

Subject Index

Activated carbon

Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257

Alumina

A case study: surface chemistry and surface structure of catalytic aluminas, as studied by vibrational spectroscopy of adsorbed species 497

Aluminium oxide

Catalytic hydrolysis of s-triazine compounds over Al_2O_3 167

Atmospheric pollution

A new Claus catalyst to reduce atmospheric pollution 49

Automotive lean-burn engine

The new concept 3-way catalyst for automotive lean-burn engine: NO_x storage and reduction catalyst 63

Base metal catalysts

Catalytic combustion of solvent-containing air on base metal catalysts 237

γ -Butyrolactone

Chromium-free catalysts for selective vapor phase hydrogenation of maleic anhydride to γ -butyrolactone 181

Carbon dioxide conversion

Hydrogen production from water and conversion of carbon dioxide to useful chemicals by room temperature photo-electrocatalysis 271

Carbon monoxide

Adsorption-induced structural changes of supported Pt-Rh catalysts 115

IR studies of CO and NO adsorbed on well characterized oxide single microcrystals 403

Carbon particulates

Catalytic combustion of carbon particulate 99

Catalyst

Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257

Catalytic hot gas cleaning

Catalytic hot gas cleaning of gasification gas 55

Caustic effluent

Catalysis and pollution abatement: the removal of hypochlorite from waste chlorine/caustic effluent 203

Chlorinated VOC destruction

Energy efficient dual-function sorbent/catalyst media for chlorinated VOC destruction 289

Chloroform decomposition

Photocatalytic decomposition of chloroform in a fully irradiated heterogeneous photoreactor using titanium oxide particulate suspensions 221

Chromium-free catalysts

Chromium-free catalysts for selective vapor phase hydrogenation of maleic anhydride to γ -butyrolactone 181

Claus catalyst

A new Claus catalyst to reduce atmospheric pollution 49

Combustion

Catalytic combustion of carbon particulate 99

Catalytic combustion of solvent-containing air on base metal catalysts 237

Some aspects of hydrocarbon activation on platinum group metal combustion catalysts 243

Monolith perovskite catalysts for environmentally benign fuels combustion and toxic wastes incineration 249

Copper

State of copper in a working, low-concentration CuH-ZSM-5 catalyst for exhaust gas purification: in-situ ESR monitoring 79

Copper(I)

Catalytic reduction of polyhalogenated aromatic hydrocarbons by Cu(I) under Dow-Phenol conditions 159

Copper-MFI zeolite

Pulse study on reactivity of ethene adsorbed on Cu-MFI with nitrogen oxides and oxygen 71

Copper-on-zirconia catalysts

Catalytic behavior and nature of active sites in copper-on-zirconia catalysts for the decomposition of N_2O 265

Co-zeolite catalyst

Study on catalysts of selective reduction of NO_x using hydrocarbons for natural gas engines 91

CuH-ZSM-5 catalyst

State of copper in a working, low-concentration CuH-ZSM-5 catalyst for exhaust gas purification: in-situ ESR monitoring 79

Cu-ZSM-5 catalyst

Study on catalysts of selective reduction of NO_x using hydrocarbons for natural gas engines 91

De NO_x -SCR catalysts

Theoretical and experimental study of the interaction between NO_x reduction and SO_2 oxidation over De NO_x -SCR catalysts 15

DENOX system

The Shell DENOX system for low temperature NO_x removal 23

Dichlorodifluoromethane

Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257

Diesel engine exhaust gas

Innovative lines of SCR catalysis: NO_x reduction for stationary diesel engine exhaust gas and dioxin abatement for waste incineration facilities 29

- Diesel soot particulate
Simultaneous catalytic removal of nitrogen oxides and diesel soot particulate over perovskite-related oxides 107
- Difluoromethane
Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257
- Dioxin abatement
Innovative lines of SCR catalysis: NO_x reduction for stationary diesel engine exhaust gas and dioxin abatement for waste incineration facilities 29
- Direct synthesis from alcohols
Kinetic evaluation of the direct synthesis of ethers from alcohols over sulfonated resin catalysts 151
- Disposable catalyst
Development of new disposable catalyst for waste plastics treatment for high quality transportation fuel 175
- Dow-Phenol conditions
Catalytic reduction of polyhalogenated aromatic hydrocarbons by Cu(I) under Dow-Phenol conditions 159
- Drinking water
Sol-gel palladium catalysts for nitrate and nitrite removal from drinking water 209
- Energy efficiency
Energy efficient dual-function sorbent/catalyst media for chlorinated VOC destruction 289
- Environmentally benign fuels combustion
Monolith perovskite catalysts for environmentally benign fuels combustion and toxic wastes incineration 249
- Ethene reactivity
Pulse study on reactivity of ethene adsorbed on Cu-MFI with nitrogen oxides and oxygen 71
- Ethers
Kinetic evaluation of the direct synthesis of ethers from alcohols over sulfonated resin catalysts 151
- Exhaust gas
 NO_x abatement in lean exhaust gas conditions over metal substrated zeolite catalysts 85
- Exhaust gas purification
State of copper in a working, low-concentration CuH-ZSM-5 catalyst for exhaust gas purification: in-situ ESR monitoring 79
- Fenitrothion
Photocatalytic pollutant removal in water at room temperature: case study of the total degradation of the insecticide fenitrothion (phosphorothioic acid $\text{O,O-dimethyl-O- (3-methyl-4-nitro-phenyl) ester}$) 215
- Fuel cells
Improved Pt alloy catalysts for fuel cells 279
- Fuel production
Molybdenum oxycarbide isomerization catalysts for cleaner fuel production 145
- Gasification gases
Catalytic hot gas cleaning of gasification gas 55
- Gas purification
Application of the nonstationary state of a catalyst surface for gas purification from toxic impurities 315
- High quality transport fuel
Development of new disposable catalyst for waste plastics treatment for high quality transportation fuel 175
- High-void-fraction SCR- DeNO_x catalysts
Improved emission control due to a new generation of high-void-fraction SCR- DeNO_x catalysts 3
- Hydrocarbon activation
Some aspects of hydrocarbon activation on platinum group metal combustion catalysts 243
- Hydrocracking
Two stage upgrading of middle and heavy distillates over newly prepared catalysts 129
- Hydrosulfurization
Catalytic properties of pure and Ni doped niobium sulfide catalysts for hydrosulfurization 137
- Hydrogenolysis
Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257
- Hydrogen production from water
Hydrogen production from water and conversion of carbon dioxide to useful chemicals by room temperature photo-electrocatalysis 271
- Hydrolysis
Catalytic hydrolysis of s-triazine compounds over Al_2O_3 167
- Hypochlorite
Catalysis and pollution abatement: the removal of hypochlorite from waste chlorine/caustic effluent 203
- In/H-ZSM-5
Promotive effect of additives to In/H-ZSM-5 catalyst for selective reduction of nitric oxide with methane in the presence of water vapor 35
- Industrial catalytic wet air oxidation processes
A review of industrial catalytic wet air oxidation processes 195
- Industrial pilot scale incinerator
Comparison of precious metals and base metal oxides for catalytic deep oxidation of volatile organic compounds from coating plants: test results on an industrial pilot scale incinerator 229
- Infrared spectrometry
Infrared spectrometric studies of the surface basicity of metal oxides and zeolites using adsorbed probe molecules 377
IR studies of CO and NO adsorbed on well characterized oxide single microcrystals 403
Raman and IR studies of surface metal oxide species on oxide supports: Supported metal oxide catalysts 437
Infrared studies of the reactive adsorption of organic molecules over metal oxides and of the mechanisms of their heterogeneously-catalyzed oxidation 457
A case study: surface chemistry and surface structure of catalytic aluminas, as studied by vibrational spectroscopy of adsorbed species 497
- Infrared spectroscopy
Infrared studies of the surface acidity of oxides and zeolites using adsorbed probe molecules 353
- Insecticides
Photocatalytic pollutant removal in water at room temperature: case study of the total degradation of the insecticide fenitrothion (phosphorothioic acid $\text{O,O-dimethyl-O- (3-methyl-4-nitro-phenyl) ester}$) 215
- Isomerization catalysts
Molybdenum oxycarbide isomerization catalysts for cleaner fuel production 145

Kinetics

Kinetic evaluation of the direct synthesis of ethers from alcohols over sulfonated resin catalysts 151

La_{0.8}Ca_{0.2}CrO₃ anode

Temperature programmed investigation of La(Ca)CrO₃ anode for the oxidation of methane in solid oxide fuel cells 285

Liquid-phase oxidation

Molecular oxygen as environmental acceptable, selective and the most strong oxidant in liquid-phase oxidation 187

Maleic anhydride

Chromium-free catalysts for selective vapor phase hydrogenation of maleic anhydride to γ -butyrolactone 181

Metal oxides

Comparison of precious metals and base metal oxides for catalytic deep oxidation of volatile organic compounds from coating plants: test results on an industrial pilot scale incinerator 229

The use of vibrational spectroscopies in studies of heterogeneous catalysis by metal oxides: an introduction 323

Infrared spectrometric studies of the surface basicity of metal oxides and zeolites using adsorbed probe molecules 377

Infrared studies of the reactive adsorption of organic molecules over metal oxides and of the mechanisms of their heterogeneously-catalyzed oxidation 457

Metal substrated zeolite catalysts

NO_x abatement in lean exhaust gas conditions over metal substrated zeolite catalysts 85

Methane

NO reduction by CH₄ over rare earth oxides 41

Methane oxidation

Temperature programmed investigation of La(Ca)CrO₃ anode for the oxidation of methane in solid oxide fuel cells 285

Microcrystals of oxides

IR studies of CO and NO adsorbed on well characterized oxide single microcrystals 403

Middle and heavy distillates

Two stage upgrading of middle and heavy distillates over newly prepared catalysts 129

Mixed oxide catalysts

Selective removal of NO by absorption in mixed oxide catalysts 297

Mobile engine exhaust

Cerium-exchanged zeolites grown on metal gauze: A new catalyst system applicable for NO_x reduction in mobile engine exhaust 123

Molecular oxygen

Molecular oxygen as environmental acceptable, selective and the most strong oxidant in liquid-phase oxidation 187

Molecular structure

Raman and IR studies of surface metal oxide species on oxide supports: Supported metal oxide catalysts 437

Molybdenum oxycarbide

Molybdenum oxycarbide isomerization catalysts for cleaner fuel production 145

Monolith perovskite catalysts

Monolith perovskite catalysts for environmentally benign fuels combustion and toxic wastes incineration 249

Mordenite

Cerium-exchanged zeolites grown on metal gauze: A new catalyst

system applicable for NO_x reduction in mobile engine exhaust 123

Natural gas engines

Study on catalysts of selective reduction of NO_x using hydrocarbons for natural gas engines 91

Nickel

Catalytic properties of pure and Ni doped niobium sulfide catalysts for hydrodesulfurization 137

Niobium sulfide catalysts

Catalytic properties of pure and Ni doped niobium sulfide catalysts for hydrodesulfurization 137

Nitrate

Sol-gel palladium catalysts for nitrate and nitrite removal from drinking water 209

Nitric oxide

Promotive effect of additives to In/H-ZSM-5 catalyst for selective reduction of nitric oxide with methane in the presence of water vapor 35

Nitrite

Sol-gel palladium catalysts for nitrate and nitrite removal from drinking water 209

Nitrogen oxide

The Shell DENOX system for low temperature NO_x removal 23
Innovative lines of SCR catalysis: NO_x reduction for stationary diesel engine exhaust gas and dioxin abatement for waste incineration facilities 29

NO reduction by CH₄ over rare earth oxides 41

Pulse study on reactivity of ethene adsorbed on Cu-MFI with nitrogen oxides and oxygen 71

NO_x abatement in lean exhaust gas conditions over metal substrated zeolite catalysts 85

Adsorption-induced structural changes of supported Pt-Rh catalysts 115

Catalytic behavior and nature of active sites in copper-on-zirconia catalysts for the decomposition of N₂O 265

Selective removal of NO by absorption in mixed oxide catalysts 297

Application of the nonstationary state of a catalyst surface for gas purification from toxic impurities 315

IR studies of CO and NO adsorbed on well characterized oxide single microcrystals 403

NO_x

Theoretical and experimental study of the interaction between NO_x reduction and SO₂ oxidation over DeNO_x-SCR catalysts 15

The new concept 3-way catalyst for automotive lean-burn engine: NO_x storage and reduction catalyst 63

Study on catalysts of selective reduction of NO_x using hydrocarbons for natural gas engines 91

Simultaneous catalytic removal of nitrogen oxides and diesel soot particulate over perovskite-related oxides 107

Cerium-exchanged zeolites grown on metal gauze: A new catalyst system applicable for NO_x reduction in mobile engine exhaust 123

Oxidation

Theoretical and experimental study of the interaction between NO_x reduction and SO₂ oxidation over DeNO_x-SCR catalysts 15

A review of industrial catalytic wet air oxidation processes 195

Comparison of precious metals and base metal oxides for catalytic deep oxidation of volatile organic compounds from coating

- plants: test results on an industrial pilot scale incinerator 229
- Infrared studies of the reactive adsorption of organic molecules over metal oxides and of the mechanisms of their heterogeneously-catalyzed oxidation 457
- Oxides
- Infrared studies of the surface acidity of oxides and zeolites using adsorbed probe molecules 353
- Oxygen
- Pulse study on reactivity of ethene adsorbed on Cu-MFI with nitrogen oxides and oxygen 71
- Palladium
- Process for the selective hydrogenolysis of CCl_2F_2 (CFC-12) into CH_2F_2 (HFC-32) 257
- Perovskite-related oxides
- Simultaneous catalytic removal of nitrogen oxides and diesel soot particulate over perovskite-related oxides 107
- Photocatalytic pollutant removal
- Photocatalytic pollutant removal in water at room temperature: case study of the total degradation of the insecticide fenitrothion (phosphorothioic acid O,O-dimethyl-O- (3-methyl-4-nitrophenyl) ester) 215
- Photocatalytic reactors
- Photocatalytic decomposition of chloroform in a fully irradiated heterogeneous photoreactor using titanium oxide particulate suspensions 221
- Platinum alloy catalysts
- Improved Pt alloy catalysts for fuel cells 279
- Platinum group metal combustion catalysts
- Some aspects of hydrocarbon activation on platinum group metal combustion catalysts 243
- Pollution abatement
- Catalysis and pollution abatement: the removal of hypochlorite from waste chlorine/caustic effluent 203
- Polyhalogenated aromatic hydrocarbons
- Catalytic reduction of polyhalogenated aromatic hydrocarbons by Cu(I) under Dow-Phenol conditions 159
- Pt-Rh bimetallic catalyst
- Adsorption-induced structural changes of supported Pt-Rh catalysts 115
- Raman spectrometry
- Raman and IR studies of surface metal oxide species on oxide supports: Supported metal oxide catalysts 437
- Rare earth oxides
- NO reduction by CH_4 over rare earth oxides 41
- Reduction
- Theoretical and experimental study of the interaction between NO_x reduction and SO_2 oxidation over DeNO_x -SCR catalysts 15
- Promotive effect of additives to In/H-ZSM-5 catalyst for selective reduction of nitric oxide with methane in the presence of water vapor 35
- The new concept 3-way catalyst for automotive lean-burn engine: NO_x storage and reduction catalyst 63
- Study on catalysts of selective reduction of NO_x using hydrocarbons for natural gas engines 91
- Catalytic reduction of polyhalogenated aromatic hydrocarbons by Cu(I) under Dow-Phenol conditions 159
- Regenerative oxidizers
- Is it economically feasible to use heterogeneous catalysts for VOC control in regenerative oxidizers? 307
- Room temperature photoelectrocatalysis
- Hydrogen production from water and conversion of carbon dioxide to useful chemicals by room temperature photoelectrocatalysis 271
- SCR catalysis
- Innovative lines of SCR catalysis: NO_x reduction for stationary diesel engine exhaust gas and dioxin abatement for waste incineration facilities 29
- SCR monolithic catalyst
- Influence of the operation time on the performance of a new SCR monolithic catalyst 9
- Selective vapour phase hydrogenation
- Chromium-free catalysts for selective vapor phase hydrogenation of maleic anhydride to γ -butyrolactone 181
- Sol-gel palladium catalysts
- Sol-gel palladium catalysts for nitrate and nitrite removal from drinking water 209
- Solide oxide fuel cells
- Temperature programmed investigation of $\text{La}(\text{Ca})\text{CrO}_3$ anode for the oxidation of methane in solid oxide fuel cells 285
- Solvent containing air
- Catalytic combustion of solvent-containing air on base metal catalysts 237
- Sulfonated resin catalysts
- Kinetic evaluation of the direct synthesis of ethers from alcohols over sulfonated resin catalysts 151
- Sulphur dioxide
- Theoretical and experimental study of the interaction between NO_x reduction and SO_2 oxidation over DeNO_x -SCR catalysts 15
- Supported metal oxide catalysts
- Raman and IR studies of surface metal oxide species on oxide supports: Supported metal oxide catalysts 437
- Surface acidity
- Infrared studies of the surface acidity of oxides and zeolites using adsorbed probe molecules 353
- Surface basicity
- Infrared spectrometric studies of the surface basicity of metal oxides and zeolites using adsorbed probe molecules 377
- Surface chemistry
- Raman and IR studies of surface metal oxide species on oxide supports: Supported metal oxide catalysts 437
- Surface chemistry and structure
- A case study: surface chemistry and surface structure of catalytic aluminas, as studied by vibrational spectroscopy of adsorbed species 497
- Titanium dioxide
- Photocatalytic decomposition of chloroform in a fully irradiated heterogeneous photoreactor using titanium oxide particulate suspensions 221
- Toxic wastes incineration
- Monolith perovskite catalysts for environmentally benign fuels combustion and toxic wastes incineration 249
- s-Triazine
- Catalytic hydrolysis of s-triazine compounds over Al_2O_3 167
- Vibrational spectroscopy
- The use of vibrational spectroscopies in studies of heterogeneous catalysis by metal oxides: an introduction 323
- VOC control
- Is it economically feasible to use heterogeneous catalysts for VOC control in regenerative oxidizers? 307

Volatile organic compounds

Comparison of precious metals and base metal oxides for catalytic deep oxidation of volatile organic compounds from coating plants; test results on an industrial pilot scale incinerator 229

Waste chlorine

Catalysis and pollution abatement: the removal of hypochlorite from waste chlorine/caustic effluent 203

Waste incineration facilities

Innovative lines of SCR catalysis: NO_x reduction for stationary diesel engine exhaust gas and dioxin abatement for waste incineration facilities 29

Waste plastics treatment

Development of new disposable catalyst for waste plastics treatment for high quality transportation fuel 175

Water vapor

Promotive effect of additives to In/H-ZSM-5 catalyst for selective reduction of nitric oxide with methane in the presence of water vapor 35

Wet oxidation

A review of industrial catalytic wet air oxidation processes 195

Zeolites

Cerium-exchanged zeolites grown on metal gauze: A new catalyst system applicable for NO_x reduction in mobile engine exhaust 123

Energy efficient dual-function sorbent/catalyst media for chlorinated VOC destruction 289

Infrared studies of the surface acidity of oxides and zeolites using adsorbed probe molecules 353

Infrared spectrometric studies of the surface basicity of metal oxides and zeolites using adsorbed probe molecules 377

Zirconia

Catalytic behavior and nature of active sites in copper-on-zirconia catalysts for the decomposition of N₂O 265

ZSM-5

Cerium-exchanged zeolites grown on metal gauze: A new catalyst system applicable for NO_x reduction in mobile engine exhaust 123
