

Subject Index of Volume 337

ab initio

Ab initio computational study of β -cellobiose conformers using B3LYP/6-311++G** 1833

A DFT/ab initio study of hydrogen bonding and conformational preference in model cellobiose analogs using B3LYP/6-311++G** 1851

Crystal structure of penta-*O*-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301

Acarbose

Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextran-sucrases 2427

Acarbose analogues

Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltotetraose and cyclomaltodextrin glucanyltransferase 509

Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextran-sucrases 2427

Acarbose biosynthesis

Biosynthetic studies on the α -glucosidase inhibitor acarbose: the chemical synthesis of dTDP-4-amino-4,6-dideoxy- α -D-glucose 297

Acceptor reactions

Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltotetraose 2245

Oligosaccharide synthesis by dextran-sucrase: new unconventional acceptors 1811

Acemetacin

The self-association of the drug acemetacin and its interactions and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

acetal linkage

Conformational studies of a novel cationic glycolipid, glyceroplasmalopsychosine, from bovine brain by NMR spectroscopy 1775

Acetals

Selective epimerization of L-*chiro*-inositol to L-*muco*- and D-*chiro*-inositol derivatives 1

5-Acetamido-4,8-anhydro-1,2,3,5-tetra-deoxy-D-glycero-D-ido-non-1-enitol

Oxidation of 3-C-(2-amino-2-deoxy-D-glucopyranosyl)-1-propene compounds and the structure of 3-C-(2-amino-2-deoxy-D-glucopyranosyl)-1,2-propanediol derivatives for a synthesis of 2,3-dihydro-2,7-dideoxy-N-acetylneuraminic acid 1917

2-Acetamido-2-deoxy-D-glucopyranosides

Side products of glycosidation with selected 2-acetamido-2-deoxy-D-glucopyranosides 1495

2-Acetamido-2-deoxy-D-glucose

Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557

2-Acetamido-4-O-[(R)-1-carboxyethyl]-2-deoxy-D-glucose

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of N-acetylmuramic acid, 2-acetamido-4-O-[(R)-1-carboxyethyl]-2-deoxy-D-glucose 2463

Acetate

A mild and selective method for cleavage of *O*-acetyl groups with dibutyltin oxide 1763

Acetolysis

Synthesis of 3-C-(6-*O*-acetyl-2,3,4-tri-*O*-benzyl- α -D-mannopyranosyl)-1-propene: a caveat 1769

Acetylated (α - and β -D-glycopyranosyl)ethylphosphonates

Towards α - or β -D-C-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

Acetylated 1,5-anhydro-D-glucitol

Towards α - or β -D-C-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

Acetylated 2-deoxy- α -D-arabino-hexopyranose

Towards α - or β -D-C-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

Acetylated pyranosides

Regioselective enzymatic hydrolysis of acetylated pyranoses and pyranosides using immobilised lipases. An easy chemoenzymatic synthesis of α - and β -D-glucopyranose acetates bearing a free secondary C-4 hydroxyl group 1615

Acetylated sugar nitriles

Towards α - or β -D-C-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

Acetyl group migration

Regioselective enzymatic hydrolysis of acetylated pyranoses and pyranosides using immobilised lipases. An easy chemoenzymatic synthesis of α - and β -D-glucopyranose acetates bearing a free secondary C-4 hydroxyl group 1615

Acetyl migration

Side products of glycosidation with selected 2-acetamido-2-deoxy-D-glucopyranosides 1495

α_1 -Acid glycoprotein

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and progesterone. A fluorescence study 1405

Acid treatment

Depolymerization of *N*-succinyl-chitosan by hydrochloric acid 561

Acremonium cellulolyticus

Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β -chitin 133

3-Acylamido-3,6-dideoxy-D-glucose

Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365

Acylamidodisaccharides

Syntheses of unnatural N-substituted UDP-galactosamines as alternative substrates for *N*-acetylgalactosaminyl transferases 2187

- Adenophostin**
Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067
- Adjuvant**
Synthesis and surface-active properties of a new class of surfactants derived from D-gluconic acid 997
- ADPGlc**
Starch biosynthesis: mechanism for the elongation of starch chains 1015
- Aeromonas hydrophila***
Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381
- AFM**
Structural features of non-granular spherulitic maize starch 1467
- Agarans**
Sulfated polysaccharides from the red seaweed *Georgiella confluens* 57
- Agaricus blazei***
Structural characterization of a water-soluble β -D-glucan from fruiting bodies of *Agaricus blazei* Murr 1417
- Agrochemicals**
Synthesis and surface-active properties of a new class of surfactants derived from D-gluconic acid 997
- Aldehyde cyclic acetals**
Access to aldehyde acetals of sugars via palladium-catalyzed oxidation of α,β -unsaturated cyclic acetals 2325
- Alditols**
Regioselective synthesis of alditol vicinal bis-cyclic thionocarbonates via alditol stannylene acetal complexes as a short and efficient route to α,ω -diiodoalditol derivatives 69
- Aldohexose**
Crystal structure of penta-O-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301
- Aldohexosides**
Quantum mechanical and NMR spectroscopy studies on the conformations of the hydroxymethyl and methoxymethyl groups in aldohexosides 353
- Alkaline solubility**
Effects of cellulase on the modification of cellulose 1291
- Alkali solubility**
The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453
- Alkyl 5a-carba-glycosides, ether-linked**
Synthesis of an ether-linked alkyl 5a-carba- β -D-glucoside, a 5a-carba- β -D-galactoside, a 2-acetamido-2-deoxy-5a-carba- β -D-glucoside, and an alkyl 5a'-carba- β -lactoside 1979
- Alkylated derivative**
Disentangling α from β mechanical relaxations in the rubber-to-glass transition of high-sugar–chitosan mixtures 595
- Alpha amylases**
Reactions of alpha amylases with starch granules in aqueous resuspension giving products in solution and in a minimum amount of water giving products inside the granule 1113
- Amadori rearrangement**
Galactose dialdehyde as potential protein cross-linker: proof of principle 899
- 3-Amine-2,3-dideoxy saccharide**
The use of tri-O-acetyl-D-glucal and -D-galactal in the synthesis of 3-acetamido-2,3-dideoxyhexopyranoses and -hexopyranosides 1803
- 2-Aminobenzamide**
Fluorescent labeling of pectic oligosaccharides with 2-aminobenzamide and enzyme assay for pectin 1023
- 6-Amino-6-deoxycellulose**
Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297
- Aminodeoxy sugar**
Biosynthetic studies on the α -glucosidase inhibitor acarbose: the chemical synthesis of dTDP-4-amino-4,6-dideoxy- α -D-glucose 297
- Aminopropyl starch**
Preparation and structural characterisation of O-aminopropyl starch and amylose 2263
- 2-Aminopyridine**
Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208
- Amino sugars**
Structural studies on C-2 substitution in a new set of synthetic aminodeoxy sugars: the steric bulk at C-2 influences the puckering of the pyranose ring 1507
- Ammonium salts**
The role of the anion in the reaction of reducing sugars with ammonium salts 2273
- A modified stereospecific hydration model**
Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441
- Amphibia**
Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121
- Amylopectin**
Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208
- Amylose**
Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245
- Analogos**
A DFT/ab initio study of hydrogen bonding and conformational preference in model cellobiose analogs using B3LYP/6-311++G** 1851
- α and β Anomers**
Structural studies on C-2 substitution in a new set of synthetic aminodeoxy sugars: the steric bulk at C-2 influences the puckering of the pyranose ring 1507
- D- and L-*myo*-Inositol 2,4,5-trisphosphate**
Synthesis of D- and L-*myo*-inositol 2,4,5-trisphosphate and trisphosphorothioate: structural analogues of D-*myo*-inositol 1,4,5-trisphosphate 1795
- D- and L-*myo*-Inositol 2,4,5-trisphosphorothioate**
Synthesis of D- and L-*myo*-inositol 2,4,5-trisphosphate and trisphosphorothioate: structural analogues of D-*myo*-inositol 1,4,5-trisphosphate 1795
- Angiogenesis inhibitor**
LaPSvS1, a (1 \rightarrow 3)- β -galactan sulfate and its effect on angiogenesis in vivo and in vitro 1459
- 1,4-Anhydroerythritol**
Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067
- 1,5-Anhydro-D-fructose**
1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873
- 1,5-Anhydro-D-glucitol**
1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873
- Anions**
Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161
- β Anomer**
Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289
- Anomeric configuration**
Crystal structure of methyl 1,2,3,4-tetra-O-acetyl- β -D-glucopyranuronate 2343

- Anomeric mixture**
Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289
- Anomerization**
Acid-catalyzed isomerization of methyl 2-deoxy-D-arabino-hexosides: equilibria, kinetics and mechanism 265
- Anticoagulant activity**
Anticoagulant activity of a sulfated chitosan 1233
A 2-sulfated, 3-linked α -L-galactan is an anticoagulant polysaccharide 2231
Effect of (1 \rightarrow 3)- and (1 \rightarrow 4)-linkages of fully sulfated polysaccharides on their anticoagulant activity 925
- Anti- α -Gal antibody**
The synthesis of deoxy- α -Gal epitope derivatives for the evaluation of an anti- α -Gal antibody binding 1247
- Antigen**
Synthesis of GD3-lactam: a potential ligand for the development of an anti-melanoma vaccine 569
- Antigen 85 complex**
Synthesis and biological evaluation of trehalose analogs as potential inhibitors of mycobacterial cell wall biosynthesis 105
- Antigens**
Concise synthesis of a buffalo milk pentasaccharide derivative 1313
- Antiinflammatory**
LaPSyS1, a (1 \rightarrow 3)- β -galactan sulfate and its effect on angiogenesis in vivo and in vitro 1459
- Anti-metastasis**
Facile synthesis of 1-thio- β -lactoside clusters scaffolded onto *p*-methoxyphenyl, β -D-galactopyranoside, β -D-glucopyranoside, and lactoside 977
- Antioxidants**
1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873
- Antitubercular agents**
Synthesis and biological evaluation of trehalose analogs as potential inhibitors of mycobacterial cell wall biosynthesis 105
- Antitumor activity**
Synthesis of a cholestane glycoside OSW-1 with potent cytostatic activity 1269
- Apodus deciduus***
Fungal cell wall galactomannan isolated from *Apodus deciduus* 1503
- Arabica**
Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239
Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421
- Arabidopsis thaliana***
Molecular ordering of cellulose after extraction of polysaccharides from primary cell walls of *Arabidopsis thaliana*: a solid-state CP/MAS ^{13}C NMR study 587
- Arabinan**
NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255
Structural characterisation of the olive pomace pectic polysaccharide arabinan side chains 917
- Arabinitol**
Confirmation of the D configuration of the 2-substituted arabinitol 1-phosphate residue in the capsular polysaccharide from *Streptococcus pneumoniae* Type 17F 2353
- Arabinogalactan**
An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641
Morphology of Western larch arabinogalactan 2211
Structure of the arabinogalactan from gum tragacanth (*Astragalus gummifer*) 1647
- Arabinogalactan-proteins**
Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239
- Arabinogalactans**
Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239
Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421
- L-Arabinose**
Efficient synthesis of 2-deoxy-L-erythro-pentose (2-deoxy-L-ribose) from L-arabinose 397
- Arabinoxylan conformation**
On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781
- Arthro-series**
Synthetic studies on glycosphingolipids from the Protostomia phyla: syntheses of arthro-series glycosphingolipids 2037
- Aryl C-glycoside**
Synthesis of C-glycopyranosylphloroacetophenone derivatives and their anomerization facilitated by 1,3-diaxial interactions 1007
- Arylsulfonyl chloride**
One-pot synthesis of C-glycosylic compounds (C-glycosides) from D-glucal, *p*-tolylsulfonyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275
- Aspen wood**
Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711
- Aspergillus niger***
Studies on the glycosylation of wild-type and mutant forms of *Aspergillus niger* pectin methylesterase 802
Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β -chitin 133
- Association constant**
NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841
- Asymbiotic diazotroph**
Structure of the O-specific polysaccharide of the lipopolysaccharide of *Azospirillum brasilense* Sp245 869
- Aureobasidium pullulans***
New exopolysaccharides produced by *Aureobasidium pullulans* grown on glucosamine 1201
- Automated solid-phase synthesis**
Toward the automated solid-phase synthesis of oligoglucosamines: systematic evaluation of glycosyl phosphate and glycosyl trichloroacetimidate building blocks 1893
- Azasugars**
Synthesis of 1-deoxy-L-gulonojirimycin (L-guloDNJ) and 1-deoxy-D-talonojirimycin (D-taloDNJ) 1083
- Aza-Wittig reaction**
One-step synthesis of non-anomeric sugar isothiocyanates from sugar azides 2329
- Azetidines, polyhydroxylated**
Reinvestigation of the iodocyclization of 4,5,7-tri-O-benzyl-3-(N-benzylacetamido)-1,2,3-trideoxy-D-glucopyranose: unexpected formation of a 1,3-imino-heptitol derivative 273
- 3-Azide-2,3-dideoxy sugar**
The use of tri-O-acetyl-D-glucal and -D-galactal in the synthesis of 3-acetamido-2,3-dideoxyhexopyranoses and -hexopyranosides 1803
- 6-Azido-6-deoxy-2,3-di-O-tosylcellulose**
Exclusive and complete introduction of amino groups and their N-sulfo and N-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297
- Azido group**
Synthesis of 7-O-(2-deoxy-2-sulfamido- α -D-glucopyranosyl)-4-methylcoumarin sodium salt: a fluorogenic substrate for sulfamidase 1055

- (2-Azidomethyl)phenylacetyl
 (2-Azidomethyl)phenylacetyl as a new, reductively cleavable protecting group for hydroxyl groups in carbohydrate synthesis 87
- 5-Azidoneuraminic acid
 5-Azido neuraminic acid thioglycoside as sialylation donor 755
- Azospirillum brasilense*
 Structure of the O-specific polysaccharide of the lipopolysaccharide of *Azospirillum brasilense* Sp245 869
- AZT
 The use of tri-*O*-acetyl-D-glucal and -D-galactal in the synthesis of 3-acetamido-2,3-dideoxyhexopyranoses and -hexopyranosides 1803
- Bacillus amyloliquefaciens* alpha amylase
 Reactions of alpha amylases with starch granules in aqueous suspension giving products in solution and in a minimum amount of water giving products inside the granule 1113
- Bacillus licheniformis*
 Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557
- Bacterial polysaccharide
 Structure of the O-polysaccharide from the lipopolysaccharide from *Vibrio cholerae* O6 813
 Structure of the O-specific polysaccharide of the lipopolysaccharide of *Azospirillum brasilense* Sp245 869
 X-ray structure analysis of the sodium salt of bejjeran 305
- Bacterial polysaccharide structure
 Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697
 Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381
 Structure of the O-specific polysaccharide of *Providencia alcalifaciens* O16 containing *N*-acetylmuramic acid 1667
- Bacterial polysaccharide, structure
 Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365
- Bacterial polysaccharide structure
 Structure of a new 2-deoxy-2-[(*R*)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541
 Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of *N*-acetylmuramic acid, 2-acetamido-4-*O*-[(*R*)-1-carboxyethyl]-2-deoxy-D-glucose 2463
- Bacterial recombinant proteins
 Production of highly phosphorylated glycopolymers by expression of R1 in *Escherichia coli* 327
- Bacteria–plant interaction
 5,7-Diamino-5,7,9-trideoxynon-2-ulosonic acid: a novel sugar from a phytopathogenic *Pseudomonas* lipopolysaccharide 955
- Bathochromic shift
 Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161
- BCR
 Synthesis of a multivalent display of a CD22-binding trisaccharide 1605
- Bejjeran
 X-ray structure analysis of the sodium salt of bejjeran 305
- Benzothiazoline derivatives
 Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289
- Benzyl ether
 Synthesis of D- and L-*myo*-inositol 2,4,5-trisphosphate and trisphosphorothioate: structural analogues of D-*myo*-inositol 1,4,5-trisphosphate 1795
- Benzylidene group
 Photoreaction of methyl and phenyl 4,6-*O*-benzylidene-2,3-dideoxy-2-*C*-*p*-tolylsulfonyl-β-D-*erythro*-hex-2-enopyranosides in methanol 2061
- Benzylactoside
 Human milk oligosaccharides: an enzymatic protection step simplifies the synthesis of 3'- and 6'-*O*-sialyllactose and their analogues 473
- Bifunctional carbohydrate-based monomers
 Synthesis of D-mannitol and L-iditol derivatives as monomers for the preparation of new regioregular AABB-type polyamides 607
- Biocombinatorial synthesis using a living cell
 Synthesis of an ether-linked alkyl 5a-carba-β-D-glucoside, a 5a-carba-β-D-galactoside, a 2-acetamido-2-deoxy-5a-carba-β-D-glucoside, and an alkyl 5a'-carba-β-lactoside 1979
- Biofilm
 Regulation of fructosyltransferase activity by carbohydrates, in solution and immobilized on hydroxyapatite surfaces 701
- Biosynthesis
 1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873
 Biosynthesis of a substituted cellulose from a mutant strain of *Xanthomonas campestris* 315
 Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435
 Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119
- Birch-type reduction
 A facile approach to diosgenin and furostan type saponins bearing a 3β-chacotriose moiety 2153
- Bis-thionocarbonates
 Regioselective synthesis of alditol vicinal bis-cyclic thionocarbonates via alditol stannylene acetal complexes as a short and efficient route to α,ω-diiodoalditol derivatives 69
- Blood group
 Conformational studies of blood group A and blood group B oligosaccharides using NMR residual dipolar couplings 905
 Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121
- B3LYP/6-311 + + G**
 A DFT/ab initio study of hydrogen bonding and conformational preference in model cellobiose analogs using B3LYP/6-311 + + G** 1851
- Boltzmann distribution
 Crystal structure of penta-*O*-acetyl-β-D-galactopyranose with modeling of the conformation of the acetate groups 2301
- Bonding and structural group parameters
 Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289
- Bordetella hinzii*
 Structure of the O-specific polysaccharide chain of the lipopolysaccharide of *Bordetella hinzii* 961
- D-(–)-Bornesitol
 Carbohydrates from *Detarium microcarpum* bark extract 1663
- Bostrychia montagnei*
 The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137
- Bovine testicular hyaluronidase
 Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229
- Branched monosaccharide
 Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697
- Bread staling
 Use of ¹H cross-relaxation nuclear magnetic resonance spectroscopy to probe the changes in bread and its components during aging 147

Brevundimonas vesicularis

Structural elucidation of the EPS of slime producing *Brevundimonas vesicularis* sp. isolated from a paper machine 1821

Bromination

Bromonium ion-promoted glycosidic bond formation and simultaneous bromination of an activated aryl aglycon 31

5-Bromo-5-deoxy-D-ribofuranose

An improved synthesis of 5-thio-D-ribose from D-ribo-1,4-lactone 1411

5-Bromo-5-deoxy-D-ribo-1,4-lactone

An improved synthesis of 5-thio-D-ribose from D-ribo-1,4-lactone 1411

Brown algae

Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719

Brown seaweeds

Brown seaweed protein as an inhibitor of marine mollusk endo-(1 → 3)- β -D-glucanases 229

Bufo viridis

Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121

Building block

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

Burkholderia cepacia

Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557

Cactus

Isolation and structure of D-xylans from pericarp seeds of *Opuntia ficus-indica* prickly pear fruits 1593

Ca-galactitol complex

Sugar interaction with metal ions. The coordination behavior of neutral galactitol to Ca(II) and lanthanide ions 1485

Calcofluor white

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and progesterone. A fluorescence study 1405

Callus

An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641

Calorimetry

Structural and physicochemical characterization of the inclusion complexes of cyclomaltooligosaccharides (cyclodextrins) with melatonin 743

CAM-assay

LaPSvS1, a (1 → 3)- β -galactan sulfate and its effect on angiogenesis in vivo and in vitro 1459

3-C-(2-Amino-2-deoxyglycosyl)-1,2-propanediol

Oxidation of 3-C-(2-amino-2-deoxy-D-glucopyranosyl)-1-propene compounds and the structure of 3-C-(2-amino-2-deoxy-D-glucopyranosyl)-1,2-propanediol derivatives for a synthesis of 2,3-didehydro-2,7-dideoxy-N-acetylneuraminic acid 1917

Campylobacter jejuni

Structures of two polysaccharides of *Campylobacter jejuni* 81116 2223

Capillary electrophoresis

Determination of the composition of the oligosaccharide phosphate fraction of *Pichia (Hansenula) holstii* NRRL Y-2448 phosphomannan by capillary electrophoresis and HPLC 139
Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

Capsular polysaccharide

Identification of the capsular polysaccharides of Type D and F *Pasteurella multocida* as unmodified heparin and chondroitin, respectively 1547

Structural analysis and chemical depolymerization of the capsular polysaccharide of *Streptococcus pneumoniae* type 1 335

Carba-sugars

Synthesis of an ether-linked alkyl 5a-carba- β -D-glucoside, a 5a-carba- β -D-galactoside, a 2-acetamido-2-deoxy-5a-carba- β -D-glucoside, and an alkyl 5a'-carba- β -lactoside 1979

Carbohydrate

Chiral induction based on carbohydrate ligands in olefin platinum(0) complexes 651

Crystal structure of penta-O-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301

Carbohydrate-carbohydrate interaction

Synthesis of dimeric lactose and dimeric (sialyl) Lewis^x glycolipids 1089

Carbohydrate residues

Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomucoid) and progesterone. A fluorescence study 1405

Carbohydrates

Access to aldehyde acetals of sugars via palladium-catalyzed oxidation of α,β -unsaturated cyclic acetals 2325

A method for obtaining equilibrium tautomeric mixtures of reducing sugars via glycosylamines using nonaqueous media 965

1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873

(2-Azidomethyl)phenylacetyl as a new, reductively cleavable protecting group for hydroxyl groups in carbohydrate synthesis 87

Carbons

An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641

Carrabiose

Potential energy surfaces of carrageenan models: carrabiose, β -(1 → 4)-linked D-galactobiose, and their sulfated derivatives 2311

 κ -Carrageenan

Structural studies on κ -carrageenan derived oligosaccharides 433

Carrageenans

Potential energy surfaces of carrageenan models: carrabiose, β -(1 → 4)-linked D-galactobiose, and their sulfated derivatives 2311

Carvone enantiomers

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H → D and D → H exchange 2501

Cations

Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161

C chain

Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208

CD22

Synthesis of a multivalent display of a CD22-binding trisaccharide 1605

CE-ESIMS/MS

Structural analysis of lipopolysaccharide oligosaccharide epitopes expressed by non-typeable *Haemophilus influenzae* strain 176 409

Cell-cell aggregation

Effect of sodium orthovanadate on glycosylation of the phosphopeptidomannans involved in the cell-cell aggregation of the yeast *Kluyveromyces bulgaricus* 1873

Cell-free synthesis

Production of insoluble dextran using cell-bound dextranase of *Leuconostoc mesenteroides* NRRL B-523 1529

 α -Cellobiose

The crystal structure of the α -cellobiose·2 NaI·2 H₂O complex in the context of related structures and conformational analysis 851

Cellobiose

Ab initio computational study of β -cellobiose conformers using B3LYP/6-311 + + G** 1833

 β -Cellobiose

A DFT/ab initio study of hydrogen bonding and conformational preference in model cellobiose analogs using B3LYP/6-311 + + G** 1851

Cellobioside

Synthesis of oxidized methyl 4-*O*-methyl- β -D-glucopyranoside and methyl β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside derivatives as substrates for fluorescence labeling reactions 691

Cellulase

Effects of cellulase on the modification of cellulose 1291

Cellulose

Crystal and molecular structure of methyl 4-*O*-methyl- β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside 161

Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421

Effects of cellulase on the modification of cellulose 1291

Synthesis of oxidized methyl 4-*O*-methyl- β -D-glucopyranoside and methyl β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside derivatives as substrates for fluorescence labeling reactions 691

The crystal structure of the α -cellobiose-2 NaI-2 H₂O complex in the context of related structures and conformational analysis 851

The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453

Cellulose composites

Molecular interactions in bacterial cellulose composites studied by 1D FT-IR and dynamic 2D FT-IR spectroscopy 1145

Cellulose I and II

Molecular ordering of cellulose after extraction of polysaccharides from primary cell walls of *Arabidopsis thaliana*: a solid-state CP/MAS ¹³C NMR study 587

Cellulose synthesis

An improved method for the preparation of 3-*O*-benzyl-6-*O*-pivaloyl- α -D-glucopyranose 1,2,4-orthopivalate 951

Cell-wall extraction

Molecular ordering of cellulose after extraction of polysaccharides from primary cell walls of *Arabidopsis thaliana*: a solid-state CP/MAS ¹³C NMR study 587

Ceramidated GLA-60 derivatives

Synthesis of ceramidated GLA-60 derivatives 1343

C-Glycoside

Stereoselective synthesis of a *C*-glycosylic compound (a “methyl *C*-glycoside”) through a regioselective free-radical ring-opening reaction. A single-crystal X-ray structure determination 1523

C-Glycosides

A convenient synthesis of *C*-galactofuranosylic compounds (*C*-galactofuranosides) 2017

One-pot synthesis of *C*-glycosylic compounds (*C*-glycosides) from D-glucal, *p*-tolylsulfenyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275

Reinvestigation of the iodocyclization of 4,5,7-tri-*O*-benzyl-3-(*N*-benzylacetamido)-1,2,3-trideoxy-D-glucopyranose-1-enitol: unexpected formation of a 1,3-imino-heptitol derivative 273

Synthesis of *C*-glycosyl compounds of *N*-acetylneuraminic acid from D-gluconolactone 1967

C-Glycosyl compounds

Towards α - or β -D-*C*-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

C-Glycosylflavonoid

Synthesis of *C*-glycopyranosylphloracetophenone derivatives and their anomerization facilitated by 1,3-diaxial interactions 1007

C-Glycosylic compound

Synthesis of *C*-glycopyranosylphloracetophenone derivatives and their anomerization facilitated by 1,3-diaxial interactions 1007

C-Glycosylic compounds

A convenient synthesis of *C*-galactofuranosylic compounds (*C*-galactofuranosides) 2017

One-pot synthesis of *C*-glycosylic compounds (*C*-glycosides) from D-glucal, *p*-tolylsulfenyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275

C-Glycosylic compound, synthesis

Synthesis of 3-*C*-(6-*O*-acetyl-2,3,4-tri-*O*-benzyl- α -D-mannopyranosyl)-1-propene: a caveat 1769

Chacotriose

A facile approach to diosgenin and furostan type saponins bearing a 3 β -chacotriose moiety 2153

Chain extension

Synthesis of *C*-glycosyl compounds of *N*-acetylneuraminic acid from D-gluconolactone 1967

Chain flexibility

On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781

Channel-type packing

Crystal structure of the cyclomaltohexaose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

Characteristic ratio

On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781

Chemical structure

The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137

Chemical synthesis

A first total synthesis of a novel sulfated ganglioside, 3'-*O*-sulfo-GM1b 1679

Synthetic studies on glycosphingolipids from the Protostomia phyla: syntheses of arthro-series glycosphingolipids 2037

Chemo-enzymatic synthesis

Expedient syntheses of two carbohydrate-linked cisplatin analogs 1043

Chemoenzymatic synthesis

Efficient chemoenzymatic synthesis of globotriose and its derivatives with a recombinant α -(1 \rightarrow 4)-galactosyltransferase 969

Chiral building block

1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873

Chiral intermediates

Synthesis of D- and L-*myo*-inositol 2,4,5-trisphosphate and trisphosphorothioate: structural analogues of D-*myo*-inositol 1,4,5-trisphosphate 1795

Chiral NMR solvating agent

¹³C NMR spectroscopic analysis on the chiral discrimination of *N*-acetylphenylalanine, catechin and propranolol induced by cyclic-(1 \rightarrow 2)- β -D-glucans (cyclosophoraoses) 1785

Chiral recognition

¹³C NMR spectroscopic analysis on the chiral discrimination of *N*-acetylphenylalanine, catechin and propranolol induced by cyclic-(1 \rightarrow 2)- β -D-glucans (cyclosophoraoses) 1785

Chiral shift reagents

Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161

Chitin

Evaluation of steric effects on the exocyclic conformations of 6-*C*-methyl-substituted 2-acetamido-2-deoxy- β -D-glucopyranosides 83

Preparation of orthogonally protected chitosan oligosaccharides: observation of an anomalous remote substituent effect 1319

Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557

Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β -chitin 133

Chitinase

Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557

Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β -chitin 133

Chitosan

- Anticoagulant activity of a sulfated chitosan 1233
- Disentangling α from β mechanical relaxations in the rubber-to-glass transition of high-sugar–chitosan mixtures 595
- Preparation and characterisation of chitosans with oligosaccharide branches 2455

Chitosan chemistry

- Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297

Chlorosulfonyl isocyanate

- Stereocontrolled formation of oxacephams from carbohydrates 2005

Chondroitin

- Identification of the capsular polysaccharides of Type D and F *Pasteurella multocida* as unmodified heparin and chondroitin, respectively 1547

Chondrosine

- Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229

Chromium(VI)

- Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

Chromogenic sugar sulfates

- Synthesis and utility of sulfated chromogenic carbohydrate model substrates for measuring activities of mucin-desulfating enzymes 1095

Cisplatin analog

- Expedition syntheses of two carbohydrate-linked cisplatin analogs 1043

Citrobacter gillenii

- Structure of a new 2-deoxy-2-[(*R*)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541

Clustering

- Synthesis of a multivalent display of a CD22-binding trisaccharide 1605

¹³C NMR spectroscopy

- Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltotetraose and cyclomaltodextrin glucanyltransferase 509
- Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297

Coffee

- Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239
- Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421

Collision-induced dissociation

- Application of mass spectrometry to determine the activity and specificity of pectin lyase A 1213

Combinatorial chemistry

- D-Glucose as a multivalent chiral scaffold for combinatorial chemistry 2089

Complex formation

- Interaction of lead(II) with β -cyclodextrin in alkaline solutions 1657

Configuration

- Confirmation of the D configuration of the 2-substituted arabinitol 1-phosphate residue in the capsular polysaccharide from *Streptococcus pneumoniae* Type 17F 2353

conformation

- Conformational studies of a novel cationic glycolipid, glyceroplasmalopsychosine, from bovine brain by NMR spectroscopy 1775
- Conformation of the branched O-specific polysaccharide of

Shigella dysenteriae type 2: Molecular mechanics calculations show a compact helical structure exposing an epitope which potentially mimics galabiose 1633

Quantum mechanical and NMR spectroscopy studies on the conformations of the hydroxymethyl and methoxymethyl groups in aldohexosides 353

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-O-isopropylidene- α -D-lyxo-hexofuranosid-5-ulose and methyl 2,3-O-isopropylidene- α -D-lyxo-pentodialdo-1,4-furanoside 663

Synthesis of C-glycopyranosylphloroacetophenone derivatives and their anomerization facilitated by 1,3-diaxial interactions 1007

Conformational analysis

Can the stereochemical outcome of glycosylation reactions be controlled by the conformational preferences of the glycosyl donor? 765

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ¹H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

Disaccharide conformational maps: 3D contours or 2D plots? 1861

Evaluation of steric effects on the exocyclic conformations of 6-C-methyl-substituted 2-acetamido-2-deoxy- β -D-glucopyranosides 83

Potential energy surfaces of carrageenan models: carrabiose, β -(1 \rightarrow 4)-linked D-galactobiose, and their sulfated derivatives 2311

Conformations

Ab initio computational study of β -cellobiose conformers using B3LYP/6-311 + G** 1833

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

Conjugate vaccines

Isolation of oligosaccharides from a partial-acid hydrolysate of pneumococcal type 3 polysaccharide for use in conjugate vaccines 819

Convolvulinic acid

Preparation and diastereomeric separation of an (*S*)- and (*R*)-1-(methoxycarbonyl)tridec-10-yl glucoside derivative, a precursor for a monosaccharide constituent of resin glycosides 1047

Copper(II) trifluoromethanesulfonate

A substrate-unspecified glycosylation reaction promoted by copper(II) trifluoromethanesulfonate in benzotrifluoride 581

Core

The structure of the carbohydrate backbone of the rough type lipopolysaccharides from *Proteus penneri* strains 12, 13, 37 and 44 835

Core structure

Structure of the core part of the lipopolysaccharides from *Proteus penneri* strains 7, 8, 14, 15, and 21 643

The core structure of the lipopolysaccharide from the causative agent of plague, *Yersinia pestis* 775

Cotton-seed

Preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides from an acid hydrolysate of cotton-seed xylan: suitability of cotton-seed xylan as a starting material for the preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides 657

Coupling reactions

Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltotetraose 2245

Cryphonectria parasitica

Structural determination of the complex exopolysaccharide from the virulent strain of *Cryphonectria parasitica* 1707

Crystal structure

Chiral induction based on carbohydrate ligands in olefin platinum(0) complexes 651

Crystal and molecular structure of methyl 4-*O*-methyl- β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside 161

Crystal structure of β -cyclodextrin–dimethylsulfoxide inclusion complex 2487

Crystal structure of the cyclomaltohexaose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224

Sugar interaction with metal ions. The coordination behavior of neutral galactitol to Ca(II) and lanthanide ions 1485

Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787

The crystal structure of the α -cellobiose-2 NaI-2 H₂O complex in the context of related structures and conformational analysis 851

C-2 Substitution

Structural studies on C-2 substitution in a new set of synthetic aminodideoxy sugars: the steric bulk at C-2 influences the puckering of the pyranose ring 1507

Cyanation

A convenient synthesis of *C*-galactofuranosylic compounds (*C*-galactofuranosides) 2017

Cyclitol

(\pm)-1,2:5,6-Di-*O*-isopropylidene-*myo*-inositol and (\pm)-6-*O*-benzoyl-1,2:4,5-di-*O*-isopropylidene-*myo*-inositol: a practical preparation of key intermediates for *myo*-inositol phosphates 75

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Cyclization

Synthesis of *C*-glycosyl compounds of *N*-acetylneuraminic acid from D-gluconolactone 1967

[2 + 2] Cycloaddition

Stereocontrolled formation of oxacephams from carbohydrates 2005

Cyclobutenedione phenylazo-phenylamines

Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161

 β -Cyclodextrin

Thermodynamic insight into the origin of the inclusion of mono-sulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281

 α -Cyclodextrin

Crystal structure of the cyclomaltohexaose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

 β -Cyclodextrin

Interaction of lead(II) with β -cyclodextrin in alkaline solutions 1657

Cyclodextrin

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

 β -Cyclodextrin

Crystal structure of β -cyclodextrin–dimethylsulfoxide inclusion complex 2487

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501

Synthesis of novel cyclomaltoheptaose (β -cyclodextrin) derivatives containing the Ebselen key moiety of benzoiselenazolone 1309

The self-association of the drug acemetacin and its interactions

and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737

Cyclodextrin ether

Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493

 β -Cyclodextrin, mono-2-*O*-modified

Facile preparation of mono-2-*O*-modified eicosa-*O*-methylcyclomaltoheptaoses (β -cyclodextrins) 2393

Cyclodextrins

Improved preparation of perallylated cyclodextrins: facile synthesis of cyclodextrin-based polycationic and polyanionic compounds 217

Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129

Structural and physicochemical characterization of the inclusion complexes of cyclomaltooligosaccharides (cyclodextrins) with melatonin 743

Cyclomaltoheptaose

Bacillus macerans cyclomaltoheptaose glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245

Cyclomaltoheptaose glucanotransferase

Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltohexaose and cyclomaltoheptaose glucanotransferase 509

Cyclomaltohexaose

Bacillus macerans cyclomaltoheptaose glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245

Cyclomaltoheptaose

Synthesis of novel cyclomaltoheptaose (β -cyclodextrin) derivatives containing the Ebselen key moiety of benzoiselenazolone 1309

Cyclomaltoheptaose (β -CD)

Monte Carlo docking simulations of cyclomaltoheptaose and dimethyl cyclomaltoheptaose with paclitaxel 549

Cyclomaltoheptaoses

Facile preparation of mono-2-*O*-modified eicosa-*O*-methylcyclomaltoheptaoses (β -cyclodextrins) 2393

Cyclomaltohexaose

Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltohexaose and cyclomaltoheptaose glucanotransferase 509

Crystal structure of the cyclomaltohexaose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

Cyclomaltooligosaccharides

Bacillus macerans cyclomaltoheptaose glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245

1,2-Cyclopropanated sugar

Stereoselective synthesis of a *C*-glycosylic compound (a “methyl *C*-glycoside”) through a regioselective free-radical ring-opening reaction. A single-crystal X-ray structure determination 1523

Cyclosophoraoses

¹³C NMR spectroscopic analysis on the chiral discrimination of *N*-acetylphenylalanine, catechin and propranolol induced by cyclic-(1 \rightarrow 2)- β -D-glucans (cyclosophoraoses) 1785

1D and 2D NMR spectroscopy

Flavonoid glycosides from *Salvia moorcroftiana* Wall. 403

Deacetylation

A mild and selective method for cleavage of *O*-acetyl groups with dibutyltin oxide 1763

Debenzoylation

(\pm)-1,2:5,6-Di-*O*-isopropylidene-*myo*-inositol and (\pm)-6-*O*-benzoyl-1,2:4,5-di-*O*-isopropylidene-*myo*-inositol: a practical preparation of key intermediates for *myo*-inositol phosphates 75

Degradation

Chemical formation of 4-hydroxy-2,5-dimethyl-3[2*H*]-furanone from D-fructose 1,6-diphosphate 1184

Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421

Dehydration

An anhydrous polymorphic form of trehalose 167

Supercritical CO₂ fluid extraction of crystal water from trehalose dihydrate. Efficient production of form II (T₂) phase 1729

Density functional

Ab initio computational study of β -cellobiose conformers using B3LYP/6-311 + + G** 1833

A DFT/ab initio study of hydrogen bonding and conformational preference in model cellobiose analogs using B3LYP/6-311 + + G** 1851

Density functional theory

Can the stereochemical outcome of glycosylation reactions be controlled by the conformational preferences of the glycosyl donor? 765

Dental plaque

Regulation of fructosyltransferase activity by carbohydrates, in solution and immobilized on hydroxyapatite surfaces 701

2-Deoxy-L-erythro-pentose

Efficient synthesis of 2-deoxy-L-erythro-pentose (2-deoxy-L-ribose) from L-arabinose 397

6-Deoxy-L-fructose

Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778

6-Deoxyhexose

Preparation and diastereomeric separation of an (*S*)- and (*R*)-1-(methoxycarbonyl)tridec-10-yl glucoside derivative, a precursor for a monosaccharide constituent of resin glycosides 1047

2-Deoxy-D-lyxo-hexofuranosides

Photoinduced electron transfer and chemical α -deoxygenation of D-galactono-1,4-lactone. Synthesis of 2-deoxy-D-lyxo-hexofuranosides 2119

2-Deoxy-D-lyxo-hexono-1,4-lactone

Photoinduced electron transfer and chemical α -deoxygenation of D-galactono-1,4-lactone. Synthesis of 2-deoxy-D-lyxo-hexofuranosides 2119

6-Deoxy-D-lyxo-2-hexulose

Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778

1-Deoxymannojirimycin

A simple access to the D-mannosidase inhibitor, 1-deoxymannojirimycin 183

6-Deoxymannojirimycin

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-lyxo-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-lyxo-pentodialdo-1,4-furanoside 663

2-Deoxy-L-ribose

Efficient synthesis of 2-deoxy-L-erythro-pentose (2-deoxy-L-ribose) from L-arabinose 397

Deoxy sugars

Photoinduced electron transfer and chemical α -deoxygenation of D-galactono-1,4-lactone. Synthesis of 2-deoxy-D-lyxo-hexofuranosides 2119

The synthesis of deoxy- α -Gal epitope derivatives for the evaluation of an anti- α -Gal antibody binding 1247

6-Deoxy-L-talose

Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of *N*-acetylmuramic acid, 2-acet-amido-4-*O*-[(*R*)-1-carboxyethyl]-2-deoxy-D-glucose 2463

3-Deoxy-4-thiopentopyranosides

Synthesis of glycosides of 3-deoxy-4-thiopentopyranosid-2-uloses and their reduction products: 3-deoxy-4-thiopentopyranosides 2069

3-Deoxy-4-thiopentopyranosid-2-uloses

Synthesis of glycosides of 3-deoxy-4-thiopentopyranosid-2-uloses and their reduction products: 3-deoxy-4-thiopentopyranosides 2069

2-Deoxy-2-trichloroacetamido-D-galacto derivatives

An access to various sulfation patterns in dermatan sulfate: chemical syntheses of sulfoforms of trisaccharide methyl glycosides 673

Depolymerisation

Structural analysis and chemical depolymerization of the capsular polysaccharide of *Streptococcus pneumoniae* type 1 335

Depolymerization

Depolymerization of *N*-succinyl-chitosan by hydrochloric acid 561

Deprotection

Selective epimerization of L-*chiro*-inositol to L-*muco*- and D-*chiro*-inositol derivatives 1

Dermatan sulfate trisaccharides

An access to various sulfation patterns in dermatan sulfate: chemical syntheses of sulfoforms of trisaccharide methyl glycosides 673

Detarium microcarpum

Carbohydrates from *Detarium microcarpum* bark extract 1663

Dextran

Determination of structural peculiarities of dextran, pullulan and γ -irradiated pullulan by Fourier-transform IR spectroscopy 1445

Dextranucrase

Oligosaccharide synthesis by dextranucrase: new unconventional acceptors 1811

Production of insoluble dextran using cell-bound dextranucrase of *Leuconostoc mesenteroides* NRRL B-523 1529

Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextranucrases 2427

DFT

Crystal structure of penta-*O*-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301

Dialdehyde

Galactose dialdehyde as potential protein cross-linker: proof of principle 899

Dialdose

Galactose dialdehyde as potential protein cross-linker: proof of principle 899

5,7-Diamino-3,5,7,9-tetra-deoxy-L-glycero-D-galacto-non-2-ulosonic acid

Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697

5,7-Diamino-5,7,9-trideoxynon-2-ulosonic acid

5,7-Diamino-5,7,9-trideoxynon-2-ulosonic acid: a novel sugar from a phytopathogenic *Pseudomonas* lipopolysaccharide 955

Diastereomeric separation

Preparation and diastereomeric separation of an (*S*)- and (*R*)-1-(methoxycarbonyl)tridec-10-yl glucoside derivative, a precursor for a monosaccharide constituent of resin glycosides 1047

1,3-Diaxial interaction

Synthesis of C-glycopyranosylphloracetophenone derivatives and their anomerization facilitated by 1,3-diaxial interactions 1007

Diazo transfer

Syntheses of unnatural N-substituted UDP-galactosamines as alternative substrates for *N*-acetylgalactosaminyl transferases 2187

Dibutyltin oxide

A mild and selective method for cleavage of *O*-acetyl groups with dibutyltin oxide 1763

- (2,4-Dichlorophenoxy)acetic acid
Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224
- 2,3-Didehydro-2,7-dideoxy-*N*-acetylneuraminic acid
Oxidation of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1-propene compounds and the structure of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1,2-propanediol derivatives for a synthesis of 2,3-didehydro-2,7-dideoxy-*N*-acetylneuraminic acid 1917
- Dietary carotenoids
Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129
- α , ω -Diiodoalditols
Regioselective synthesis of alditol vicinal bis-cyclic thionocarbonates via alditol stannylene acetal complexes as a short and efficient route to α , ω -diiodoalditol derivatives 69
- Dimethylsulfoxide inclusion complex
Crystal structure of β -cyclodextrin–dimethylsulfoxide inclusion complex 2487
- Diosgenin
A facile approach to diosgenin and furostan type saponins bearing a 3 β -chacotriose moiety 2153
- Dipodascus
Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their teleomorphs, *Dipodascus* and *Galactomyces* 2347
- Disaccharide alditols
Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443
- Disaccharide maps
Potential energy surfaces of carrageenan models: carrabiose, β -(1 \rightarrow 4)-linked D-galactobiose, and their sulfated derivatives 2311
- Disaccharide-phosphate
Synthesis and NMR characterization of the six regioisomeric monophosphates of octyl β -D-galactopyranosyl-(1 \rightarrow 4)-2-acetamido-2-deoxy- β -D-glucopyranoside 2127
- Disaccharide repeating unit
Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719
- Disaccharides
Disaccharide conformational maps: 3D contours or 2D plots? 1861
Effect of fatty acid chain length on initial reaction rates and regioselectivity of lipase-catalysed esterification of disaccharides 1178
Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441
 α -Galactosyl fluoride in transfer reactions mediated by the green coffee beans α -galactosidase in ice 221
1-*O*-Acetyl- β -D-galactopyranose: a novel substrate for the transglycosylation reaction catalyzed by the β -galactosidase from *Penicillium* sp. 635
- Disaccharide sulfate
Synthesis and utility of sulfated chromogenic carbohydrate model substrates for measuring activities of mucin-desulfating enzymes 1095
- distance geometry
Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737
- Disulfated tetrasaccharide
Synthesis of a spacer-armed disulfated tetrasaccharide of SB_{1A}, a carbohydrate hapten associated with human hepatocellular carcinoma 1929
- DP
Effects of cellulase on the modification of cellulose 1291
- DSC
An anhydrous polymorphic form of trehalose 167
The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453
- Dynamic 2D FT-IR spectroscopy
Molecular interactions in bacterial cellulose composites studied by 1D FT-IR and dynamic 2D FT-IR spectroscopy 1145
- Dynamic oscillation
Disentangling α from β mechanical relaxations in the rubber-to-glass transition of high-sugar–chitosan mixtures 595
- Ebselen
Synthesis of novel cyclomaltoheptaose (β -cyclodextrin) derivatives containing the Ebselen key moiety of benzoisoseleazolone 1309
- Electrophoretically mediated microanalysis
Electrophoretically mediated microscale reaction of glycosidases: kinetic analysis of some glycosidases at the nanoliter scale 1757
- Electrospray ionization
Application of mass spectrometry to determine the activity and specificity of pectin lyase A 1213
- Electrospray ionization/ionspray mass spectrometry
Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129
- Electrospray-ionization mass spectrometry
Fluorescent labeling of pectic oligosaccharides with 2-aminobenzamide and enzyme assay for pectin 1023
High-performance liquid chromatographic separation and on-line mass spectrometric detection of saturated and unsaturated oligogalacturonic acids 2481
- Elemental analysis
Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297
- Enantiomers
¹³C NMR spectroscopic analysis on the chiral discrimination of *N*-acetylphenylalanine, catechin and propranolol induced by cyclic-(1 \rightarrow 2)- β -D-glucans (cyclosophoraoses) 1785
- endo-(1 \rightarrow 3)- β -D-Glucanase
Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229
- Enolization
Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161
- Enterobacteria
Structure of a new 2-deoxy-2-[(*R*)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541
- Enthalpy
Thermodynamic insight into the origin of the inclusion of monosulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281
- Entropy
Thermodynamic insight into the origin of the inclusion of monosulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281
- Enzymatic degradation
Characterisation of pectin subunits released by an optimised combination of enzymes 1687
Exopolysaccharide lyase from *Thermotoga maritima*: cloning, characterization and organic synthesis application 1427
- Enzymatic hydrolysis
Production of *N*-acetyl-D-glucosamine from α -chitin by crude enzymes from *Aeromonas hydrophila* H-2330 761
- Enzymatic 6'-*O*-acylation
Human milk oligosaccharides: an enzymatic protection step simplifies the synthesis of 3'- and 6'-*O*-sialyllactose and their analogues 473

- Enzyme activity
High-performance liquid chromatographic separation and on-line mass spectrometric detection of saturated and unsaturated oligogalacturonic acids 2481
- Enzyme and enzyme reactions
1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873
- Enzyme mimics
Synthesis of novel cyclomaltoheptaose (β -cyclodextrin) derivatives containing the Ebselen key moiety of benzoiselenazolone 1309
- 8-epilegionaminic acid
Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697
- Epimerization
Selective epimerization of L-chiro-inositol to L-muco- and D-chiro-inositol derivatives 1
- EPS (slime)
Structural elucidation of the EPS of slime producing *Brevundimonas vesicularis* sp. isolated from a paper machine 1821
- Equilibrium composition
A method for obtaining equilibrium tautomeric mixtures of reducing sugars via glycosylamines using nonaqueous media 965
- Equilibrium constant
NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841
- Erwinia* spp.
Extracellular polysaccharides of a bacterium associated with a fungal canker disease of *Eucalyptus* sp 731
- Erwinia* spp.
Extracellular polysaccharides of *Erwinia futululu*, a bacterium associated with a fungal canker disease of *Eucalyptus* spp. 2469
- Erythrocytes
Synthesis and inhibitory activity of a di- and a trisaccharide corresponding to an erythrocyte glycolipid responsible for the nor polyagglutination 1517
- D-erythro-L-glucO-Octitol
NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-glucO-octose and their alditols 1745
- D-erythro-L-glucO-Octose
NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-glucO-octose and their alditols 1745
- D-erythro-L-manno-Octitol
NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-glucO-octose and their alditols 1745
- D-erythro-L-manno-Octose
NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-glucO-octose and their alditols 1745
- L-erythro-2-Pentulose
Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778
- ESCA analysis
Exclusive and complete introduction of amino groups and their N-sulfo and N-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297
- ESIMS
Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443
- ESI-TOF-MS
Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarribose oligosaccharides 1553
- Esterification
Effect of fatty acid chain length on initial reaction rates and regioselectivity of lipase-catalysed esterification of disaccharides 1178
- Eucalyptus
Extracellular polysaccharides of a bacterium associated with a fungal canker disease of *Eucalyptus* sp 731
- Eucalyptus* spp.
Extracellular polysaccharides of *Erwinia futululu*, a bacterium associated with a fungal canker disease of *Eucalyptus* spp. 2469
- Europium
 β -(1 \rightarrow 4)-Galactosyltransferase activity in native and engineered insect cells measured with time-resolved europium fluorescence 2181
- exo β -D-Galactofuranosidase
Photoinduced electron transfer and chemical α -deoxygenation of D-galactono-1,4-lactone. Synthesis of 2-deoxy-D-lyxo-hexofuranosides 2119
- Exopolygalacturonate lyase
Exopolygalacturonate lyase from *Thermotoga maritima*: cloning, characterization and organic synthesis application 1427
- Exopolysaccharide
Structural determination of the complex exopolysaccharide from the virulent strain of *Cryphonectria parasitica* 1707
- exo-Sulfatase
Synthesis and utility of sulfated chromogenic carbohydrate model substrates for measuring activities of mucin-desulfating enzymes 1095
- extracellular polysaccharide
Extracellular polysaccharides of a bacterium associated with a fungal canker disease of *Eucalyptus* sp 731
- Extracellular polysaccharides of *Erwinia futululu*, a bacterium associated with a fungal canker disease of *Eucalyptus* spp. 2469
- Fatty acids
Effect of fatty acid chain length on initial reaction rates and regioselectivity of lipase-catalysed esterification of disaccharides 1178
- FGF-2
LaPSvS1, a (1 \rightarrow 3)- β -galactan sulfate and its effect on angiogenesis in vivo and in vitro 1459
- FITC analysis
Exclusive and complete introduction of amino groups and their N-sulfo and N-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297
- Flavonoid glycosides
Flavonoid glycosides from *Salvia moorcroftiana* Wall. 403
- Floridoside
Complete ^1H and ^{13}C spectral assignment of floridoside 279
- Fluorescence anisotropy
Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomuroid) and progesterone. A fluorescence study 1405
- Fluorescence intensity quenching
Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomuroid) and progesterone. A fluorescence study 1405
- Fluorescence labelling
Synthesis of oxidized methyl 4-O-methyl- β -D-glucopyranoside and methyl β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside derivatives as substrates for fluorescence labeling reactions 691
- Fluorescence titration
Interaction between carbohydrate residues of α_1 -acid glycoprotein (orosomuroid) and progesterone. A fluorescence study 1405
- Fluorescent labeling
Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208
Fluorescent labeling of pectic oligosaccharides with 2-aminobenzamide and enzyme assay for pectin 1023
- Forbidden conformation
The saccharide-hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a 'forbidden' conformation of the galactose derivative 21

- Fourier-transform IR spectroscopy
Determination of structural peculiarities of dextran, pullulan and γ -irradiated pullulan by Fourier-transform IR spectroscopy 1445
- Free-radical addition
Facile synthesis of 1-thio- β -lactoside clusters scaffolded onto *p*-methoxyphenyl, β -D-galactopyranoside, β -D-glucopyranoside, and lactoside 977
- Free-radical deoxygenation
Efficient synthesis of 2-deoxy-L-erythro-pentose (2-deoxy-L-ribose) from L-arabinose 397
- Free, reducing oligosaccharides
New structural features of the polysaccharide from gum ghatti (*Anogeissus latifolia*) 2205
Structure of the arabinogalactan from gum tragacanth (*Astragalus gummifer*) 1647
- Friedel–Crafts reaction
One-pot synthesis of C-glycosylic compounds (C-glycosides) from D-glucal, *p*-tolylsulfenyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275
- Fructans
Regulation of fructosyltransferase activity by carbohydrates, in solution and immobilized on hydroxyapatite surfaces 701
- Fructopyranose
Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787
- β -D-Fructopyranose, protected isopropylidene derivative
Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787
- D-Fructose
Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778
Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573
- D-Fructose 1,6-diphosphate
Chemical formation of 4-hydroxy-2,5-dimethyl-3[2*H*]-furanone from D-fructose 1,6-diphosphate 1184
- Fructosyltransferase
Regulation of fructosyltransferase activity by carbohydrates, in solution and immobilized on hydroxyapatite surfaces 701
- Fruiting bodies
Structural characterization of a water-soluble β -D-glucan from fruiting bodies of *Agaricus blazei* Murr 1417
- FT-IR
Sugar interaction with metal ions. The coordination behavior of neutral galactitol to Ca(II) and lanthanide ions 1485
- FTIR
Supercritical CO₂ fluid extraction of crystal water from trehalose dihydrate. Efficient production of form II (T₂) phase 1729
The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453
- FT-IR spectroscopy
Molecular interactions in bacterial cellulose composites studied by 1D FT-IR and dynamic 2D FT-IR spectroscopy 1145
- Fucan NMR
Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719
- Fucoidan
Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719
- Fucus evanescens*
Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719
- Fully chemically sulfated polysaccharides
Effect of (1→3)- and (1→4)-linkages of fully sulfated polysaccharides on their anticoagulant activity 925
- Fungi
Fungal cell wall galactomannan isolated from *Apodus deciduus* 1503
Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their teleomorphs, *Dipodascus* and *Galactomyces* 2347
Structural determination of the complex exopolysaccharide from the virulent strain of *Cryphonectria parasitica* 1707
- Furanoid spirohydantoin
Syntheses of hydantocidin and C-2-thioxohydantocidin 2077
- Fusion enzyme
Expeditious syntheses of two carbohydrate-linked cisplatin analogs 1043
- β -(1→4)-Galactan
NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255
- Galactan
Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443
- Galactans, sulfated
Sulfated polysaccharides from the red seaweed *Georgiella confluens* 57
- (1→3)- β -Galactan-sulfate
LaPSvS1, a (1→3)- β -galactan sulfate and its effect on angiogenesis in vivo and in vitro 1459
- Galactitol, D-Glucitol
The solvent-free thermal dehydration of hexitols on zeolites 1261
- Galactofuranose
A convenient synthesis of C-galactofuranosylic compounds (C-galactofuranosides) 2017
Influence of exo β -D-galactofuranosidase inhibitors in cultures of *Penicillium fellutanum* and modifications in hyphal cell structure 891
- Galactofuranosidase
Influence of exo β -D-galactofuranosidase inhibitors in cultures of *Penicillium fellutanum* and modifications in hyphal cell structure 891
- Galactoglucomannan
An acetylated galactoglucomannan from *Picea abies* L. Karst 1033
- galacto-Hexodialdose
Galactose dialdehyde as potential protein cross-linker: proof of principle 899
- Galactomannan
NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255
- Galactomannans
On the chain flexibility of arabinoxylans and other β -(1→4) polysaccharides 1781
- Galactomyces
Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their teleomorphs, *Dipodascus* and *Galactomyces* 2347
- β -(1→4)-galacto-Oligosaccharides
Synthesis of linear β -(1→4)-galacto-hexa- and heptasaccharides and studies directed towards cyclogalactans 2171
- Galactose oxidase
Galactose dialdehyde as potential protein cross-linker: proof of principle 899
- β -D-Galactosidase
1-*O*-Acetyl- β -D-galactopyranose: a novel substrate for the transglycosylation reaction catalyzed by the β -galactosidase from *Penicillium* sp. 635

β -Galactosidase inhibitor

Synthesis of an ether-linked alkyl 5a-carba- β -D-glucoside, a 5a-carba- β -D-galactoside, a 2-acetamido-2-deoxy-5a-carba- β -D-glucoside, and an alkyl 5a'-carba- β -lactoside 1979

 α -Galactosidases

α -Galactosyl fluoride in transfer reactions mediated by the green coffee beans α -galactosidase in ice 221

Galactosylations

Synthesis of linear β -(1 \rightarrow 4)-galacto-hexa- and heptasaccharides and studies directed towards cyclogalactans 2171

Galactosyl phenylsulfoxides

Synthesis of linear β -(1 \rightarrow 4)-galacto-hexa- and heptasaccharides and studies directed towards cyclogalactans 2171

 α -(1 \rightarrow 4)-Galactosyltransferase

Efficient chemoenzymatic synthesis of globotriose and its derivatives with a recombinant α -(1 \rightarrow 4)-galactosyltransferase 969

 β -(1 \rightarrow 4)-Galactosyltransferase

Thiosugar nucleotide analogs: Synthesis of 5'-(2,3,4-tri-*O*-acetyl-6-*S*-acetyl-6-thio- α -D-galactopyranosyl diphosphate) 1935

Galactosyltransferase

β -(1 \rightarrow 4)-Galactosyltransferase activity in native and engineered insect cells measured with time-resolved europium fluorescence 2181

Galacturonosyltransferase

Fluorescent labeling of pectic oligosaccharides with 2-aminobenamide and enzyme assay for pectin 1023

 α -Gal epitope

The synthesis of deoxy- α -Gal epitope derivatives for the evaluation of an anti- α -Gal antibody binding 1247

Gal(α 1 \rightarrow 3)Gal epitope

Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983

GalN-1-P

Syntheses of unnatural N-substituted UDP-galactosamines as alternative substrates for *N*-acetylgalactosaminyl transferases 2187

Ganglioside

Synthesis and selectin-binding activity of *N*-deacetylsialyl Lewis X ganglioside 2111

GC analysis of hydroxyacids

Determination of the side-products formed during the nitroxide-mediated bleach oxidation of glucose to glucaric acid 1059

GD3

Synthesis of GD3-lactam: a potential ligand for the development of an anti-melanoma vaccine 569

GD3-lactam

Synthesis of GD3-lactam: a potential ligand for the development of an anti-melanoma vaccine 569

GDP-hexanolamine

An efficient synthesis of GDP-hexanolamine, a key tool for the purification of fucosyltransferases 1039

Geometry optimization

Ab initio computational study of β -cellobiose conformers using B3LYP/6-311 + + G** 1833

Geotrichum

Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their teleomorphs, *Dipodascus* and *Galactomyces* 2347

GLA-60 derivatives

Practical stereoselective synthesis of α -linked *C*-glucosamine propionic acid esters: conversion to GLA-60 derivatives 97

Glass transition

Disentangling α from β mechanical relaxations in the rubber-to-glass transition of high-sugar-chitosan mixtures 595

Structural relaxation and physical ageing of starchy materials 827

Glass transition temperature

Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441

GlcNAc

Production of *N*-acetyl-D-glucosamine from α -chitin by crude enzymes from *Aeromonas hydrophila* H-2330 761

Gleditsia triacanthos

NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255

Glibenclamide

Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493

Globotetraose

Synthesis of a globotetraose trimer 947

Globotriose

Efficient chemoenzymatic synthesis of globotriose and its derivatives with a recombinant α -(1 \rightarrow 4)-galactosyltransferase 969

D-Glucal

One-pot synthesis of *C*-glycosylic compounds (*C*-glycosides) from D-glucal, *p*-tolylsulfenyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275

 α -(1 \rightarrow 3)-D-glucan

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

D-glucan

A neutral β -D-glucan from dates of the date palm, *Phoenix dactylifera* L. 1325

 β -D-Glucan

Structural characterization of a water-soluble β -D-glucan from fruiting bodies of *Agaricus blazei* Murr 1417

Glucan

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

 α -(1 \rightarrow 4)-Glucan lyase

1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873

Glucaric acid

Determination of the side-products formed during the nitroxide-mediated bleach oxidation of glucose to glucaric acid 1059

D-Glucofuranosides

Glucofuranosylation with penta-*O*-propanoyl- β -D-glucofuranose 1999

Glucomannan

Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

D-Glucono-1,5-lactone

Confirmation of the structure of tetra-*O*-(*tert*-butyldimethylsilyl)-D-glucono-1,4-lactone formed by silylation of D-glucono-1,5-lactone 565

D-Glucono-1,4-lactone

Confirmation of the structure of tetra-*O*-(*tert*-butyldimethylsilyl)-D-glucono-1,4-lactone formed by silylation of D-glucono-1,5-lactone 565

D-Gluconolactone

Synthesis and surface-active properties of a new class of surfactants derived from D-gluconic acid 997

Glucosamine

Evaluation of steric effects on the exocyclic conformations of 6-*C*-methyl-substituted 2-acetamido-2-deoxy- β -D-glucopyranosides 83

Glucosamines

Toward the automated solid-phase synthesis of oligoglucosamines: systematic evaluation of glycosyl phosphate and glycosyl trichloroacetimidate building blocks 1893

D-Glucose

Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778

Glucose

Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067

D-Glucose

The role of the anion in the reaction of reducing sugars with ammonium salts 2273

Glucose oligosaccharides

Synthesis of two isomeric pentasaccharides, the possible repeating unit of the β -glucan from the micro fungus *Epicoccum nigrum* Ehrenb. ex Schlecht 2383

 α -Glucosidase

Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629

D-Glucosone

Enzymatic synthesis of D-glucosone 6-phosphate (D-*arabino*-hexose-2-ulose 6-(dihydrogen phosphate)) and NMR analysis of its isomeric forms 1585

D-Glucosone 6-phosphate

Enzymatic synthesis of D-glucosone 6-phosphate (D-*arabino*-hexose-2-ulose 6-(dihydrogen phosphate)) and NMR analysis of its isomeric forms 1585

Glucuronic acid

Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239

Glutathione peroxidase

Synthesis of novel cyclomaltoheptaose (β -cyclodextrin) derivatives containing the Ebselen key moiety of benzoiselenazolone 1309

Glycan

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ^1H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

glyceroplasmalopsychosine

Conformational studies of a novel cationic glycolipid, glyceroplasmalopsychosine, from bovine brain by NMR spectroscopy 1775

Glycocluster

Facile synthesis of 1-thio- β -lactoside clusters scaffolded onto *p*-methoxyphenyl, β -D-galactopyranoside, β -D-glucopyranoside, and lactoside 977

Glycoconjugate polymers

Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983

Glycoconjugate vaccines

Synthesis of oligosaccharides corresponding to *Streptococcus pneumoniae* type 9 capsular polysaccharide structures 1715

Glycogen

Production of highly phosphorylated glycopolymers by expression of R1 in *Escherichia coli* 327

Glycogen branching enzyme (GBE)

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

Glycogenolysis

1,5-Anhydro-D-fructose; a versatile chiral building block: biochemistry and chemistry 873

Glycon specificity profiling

Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629

Glycoprotein

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ^1H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

Glycopyranosyl radicals

Towards α - or β -D-C-glycosyl compounds by tin-catalyzed addition of glycosyl radicals to acrylonitrile and vinylphosphonate, and flexible reduction of tetra-*O*-acetyl- α -D-glucopyranosyl bromide with cyanoborohydride 1623

Glycosaminoglycan

Identification of the capsular polysaccharides of Type D and F

Pasteurella multocida as unmodified heparin and chondroitin, respectively 1547

Synthesis and biological evaluation of a radiolabeled analog of methyl 2-acetamido-2,4-dideoxy- β -D-xylo-hexopyranoside directed towards influencing cellular glycosaminoglycan biosynthesis 37

Glycosidase inhibitors

Synthesis of 1-deoxy-L-*gulo*nojirimycin (L-*gulo*DNJ) and 1-deoxy-D-*talo*nojirimycin (D-*talo*DNJ) 1083

Glycosidases in ice

α -Galactosyl fluoride in transfer reactions mediated by the green coffee beans α -galactosidase in ice 221

Glycosidases, kinetic analysis

Electrophoretically mediated microscale reaction of glycosidases: kinetic analysis of some glycosidases at the nanoliter scale 1757

Glycosidation

Glycosidation of fructose-containing disaccharides using MCM-41 material as the catalyst 1993

Synthesis of ceramidated GLA-60 derivatives 1343

Glycoside

A mild and selective method for cleavage of *O*-acetyl groups with dibutyltin oxide 1763

Glycosides

Efficient intramolecular β -mannoside formation using *m*-xylylene and isophthaloyl derivatives as rigid spacers 195

Glycosidic linkage

Determination of structural peculiarities of dexran, pullulan and γ -irradiated pullulan by Fourier-transform IR spectroscopy 1445

Glycosphingolipids

Synthesis of ceramidated GLA-60 derivatives 1343

Synthetic studies on glycosphingolipids from the Protostomia phyla: syntheses of arthro-series glycosphingolipids 2037

Glycosylamines

Glycosylamines of 4,6-*O*-butylidene- α -D-glucopyranose: synthesis and characterization of glycosylamines, and the crystal structure of 4,6-*O*-butylidene-*N*-(*o*-chlorophenyl)- β -D-glucopyranosylamine 187

Glycosyl amines

Synthesis and characterization of 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine: crystal structures of 4,6-*O*-butylidene- α -D-glucopyranose, 4,6-*O*-butylidene- β -D-glucopyranosylamine and 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 1477

Glycosylation

A substrate-unspecified glycosylation reaction promoted by copper(II) trifluoromethanesulfonate in benzotrifluoride 581

Can the stereochemical outcome of glycosylation reactions be controlled by the conformational preferences of the glycosyl donor? 765

Concise synthesis of a buffalo milk pentasaccharide derivative 1313

Effect of sodium orthovanadate on glycosylation of the phosphopeptidomannans involved in the cell–cell aggregation of the yeast *Kluyveromyces fragilis* 1873

Glucufuranosylation with penta-*O*-propanoyl- β -D-glucopyranose 1999

Oligosaccharide synthesis by dextranase: new unconventional acceptors 1811

Preparation of orthogonally protected chitosan oligosaccharides: observation of an anomalous remote substituent effect 1319

Studies on the glycosylation of wild-type and mutant forms of *Aspergillus niger* pectin methylesterase 802

Synthesis of a cholestane glycoside OSW-1 with potent cytostatic activity 1269

Synthesis of GD3-lactam: a potential ligand for the development of an anti-melanoma vaccine 569

Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067

- Synthesis of natural β -D-(1 \rightarrow 3)-glucopyranosyl oligosaccharides 1673
- Unexpected α -stereochemical outcomes of attempted β -glycosylations 1165
- Glycosylation reactions
- An access to various sulfation patterns in dermatan sulfate: chemical syntheses of sulfoforms of trisaccharide methyl glycosides 673
- Glycosylations
- Synthesis of oligosaccharide derivatives related to those from sanqi, a Chinese herbal medicine from *Panax notoginseng* 485
- Glycosyl azides
- Convenient syntheses of symmetrical and unsymmetrical glycosyl carbodiimides and *N,N*-bis(glycosyl)cyanamides 1170
- Glycosyl carbodiimides
- Convenient syntheses of symmetrical and unsymmetrical glycosyl carbodiimides and *N,N*-bis(glycosyl)cyanamides 1170
- Glycosyl cyanamides
- Convenient syntheses of symmetrical and unsymmetrical glycosyl carbodiimides and *N,N*-bis(glycosyl)cyanamides 1170
- Glycosyl iodides
- Solution- and solid-phase oligosaccharide synthesis using glucosyl iodides: a comparative study 1953
- Glycosyl isothiocyanate
- Syntheses of hydantocidin and C-2-thioxohydantocidin 2077
- Glycosyl phosphates
- Toward the automated solid-phase synthesis of oligoglucosamines: systematic evaluation of glycosyl phosphate and glycosyl trichloroacetimidate building blocks 1893
- Glycosylphosphatidylinositol (GPI) membrane anchors
- Further probing of the substrate specificities and inhibition of enzymes involved at an early stage of glycosylphosphatidylinositol (GPI) biosynthesis 2049
- Glycosyltransferase
- An efficient synthesis of GDP-hexanolamine, a key tool for the purification of fucosyltransferases 1039
- GPI biosynthesis in *Trypanosoma brucei* and HeLa (human) cell-free systems
- Further probing of the substrate specificities and inhibition of enzymes involved at an early stage of glycosylphosphatidylinositol (GPI) biosynthesis 2049
- Granule formation
- Structural features of non-granular spherulitic maize starch 1467
- Guest–host chemistry
- NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841
- Guest–host complex
- Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493
- L-gulo*DNJ
- Synthesis of 1-deoxy-*L-gulo*nojirimycin (*L-gulo*DNJ) and 1-deoxy-*D-talo*nojirimycin (*D-talo*DNJ) 1083
- gum* genes
- Biosynthesis of a substituted cellulose from a mutant strain of *Xanthomonas campestris* 315
- Gum ghatti
- New structural features of the polysaccharide from gum ghatti (*Anogeissus latifolia*) 2205
- Gum tragacanth
- Structure of the arabinogalactan from gum tragacanth (*Astragalus gummifer*) 1647
- Haemophilus*
- Structural analysis of lipopolysaccharide oligosaccharide epitopes expressed by non-typeable *Haemophilus influenzae* strain 176 409
- ^1H and ^{13}C NMR
- Conformational studies of a novel cationic glycolipid, glyceroplasmalopsychosine, from bovine brain by NMR spectroscopy 1775
- Side products of glycosidation with selected 2-acetamido-2-deoxy-D-glucopyranosides 1495
- ^1H and ^{13}C NMR analyses
- Structural elucidation of the EPS of slime producing *Brevundimonas vesicularis* sp. isolated from a paper machine 1821
- ^1H and ^{13}C NMR spectroscopy
- Characterization of *O*-acetyl-(4-*O*-methylglucurono)xylan isolated from birch and beech 373
- Isolation and structure of D-xylans from pericarp seeds of *Opuntia ficus-indica* prickly pear fruits 1593
- Synthesis, the crystal structure, and high-resolution NMR spectroscopy of methyl 4-*O*-acetyl-3-azido-2,3,6-trideoxy-6-iodo- α -D-arabino-hexopyranoside 175
- Hardwood
- Characterization of *O*-acetyl-(4-*O*-methylglucurono)xylan isolated from birch and beech 373
- HClO₄ medium
- Kinetics and mechanism of Ru(III) and Hg(II) co-catalyzed oxidation of D-galactose and D-ribose by *N*-bromoacetamide in perchloric acid 345
- ^1H , ^{13}C NMR
- Structure of a new 2-deoxy-2-[(*R*)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541
- ^1H , ^{13}C , ^{31}P NMR
- Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535
- H \rightarrow D/D \rightarrow H exchange
- Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501
- Heat of solution
- Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441
- Hemicellulose
- Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711
- Hemicellulose, extraction
- Characterization of *O*-acetyl-(4-*O*-methylglucurono)xylan isolated from birch and beech 373
- Hemocompatibility
- Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411
- Heparin
- Heparin oligosaccharide sequence and size essential for inhibition of pulmonary artery smooth muscle cell proliferation 2359
- Hexasaccharides from the histamine-modified depolymerization of porcine intestinal mucosal heparin 935
- Heparinase I
- Hexasaccharides from the histamine-modified depolymerization of porcine intestinal mucosal heparin 935
- Heparin sulfamidase
- Synthesis of 7-*O*-(2-deoxy-2-sulfamido- α -D-glucopyranosyl)-4-methylcoumarin sodium salt: a fluorogenic substrate for sulfamidase 1055
- Heparosan
- Identification of the capsular polysaccharides of Type D and F *Pasteurella multocida* as unmodified heparin and chondroitin, respectively 1547
- Heptakis(2,6-di-*O*-methyl)- β -cyclodextrin
- Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224
- Herbicide
- Syntheses of hydantocidin and C-2-thioxohydantocidin 2077

Hetaryl thioglycosides

Efficient intramolecular β -mannoside formation using *m*-xylene and isophthaloyl derivatives as rigid spacers 195

Heteroaromatic compounds

One-pot synthesis of *C*-glycosylic compounds (*C*-glycosides) from D-glucal, *p*-tolylsulfenyl chloride and aromatic/heteroaromatic compounds in the presence of Lewis acids 1275

Heterocyclization

Heterocyclization of 3-deoxy-D-*erythro*-hexos-2-ulose-1,2-bis(thiosemicarbazone). Crystal structure of the major diastereomer 1397

Hexasaccharides

Hexasaccharides from the histamine-modified depolymerization of porcine intestinal mucosal heparin 935

Hexitols

The solvent-free thermal dehydration of hexitols on zeolites 1261

Hexokinase

Enzymatic synthesis of D-glucosone 6-phosphate (D-*arabino*-hexos-2-ulose 6-(dihydrogen phosphate)) and NMR analysis of its isomeric forms 1585

Hexuronamide

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-*lyxo*-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-*lyxo*-pentodialdo-1,4-furanoside 663

Hexuronate

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-*lyxo*-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-*lyxo*-pentodialdo-1,4-furanoside 663

High-amylose maize starch

Structural features of non-granular spherulitic maize starch 1467

Histamine

Hexasaccharides from the histamine-modified depolymerization of porcine intestinal mucosal heparin 935

¹H NMR

Preparation and characterisation of chitosans with oligosaccharide branches 2455

¹H NMR studies

Crystal structure of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 79

Homogalacturonan

Characterisation of pectin subunits released by an optimised combination of enzymes 1687

Homologous recombination

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

HPAEC

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

HPAEC-PAD

Isolation of oligosaccharides from a partial-acid hydrolysate of pneumococcal type 3 polysaccharide for use in conjugate vaccines 819

HPLC

High-performance liquid chromatographic separation and on-line mass spectrometric detection of saturated and unsaturated oligogalacturonic acids 2481

The self-association of the drug acetaminophen and its interactions and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

HPSEC

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

Human milk

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

Human milk oligosaccharides

Human milk oligosaccharides: an enzymatic protection step simplifies the synthesis of 3'- and 6'-*O*-sialyllactose and their analogues 473

Hyalobiuronic acid

Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229

Hyaluronic acid

Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229

Hydrazoic acid

The use of tri-*O*-acetyl-D-glucal and -D-galactal in the synthesis of 3-acetamido-2,3-dideoxyhexopyranoses and -hexopyranosides 1803

Hydrogenation

The use of tri-*O*-acetyl-D-glucal and -D-galactal in the synthesis of 3-acetamido-2,3-dideoxyhexopyranoses and -hexopyranosides 1803

Hydrogen bond

Crystal structure of β -cyclodextrin–dimethylsulfoxide inclusion complex 2487

Hydrogen bonding

The saccharide–hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a 'forbidden' conformation of the galactose derivative 21

Hydrogen bonds

Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787

Hydrolysis

Effects of cellulase on the modification of cellulose 1291

Hydrophobic

Synthesis of a globotetraose trimer 947

Hydroxyapatite

Regulation of fructosyltransferase activity by carbohydrates, in solution and immobilized on hydroxyapatite surfaces 701

Hydroxybutenyl cyclodextrin

Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493

Hydroxybutenyl cyclomaltooligosaccharide

Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493

4-Hydroxy-2,5-dimethyl-3[2*H*]-furanone

Chemical formation of 4-hydroxy-2,5-dimethyl-3[2*H*]-furanone from D-fructose 1,6-diphosphate 1184

3-Hydroxy-2,3-dimethyl-5-oxopropyl group

Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365

Hydroxymethyl

Evaluation of steric effects on the exocyclic conformations of 6-*C*-methyl-substituted 2-acetamido-2-deoxy- β -D-glucopyranosides 83

Hypsochromic shift

Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161

Ibuprofen

Synthesis and characterization of water-soluble hydroxybutenyl cyclomaltooligosaccharides (cyclodextrins) 493

L-Iditol-based polyamides

Synthesis of D-mannitol and L-iditol derivatives as monomers for the preparation of new regioregular AABB-type polyamides 607

1,3-Imino heptitols

Reinvestigation of the iodocyclization of 4,5,7-tri-*O*-benzyl-3-(*N*-benzylacetamido)-1,2,3-trideoxy-D-*gluco*-hept-1-enitol: unexpected formation of a 1,3-imino-heptitol derivative 273

Iminosugars

Synthesis of 1-deoxy-L-*gulo*nojirimycin (L-*gulo*DNJ) and 1-deoxy-D-*talo*nojirimycin (D-*talo*DNJ) 1083

inclusion

Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737

Inclusion complex

Crystal structure of the cyclomaltose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Thermodynamic insight into the origin of the inclusion of mono-sulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281

Inclusion complexes

Non-covalent associations of cyclomaltoligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ,ψ -carotene (lycopene) systems by light scattering, ion-spray ionization and tandem mass spectrometry 1129

Structural and physicochemical characterization of the inclusion complexes of cyclomaltoligosaccharides (cyclodextrins) with melatonin 743

Inclusion compound

Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224

Inclusion compounds

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501

Incorporation

Synthesis and biological evaluation of a radiolabeled analog of methyl 2-acetamido-2,4-dideoxy- β -D-xylo-hexopyranoside directed towards influencing cellular glycosaminoglycan biosynthesis 37

Inhibitor

Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229

Inhibitors

Influence of exo β -D-galactofuranosidase inhibitors in cultures of *Penicillium fellutanum* and modifications in hyphal cell structure 891

Inositol

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Inositol phosphate

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Inositol phosphate intermediate

(\pm)-1,2:5,6-Di-*O*-isopropylidene-*myo*-inositol and (\pm)-6-*O*-benzoyl-1,2:4,5-di-*O*-isopropylidene-*myo*-inositol: a practical preparation of key intermediates for *myo*-inositol phosphates 75

Inositols

Selective epimerization of L-*chiro*-inositol to L-*muco*- and D-*chiro*-inositol derivatives 1

Insect cells

β -(1 \rightarrow 4)-Galactosyltransferase activity in native and engineered insect cells measured with time-resolved europium fluorescence 2181

Insoluble dextran

Production of insoluble dextran using cell-bound dextranase of *Leuconostoc mesenteroides* NRRL B-523 1529

Intramolecular 1,3-dipolar cycloaddition

Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419

Intramolecular glycosidation

Efficient intramolecular β -mannoside formation using *m*-xylylene and isophthaloyl derivatives as rigid spacers 195

Intramolecular orthoesterification

An improved method for the preparation of 3-*O*-benzyl-6-*O*-pivaloyl- α -D-glucopyranose 1,2,4-orthopivalate 951

Intrinsic viscosity

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Inversion of conformation

Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289

Ion-trap mass spectrometry

Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191

Iota-carrageenan

Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523

 γ -Irradiation

Determination of structural peculiarities of dextran, pullulan and γ -irradiated pullulan by Fourier-transform IR spectroscopy 1445

Isomaltulose

Glycosidation of fructose-containing disaccharides using MCM-41 material as the catalyst 1993

Isomeric forms

Enzymatic synthesis of D-glucosone 6-phosphate (D-*arabino*-hexose-2-ulose 6-(dihydrogen phosphate)) and NMR analysis of its isomeric forms 1585

Isomerization

Acid-catalyzed isomerization of methyl 2-deoxy-D-*arabino*-hexosides: equilibria, kinetics and mechanism 265

Isopropyl acetate

Crystal structure of penta-*O*-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301

Isosorbide dinitrate

Crystal structure of the cyclomaltose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

Isoxazolines

Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419

Junction zone

Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523

 κ -Carrageenan oligosaccharides

Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarrabiose oligosaccharides 1553

Kappaphycus striatum

Structural studies on κ -carrageenan derived oligosaccharides 433

Kdn

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

Kinetic and thermodynamic control

Preparation and structural characterisation of *O*-aminopropyl starch and amylose 2263

Kinetics

Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

Transglucosidation of methyl and ethyl D-glucopyranosides by alcoholysis 517

Kinetic studies

Acid-catalyzed isomerization of methyl 2-deoxy-D-*arabino*-hexosides: equilibria, kinetics and mechanism 265

Kluyveromyces

Effect of sodium orthovanadate on glycosylation of the phosphopeptidomannans involved in the cell–cell aggregation of the yeast *Kluyveromyces bulgaricus* 1873

Konjac

Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

Lactose

Chemical transformation of lactose into 4-*O*- β -D-galactopyranosyl-D-glucuronic acid (pseudolactobiouronic acid) and some derivatives thereof 991

Lactulose

Glycosidation of fructose-containing disaccharides using MCM-41 material as the catalyst 1993

Lamiaceae

Flavonoid glycosides from *Salvia moorcroftiana* Wall. 403

Laminaria cichorioides

Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229

Lanthanide ions

Sugar interaction with metal ions. The coordination behavior of neutral galactitol to Ca(II) and lanthanide ions 1485

Lattice structure

Crystal structure of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 79

Lead(II)

Interaction of lead(II) with β -cyclodextrin in alkaline solutions 1657

Lectin affinity chromatography

New exopolysaccharides produced by *Aureobasidium pullulans* grown on glucosamine 1201

legume seeds

NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255

Lentinus edodes

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Leuconostoc mesenteroides

Production of insoluble dextran using cell-bound dextranucrase of *Leuconostoc mesenteroides* NRRL B-523 1529

Leucrose

Glycosidation of fructose-containing disaccharides using MCM-41 material as the catalyst 1993

Levorotatory

Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289

Lewis antigen

Synthesis of dimeric lactose and dimeric (sialyl) Lewis^x glycolipids 1089

Lewis^x

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

LgtC

Efficient chemoenzymatic synthesis of globotriose and its derivatives with a recombinant α -(1 \rightarrow 4)-galactosyltransferase 969

Light scattering

Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129

Linear stretching

Molecular interactions in bacterial cellulose composites studied by 1D FT-IR and dynamic 2D FT-IR spectroscopy 1145

 α -Linked C-glycosylation of glucosamine

Practical stereoselective synthesis of α -linked C-glucosamine propi-

onic acid esters: conversion to GLA-60 derivatives 97

 α -Linked gluco-homopolymer

Solution- and solid-phase oligosaccharide synthesis using glucosyl iodides: a comparative study 1953

Lipase

Effect of fatty acid chain length on initial reaction rates and regioselectivity of lipase-catalysed esterification of disaccharides 1178

Regioselective enzymatic hydrolysis of acetylated pyranoses and pyranosides using immobilised lipases. An easy chemoenzymatic synthesis of α - and β -D-glucopyranose acetates bearing a free secondary C-4 hydroxyl group 1615

Lipases

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

Lipochitin oligosaccharides (LCOs)

Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191

Lipooligosaccharide

Synthesis of α -lactosyl-(1 \rightarrow 3)-L-glycero- α -D-manno-heptopyranoside, a partial oligosaccharide structure expressed within the lipooligosaccharide produced by *Neisseria gonorrhoeae* strain 15253 11

Lipopolysaccharide

5,7-Diamino-5,7,9-trideoxynon-2-ulonic acid: a novel sugar from a phytopathogenic *Pseudomonas* lipopolysaccharide 955

Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365

Structural analysis of lipopolysaccharide oligosaccharide epitopes expressed by non-typeable *Haemophilus influenzae* strain 176 409

Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697

Structure of a new 2-deoxy-2-[(R)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541

Structure of the core part of the lipopolysaccharides from *Proteus penneri* strains 7, 8, 14, 15, and 21 643

Structure of the O-polysaccharide from the lipopolysaccharide from *Vibrio cholerae* O6 813

Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381

Structure of the O-polysaccharide of *Pseudomonas putida* FERM P-18867 1589

Structure of the O-specific polysaccharide chain of the lipopolysaccharide of *Bordetella hinzii* 961

Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of *N*-acetylmuramic acid, 2-acetamido-4-*O*-[(R)-1-carboxyethyl]-2-deoxy-D-glucose 2463

Structure of the O-specific polysaccharide of *Providencia alcalifaciens* O16 containing *N*-acetylmuramic acid 1667

Structure of the O-specific polysaccharide of the lipopolysaccharide of *Azospirillum brasilense* Sp245 869

Structures of the O-polysaccharide chains of the lipopolysaccharides of *Xanthomonas campestris* pv. *phaseoli* var. *fuscans* GSPB 271 and *X. campestris* pv. *malvacearum* GSPB 1386 and GSPB 2388 1723

Synthesis of α -lactosyl-(1 \rightarrow 3)-L-glycero- α -D-manno-heptopyranoside, a partial oligosaccharide structure expressed within the lipooligosaccharide produced by *Neisseria gonorrhoeae* strain 15253 11

The core structure of the lipopolysaccharide from the causative agent of plague, *Yersinia pestis* 775

The structure of the carbohydrate backbone of the rough type lipopolysaccharides from *Proteus penneri* strains 12, 13, 37 and 44 835

- Lipopolysaccharide, bacillosamine
O-Specific chain structure from the lipopolysaccharide fraction of *Pseudomonas reactans*: a pathogen of the cultivated mushrooms 467
- L. mesenteroides* B-742CB
Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextranucrases 2427
- L. mesenteroides* B-512FMC
Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextranucrases 2427
- LPS
Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435
- LPS-antagonist
Practical stereoselective synthesis of α -linked C-glucosamine propionic acid esters: conversion to GLA-60 derivatives 97
Synthesis of ceramidated GLA-60 derivatives 1343
- Lucilia caesar*
Synthetic studies on glycosphingolipids from the Protostomia phyla: syntheses of arthro-series glycosphingolipids 2037
- Lycopene
Non-covalent associations of cyclomaltoligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ,ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129
- Macrocytic maltodextrins
Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245
- Macrocytic maltoligosaccharides
Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245
- Macromolecular characterisation
On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781
- Maillard reaction
Galactose dialdehyde as potential protein cross-linker: proof of principle 899
- MALDI-MS
Characterization of O-acetyl-(4-O-methylglucurono)xylan isolated from birch and beech 373
- MALDI-TOF-MS
Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711
- MALDI-TOF MS
Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255
- Maltodextrins
Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245
Reactions of alpha amylases with starch granules in aqueous suspension giving products in solution and in a minimum amount of water giving products inside the granule 1113
- Maltododecaose
Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltohexaose and cyclomaltodextrin glucanyltransferase 509
- Maltohexaose
Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltohexaose and cyclomaltodextrin glucanyltransferase 509
- Maltooctadecaose
Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltohexaose and cyclomaltodextrin glucanyltransferase 509
- Maltoligosaccharides
Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltohexaose 2245
- Maltose
Structural relaxation and physical ageing of starchy materials 827
- Mannan
Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711
- Mannans
Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421
- D-Mannitol
The solvent-free thermal dehydration of hexitols on zeolites 1261
- D-Mannitol-based polyamides
Synthesis of D-mannitol and L-iditol derivatives as monomers for the preparation of new regioregular AABB-type polyamides 607
- D-manno-, L-ido- and D-glucosioheptanose peracetates
Synthesis of 4-cyano and 4-nitrophenyl 1,6-dithio-D-manno-, L-ido- and D-glucoseptanosides possessing antithrombotic activity 1351
- β -Mannopyranosides
Efficient intramolecular β -mannoside formation using *m*-xylylene and isophthaloyl derivatives as rigid spacers 195
- Mannopyranosyl oligosaccharides
A highly efficient synthesis of an octasaccharide, the repeating unit of the cell-wall mannan of *Trichophyton mentagrophytes* and *T. rubrum* 1159
- Mannose
Synthesis of α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 3)- α -Manp-(1 \rightarrow 3)-Manp, the tetrasaccharide repeating unit of *Escherichia coli* O9a, and α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 3)- α -Manp-(1 \rightarrow 3)-Manp, the pentasaccharide repeating unit of *E. coli* O9 and *Klebsiella* O3 383
- Mannose oligosaccharides
A facile regio- and stereoselective synthesis of mannose octasaccharide of the N-glycan in human CD2 and mannose hexasaccharide antigenic factor 13b 207
Synthesis of a mannose heptasaccharide of the pathogenic yeast, *Candida glabrata* IFO 0622 strain 1367
- D-Mannosidase inhibitor
A simple access to the D-mannosidase inhibitor, 1-deoxymannojirimycin 183
- Marine invertebrates
A 2-sulfated, 3-linked α -L-galactan is an anticoagulant polysaccharide 2231
- Marine mollusk
Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229
- Mark–Houwink relationship
On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781
- Mass spectrometry
Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435
Structural and physicochemical characterization of the inclusion complexes of cyclomaltoligosaccharides (cyclodextrins) with melatonin 743
Studies on the glycosylation of wild-type and mutant forms of *Aspergillus niger* pectin methylesterase 802

Mechanism

Kinetics and mechanism of Ru(III) and Hg(II) co-catalyzed oxidation of D-galactose and D-ribose by *N*-bromoacetamide in perchloric acid 345

Mechanism of starch chain elongation

Starch biosynthesis: mechanism for the elongation of starch chains 1015

Mechanistic studies

Transglucosidation of methyl and ethyl D-glucopyranosides by alcoholysis 517

Melanoma

Synthesis of GD3-lactam: a potential ligand for the development of an anti-melanoma vaccine 569

Melatonin

Structural and physicochemical characterization of the inclusion complexes of cyclomaltooligosaccharides (cyclodextrins) with melatonin 743

Mercerization

The crystal structure of the α -cellobiose·2 NaI·2 H₂O complex in the context of related structures and conformational analysis 851

Methanesulfonate

Regioselective sulfonylation of 6,1',6'-tri-*O*-tritylsucrose through dibutylstannylation: synthesis of 4'-*O*-sulfonyl derivatives of sucrose 2377

(Methoxydimethyl)methyl ethers

Mixed acetals of cyclodextrins. Preparation of hexakis-, heptakis- and octakis[2,6-di-*O*-(methoxydimethyl)methyl]- α -, β - and γ -cyclodextrins 93

Methyl 2-acetamido-2,4-dideoxy- β -D-xylo-hexopyranoside

Synthesis and biological evaluation of a radiolabeled analog of methyl 2-acetamido-2,4-dideoxy- β -D-xylo-hexopyranoside directed towards influencing cellular glycosaminoglycan biosynthesis 37

Methylation analysis

Structural characterisation of the olive pomace pectic polysaccharide arabinan side chains 917

The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137

Methyl cellobioside

Crystal and molecular structure of methyl 4-*O*-methyl- β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside 161

Methyl 2-deoxy-D-arabino-hexosides

Acid-catalyzed isomerization of methyl 2-deoxy-D-arabino-hexosides: equilibria, kinetics and mechanism 265

Methylesterase

Studies on the glycosylation of wild-type and mutant forms of *Aspergillus niger* pectin methylesterase 802

Methyl esterification

Application of mass spectrometry to determine the activity and specificity of pectin lyase A 1213

Methyl α -D-galactopyranosides, acylated

Synthesis and intramolecular transesterifications of pivaloylated methyl α -D-galactopyranosides 863

Methyl 4-*O*-acetyl-3-azido-2,3,6-trideoxy-6-iodo- α -D-arabino-hexopyranoside

Synthesis, the crystal structure, and high-resolution NMR spectroscopy of methyl 4-*O*-acetyl-3-azido-2,3,6-trideoxy-6-iodo- α -D-arabino-hexopyranoside 175

4-Methylumbelliferyl

Synthesis of 7-*O*-(2-deoxy-2-sulfamido- α -D-glucopyranosyl)-4-methylcoumarin sodium salt: a fluorogenic substrate for sulfamidase 1055

Metropolis Monte Carlo calculations

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

Michael addition

Synthesis of glycosides of 3-deoxy-4-thiopentopyranosid-2-uloses

and their reduction products: 3-deoxy-4-thiopentopyranosides 2069

Microemulsion stability

Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411

Microreaction

Electrophoretically mediated microscale reaction of glycosidases: kinetic analysis of some glycosidases at the nanoliter scale 1757

Microwave treatment

Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711

Mixed acetals of cyclodextrin

Mixed acetals of cyclodextrins. Preparation of hexakis-, heptakis- and octakis[2,6-di-*O*-(methoxydimethyl)methyl]- α -, β - and γ -cyclodextrins 93

MM3

Disaccharide conformational maps: 3D contours or 2D plots? 1861

Potential energy surfaces of carrageenan models: carrabiose, β -(1 \rightarrow 4)-linked D-galactobiose, and their sulfated derivatives 2311

Modeling

The crystal structure of the α -cellobiose·2 NaI·2 H₂O complex in the context of related structures and conformational analysis 851

Model systems

The role of the anion in the reaction of reducing sugars with ammonium salts 2273

Molecular dynamics

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ¹H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

Molecular dynamics simulations

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

Molecular mechanics

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ¹H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

Conformation of the branched O-specific polysaccharide of *Shigella dysenteriae* type 2: Molecular mechanics calculations show a compact helical structure exposing an epitope which potentially mimics galabiose 1633

Disaccharide conformational maps: 3D contours or 2D plots? 1861

Molecular mimicry

Conformation of the branched O-specific polysaccharide of *Shigella dysenteriae* type 2: Molecular mechanics calculations show a compact helical structure exposing an epitope which potentially mimics galabiose 1633

Molecular mobility

Use of ¹H cross-relaxation nuclear magnetic resonance spectroscopy to probe the changes in bread and its components during aging 147

Molecular modeling

Morphology of Western larch arabinogalactan 2211

Molecular recognition

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Synthesis of dimeric lactose and dimeric (sialyl) Lewis^x glycolipids 1089

Molecular sieves

Direct regioselective 2-*O*-(*p*-toluenesulfonylation) of sucrose 613

The solvent-free thermal dehydration of hexitols on zeolites 1261

Molecular simulation

Modeling and measurements of solid-liquid and vapor-liquid equilibria of polyols and carbohydrates in aqueous solution 1563

Molecular structure

Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787

Molecular weight

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Molecular weight (MW)

Depolymerization of *N*-succinyl-chitosan by hydrochloric acid 561

Monodeoxy glucoside

Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629

Monomer analysis

Preparation and structural characterisation of *O*-aminopropyl starch and amylose 2263

Mono-*O*-methyl glucoside

Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629

Monophosphates

Synthesis and NMR characterization of the six regioisomeric monophosphates of octyl β -D-galactopyranosyl-(1 \rightarrow 4)-2-acetamido-2-deoxy- β -D-glucopyranoside 2127

Monosaccharide dihydrates

The saccharide-hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a 'forbidden' conformation of the galactose derivative 21

Monosaccharide sulfate

Synthesis and utility of sulfated chromogenic carbohydrate model substrates for measuring activities of mucin-desulfating enzymes 1095

Monosulfonated triphenylphosphine

Thermodynamic insight into the origin of the inclusion of monosulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281

Monte Carlo docking

Monte Carlo docking simulations of cyclomaltoheptaose and dimethyl cyclomaltoheptaose with paclitaxel 549

Morganella morganii

Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697

Morpholidate coupling

Syntheses of unnatural N-substituted UDP-galactosamines as alternative substrates for *N*-acetylgalactosaminyl transferases 2187

Mo^{VI} complexes

NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-gluc-octose and their alditols 1745

Multiple equilibria

The self-association of the drug acemetacin and its interactions and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

Multivalency

Synthesis of a globotetraose trimer 947

Synthesis of a multivalent display of a CD22-binding trisaccharide 1605

Multivalent oligosaccharides

Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983

Mushroom

Structural characterization of a water-soluble β -D-glucan from fruiting bodies of *Agaricus blazei* Murr 1417

Mushrooms

O-Specific chain structure from the lipopolysaccharide fraction of

Pseudomonas reactans: a pathogen of the cultivated mushrooms 467

Mutarotation

A method for obtaining equilibrium tautomeric mixtures of reducing sugars via glycosylamines using nonaqueous media 965

Mycoloylation

Synthesis and biological evaluation of trehalose analogs as potential inhibitors of mycobacterial cell wall biosynthesis 105

myo-Inositol

Carbohydrates from *Detarium microcarpum* bark extract 1663

Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067

N-Acetyl-D-glucosamine

Quantitative production of 2-acetamido-2-deoxy-D-glucose from crystalline chitin by bacterial chitinase 557

Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β -chitin 133

N-Acetyl lactosamine

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

N-acetylglucosamine

Synthesis and NMR characterization of the six regioisomeric monophosphates of octyl β -D-galactopyranosyl-(1 \rightarrow 4)-2-acetamido-2-deoxy- β -D-glucopyranoside 2127

N-Acetylmuramic acid

Structure of the O-specific polysaccharide of *Providencia alcalifaciens* O16 containing *N*-acetylmuramic acid 1667

5-*N*-Acetylneuraminic acid

Structural analysis of lipopolysaccharide oligosaccharide epitopes expressed by non-typeable *Haemophilus influenzae* strain 176 409

N-Acetyl-2,3,4-tri-*O*-acetyl-L-fucopyranosylamine

Side products of glycosidation with selected 2-acetamido-2-deoxy-D-glucopyranosides 1495

NanoHPLC system

Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191

Nanoparticles

Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ionspray ionization and tandem mass spectrometry 1129

Natural products

Synthesis of oligosaccharide derivatives related to those from sanqi, a Chinese herbal medicine from *Panax notoginseng* 485

N-Benzoyl uridine and thymidine

New methods for the synthesis of *N*-benzoylated uridine and thymidine derivatives; a convenient method for *N*-debenzoylation 369

N-Bromoacetamide

Kinetics and mechanism of Ru(III) and Hg(II) co-catalyzed oxidation of D-galactose and D-ribose by *N*-bromoacetamide in perchloric acid 345

N-Bromosuccinimide

Bromonium ion-promoted glycosidic bond formation and simultaneous bromination of an activated aryl aglycon 31

N-Carboxymethylation

Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297

N-Deacetylation

Preparative route to *N*-glycolylneuraminic acid phenyl 2-thioglycoside donor and synthesis of Neu5Gc- α -(2 \rightarrow 3')-lactosamine 3-aminopropyl glycoside 451

N-Deacetylsialic acid

Synthesis and selectin-binding activity of *N*-deacetylsialyl Lewis X ganglioside 2111

Neighboring-group effects

Synthesis of oligosaccharide derivatives related to those from sangqi, a Chinese herbal medicine from *Panax notoginseng* 485

Neighboring group participation effects

Unexpected α -stereochemical outcomes of attempted β -glycosylations 1165

Neisseria

Synthesis of α -lactosyl-(1 \rightarrow 3)-L-glycero- α -D-manno-heptopyranoside, a partial oligosaccharide structure expressed within the lipooligosaccharide produced by *Neisseria gonorrhoeae* strain 15253 11

Neisseria meningitidis

Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435

Neoglycolipids

Synthesis of dimeric lactose and dimeric (sialyl) Lewis^x glycolipids 1089

Neuraminic acid

Synthesis of C-glycosyl compounds of N-acetylneuraminic acid from D-gluconolactone 1967

N-Glucofuranosylamine

Glucofuranosylation with penta-O-propanoyl- β -D-glucofuranose 1999

4-Nitrophenyl glycosides

Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229

NMR

Chiral induction based on carbohydrate ligands in olefin platinum(0) complexes 651

Complete ¹H and ¹³C spectral assignment of floridoside 279

Fluorescent labeling of pectic oligosaccharides with 2-aminobenzamide and enzyme assay for pectin 1023

NMR spectroscopy and chemical studies of an arabinan-rich system from the endosperm of the seed of *Gleditsia triacanthos* 255

Quantum mechanical and NMR spectroscopy studies on the conformations of the hydroxymethyl and methoxymethyl groups in aldohexosides 353

Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121

Structural analysis and chemical depolymerization of the capsular polysaccharide of *Streptococcus pneumoniae* type 1 335

Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435

Structural and physicochemical characterization of the inclusion complexes of cyclomaltooligosaccharides (cyclodextrins) with melatonin 743

Structural characterisation of the olive pomace pectic polysaccharide arabinan side chains 917

Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

The self-association of the drug acetaminophen and its interactions and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

NMR abstract

Structures of two polysaccharides of *Campylobacter jejuni* 81116 2223

NMR data

Structural studies on κ -carrageenan derived oligosaccharides 433

NMR, residual dipolar coupling

Conformational studies of blood group A and blood group B oligosaccharides using NMR residual dipolar couplings 905

NMR spectroscopy

A method for obtaining equilibrium tautomeric mixtures of reducing sugars via glycosylamines using nonaqueous media 965

An acetylated galactoglucomannan from *Picea abies* L. Karst 1033

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

Conformational analysis of two xylose-containing N-glycans in aqueous solution by using ¹H NMR ROESY and NOESY spectroscopy in combination with MD simulations 2279

Effect of (1 \rightarrow 3)- and (1 \rightarrow 4)-linkages of fully sulfated polysaccharides on their anticoagulant activity 925

Evaluation of steric effects on the exocyclic conformations of 6-C-methyl-substituted 2-acetamido-2-deoxy- β -D-glucopyranosides 83

Fungal cell wall galactomannan isolated from *Apodys decidueus* 1503

Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their teleomorphs, *Dipodascus* and *Galactomyces* 2347

New exopolysaccharides produced by *Aureobasidium pullulans* grown on glucosamine 1201

NMR studies of molybdate complexes of D-erythro-L-manno-octose and D-erythro-L-glucoside and their alditols 1745

Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161

Structural determination of the complex exopolysaccharide from the virulent strain of *Cryphonectria parasitica* 1707

Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119

Synthesis and NMR characterization of the six regioisomeric monophosphates of octyl β -D-galactopyranosyl-(1 \rightarrow 4)-2-acetamido-2-deoxy- β -D-glucopyranoside 2127

Thermodynamic insight into the origin of the inclusion of monosulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281

The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137

Nodulation

Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191

NOE

Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737

Nonaqueous media

A method for obtaining equilibrium tautomeric mixtures of reducing sugars via glycosylamines using nonaqueous media 965

Nonulosonic acid

Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119

NOR polyagglutination

Synthesis and inhibitory activity of a di- and a trisaccharide corresponding to an erythrocyte glycolipid responsible for the nor polyagglutination 1517

N-Succinyl-chitosan

Depolymerization of N-succinyl-chitosan by hydrochloric acid 561

N-Sulfonation

Exclusive and complete introduction of amino groups and their N-sulfo and N-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297

L-Nucleosides

Efficient synthesis of 2-deoxy-L-erythro-pentose (2-deoxy-L-ribose) from L-arabinose 397

O-Acetylation

Characterization of *O*-acetyl-(4-*O*-methylglucurono)xylan isolated from birch and beech 373

O-Acetylation

Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711

Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381

1-O-Acetyl-β-D-galactopyranose

1-*O*-Acetyl-β-D-galactopyranose: a novel substrate for the transglycosylation reaction catalyzed by the β-galactosidase from *Penicillium* sp. 635

O-Acetyl groups

An acetylated galactoglucomannan from *Picea abies* L. Karst 1033

O-antigen

Conformation of the branched O-specific polysaccharide of *Shigella dysenteriae* type 2: Molecular mechanics calculations show a compact helical structure exposing an epitope which potentially mimics galabiose 1633

Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365

Structure of a new 2-deoxy-2-[(*R*)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541

Structure of the O-polysaccharide from the lipopolysaccharide from *Vibrio cholerae* O6 813

Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of *N*-acetylmuramic acid, 2-acetamido-4-*O*-[(*R*)-1-carboxyethyl]-2-deoxy-D-glucose 2463

Structure of the O-specific polysaccharide of the lipopolysaccharide of *Azospirillum brasilense* Sp245 869

3-O-Benzyl-α-CD

Mixed acetals of cyclodextrins. Preparation of hexakis-, heptakis- and octakis[2,6-di-*O*-(methoxydimethyl)methyl]-α-, β- and γ-cyclodextrins 93

3-O-Benzyl-6-O-pivaloyl-α-D-glucopyranose 1,2,4-orthopivalate

An improved method for the preparation of 3-*O*-benzyl-6-*O*-pivaloyl-α-D-glucopyranose 1,2,4-orthopivalate 951

4,6-O-Butylidene-α-D-glucopyranose

Glycosylamines of 4,6-*O*-butylidene-α-D-glucopyranose: synthesis and characterization of glycosylamines, and the crystal structure of 4,6-*O*-butylidene-*N*-(*o*-chlorophenyl)-β-D-glucopyranosylamine 187

Synthesis and characterization of 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine: crystal structures of 4,6-*O*-butylidene-α-D-glucopyranose, 4,6-*O*-butylidene-β-D-glucopyranosylamine and 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 1477

4,6-O-Butylidene-β-D-glucopyranosylamine

Synthesis and characterization of 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine: crystal structures of 4,6-*O*-butylidene-α-D-glucopyranose, 4,6-*O*-butylidene-β-D-glucopyranosylamine and 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 1477

4,6-O-Butylidene-N-(2-hydroxybenzylidene)-β-D-glucopyranosylamine

Synthesis and characterization of 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine: crystal structures of 4,6-*O*-butylidene-α-D-glucopyranose, 4,6-*O*-butylidene-β-D-glucopyranosylamine and 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)-β-D-glucopyranosylamine 1477

4,6-O-Butylidene-N-(o-chlorophenyl)-β-D-glucopyranosylamine

Glycosylamines of 4,6-*O*-butylidene-α-D-glucopyranose: synthesis

and characterization of glycosylamines, and the crystal structure of 4,6-*O*-butylidene-*N*-(*o*-chlorophenyl)-β-D-glucopyranosylamine 187

O-chain polysaccharide

Structures of the O-polysaccharide chains of the lipopolysaccharides of *Xanthomonas campestris* pv. *phaseoli* var. *fuscans* GSPB 271 and *X. campestris* pv. *malvacearum* GSPB 1386 and GSPB 2388 1723

O-Dimethylcyclomaltoheptaose (DM-β-CD)

Monte Carlo docking simulations of cyclomaltoheptaose and dimethyl cyclomaltoheptaose with paclitaxel 549

O-Fluoroalkyl-D-galactose

Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411

O-Fluoroalkyl-D-glucose

Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411

O-(Fluoroalkyl)xylitol

Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411

O-Glycan

Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121

O-Glycoside

Crystal structure of methyl 1,2,3,4-tetra-*O*-acetyl-β-D-glucopyranuronate 2343

Olefin-coordination

Chiral induction based on carbohydrate ligands in olefin platinum(0) complexes 651

Oligogalacturonic acids

High-performance liquid chromatographic separation and on-line mass spectrometric detection of saturated and unsaturated oligogalacturonic acids 2481

Oligomers

Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

Oligosaccharide

An efficient and practical synthesis of β-(1→3)-linked xylo-oligosaccharides 2335

A practical synthesis of β-D-GlcA-(1→3)-β-D-Gal-(1→3)-β-D-Gal-(1→4)-D-Xyl, a part of the common linkage region of a glycosaminoglycan 1373

Heparin oligosaccharide sequence and size essential for inhibition of pulmonary artery smooth muscle cell proliferation 2359

Synthesis of an xylosylated rhamnose pentasaccharide, the repeating unit of the O-chain polysaccharide of the lipopolysaccharide of *Xanthomonas campestris* pv. *begoniae* GSPB 525 391

Synthesis of a potential tetrasaccharide ligand for E-selectin 621

Synthesis of α-lactosyl-(1→3)-L-glycero-α-D-manno-heptopyranoside, a partial oligosaccharide structure expressed within the lipooligosaccharide produced by *Neisseria gonorrhoeae* strain 15253 11

Synthesis of α-Manp-(1→2)-α-Manp-(1→3)-α-Manp-(1→3)-Manp, the tetrasaccharide repeating unit of *Escherichia coli* O9a, and α-Manp-(1→2)-α-Manp-(1→2)-α-Manp-(1→3)-α-Manp-(1→3)-Manp, the pentasaccharide repeating unit of *E. coli* O9 and *Klebsiella* O3 383

Synthesis of oligosaccharide derivatives related to those from sanqi, a Chinese herbal medicine from *Panax notoginseng* 485

Unexpected α-stereochemical outcomes of attempted β-glycosylations 1165

Oligosaccharide branches

Preparation and characterisation of chitosans with oligosaccharide branches 2455

Oligosaccharide conformation

Conformational studies of blood group A and blood group B oligosaccharides using NMR residual dipolar couplings 905

Oligosaccharide derivatives, synthesis

Synthesis of building blocks of human milk oligosaccharides. Fucosylated derivatives of the lacto- and neolacto-series 1333

Oligosaccharide phosphate fraction

Determination of the composition of the oligosaccharide phosphate fraction of *Pichia (Hansenula) holstii* NRRL Y-2448 phosphomannan by capillary electrophoresis and HPLC 139

Oligosaccharides

Concise synthesis of a buffalo milk pentasaccharide derivative 1313

Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441

Structural studies on κ -carrageenan derived oligosaccharides 433

Synthesis of natural β -D-(1 \rightarrow 3)-glucopyranosyl oligosaccharides 1673

Oligosaccharide synthesis

Oligosaccharide synthesis by dextransucrase: new unconventional acceptors 1811

Solution- and solid-phase oligosaccharide synthesis using glucosyl iodides: a comparative study 1953

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

Synthesis and inhibitory activity of a di- and a trisaccharide corresponding to an erythrocyte glycolipid responsible for the nor polyagglutination 1517

Synthesis of oligosaccharides corresponding to *Streptococcus pneumoniae* type 9 capsular polysaccharide structures 1715

Olive pomace

Structural characterisation of the olive pomace pectic polysaccharide arabinan side chains 917

3-*O*-Methylgalactose

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

4-*O*-Methyl-glucuronoxylan

Isolation and structure of D-xylans from pericarp seeds of *Opuntia ficus-indica* prickly pear fruits 1593

One-pot glycosylation

A facile approach to diosgenin and furostan type saponins bearing a β -chacotriose moiety 2153

Open-chain ketose

A simple access to the D-mannosidase inhibitor, 1-deoxymannojirimycin 183

O-Permethylocyclodextrin

Facile preparation of mono-2-*O*-modified eicosa-*O*-methylocyclomaltoheptaoses (β -cyclodextrins) 2393

O-Polysaccharide

Structure of the O-polysaccharide of *Aeromonas hydrophila* O:34; a case of random O-acetylation of 6-deoxy-L-talose 1381

Structure of the O-polysaccharide of *Pseudomonas putida* FERM P-18867 1589

4-*O*-Propenyl-hexopyranosides

Stereocontrolled formation of oxacephams from carbohydrates 2005

Opuntia ficus-indica

Isolation and structure of D-xylans from pericarp seeds of *Opuntia ficus-indica* prickly pear fruits 1593

Oral antithrombotic activity

Synthesis of 4-cyano and 4-nitrophenyl 1,6-dithio-D-manno-, L-ido- and D-glucoseptanosides possessing antithrombotic activity 1351

Orthoesters

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-

inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

O-specific polysaccharide

O-Specific chain structure from the lipopolysaccharide fraction of *Pseudomonas reactans*: a pathogen of the cultivated mushrooms 467

Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535

Structure of the O-specific polysaccharide of *Providencia alcalifaciens* O16 containing *N*-acetylmuramic acid 1667

Osteoarthritis

Production of *N*-acetyl-D-glucosamine from α -chitin by crude enzymes from *Aeromonas hydrophila* H-2330 761

3'-*O*-sulfo-GM1b

A first total synthesis of a novel sulfated ganglioside, 3'-*O*-sulfo-GM1b 1679

OSW-1

Synthesis of a cholestane glycoside OSW-1 with potent cytostatic activity 1269

Oviducal mucin

Species-specificity of amphibia carbohydrate chains: the *Bufo viridis* case study 121

4-*O*-Vinylxyazetidin-2-one

Stereocontrolled formation of oxacephams from carbohydrates 2005

Oxacephams

Stereocontrolled formation of oxacephams from carbohydrates 2005

Oxidation

Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

Synthesis of oxidized methyl 4-*O*-methyl- β -D-glucopyranoside and methyl β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside derivatives as substrates for fluorescence labeling reactions 691

Oxidations

Chemical transformation of lactose into 4-*O*- β -D-galactopyranosyl-D-glucuronic acid (pseudolactobiouronic acid) and some derivatives thereof 991

(+) -Oxybiotin

Stereospecific synthesis of (+)-oxybiotin from D-xylose 459

Paclitaxel

Monte Carlo docking simulations of cyclomaltoheptaose and dimethyl cyclomaltoheptaose with paclitaxel 549

Palladium-catalyzed oxidation

Access to aldehyde acetals of sugars via palladium-catalyzed oxidation of α,β -unsaturated cyclic acetals 2325

P-Antigen

Synthesis of a globotetraose trimer 947

Partial molar compressibility

Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441

Partial reductive hydrolysis

Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443

Pasteurella multocida

Identification of the capsular polysaccharides of Type D and F *Pasteurella multocida* as unmodified heparin and chondroitin, respectively 1547

Pectic polysaccharides

Structural characterisation of the olive pomace pectic polysaccharide arabinan side chains 917

Pectin

An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641

- Application of mass spectrometry to determine the activity and specificity of pectin lyase A 1213
- Fluorescent labeling of pectic oligosaccharides with 2-aminobenzamide and enzyme assay for pectin 1023
- Studies on the glycosylation of wild-type and mutant forms of *Aspergillus niger* pectin methylesterase 802
- Pectin lyase**
- Application of mass spectrometry to determine the activity and specificity of pectin lyase A 1213
- Pectin methylesterases**
- Characterisation of pectin subunits released by an optimised combination of enzymes 1687
- Pectins**
- Characterisation of pectin subunits released by an optimised combination of enzymes 1687
- Penicillium fellutanum*
- Influence of exo β -D-galactofuranosidase inhibitors in cultures of *Penicillium fellutanum* and modifications in hyphal cell structure 891
- Penicillium* sp.
- 1-*O*-Acetyl- β -D-galactopyranose: a novel substrate for the transglycosylation reaction catalyzed by the β -galactosidase from *Penicillium* sp. 635
- Pentitols, hexitols, iodination**
- Regioselective synthesis of alditol vicinal bis-cyclic thionocarbonates via alditol stannylene acetal complexes as a short and efficient route to α,ω -diiodoalditol derivatives 69
- Perallylated cyclodextrins**
- Improved preparation of perallylated cyclodextrins: facile synthesis of cyclodextrin-based polycationic and polyanionic compounds 217
- Perfluoroalkyl iodides**
- Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411
- Perfluoro(alkyl vinyl oligoether)**
- Novel amphiphilic fluoroalkylated derivatives of xylitol, D-glucose and D-galactose for medical applications: hemocompatibility and co-emulsifying properties 2411
- Persistence length**
- On the chain flexibility of arabinoxylans and other β -(1 \rightarrow 4) polysaccharides 1781
- Phenyl 1-thioglucoside**
- Simultaneous regioselective protection of phenyl 1-thioglucosides at the C-3 and C-6 or at the C-2 and C-6 hydroxy groups 1499
- phloridzin**
- Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737
- Phoenix dactylifera* L.
- A neutral β -D-glucan from dates of the date palm, *Phoenix dactylifera* L. 1325
- Phosphitylation**
- Synthesis of D- and L-*myo*-inositol 2,4,5-trisphosphate and trisphosphorothioate: structural analogues of D-*myo*-inositol 1,4,5-trisphosphate 1795
- Phosphocholine**
- Structural analysis of lipopolysaccharide oligosaccharide epitopes expressed by non-typeable *Haemophilus influenzae* strain 176 409
- Phosphoethanolamine**
- Structural analysis of the lipopolysaccharide from *Neisseria meningitidis* strain BZ157 *galE*: localisation of two phosphoethanolamine residues in the inner core oligosaccharide 1435
- Phosphomannan**
- Determination of the composition of the oligosaccharide phosphate fraction of *Pichia (Hansenula) holstii* NRRL Y-2448 phosphomannan by capillary electrophoresis and HPLC 139
- Phosphopeptidomannans**
- Effect of sodium orthovanadate on glycosylation of the phosphopeptidomannans involved in the cell–cell aggregation of the yeast *Kluyveromyces fragilis* 1873
- Phosphorothioates**
- Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067
- Phosphorylation**
- Production of highly phosphorylated glycopolymers by expression of R1 in *Escherichia coli* 327
- Synthesis and NMR characterization of the six regioisomeric monophosphates of octyl β -D-galactopyranosyl-(1 \rightarrow 4)-2-acetamido-2-deoxy- β -D-glucopyranoside 2127
- Photoaddition**
- Improved preparation of perallylated cyclodextrins: facile synthesis of cyclodextrin-based polycationic and polyanionic compounds 217
- Photoreaction**
- Photoreaction of methyl and phenyl 4,6-*O*-benzylidene-2,3-dideoxy-2-*C*-*p*-tolylsulfonyl- β -D-*erythro*-hex-2-enopyranosides in methanol 2061
- Physical ageing**
- Structural relaxation and physical ageing of starchy materials 827
- Phytopathogenic bacteria**
- Structures of the O-polysaccharide chains of the lipopolysaccharides of *Xanthomonas campestris* pv. *phaseoli* var. *fusca* GSPB 271 and *X. campestris* pv. *malvacearum* GSPB 1386 and GSPB 2388 1723
- PI-88**
- Determination of the composition of the oligosaccharide phosphate fraction of *Pichia (Hansenula) holstii* NRRL Y-2448 phosphomannan by capillary electrophoresis and HPLC 139
- Picea abies* L. Karst
- An acetylated galactoglucomannan from *Picea abies* L. Karst 1033
- Pichia (Hansenula) holstii*
- Determination of the composition of the oligosaccharide phosphate fraction of *Pichia (Hansenula) holstii* NRRL Y-2448 phosphomannan by capillary electrophoresis and HPLC 139
- D-Pinitol**
- Carbohydrates from *Detarium microcarpum* bark extract 1663
- Pivalates, intramolecular transesterifications**
- Synthesis and intramolecular transesterifications of pivaloylated methyl α -D-galactopyranosides 863
- P^k antigenic trisaccharide**
- Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983
- Plant polysaccharide**
- Morphology of Western larch arabinogalactan 2211
- Platinum**
- Chiral induction based on carbohydrate ligands in olefin platinum(0) complexes 651
- Pneumococcal polysaccharide**
- Confirmation of the D configuration of the 2-substituted arabinitol 1-phosphate residue in the capsular polysaccharide from *Streptococcus pneumoniae* Type 17F 2353
- p*-Nitrophenyl α -D-glucoside
- Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629
- PNP, glycosides**
- Electrophoretically mediated microscale reaction of glycosidases: kinetic analysis of some glycosidases at the nanoliter scale 1757
- Polyanionic compound**
- Improved preparation of perallylated cyclodextrins: facile synthesis of cyclodextrin-based polycationic and polyanionic compounds 217

Polycationic compound

Improved preparation of perallylated cyclodextrins: facile synthesis of cyclodextrin-based polycationic and polyanionic compounds 217

Polygalacturonase

Fluorescent labeling of pectic oligosaccharides with 2-aminobenamide and enzyme assay for pectin 1023

Polymorphism

An anhydrous polymorphic form of trehalose 167

Polyols

Modeling and measurements of solid–liquid and vapor–liquid equilibria of polyols and carbohydrates in aqueous solution 1563

Polysaccharide

Biosynthesis of a substituted cellulose from a mutant strain of *Xanthomonas campestris* 315

New structural features of the polysaccharide from gum ghatti (*Anogeissus latifolia*) 2205

Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119

Polysaccharide degradation

Isolation of oligosaccharides from a partial-acid hydrolysate of pneumococcal type 3 polysaccharide for use in conjugate vaccines 819

Polysaccharides

A neutral β -D-glucan from dates of the date palm, *Phoenix dactylifera* L. 1325

Coffee bean arabinogalactans: acidic polymers covalently linked to protein 239

Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421

Fungal cell wall galactomannan isolated from *Apodus deciduus* 1503

Fungal cell-wall galactomannans isolated from *Geotrichum* spp. and their telomorphs, *Dipodascus* and *Galactomyces* 2347

New exopolysaccharides produced by *Aureobasidium pullulans* grown on glucosamine 1201

Polysaccharides, red algal

Sulfated polysaccharides from the red seaweed *Georgiella confluenta* 57

Polysaccharides, sulfated

Sulfated polysaccharides from the red seaweed *Georgiella confluenta* 57

Polysaccharide structure

Structure of the O-specific polysaccharide chain of the lipopolysaccharide of *Bordetella hinzii* 961

Structures of two polysaccharides of *Campylobacter jejuni* 81116 2223

porcine pancreatic alpha amylase

Reactions of alpha amylases with starch granules in aqueous suspension giving products in solution and in a minimum amount of water giving products inside the granule 1113

Potato

Production of highly phosphorylated glycopolymers by expression of R1 in *Escherichia coli* 327

Potential selectin ligand

Synthesis of a potential tetrasaccharide ligand for E-selectin 621

Prickly pear seeds

Isolation and structure of D-xylans from pericarp seeds of *Opuntia ficus-indica* prickly pear fruits 1593

Primary plant cell walls

Molecular ordering of cellulose after extraction of polysaccharides from primary cell walls of *Arabidopsis thaliana*: a solid-state CP/MAS ^{13}C NMR study 587

Protected 2,5-anhydro pentoses

Stereospecific synthesis of (+)-oxybiotin from D-xylose 459

Protecting group

(2-Azidomethyl)phenylacetyl as a new, reductively cleavable pro-

tecting group for hydroxyl groups in carbohydrate synthesis 87

Protecting groups

Preparation of orthogonally protected chitosan oligosaccharides: observation of an anomalous remote substituent effect 1319

Protein

Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229

Proteoglycan

A practical synthesis of β -D-GlcA-(1 \rightarrow 3)- β -D-Gal-(1 \rightarrow 3)- β -D-Gal-(1 \rightarrow 4)-D-Xyl, a part of the common linkage region of a glycosaminoglycan 1373

Proteus

Structure of the core part of the lipopolysaccharides from *Proteus penneri* strains 7, 8, 14, 15, and 21 643

Proteus

The structure of the carbohydrate backbone of the rough type lipopolysaccharides from *Proteus penneri* strains 12, 13, 37 and 44 835

Proteus penneri

Structure of the core part of the lipopolysaccharides from *Proteus penneri* strains 7, 8, 14, 15, and 21 643

Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535

The structure of the carbohydrate backbone of the rough type lipopolysaccharides from *Proteus penneri* strains 12, 13, 37 and 44 835

Proteus vulgaris

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of N-acetylmuramic acid, 2-acet-amido-4-O-[(R)-1-carboxyethyl]-2-deoxy-D-glucose 2463

Proton-catalyzed addition of 2-methoxypropene

Mixed acetals of cyclodextrins. Preparation of hexakis-, heptakis- and octakis[2,6-di-O-(methoxydimethyl)methyl]- α -, β - and γ -cyclodextrins 93

Proton cross-relaxation NMR

Use of ^1H cross-relaxation nuclear magnetic resonance spectroscopy to probe the changes in bread and its components during aging 147

Providencia alcalifaciens

Structure of the O-specific polysaccharide of *Providencia alcalifaciens* O16 containing N-acetylmuramic acid 1667

PSD UV-MALDI-TOF-MS

Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarrabiose oligosaccharides 1553

Pseudoaldobiouronic acids

Chemical transformation of lactose into 4-O- β -D-galactopyranosyl-D-glucuronic acid (pseudolactobiouronic acid) and some derivatives thereof 991

Pseudolactobiouronic acid

Chemical transformation of lactose into 4-O- β -D-galactopyranosyl-D-glucuronic acid (pseudolactobiouronic acid) and some derivatives thereof 991

Pseudomonas corrugata

5,7-Diamino-5,7,9-trideoxynon-2-ulonic acid: a novel sugar from a phytopathogenic *Pseudomonas* lipopolysaccharide 955

Pseudomonas fluorescens

Somatic antigens of pseudomonads: structure of the O-specific polysaccharide of *Pseudomonas fluorescens* IMV 2366 (biovar C) 2365

Pseudomonas putida

Structure of the O-polysaccharide of *Pseudomonas putida* FERM P-18867 1589

Pseudomonas reactans

O-Specific chain structure from the lipopolysaccharide fraction of *Pseudomonas reactans*: a pathogen of the cultivated mushrooms 467

Iminosugars

Synthesis of 1-deoxy-L-*gulo*nojirimycin (L-*gulo*DNJ) and 1-deoxy-D-*talono*jirimycin (D-*talono*DNJ) 1083

inclusion

Three-dimensional structure of the inclusion complex between phloridzin and β -cyclodextrin 1737

Inclusion complex

Crystal structure of the cyclomaltose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Thermodynamic insight into the origin of the inclusion of mono-sulfonated isomers of triphenylphosphine into the β -cyclodextrin cavity 281

Inclusion complexes

Non-covalent associations of cyclomaltoligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ,ψ -carotene (lycopene) systems by light scattering, ion-spray ionization and tandem mass spectrometry 1129

Structural and physicochemical characterization of the inclusion complexes of cyclomaltoligosaccharides (cyclodextrins) with melatonin 743

Inclusion compound

Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224

Inclusion compounds

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501

Incorporation

Synthesis and biological evaluation of a radiolabeled analog of methyl 2-acetamido-2,4-dideoxy- β -D-xylo-hexopyranoside directed towards influencing cellular glycosaminoglycan biosynthesis 37

Inhibitor

Brown seaweed protein as an inhibitor of marine mollusk endo-(1 \rightarrow 3)- β -D-glucanases 229

Inhibitors

Influence of exo β -D-galactofuranosidase inhibitors in cultures of *Penicillium fellutanum* and modifications in hyphal cell structure 891

Inositol

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Inositol phosphate

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Inositol phosphate intermediate

(\pm)-1,2:5,6-Di-*O*-isopropylidene-*myo*-inositol and (\pm)-6-*O*-benzoyl-1,2:4,5-di-*O*-isopropylidene-*myo*-inositol: a practical preparation of key intermediates for *myo*-inositol phosphates 75

Inositols

Selective epimerization of L-*chiro*-inositol to L-*muco*- and D-*chiro*-inositol derivatives 1

Insect cells

β -(1 \rightarrow 4)-Galactosyltransferase activity in native and engineered insect cells measured with time-resolved europium fluorescence 2181

Insoluble dextran

Production of insoluble dextran using cell-bound dextranase of *Leuconostoc mesenteroides* NRRL B-523 1529

Intramolecular 1,3-dipolar cycloaddition

Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419

Intramolecular glycosidation

Efficient intramolecular β -mannoside formation using *m*-xylylene and isophthaloyl derivatives as rigid spacers 195

Intramolecular orthoesterification

An improved method for the preparation of 3-*O*-benzyl-6-*O*-pivaloyl- α -D-glucopyranose 1,2,4-orthopivalate 951

Intrinsic viscosity

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Inversion of conformation

Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289

Ion-trap mass spectrometry

Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191

Iota-carrageenan

Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523

 γ -Irradiation

Determination of structural peculiarities of dextran, pullulan and γ -irradiated pullulan by Fourier-transform IR spectroscopy 1445

Isomaltulose

Glycosidation of fructose-containing disaccharides using MCM-41 material as the catalyst 1993

Isomeric forms

Enzymatic synthesis of D-glucosone 6-phosphate (D-*arabino*-hexose-2-ulose 6-(dihydrogen phosphate)) and NMR analysis of its isomeric forms 1585

Isomerization

Acid-catalyzed isomerization of methyl 2-deoxy-D-*arabino*-hexosides: equilibria, kinetics and mechanism 265

Isopropyl acetate

Crystal structure of penta-*O*-acetyl- β -D-galactopyranose with modeling of the conformation of the acetate groups 2301

Isosorbide dinitrate

Crystal structure of the cyclomaltose (α -cyclodextrin) complex with isosorbide dinitrate. Guest-modulated channel-type structure 537

Isoxazolines

Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419

Junction zone

Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523

 κ -Carrageenan oligosaccharides

Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarrabiose oligosaccharides 1553

Kappaphycus striatum

Structural studies on κ -carrageenan derived oligosaccharides 433

Kdn

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

Kinetic and thermodynamic control

Preparation and structural characterisation of *O*-aminopropyl starch and amylose 2263

Kinetics

Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

Transglucosidation of methyl and ethyl D-glucopyranosides by alcoholysis 517

Kinetic studies

Acid-catalyzed isomerization of methyl 2-deoxy-D-*arabino*-hexosides: equilibria, kinetics and mechanism 265

- Regioselective sulfonylation
Direct regioselective 2-*O*-(*p*-toluenesulfonylation) of sucrose 613
- Regioselective synthesis
An efficient and practical synthesis of β -(1 \rightarrow 3)-linked xylooligosaccharides 2335
Synthesis of α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 3)- α -Manp-(1 \rightarrow 3)-Manp, the tetrasaccharide repeating unit of *Escherichia coli* O9a, and α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 2)- α -Manp-(1 \rightarrow 3)- α -Manp-(1 \rightarrow 3)-Manp, the pentasaccharide repeating unit of *E. coli* O9 and *Klebsiella* O3 383
- Regioselectivity
Concise synthesis of a buffalo milk pentasaccharide derivative 1313
Synthesis of natural β -D-(1 \rightarrow 3)-glucopyranosyl oligosaccharides 1673
- β Relaxation
Disentangling α from β mechanical relaxations in the rubber-to-glass transition of high-sugar–chitosan mixtures 595
- Resin glycosides
Preparation and diastereomeric separation of an (*S*)- and (*R*)-1-(methoxycarbonyl)tridec-10-yl glucoside derivative, a precursor for a monosaccharide constituent of resin glycosides 1047
- Rhamnogalacturonan hydrolase
Characterisation of pectin subunits released by an optimised combination of enzymes 1687
- Rhamnose
Synthesis of an xylosylated rhamnose pentasaccharide, the repeating unit of the O-chain polysaccharide of the lipopolysaccharide of *Xanthomonas campestris* pv. *begoniae* GSPB 525 391
- D-Rhamnose
Structure of the O-polysaccharide of *Pseudomonas putida* FERM P-18867 1589
- Rhamsan analog
Molecular structure of the rhamsan-like exocellular polysaccharide RMDP17 from *Sphingomonas paucimobilis* 45
- Rhizobium etli*
Novel lipochitin oligosaccharide structures produced by *Rhizobium etli* KIM5s 1191
- Rhizobium meliloti*
¹³C NMR spectroscopic analysis on the chiral discrimination of *N*-acetylphenylalanine, catechin and propranolol induced by cyclic-(1 \rightarrow 2)- β -D-glucans (cyclosophoraoses) 1785
- Rhodomelaceae
The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137
- Rhodophyceae
Complete ¹H and ¹³C spectral assignment of floridoside 279
- Rhodymenia palmata*
Complete ¹H and ¹³C spectral assignment of floridoside 279
- Ribitol phosphate, Ethanolamine phosphate
Structure of the O-specific polysaccharide of *Proteus penneri* 103 containing ribitol and 2-aminoethanol phosphates 1535
- Ribose
Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067
- ribotyping
Extracellular polysaccharides of a bacterium associated with a fungal canker disease of *Eucalyptus* sp 731
Extracellular polysaccharides of *Erwinia futilulu*, a bacterium associated with a fungal canker disease of *Eucalyptus* spp. 2469
- Rice-field crab shell
Anticoagulant activity of a sulfated chitosan 1233
- Ring-opening metathesis polymerization (ROMP)
Synthesis of a multivalent display of a CD22-binding trisaccharide 1605
- RMDP17
Molecular structure of the rhamsan-like exocellular polysaccharide RMDP17 from *Sphingomonas paucimobilis* 45
- Roasting
Effect of roasting on degradation and structural features of polysaccharides in Arabica coffee beans 421
- R1 starch protein
Production of highly phosphorylated glycopolymers by expression of R1 in *Escherichia coli* 327
- Ru(III), Hg(II) co-catalysis
Kinetics and mechanism of Ru(III) and Hg(II) co-catalyzed oxidation of D-galactose and D-ribose by *N*-bromoacetamide in perchloric acid 345
- Saccharide–hydrazide linkage
The saccharide–hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a ‘forbidden’ conformation of the galactose derivative 21
- Saccharide moiety
Crystal structure of 4,6-*O*-ethylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 79
- Saccharides
Modeling and measurements of solid–liquid and vapor–liquid equilibria of polyols and carbohydrates in aqueous solution 1563
- 5-*S*-Acetyl-5-thio-D-ribono-1,4-lactone
An improved synthesis of 5-thio-D-ribose from D-ribono-1,4-lactone 1411
- Sakurai allylation
Synthesis of 3-*C*-(6-*O*-acetyl-2,3,4-tri-*O*-benzyl- α -D-mannopyranosyl)-1-propene: a caveat 1769
- Salt complex
The crystal structure of the α -cellobiose·2 NaI·2 H₂O complex in the context of related structures and conformational analysis 851
- Salvia moorcroftiana*
Flavonoid glycosides from *Salvia moorcroftiana* Wall. 403
- Saponins
A facile approach to diosgenin and furostan type saponins bearing a 3 β -chacotriose moiety 2153
Synthesis of a cholestane glycoside OSW-1 with potent cytostatic activity 1269
- SB_{1a}, HCC carbohydrate antigen
Synthesis of a spacer-armed disulfated tetrasaccharide of SB_{1a}, a carbohydrate hapten associated with human hepatocellular carcinoma 1929
- Scaffold
D-Glucose as a multivalent chiral scaffold for combinatorial chemistry 2089
- Screw column
Structure of the complex of heptakis(2,6-di-*O*-methyl)- β -cyclodextrin with (2,4-dichlorophenoxy)acetic acid 1224
- Seaweed
Structure of a fucoidan from the brown seaweed *Fucus evanescens* C.Ag. 719
Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443
The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137
- SEC-MALLS
Preparation and characterisation of chitosans with oligosaccharide branches 2455
- Selectin
Synthesis and selectin-binding activity of *N*-deacetylsialyl Lewis X ganglioside 2111
- Selective modification
Facile preparation of mono-2-*O*-modified eicosa-*O*-methylcyclo-maltoheptaoses (β -cyclodextrins) 2393
- Selective protection and deprotection
New methods for the synthesis of *N*-benzoylated uridine and thymidine derivatives; a convenient method for *N*-debenzoylation 369

Self-association

The self-association of the drug acetaminophen and its interactions and stabilization with β -cyclodextrin in aqueous solution as inferred from NMR spectroscopy and HPLC studies 1387

Semicarbazides

The saccharide–hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a ‘forbidden’ conformation of the galactose derivative 21

Serological classification

Structure of a new 2-deoxy-2-[(R)-3-hydroxybutyramido]-D-glucose-containing O-specific polysaccharide from the lipopolysaccharide of *Citrobacter gillenii* PCM 1542 1541

Shewanella putrefaciens

Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119

Shewanellase

Structural investigation of the O-specific polysaccharides of *Morganella morganii* consisting of two higher sugars 1697

Structure of the phenol-soluble polysaccharide from *Shewanella putrefaciens* strain A6 1119

Shiga toxins

Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983

Shigella dysenteriae

Conformation of the branched O-specific polysaccharide of *Shigella dysenteriae* type 2: Molecular mechanics calculations show a compact helical structure exposing an epitope which potentially mimics galabiose 1633

Sialic acid

5-Azido neuraminic acid thioglycoside as sialylation donor 755

Synthesis of a multivalent display of a CD22-binding trisaccharide 1605

Sialylation

5-Azido neuraminic acid thioglycoside as sialylation donor 755

Preparative route to *N*-glycolylneuraminic acid phenyl 2-thioglycoside donor and synthesis of Neu5Gc- α -(2 \rightarrow 3′)-lactosamine 3-aminopropyl glycoside 451

Sialyllactosamine

Preparative route to *N*-glycolylneuraminic acid phenyl 2-thioglycoside donor and synthesis of Neu5Gc- α -(2 \rightarrow 3′)-lactosamine 3-aminopropyl glycoside 451

Sialyl Lewis X

Synthesis and selectin-binding activity of *N*-deacetylsialyl Lewis X ganglioside 2111

Signal transduction

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Silyl Lewis^x analogs

Synthesis of 3-*C*-(6-*O*-acetyl-2,3,4-tri-*O*-benzyl- α -D-mannopyranosyl)-1-propene: a caveat 1769

Silenan

An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641

Silene vulgaris (Moench) Garcke

An alternate carbon source for enhancing production of polysaccharides by *Silene vulgaris* callus 1641

Silylation

Confirmation of the structure of tetra-*O*-(*tert*-butyldimethylsilyl)-D-glucono-1,4-lactone formed by silylation of D-glucono-1,5-lactone 565

Simulated spectrum

Interaction of metal ions with D-glucobenzothiazoline: isolation and characterization of the resultant products 289

Single-crystal

Crystal structure of methyl 1,2,3,4-tetra-*O*-acetyl- β -D-glucopyranuronate 2343

Single-crystal X-ray diffraction

Glycosylamines of 4,6-*O*-butylidene- α -D-glucopyranose: synthesis and characterization of glycosylamines, and the crystal structure of 4,6-*O*-butylidene-*N*-(*o*-chlorophenyl)- β -D-glucopyranosylamine 187

Stereoselective synthesis of a *C*-glycosylic compound (a ‘methyl *C*-glycoside’) through a regioselective free-radical ring-opening reaction. A single-crystal X-ray structure determination 1523

Synthesis and characterization of 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine: crystal structures of 4,6-*O*-butylidene- α -D-glucopyranose, 4,6-*O*-butylidene- β -D-glucopyranosylamine and 4,6-*O*-butylidene-*N*-(2-hydroxybenzylidene)- β -D-glucopyranosylamine 1477

Size-exclusion Chromatography

Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711

Smooth muscle cells (SMCs)

Heparin oligosaccharide sequence and size essential for inhibition of pulmonary artery smooth muscle cell proliferation 2359

Sodium dodecyl sulfate

Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

Sodium hydroxide

The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453

Solid–liquid equilibria

Modeling and measurements of solid–liquid and vapor–liquid equilibria of polyols and carbohydrates in aqueous solution 1563

Solid phase

D-Glucose as a multivalent chiral scaffold for combinatorial chemistry 2089

Solid-state CP/MAS ¹³C NMR spectroscopy

Molecular ordering of cellulose after extraction of polysaccharides from primary cell walls of *Arabidopsis thaliana*: a solid-state CP/MAS ¹³C NMR study 587

Solid state NMR

Crystal and molecular structure of methyl 4-*O*-methyl- β -D-glucopyranosyl-(1 \rightarrow 4)- β -D-glucopyranoside 161

Solubility

Monte Carlo docking simulations of cyclomaltoheptaose and dimethyl cyclomaltoheptaose with paclitaxel 549

Structural and physicochemical characterization of the inclusion complexes of cyclomaltooligosaccharides (cyclodextrins) with melatonin 743

Solution properties

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Solvents

Effect of fatty acid chain length on initial reaction rates and regioselectivity of lipase-catalysed esterification of disaccharides 1178

Somanniathelphusa dugasti

Anticoagulant activity of a sulfated chitosan 1233

Spherulite

Structural features of non-granular spherulitic maize starch 1467

Spironucleoside

Syntheses of hydantocidin and C-2-thioxohydantocidin 2077

Spruce wood

Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711

Squaric decyl ester

Synthesis of a globotetraose trimer 947

Stability constant

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Stannylation

Regioselective sulfonylation of 6,1',6'-tri-*O*-tritylsucrose through dibutylstannylation: synthesis of 4'-*O*-sulfonyl derivatives of sucrose 2377

Starch

Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208

Structural relaxation and physical ageing of starchy materials 827

Starch biosynthesis

Starch biosynthesis: mechanism for the elongation of starch chains 1015

Starch derivatives

Preparation and structural characterisation of *O*-aminopropyl starch and amylose 2263

starch granules

Reactions of alpha amylases with starch granules in aqueous suspension giving products in solution and in a minimum amount of water giving products inside the granule 1113

Starch biosynthesis: mechanism for the elongation of starch chains 1015

Starch retrogradation

Use of ¹H cross-relaxation nuclear magnetic resonance spectroscopy to probe the changes in bread and its components during aging 147

Staudinger reaction

Convenient syntheses of symmetrical and unsymmetrical glycosyl carbodiimides and *N,N*-bis(glycosyl)cyanamides 1170

One-step synthesis of non-anomeric sugar isothiocyanates from sugar azides 2329

Stereo- and regioselective glycosylations

Convenient use of non-malodorous thioglycosyl donors for the assembly of multivalent globo- and isoglobosyl trisaccharides 983

Stereocontrolled dihydroxylation

Oxidation of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1-propene compounds and the structure of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1,2-propanediol derivatives for a synthesis of 2,3-didehydro-2,7-dideoxy-*N*-acetylneuraminic acid 1917

Stereocontrol, NMR spectroscopy

Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419

Stereoselective

Solution- and solid-phase oligosaccharide synthesis using glucosyl iodides: a comparative study 1953

Stereoselectivity

Can the stereochemical outcome of glycosylation reactions be controlled by the conformational preferences of the glycosyl donor? 765

Synthesis of oligosaccharide derivatives related to those from sanqi, a Chinese herbal medicine from *Panax notoginseng* 485

Unexpected α -stereochemical outcomes of attempted β -glycosylations 1165

Steric hindrance

Structural studies on C-2 substitution in a new set of synthetic aminodideoxy sugars: the steric bulk at C-2 influences the puckering of the pyranose ring 1507

Steroids

Synthesis of a cholestane glycoside OSW-1 with potent cytostatic activity 1269

Strecker synthesis

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-lyxo-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-lyxo-pentodialdo-1,4-furanoside 663

Streptococcus Group A

Synthesis and conformational analysis of a pentasaccharide corresponding to the cell-wall polysaccharide of the Group A *Streptococcus* 2023

Streptococcus pneumoniae

Isolation of oligosaccharides from a partial-acid hydrolysate of pneumococcal type 3 polysaccharide for use in conjugate vaccines 819

Structural analysis and chemical depolymerization of the capsular polysaccharide of *Streptococcus pneumoniae* type 1 335

Streptomyces

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

Structural analysis

Sulfated polysaccharides from the red seaweed *Georgiella confluens* 57

Structural determination

Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443

structure

Examination of molar-based distribution of A, B and C chains of amylopectin by fluorescent labeling with 2-aminopyridine 1208

Extracellular polysaccharides of a bacterium associated with a fungal canker disease of *Eucalyptus* sp 731

Extracellular polysaccharides of *Erwinia futululu*, a bacterium associated with a fungal canker disease of *Eucalyptus* spp. 2469

New exopolysaccharides produced by *Aureobasidium pullulans* grown on glucosamine 1201

New structural features of the polysaccharide from gum ghatti (*Anogeissus latifolia*) 2205

Structural features of non-granular spherulitic maize starch 1467

Structure of the arabinogalactan from gum tragacanth (*Astragalus gummifer*) 1647

Structure of the oligomers obtained by enzymatic hydrolysis of the glucomannan produced by the plant *Amorphophallus konjac* 2507

Structures of the O-polysaccharide chains of the lipopolysaccharides of *Xanthomonas campestris* pv. *phaseoli* var. *fuscans* GSPB 271 and *X. campestris* pv. *malvacearum* GSPB 1386 and GSPB 2388 1723

Structure elucidation

Structural elucidation of the EPS of slime producing *Brevundimonas vesicularis* sp. isolated from a paper machine 1821

Substitution pattern

Preparation and structural characterisation of *O*-aminopropyl starch and amylose 2263

Substrate analogues of 1-D-6-*O*-(2-amino-2-deoxy- α -D-glucopyranosyl)-*myo*-inositol 1-(1,2-di-*O*-hexadecanoyl-*sn*-glycerol 3-phosphate)

Further probing of the substrate specificities and inhibition of enzymes involved at an early stage of glycosylphosphatidylinositol (GPI) biosynthesis 2049

Substrate specificity

Glycon specificity profiling of α -glucosidases using monodeoxy and mono-*O*-methyl derivatives of *p*-nitrophenyl α -D-glucopyranoside 629

Sucrose

Direct regioselective 2-*O*-(*p*-toluenesulfonylation) of sucrose 613

Regioselective sulfonylation of 6,1',6'-tri-*O*-tritylsucrose through dibutylstannylation: synthesis of 4'-*O*-sulfonyl derivatives of sucrose 2377

Sugar amino nitriles

Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-lyxo-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-lyxo-pentodialdo-1,4-furanoside 663

Sugar carbodiimides

One-step synthesis of non-anomeric sugar isothiocyanates from sugar azides 2329

Sugar iminophosphoranes

One-step synthesis of non-anomeric sugar isothiocyanates from sugar azides 2329

Sugar isothiocyanates

One-step synthesis of non-anomeric sugar isothiocyanates from sugar azides 2329

Sugar mimics

Synthesis of an ether-linked alkyl 5a-carba- β -D-glucoside, a 5a-carba- β -D-galactoside, a 2-acetamido-2-deoxy-5a-carba- β -D-glucoside, and an alkyl 5a'-carba- β -lactoside 1979

Sugar nucleotides

Thiosugar nucleotide analogs: Synthesis of 5'-(2,3,4-tri-*O*-acetyl-6-*S*-acetyl-6-thio- α -D-galactopyranosyl diphosphate) 1935

Sugar phosphates

Synthesis of glucopyranoside-based ligands for D-*myo*-inositol 1,4,5-trisphosphate receptors 1067

Sugar sulfates

Synthesis and X-ray structures of sulfate esters of fructose and its isopropylidene derivatives. Part 1: 2,3:4,5-di-*O*-isopropylidene- β -D-fructopyranose 1-sulfate and 4,5-*O*-isopropylidene- β -D-fructopyranose 1-sulfate 787

Sugar thiosemicarbazone

Heterocyclization of 3-deoxy-D-*erythro*-hexos-2-ulose-1,2-bis(thiosemicarbazone). Crystal structure of the major diastereomer 1397

Sulfated and pyruvylated disaccharides

Sulfated and pyruvylated disaccharide alditols obtained from a red seaweed galactan: ESIMS and NMR approaches 2443

Sulfated derivatives

Solution properties of an α -(1 \rightarrow 3)-D-glucan from *Lentinus edodes* and its sulfated derivatives 155

Sulfated fucans

A 2-sulfated, 3-linked α -L-galactan is an anticoagulant polysaccharide 2231

Sulfated galactans

A 2-sulfated, 3-linked α -L-galactan is an anticoagulant polysaccharide 2231

The structure of a galactan sulfate from the red seaweed *Bostrychia montagnei* 1137

Sulfated ganglioside

A first total synthesis of a novel sulfated ganglioside, 3'-*O*-sulfo-GM1b 1679

Sulfated neocarrabiose oligosaccharides

Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarrabiose oligosaccharides 1553

Sulfated oligosaccharides

Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarrabiose oligosaccharides 1553

Sulfated polysaccharides

A 2-sulfated, 3-linked α -L-galactan is an anticoagulant polysaccharide 2231

Sulfation

Anticoagulant activity of a sulfated chitosan 1233

Sulfoforms

An access to various sulfation patterns in dermatan sulfate: chemical syntheses of sulfoforms of trisaccharide methyl glycosides 673

Sulfomucin

Synthesis and utility of sulfated chromogenic carbohydrate model substrates for measuring activities of mucin-desulfating enzymes 1095

Sulfonates

Sulfonate protecting groups. Regioselective sulfonylation of *myo*-inositol orthoesters—improved synthesis of precursors of D- and L-*myo*-inositol 1,3,4,5-tetrakisphosphate, *myo*-inositol 1,3,4,5,6-pentakisphosphate and related derivatives 2399

Sulfonyl imidazole

Direct regioselective 2-*O*-(*p*-toluenesulfonylation) of sucrose 613

Sulfonyl sugars

Photoreaction of methyl and phenyl 4,6-*O*-benzylidene-2,3-dideoxy-2-*C*-*p*-tolylsulfonyl- β -D-*erythro*-hex-2-enopyranosides in methanol 2061

Supercritical fluid CO₂ extraction

Supercritical CO₂ fluid extraction of crystal water from trehalose dihydrate. Efficient production of form II (T_α) phase 1729

Supramolecular chemistry

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Supramolecular structures

Effects of cellulase on the modification of cellulose 1291

The properties of enzyme-hydrolyzed cellulose in aqueous sodium hydroxide 1453

Surfactants

Synthesis and surface-active properties of a new class of surfactants derived from D-gluconic acid 997

Synechocystis sp. PCC6803

Characterization of cyanobacterial glycogen isolated from the wild type and from a mutant lacking of branching enzyme 2195

Synthesis

Efficient intramolecular β -mannoside formation using *m*-xylylene and isophthaloyl derivatives as rigid spacers 195

Synthesis of a potential tetrasaccharide ligand for E-selectin 621

Synthesis of a spacer-armed disulfated tetrasaccharide of SB_{1a}, a carbohydrate hapten associated with human hepatocellular carcinoma 1929

Synthesis of *C*-glycosyl compounds of *N*-acetylneuraminic acid from D-gluconolactone 1967

Synthesis, X-ray diffraction

Synthesis, the crystal structure, and high-resolution NMR spectroscopy of methyl 4-*O*-acetyl-3-azido-2,3,6-trideoxy-6-iodo- α -D-*arabino*-hexopyranoside 175

D-*talo*DNJ

Synthesis of 1-deoxy-L-*gulo*nojirimycin (L-*gulo*DNJ) and 1-deoxy-D-*talo*nojirimycin (D-*talo*DNJ) 1083

Tandem mass spectrometry

Non-covalent associations of cyclomaltooligosaccharides (cyclodextrins) with carotenoids in water. A study on the α - and β -cyclodextrin/ ψ , ψ -carotene (lycopene) systems by light scattering, ion spray ionization and tandem mass spectrometry 1129

Teichoic acids

Cell wall anionic polymers of *Streptomyces* sp. MB-8, the causative agent of potato scab 2255

TEMPO-mediated oxidations

Determination of the side-products formed during the nitroxide-mediated bleach oxidation of glucose to glucaric acid 1059

1,3,4,5-Tetra-*O*-acetyl-6-bromo-6-deoxy-*keto*-D-fructose

A simple access to the D-mannosidase inhibitor, 1-deoxymannojirimycin 183

Thermal dehydration

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501

The solvent-free thermal dehydration of hexitols on zeolites 1261

Thermal guest release

Inclusion of carvone enantiomers in cyclomaltoheptaose (β -cyclodextrin): thermal behaviour and H \rightarrow D and D \rightarrow H exchange 2501

Thermostable enzyme

Exopolysaccharide lyase from *Thermotoga maritima*: cloning, characterization and organic synthesis application 1427

Thermotoga maritima

Exopolysaccharide lyase from *Thermotoga maritima*: cloning, characterization and organic synthesis application 1427

Thiadiazoline

Heterocyclization of 3-deoxy-D-erythro-hexos-2-ulose-1,2-bis(thiosemicarbazone). Crystal structure of the major diastereomer 1397

5-Thiocyanato-D-ribo-1,4-lactone

An improved synthesis of 5-thio-D-ribose from D-ribo-1,4-lactone 1411

1-Thio-D-glucufuranosides

Glucufuranosylation with penta-O-propanoyl-β-D-glucufuranose 1999

Thioglycoside

5-Azido neuraminic acid thioglycoside as sialylation donor 755

Bromonium ion-promoted glycosidic bond formation and simultaneous bromination of an activated aryl aglycon 31

Thioglycoside anchor

D-Glucose as a multivalent chiral scaffold for combinatorial chemistry 2089

Thioglycosides

Concise synthesis of a buffalo milk pentasaccharide derivative 1313

Synthesis of linear β-(1→4)-galacto-hexa- and heptasaccharides and studies directed towards cyclolactams 2171

Synthesis of oligosaccharides corresponding to *Streptococcus pneumoniae* type 9 capsular polysaccharide structures 1715

1-Thio-β-lactoside

Facile synthesis of 1-thio-β-lactoside clusters scaffolded onto *p*-methoxyphenyl, β-D-galactopyranoside, β-D-glucopyranoside, and lactoside 977

5-Thio-D-ribofuranose

An improved synthesis of 5-thio-D-ribose from D-ribo-1,4-lactone 1411

Thioseptanosides

Synthesis of 4-cyano and 4-nitrophenyl 1,6-dithio-D-manno-, L-ido- and D-glucoseptanosides possessing antithrombotic activity 1351

6-Thiosugars

Synthesis of 4-cyano and 4-nitrophenyl 1,6-dithio-D-manno-, L-ido- and D-glucoseptanosides possessing antithrombotic activity 1351

Thiosugars

Thiosugar nucleotide analogs: Synthesis of 5'-(2,3,4-tri-O-acetyl-6-S-acetyl-6-thio-α-D-galactopyranosyl diphosphate) 1935

Thio sugars

Synthesis of glycosides of 3-deoxy-4-thiopentopyranosid-2-uloses and their reduction products: 3-deoxy-4-thiopentopyranosides 2069

Three-dimensional structure

Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523

Molecular structure of the rhamnan-like exocellular polysaccharide RMDP17 from *Sphingomonas paucimobilis* 45

X-ray structure analysis of the sodium salt of bejjeran 305

Time-resolved fluorescence

β-(1→4)-Galactosyltransferase activity in native and engineered insect cells measured with time-resolved europium fluorescence 2181

Tosylation

Direct regioselective 2-O-(*p*-toluenesulfonylation) of sucrose 613

Exclusive and complete introduction of amino groups and their *N*-sulfo and *N*-carboxymethyl groups into the 6-position of cellulose without the use of protecting groups 1297

Tragacanthic acid

Structure of the arabinogalactan from gum tragacanth (*Astragalus gummifer*) 1647

Transglucosylation

Transglucosidation of methyl and ethyl D-glucopyranosides by alcoholysis 517

Transglycosylation

α-Galactosyl fluoride in transfer reactions mediated by the green coffee beans α-galactosidase in ice 221

1-O-Acetyl-β-D-galactopyranose: a novel substrate for the transglycosylation reaction catalyzed by the β-galactosidase from *Penicillium* sp. 635

Transglycosylation reactions

Addition of maltodextrins to the nonreducing-end of acarbose by reaction of acarbose with cyclomaltotetraose and cyclomaltodextrin glucanyltransferase 509

Bacillus macerans cyclomaltodextrin glucanotransferase transglycosylation reactions with different molar ratios of D-glucose and cyclomaltotetraose 2245

Synthesis of acarbose analogues by transglycosylation reactions of *Leuconostoc mesenteroides* B-512FMC and B-742CB dextranases 2427

Translational diffusion

NMR diffusion as a novel tool for measuring the association constant between cyclodextrin and guest molecules 841

Trehalose

An anhydrous polymorphic form of trehalose 167

Supercritical CO₂ fluid extraction of crystal water from trehalose dihydrate. Efficient production of form II (T_α) phase 1729

Trehalose mono- and di-mycolate

Synthesis and biological evaluation of trehalose analogs as potential inhibitors of mycobacterial cell wall biosynthesis 105

Triacetyl tetrahydropyran

Crystal structure of penta-O-acetyl-β-D-galactopyranose with modeling of the conformation of the acetate groups 2301

Trichloroacetimidate

A practical synthesis of β-D-GlcA-(1→3)-β-D-Gal-(1→3)-β-D-Gal-(1→4)-D-Xyl, a part of the common linkage region of a glycosaminoglycan 1373

Trichloroacetimidates

A facile regio- and stereoselective synthesis of mannose octasaccharide of the *N*-glycan in human CD2 and mannose hexasaccharide antigenic factor 13b 207

A highly efficient synthesis of an octasaccharide, the repeating unit of the cell-wall mannan of *Trichophyton mentagrophytes* and *T. rubrum* 1159

Synthesis of a mannose heptasaccharide of the pathogenic yeast, *Candida glabrata* IFO 0622 strain 1367

Synthesis of two isomeric pentasaccharides, the possible repeating unit of the β-glucan from the micro fungus *Epicoccum nigrum* Ehrenb. ex Schlecht 2383

Trichoderma viride

Utilization of commercial non-chitinase enzymes from fungi for preparation of 2-acetamido-2-deoxy-D-glucose from β-chitin 133

Triflic acid solvolysis

Structure of the O-specific polysaccharide of *Proteus vulgaris* O15 containing a novel regioisomer of *N*-acetylmuramic acid, 2-acetamido-4-O-[(*R*)-1-carboxyethyl]-2-deoxy-D-glucose 2463

Trifluoromethanesulfonate

Regioselective sulfonylation of 6,1',6'-tri-*O*-tritylsucrose through dibutylstannylation: synthesis of 4'-*O*-sulfonyl derivatives of sucrose 2377

Trimer

Synthesis of a globotetraose trimer 947

Trisaccharides

α-Galactosyl fluoride in transfer reactions mediated by the green coffee beans α-galactosidase in ice 221

2,3,4-Trisubstituted tetrahydrofuranes

Stereospecific synthesis of (+)-oxybiotin from D-xylose 459

Triton X-100

Influence of sodium dodecyl sulfate/TritonX-100 micelles on the oxidation of D-fructose by chromic acid in presence of HClO₄ 1573

- Tumor-related oligosaccharides
 Synthesis of a potential tetrasaccharide ligand for E-selectin 621
- UDP-galactose
 Thiosugar nucleotide analogs: Synthesis of 5'-(2,3,4-tri-*O*-acetyl-6-*S*-acetyl-6-thio- α -D-galactopyranosyl diphosphate) 1935
- UDP-sugars
 Syntheses of unnatural N-substituted UDP-galactosamines as alternative substrates for *N*-acetylglucosaminyl transferases 2187
- Unfrozen water
 Effect of molecular structure on thermodynamic properties of carbohydrates. A calorimetric study of aqueous di- and oligosaccharides at subzero temperatures 441
- Unsaturated cyclic acetals
 Access to aldehyde acetals of sugars via palladium-catalyzed oxidation of α,β -unsaturated cyclic acetals 2325
- 4,5-Unsaturated trigalacturonic acid
 Exopolysaccharide lyase from *Thermotoga maritima*: cloning, characterization and organic synthesis application 1427
- Uronate
 Crystal structure of methyl 1,2,3,4-tetra-*O*-acetyl- β -D-glucopyranuronate 2343
- UV-MALDI-TOF-MS
 Matrix-assisted ultraviolet laser-desorption ionization and electrospray-ionization time-of-flight mass spectrometry of sulfated neocarabiose oligosaccharides 1553
- UV-Vis spectrophotometry
 Resonance-stabilized phenylazo-ene-phenylimine cations of cyclobutanetetraone derivatives 2161
- Vaccine
 Confirmation of the D configuration of the 2-substituted arabinitol 1-phosphate residue in the capsular polysaccharide from *Streptococcus pneumoniae* Type 17F 2353
 Structural analysis and chemical depolymerization of the capsular polysaccharide of *Streptococcus pneumoniae* type 1 335
 Synthesis of α -lactosyl-(1 \rightarrow 3)-L-glycero- α -D-manno-heptopyranoside, a partial oligosaccharide structure expressed within the lipooligosaccharide produced by *Neisseria gonorrhoeae* strain 15253 11
- Vanadate
 Effect of sodium orthovanadate on glycosylation of the phosphopeptidomannans involved in the cell–cell aggregation of the yeast *Kluyveromyces fragilis* 1873
- Vapor–liquid equilibria
 Modeling and measurements of solid–liquid and vapor–liquid equilibria of polyols and carbohydrates in aqueous solution 1563
- Vibrio cholerae* diarrhea
 Structure of the O-polysaccharide from the lipopolysaccharide from *Vibrio cholerae* O6 813
- Viscometric feature
 Depolymerization of *N*-succinyl-chitosan by hydrochloric acid 561
- Vitrification
 Supercritical CO₂ fluid extraction of crystal water from trehalose dihydrate. Efficient production of form II (T₂) phase 1729
- Wacker process
 Access to aldehyde acetals of sugars via palladium-catalyzed oxidation of α,β -unsaturated cyclic acetals 2325
- Xanthan
 Biosynthesis of a substituted cellulose from a mutant strain of *Xanthomonas campestris* 315
- Xanthomonas campestris*
 Structures of the O-polysaccharide chains of the lipopolysaccharides of *Xanthomonas campestris* pv. *phaseoli* var. *fusca* GSPB 271 and *X. campestris* pv. *malvacearum* GSPB 1386 and GSPB 2388 1723
- Xenotransplantation
 The synthesis of deoxy- α -Gal epitope derivatives for the evaluation of an anti- α -Gal antibody binding 1247
- X-ray analysis
 Crystal structure of β -cyclodextrin–dimethylsulfoxide inclusion complex 2487
 Crystal structure of methyl 1,2,3,4-tetra-*O*-acetyl- β -D-glucopyranuronate 2343
 Selective epimerization of L-*chiro*-inositol to L-*muco*- and D-*chiro*-inositol derivatives 1
- X-Ray crystallographic analysis
 Oxidation of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1-propene compounds and the structure of 3-*C*-(2-amino-2-deoxy-D-glucopyranosyl)-1,2-propanediol derivatives for a synthesis of 2,3-didehydro-2,7-dideoxy-*N*-acetylneuraminic acid 1917
- X-Ray crystallography
 Some amino sugars structurally related to 6-deoxymannojirimycin precursors prepared from methyl 6-deoxy-2,3-*O*-isopropylidene- α -D-*lyxo*-hexofuranosid-5-ulose and methyl 2,3-*O*-isopropylidene- α -D-*lyxo*-pentodialdo-1,4-furanoside 663
 Synthesis, high-resolution NMR spectroscopic analysis, and single-crystal X-ray diffraction of isoxazoline tetracycles 2419
- X-ray crystal structures
 The saccharide–hydrazide linkage: molecular and crystal structures of the semicarbazide derivatives of D-glucose, D-galactose, and D-xylose, including a ‘forbidden’ conformation of the galactose derivative 21
- X-ray diffraction
 Confirmation of the structure of tetra-*O*-(*tert*-butyldimethylsilyl)-D-glucono-1,4-lactone formed by silylation of D-glucono-1,5-lactone 565
 Effect of calcium ions on the organization of iota-carrageenan helices: an X-ray investigation 523
 Heterocyclization of 3-deoxy-D-*erythro*-hexos-2-ulose-1,2-bis(thiosemicarbazone). Crystal structure of the major diastereomer 1397
 Molecular structure of the rhamnan-like exocellular polysaccharide RMDP17 from *Sphingomonas paucimobilis* 45
 Morphology of Western larch arabinogalactan 2211
 X-ray structure analysis of the sodium salt of beigeran 305
- X-ray powder diffraction
 An anhydrous polymorphic form of trehalose 167
- Xylan
 Characterization of water-soluble hemicelluloses from spruce and aspen employing SEC/MALDI mass spectroscopy 711
 Preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides from an acid hydrolysate of cotton-seed xylan: suitability of cotton-seed xylan as a starting material for the preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides 657
- Xylan, structure
 Characterization of *O*-acetyl-(4-*O*-methylglucurono)xylan isolated from birch and beech 373
- Xylooligosaccharide
 Preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides from an acid hydrolysate of cotton-seed xylan: suitability of cotton-seed xylan as a starting material for the preparation of (1 \rightarrow 4)- β -D-xylooligosaccharides 657
- Xylose
 Synthesis of an xylosylated rhamnose pentasaccharide, the repeating unit of the O-chain polysaccharide of the lipopolysaccharide of *Xanthomonas campestris* pv. *begoniae* GSPB 525 391
- D-Xylose
 Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778
 Stereospecific synthesis of (+)-oxybiotin from D-xylose 459

Xylose

An efficient and practical synthesis of β -(1 \rightarrow 3)-linked xylooligosaccharides 2335

D-Xylulose

Base catalysed isomerisation of aldoses of the *arabino* and *lyxo* series in the presence of aluminate 778

Yersinia pestis

The core structure of the lipopolysaccharide from the causative

agent of plague, *Yersinia pestis* 775

Zeolites

The solvent-free thermal dehydration of hexitols on zeolites 1261

Zwitterions

Syntheses of the 4-nitrophenyl glycosides of hyalobiuronic acid and chondrosine 1229
