharide that relates to the arabinogalactan epitope 99

Regioselectivity

Preparative route to glucuronyl donors bearing temporary protecting group at O-3 via 6,3-lactonisation by Bz₂O or Piv₂O 309

Rhamnose

Synthesis of an L-rhamnose tetrasaccharide, the common and major structure of the repeating unit of the O-antigenic polysaccharide of a strain of *Klebsiella pneumoniae* and *Pseudomonas holci* 229

Rhizoctonia solani

Syntheses and activities as trehalase inhibitors of *N*-arylglucosylamines derived from fluorinated anilines 79

Saquinavir

Synthesis and anti-HIV activity of glucose-containing prodrugs derived from saquinavir, indinavir and nelfinavir 161

Selenoglycosides

Synthesis of erythro and threo furanoid glycals from 1- and 2-phenylselenenyl-carbohydrate derivatives 83

Selenoxide elimination

Synthesis of erythro and threo furanoid glycals from 1- and 2-phenylselenenyl-carbohydrate derivatives 83

Separation

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl- β -D-glucosaminyl)cyclomaltoheptaose ($n = 2, 3$, and 4) and 6-*O*-[6-*O*-(*N*-acetyl- β -D-glucosaminyl)-*N*-acetyl- β -D-glucosaminyl]cyclomaltoheptaose 203

Sialyl-oligosaccharides

Study of glycosylation with *N*-trichloroacetyl-D-glucosamine derivatives in the syntheses of the spacer-armed pentasaccharides sialyl lacto-*N*-neotetraose and sialyl lacto-*N*-tetraose, their fragments, and analogues 13

Spirilliplanes

NMR-based identification of cell wall anionic polymers of *Spirilliplanes yamanashiensis* VKM Ac-1993^T 237

Staudinger reaction

Syntheses and interfacial behaviour of neoglycolipid analogues of glycosyl ceramides 181

(3*S*)-*tert*-Butoxy-1-pyrroline *N*-oxide

Synthesis of polyhydroxyindolizidines from 5,6-dihydro-2*H*-pyran-2-one 315

Structural analysis

Isolation and structural analyses of positional isomers of 6¹,6ⁿ-di-*O*-(*N*-acetyl- β -D-glucosaminyl)cyclomaltoheptaose ($n = 2, 3$, and 4) and 6-*O*-[6-*O*-(*N*-acetyl- β -D-glucosaminyl)-*N*-acetyl- β -D-glucosaminyl]cyclomaltoheptaose 203

Structural heterogeneity

Structural heterogeneity in the lipopolysaccharides of *Pseudomonas syringae* with O-polysaccharide chains having different repeating units 329

Structure

Structural analyses of the lipopolysaccharides from *Chlamydomonas psittaci* strain 6BC and *Chlamydomonas pneumoniae* strain Kajaani 6 213

Sugar-1-phosphate polymer

NMR-based identification of cell wall anionic polymers of *Spirilliplanes yamanashiensis* VKM Ac-1993^T 237

Sugars

Rapid analysis of sugars in fruit juices by FT-NIR spectroscopy 63

Teichoic acids

NMR-based identification of cell wall anionic polymers of *Spirilliplanes yamanashiensis* VKM Ac-1993^T 237

Thermodynamic study

Sugar complexes with metal²⁺ ions: thermodynamic parameters of associations of Ca²⁺, Mg²⁺ and Zn²⁺ with galactaric acid 55

Thioglycosides

Study of glycosylation with *N*-trichloroacetyl-D-glucosamine derivatives in the syntheses of the spacer-armed pentasaccharides sialyl lacto-*N*-neotetraose and sialyl lacto-*N*-tetraose, their fragments, and analogues 13

Transglycosylation reactions

Trapping of a covalent enzyme intermediate in the reaction of

Bacillus macerans cyclomaltodextrin glucanyltransferase with cyclomaltohexaose 47

Trehalase inhibitors

Syntheses and activities as trehalase inhibitors of *N*-arylglycosylamines derived from fluorinated anilines 79

V-amylose

An orthorhombic crystal form of cyclohexaicosaoose, CA26·32.59 H₂O: comparison with the triclinic form 141

X-ray diffraction study

Synthesis, characterization and the first crystal structure of the Zn(II) complex of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 249

Zn(II) complex

Synthesis, characterization and the first crystal structure of the Zn(II) complex of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 249
