

Subject index

Alkane oxidation

The effects of steam on *n*-butane oxidation over VPO as studied in a riser reactor 51

Alkanone

Enantio-differentiating hydrogenation of prochiral ketones over modified nickel 465

Alkylation

Industrial relevance of coking 225

Amination of acids or esters

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Amine synthesis

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Aniline

Synthesis of picolines and other aza-aromatics from arylamines by isomerization-rearrangement and from dinitriles by hydrogenation-cyclization reactions 103

Arylamine

Synthesis of picolines and other aza-aromatics from arylamines by isomerization-rearrangement and from dinitriles by hydrogenation-cyclization reactions 103

Asymmetric modification

Enantio-differentiating hydrogenation of prochiral ketones over modified nickel 465

Bismuth molybdate

Propene oxidation on substituted 2:1 bismuth molybdates and vanadates 43

Bismuth vanadate

Propene oxidation on substituted 2:1 bismuth molybdates and vanadates 43

Cab-O-Sil

Development of active oxide catalysts for the direct oxidation of methane to formaldehyde 1

Carbon deposit

Methane homologation and reactivity of carbon species on supported Co catalysts 25

Carbon filament

The effect of copper on the structural characteristics of carbon filaments produced from iron catalyzed decomposition of ethylene 295

Carbon formation

Industrial relevance of coking 225

Catalysis shape-selective

Methylamines synthesis: A review 71

Catalyst deactivation

Catalyst deactivation by coke deposition: Approaches based on interactions of coke laydown with pore structure 331

Coke characterization by temperature programmed techniques 277

Catalyst regeneration

Industrial relevance of coking 225

Catalyst

Methane homologation and reactivity of carbon species on supported Co catalysts 25

Catalytic coke

Structural characterisation of catalytic coke by solid-state ¹³C-NMR spectroscopy 285

Catalytic cracking

Structural characterisation of catalytic coke by solid-state ¹³C-NMR spectroscopy 285

Catalytic partial oxidation

The role of coke formation in catalytic partial oxidation for synthesis gas production 309

Chlorine

The effects of the introduction of tetrachloromethane into the feedstream for the partial oxidation and oxidative coupling of methane 15

Cobalt

Methane homologation and reactivity of carbon species on supported Co catalysts 25

Coke characterization

Coke characterization by temperature programmed techniques 277

Coke deposition

Catalyst deactivation by coke deposition: Approaches based on interactions of coke laydown with pore structure 331

Coke formation

Coke formation and minimisation during steam reforming reactions 233

Coking

Analysis of coupled deactivation effects: Interaction of sodium and coke in cracking over zeolites 249

Deactivation by coking and poisoning of spinel-type Ni catalysts 255

- Effect of nitrogen compounds on deactivation of hydrotreating catalysts by coke 267
- Industrial relevance of coking 225
- Cracking
 - Industrial relevance of coking 225
- Cumene cracking
 - Analysis of coupled deactivation effects: Interaction of sodium and coke in cracking over zeolites 249
- Deactivation kinetics
 - Catalyst deactivation by coking in the MTG process in fixed and fluidized bed reactors 239
- Deactivation
 - Effect of nitrogen compounds on deactivation of hydrotreating catalysts by coke 267
- Dehydrogenation
 - Industrial relevance of coking 225
- Design
 - Multiphase catalytic reactor engineering and design for pharmaceuticals and fine chemicals 367
- Enantio-differentiation
 - Enantio-differentiating hydrogenation of prochiral ketones over modified nickel 465
- Ethylene decomposition
 - The effect of copper on the structural characteristics of carbon filaments produced from iron catalyzed decomposition of ethylene 295
- Ethyne hydrogenation
 - Deactivation by coking and poisoning of spinel-type Ni catalysts 255
- Formaldehyde
 - Development of active oxide catalysts for the direct oxidation of methane to formaldehyde 1
- Fouling
 - Catalyst deactivation by coke deposition: Approaches based on interactions of coke laydown with pore structure 331
- Functional group
 - Selective heterogeneously catalyzed hydrogenations 419
- Glucose oxidation
 - Selective oxidation with air on metal catalysts 405
- Glycerol oxidation
 - Selective oxidation with air on metal catalysts 405
- Glyoxal oxidation
 - Selective oxidation with air on metal catalysts 405
- Heterogenous catalyst
 - Enantio-differentiating hydrogenation of prochiral ketones over modified nickel 465
- Heterogenous enantioselective hydrogenation
 - Enantioselective hydrogenation of α -ketoesters using cinchona modified platinum catalysts and related systems: A review 441
- HMTA hydrogenolysis
 - Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137
- Homologation
 - Methane homologation and reactivity of carbon species on supported Co catalysts 25
- Hydrogenation
 - Enantio-differentiating hydrogenation of prochiral ketones over modified nickel 465
 - Selective heterogeneously catalyzed hydrogenations 419
- Hydrotreating
 - Effect of nitrogen compounds on deactivation of hydrotreating catalysts by coke 267
- HZSM5 zeolite
 - Catalyst deactivation by coking in the MTG process in fixed and fluidized bed reactors 239
- Iron–copper bimetallic catalyst
 - The effect of copper on the structural characteristics of carbon filaments produced from iron catalyzed decomposition of ethylene 295
- α -Ketoester hydrogenation
 - Enantioselective hydrogenation of α -ketoesters using cinchona modified platinum catalysts and related systems: A review 441
- Kinetics
 - Enantioselective hydrogenation of α -ketoesters using cinchona modified platinum catalysts and related systems: A review 441

 - Catalyst deactivation by coking in the MTG process in fixed and fluidized bed reactors 239
- MTG
 - Industrial relevance of coking 225
- Multiphase
 - Multiphase catalytic reactor engineering and design for pharmaceuticals and fine chemicals 367

***N*-Methylation with methanol or HMTA**

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Nitrile hydrogenation

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Nitrogen compound

Effect of nitrogen compounds on deactivation of hydrotreating catalysts by coke 267

NMR, ³¹P-

³¹P nuclear magnetic resonance by spin echo mapping: A new tool to approach the oxidation state in VPO catalysts 59

NMR

Structural characterisation of catalytic coke by solid-state ¹³C-NMR spectroscopy 285

Oxidative coupling

The effects of the introduction of tetrachloromethane into the feedstream for the partial oxidation and oxidative coupling of methane 15

Oxidative dehydrogenation

Oxidative dehydrogenation of propane over molybdenum-containing catalysts 33

Oxygen

Coke characterization by temperature programmed techniques 277

Partial burning

Coke characterization by temperature programmed techniques 277

Partial oxidation

The effects of the introduction of tetrachloromethane into the feedstream for the partial oxidation and oxidative coupling of methane 15

 α -Picoline synthesis

Synthesis of picolines and other aza-aromatics from arylamines by isomerization-rearrangement and from dinitriles by hydrogenation-cyclization reactions 103

 β -Picoline synthesis

Synthesis of picolines and other aza-aromatics from arylamines by isomerization-rearrangement and from dinitriles by hydrogenation-cyclization reactions 103

Platinum catalyst

Selective oxidation with air on metal catalysts 405

Platinum–cinchona catalyst

Enantioselective hydrogenation of α -ketoesters using cinchona modified platinum catalysts and related systems: A review 441

Poisoning

Analysis of coupled deactivation effects: Interaction of sodium and coke in cracking over zeolites 249

Pore networks

Catalyst deactivation by coke deposition: Approaches based on interactions of coke laydown with pore structure 331

Pore structure

Catalyst deactivation by coke deposition: Approaches based on interactions of coke laydown with pore structure 331

Promoted copper–chromite catalysts

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Promoted nickel catalysts

Synthesis of fatty amines. Selectivity control in presence of multifunctional catalysts 137

Propane

Oxidative dehydrogenation of propane over molybdenum-containing catalysts 33

Propene oxidation

Propene oxidation on substituted 2:1 bismuth molybdates and vanadates 43

Reactor

Multiphase catalytic reactor engineering and design for pharmaceuticals and fine chemicals 367

Reforming

Industrial relevance of coking 225

Review

Enantioselective hydrogenation of α -ketoesters using cinchona modified platinum catalysts and related systems: A review 441

Riser reactor

The effects of steam on *n*-butane oxidation over VPO as studied in a riser reactor 51

Scale-up

Multiphase catalytic reactor engineering and design for pharmaceuticals and fine chemicals 367

Selective isomerization

The use of zeolites in the synthesis of fine and intermediate chemicals 353

Selectivity

Selective heterogeneously catalyzed hydrogenations 419

Spin echo mapping

³¹P nuclear magnetic resonance by spin echo mapping: A new tool to approach the oxidation state in VPO catalysts 59

Spinel-type Ni catalysts

Deactivation by coking and poisoning of spinel-type Ni catalysts 255

Steam reforming

Coke formation and minimisation during steam reforming reactions 233

Steam

The effects of steam on *n*-butane oxidation over VPO as studied in a riser reactor 51

Substitution

Propene oxidation on substituted 2:1 bismuth molybdates and vanadates 43

Sulphur poisoning

Deactivation by coking and poisoning of spinel-type Ni catalysts 255

Syngas production

The role of coke formation in catalytic partial oxidation for synthesis gas production 309

Temperature programmed technique

Coke characterization by temperature programmed techniques 277

Titania-supported molybdena

Oxidative dehydrogenation of propane over molybdenum-containing catalysts 33

Vacuum gas oil

Effect of nitrogen compounds on deactivation of hydrotreating catalysts by coke 267

Vanadate catalyst

Development of active oxide catalysts for the direct oxidation of methane to formaldehyde 1

Vanadium phosphorus oxide

³¹P nuclear magnetic resonance by spin echo mapping: A new tool to approach the oxidation state in VPO catalysts 59

Vapour-phase Beckmann rearrangement

The use of zeolites in the synthesis of fine and intermediate chemicals 353

Zeolite Y

Analysis of coupled deactivation effects: Interaction of sodium and coke in cracking over zeolites 249

Zeolite

Methylamines synthesis: A review 71

The use of zeolites in the synthesis of fine and intermediate chemicals 353
