Catalysis Today 38 (1997) 149

Introduction

This volume contains all the papers presented at the Post-Conference Symposium on Catalysis which was held in Kyongju, South Korea, August 19–20, 1996. The Symposium, emphasizing the environmental applications of zeolite-containing catalysts, was planned as one of the two adjuncts to the 11th International Zeolite Conference held in Seoul, South Korea, August 12–17, 1996.

Two plenary lectures, four invited lectures and ten papers were solicited from those who are actively engaged in the several fields represented here, and we are gratified by the high quality of the presentations.

We are pleased that *Catalysis Today* has agreed to publish these papers as a separate issue. Professor

Julian Ross, the editor, has been helpful in many ways, and we are happy to acknowledge this.

The Symposium was organized by the Research Center for Catalytic Technology of the Pohang University of Science & Technology (POSTECH). Part of the cost of organizing the Symposium was contributed by the Korea Science & Engineering Foundation through its annual grants to the Center. Numerous people helped in organizing the Symposium, but I wish to especially acknowledge Professor In-Sik Nam of POSTECH who played an important role in both organizing the Symposium as well as editing this volume as a co-editor.

Young Gul Kim

Chair, Organizing Committee & Guest Editor
