

## Subject index

### Aerosols

Photoadsorption and photocatalytic oxidation on the metal oxides. Components of tropospheric solid aerosols under the Earth's atmosphere conditions 243

Photocatalysis on atmospheric aerosols: Experimental studies and modeling 233

### Ag<sup>+</sup>/AgCl layers

At the time he made the first photographs on paper: Did Henry Fox Talbot oxidize water to oxygen with sunlight? 145

### Ag<sup>+</sup>/ZSM-5

Design of photocatalysts encapsulated within the zeolite framework and cavities for the decomposition of NO into N<sub>2</sub> and O<sub>2</sub> at normal temperature 159

### Aluminophosphate

Hydrothermal synthesis of the microporous aluminophosphate CoAPO-5; in situ time-resolved synchrotron X-ray powder diffraction studies 301

### Aqueous

On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351

### Aromatic hydrogenation

Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77

### Atmosphere

Photoadsorption and photocatalytic oxidation on the metal oxides. Components of tropospheric solid aerosols under the Earth's atmosphere conditions 243

Photocatalysis on atmospheric aerosols: Experimental studies and modeling 233

### Catalysis

Photocatalysis as a phenomenon: Aspects of terminology 137

### Catalyst

Hydropyrolysis of coal in a pressurized powder-particle fluidized bed using several catalysts 127

### Chemical vapor deposition

Hydrodesulfurization of dibenzothiophene derivatives over TiO<sub>2</sub>–Al<sub>2</sub>O<sub>3</sub> supported sulfided molybdenum catalyst 21

### Co in MCM-41

Structure of Co and Co oxide clusters in MCM-41 311

### Co sulfide catalysts

Preparation and characterization of zeolite-supported molybdenum and cobalt–molybdenum sulfide catalysts 45

### Co–Mo/Al<sub>2</sub>O<sub>3</sub> catalyst

Elucidation of hydrodesulfurization mechanism using <sup>35</sup>S radioisotope pulse tracer methods 3

Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure (≤5.1 MPa) by means of high pressure DRIFT and EXAFS method 33

### CO<sub>2</sub> reduction

Photoreduction of carbon dioxide on quantized semiconductor nanoparticles in solution 169

### Coal liquefaction

Coal hydroliquefaction using highly dispersed catalyst precursors 99

### Coal

Hydropyrolysis of coal in a pressurized powder-particle fluidized bed using several catalysts 127

### Cobalt

Study on a cobalt silica catalyst during reduction and Fischer–Tropsch reaction: In situ EXAFS compared to XPS and XRD 329

### CoMo catalysts

Catalytic hydrodesulfurization of gas oil and model sulfur compounds over commercial and laboratory-made CoMo and NiMo catalysts: Activity and reaction scheme 13

### Coordinatively unsaturated sites

Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure (≤5.1 MPa) by means of high pressure DRIFT and EXAFS method 33

### Cu

Combined (Q)EXAFS/XRD: Technique and applications 293

### Degradation of organics

Photocatalytic mineralization of nitrogen-containing benzene derivatives 187

### Detoxification

Photocatalytic mineralization of nitrogen-containing benzene derivatives 187

### Diesel oil

Deep hydrodesulfurization process for diesel oil 69

### DRIFT of adsorbed NO

Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure (≤5.1 MPa) by means of high pressure DRIFT and EXAFS method 33

## Electrocatalysis

Challenges for (photo)electrocatalysis research 177

## EXAFS data analysis

Obtaining reliable structural parameters from EXAFS 271

## EXAFS spectroscopy

Nucleation and growth of Pd clusters in mordenite 317

## EXAFS

Combined (Q)EXAFS/XRD: Technique and applications 293

Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77

New developments in NEXAFS/EXAFS theory 263

On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351

Structure of Co and Co oxide clusters in MCM-41 311

## FEFF

New developments in NEXAFS/EXAFS theory 263

## Fischer-Tropsch

Study on a cobalt silica catalyst during reduction and Fischer–Tropsch reaction: In situ EXAFS compared to XPS and XRD 329

## Fluidized bed

Hydropyrolysis of coal in a pressurized powder-particle fluidized bed using several catalysts 127

GeO<sub>2</sub> layer on SiO<sub>2</sub>

Reversible structure change of one-atomic layer GeO<sub>2</sub> on SiO<sub>2</sub> surface under the interaction with Rh particles by in situ XAFS studies 343

## High pressure sulfiding

Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure ( $\leq 5.1$  MPa) by means of high pressure DRIFT and EXAFS method 33

## Hydrodenitrogenation

Hydrotreating of heavy distillate derived from Wandoan coal liquefaction 89

## Hydrodesulfurization

Catalytic hydrodesulfurization of gas oil and model sulfur compounds over commercial and laboratory-made CoMo and NiMo catalysts: Activity and reaction scheme 13

Deep hydrodesulfurization process for diesel oil 69

Elucidation of hydrodesulfurization mechanism using <sup>35</sup>S radioisotope pulse tracer methods 3

Hydrodesulfurization of dibenzothiophene derivatives over TiO<sub>2</sub>–Al<sub>2</sub>O<sub>3</sub> supported sulfided molybdenum catalyst 21

Noble metals supported on mesoporous silicate FSM-16 as new hydrodesulfurization catalyst 61

Preparation and characterization of zeolite-supported molybdenum and cobalt–molybdenum sulfide catalysts 45

## Hydrogen transfer process

Coal hydroliquefaction using highly dispersed catalyst precursors 99

## Hydropyrolysis

Hydropyrolysis of coal in a pressurized powder-particle fluidized bed using several catalysts 127

## Hydrotreatment

Hydrotreating of heavy distillate derived from Wandoan coal liquefaction 89

## In situ EXAFS

Study on a cobalt silica catalyst during reduction and Fischer–Tropsch reaction: In situ EXAFS compared to XPS and XRD 329

## Kinetics of crystallization

Hydrothermal synthesis of the microporous aluminophosphate CoAPO-5; in situ time-resolved synchrotron X-ray powder diffraction studies 301

## Light-driven catalysis

High-temperature catalysis driven by the direct action of concentrated light or a high-density electron beam 251

## Mesoporous silicate

Noble metals supported on mesoporous silicate FSM-16 as new hydrodesulfurization catalyst 61

## Metal centered electron transfer

Challenges for (photo)electrocatalysis research 177

## Metal clusters

Nucleation and growth of Pd clusters in mordenite 317

## Metal-support interaction

Nucleation and growth of Pd clusters in mordenite 317

## Methanol

Combined (Q)EXAFS/XRD: Technique and applications 293

## Mineralization

Photocatalytic mineralization of nitrogen-containing benzene derivatives 187

## Mo K-edge EXAFS

Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure ( $\leq 5.1$  MPa) by means of high pressure DRIFT and EXAFS method 33

## Mo sulfide catalysts

Preparation and characterization of zeolite-supported molybdenum and cobalt–molybdenum sulfide catalysts 45

Mo/Al<sub>2</sub>O<sub>3</sub> catalyst

Elucidation of hydrodesulfurization mechanism using <sup>35</sup>S radioisotope pulse tracer methods 3

## Molecular dynamics simulations

Combined (Q)EXAFS/XRD: Technique and applications 293

## Mordenite

Nucleation and growth of Pd clusters in mordenite 317

## Multi-electron transfer

Challenges for (photo)electrocatalysis research 177

## Multiple-scattering

New developments in NEXAFS/EXAFS theory 263

## NEXAFS

New developments in NEXAFS/EXAFS theory 263

## Ni–Mo catalysts

Hydrodesulfurization of dibenzothiophene derivatives over TiO<sub>2</sub>–Al<sub>2</sub>O<sub>3</sub> supported sulfided molybdenum catalyst 21

Ni–Mo/Al<sub>2</sub>O<sub>3</sub> catalyst

Hydrotreating of heavy distillate derived from Wandoan coal liquefaction 89

- Interaction between Mo and Co on Co–Mo/Al<sub>2</sub>O<sub>3</sub> sulfided at high pressure ( $\leq 5.1$  MPa) by means of high pressure DRIFT and EXAFS method 33
- Nickel–molybdate catalyst  
Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77
- Nickel–tungstate catalyst  
Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77
- NiMo catalysts  
Catalytic hydrodesulfurization of gas oil and model sulfur compounds over commercial and laboratory-made CoMo and NiMo catalysts: Activity and reaction scheme 13
- Nitrogen-containing organics  
Photocatalytic mineralization of nitrogen-containing benzene derivatives 187
- NO<sub>x</sub> decomposition  
Design of photocatalysts encapsulated within the zeolite framework and cavities for the decomposition of NO into N<sub>2</sub> and O<sub>2</sub> at normal temperature 159
- Oxidation  
On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351
- Oxygen transport  
On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351
- Palladium catalysts  
Nucleation and growth of Pd clusters in mordenite 317
- Parameter optimization  
Obtaining reliable structural parameters from EXAFS 271
- Particle size determination  
Structure of Co and Co oxide clusters in MCM-41 311
- Photo-Fenton  
Mineralization of organic compounds in photochemical and photocatalytic systems Comparative analysis for the example of methylviologen photooxidation 197
- Photoadsorption  
Photoadsorption and photocatalytic oxidation on the metal oxides Components of tropospheric solid aerosols under the Earth's atmosphere conditions 243
- Photocatalysis  
Design of photocatalysts encapsulated within the zeolite framework and cavities for the decomposition of NO into N<sub>2</sub> and O<sub>2</sub> at normal temperature 159  
Mineralization of organic compounds in photochemical and photocatalytic systems. Comparative analysis for the example of methylviologen photooxidation 197  
Photoadsorption and photocatalytic oxidation on the metal oxides Components of tropospheric solid aerosols under the Earth's atmosphere conditions 243  
Photocatalysis as a phenomenon: Aspects of terminology 137  
Photocatalytic mineralization of nitrogen-containing benzene derivatives 187
- Photocatalysts  
Photoreduction of carbon dioxide on quantized semiconductor nanoparticles in solution 169
- Photocatalytic reactions  
Photocatalysis on atmospheric aerosols: Experimental studies and modeling 233
- Photocatalytic water oxidation  
At the time he made the first photographs on paper: Did Henry Fox Talbot oxidize water to oxygen with sunlight? 145
- Photochemistry  
Photocatalysis as a phenomenon: Aspects of terminology 137
- Platinum  
On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351
- Pressure  
Hydropyrolysis of coal in a pressurized powder-particle fluidized bed using several catalysts 127
- Pt/FSM-16 catalyst  
Noble metals supported on mesoporous silicate FSM-16 as new hydrodesulfurization catalyst 61
- QEXAFS  
Combined (Q)EXAFS/XRD: Technique and applications 293
- Radiation energy conversion  
High-temperature catalysis driven by the direct action of concentrated light or a high-density electron beam 251
- Radioisotope pulse tracer method  
Elucidation of hydrodesulfurization mechanism using <sup>35</sup>S radioisotope pulse tracer methods 3
- Reducibility  
Study on a cobalt silica catalyst during reduction and Fischer–Tropsch reaction: In situ EXAFS compared to XPS and XRD 329
- Reduction  
On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351
- Rh particles  
Reversible structure change of one-atomic layer GeO<sub>2</sub> on SiO<sub>2</sub> surface under the interaction with Rh particles by in situ XAFS studies 343
- Semiconductor nanoparticles  
Photoreduction of carbon dioxide on quantized semiconductor nanoparticles in solution 169
- Solar energy  
High-temperature catalysis driven by the direct action of concentrated light or a high-density electron beam 251
- Statistical errors  
Obtaining reliable structural parameters from EXAFS 271
- Steam reforming of methane  
High-temperature catalysis driven by the direct action of concentrated light or a high-density electron beam 251
- Structural change  
Reversible structure change of one-atomic layer GeO<sub>2</sub> on SiO<sub>2</sub> surface under the interaction with Rh particles by in situ XAFS studies 343
- Supported photocatalyst  
Supported titanium oxide as photocatalyst in water decontamination: State of the art 219

## Synchrotron radiation

Hydrothermal synthesis of the microporous aluminophosphate CoAPO-5; in situ time-resolved synchrotron X-ray powder diffraction studies 301

## Systematic errors

Obtaining reliable structural parameters from EXAFS 271

## Terminology

Photocatalysis as a phenomenon: Aspects of terminology 137

## Tin

On-line characterization by EXAFS of tin promoted platinum graphite catalysts in the aqueous phase 351

TiO<sub>2</sub>

Mineralization of organic compounds in photochemical and photocatalytic systems Comparative analysis for the example of methylviologen photooxidation 197

## Titania–alumina support

Hydrodesulfurization of dibenzothiophene derivatives over TiO<sub>2</sub>–Al<sub>2</sub>O<sub>3</sub> supported sulfided molybdenum catalyst 21

## Titanium dioxide

Supported titanium oxide as photocatalyst in water decontamination: State of the art 219

## TPR

Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77

## Vanadium silicalite

Design of photocatalysts encapsulated within the zeolite framework and cavities for the decomposition of NO into N<sub>2</sub> and O<sub>2</sub> at normal temperature 159

## Volatile organic compounds

Photocatalysis on atmospheric aerosols: Experimental studies and modeling 233

## Water decontamination

Supported titanium oxide as photocatalyst in water decontamination: State of the art 219

## Water purification

Mineralization of organic compounds in photochemical and photocatalytic systems Comparative analysis for the example of methylviologen photooxidation 197

## XAFS

Reversible structure change of one-atomic layer GeO<sub>2</sub> on SiO<sub>2</sub> surface under the interaction with Rh particles by in situ XAFS studies 343

## XPS

Hydrogenation of tetralin over sulfided nickel–tungstate/alumina and nickel–molybdate/alumina catalysts 77

## XRD

Combined (Q)EXAFS/XRD: Technique and applications 293

## Zeolite microcrystals

At the time he made the first photographs on paper: Did Henry Fox Talbot oxidize water to oxygen with sunlight? 145

## Zeolite synthesis

Hydrothermal synthesis of the microporous aluminophosphate CoAPO-5; in situ time-resolved synchrotron X-ray powder diffraction studies 301
