

Subject index

Acetic acid

Catalytic wet oxidation of acetic acid using platinum on alumina monolith catalyst 59

Acidity

Catalytic performance of $\text{Al}_2\text{O}_3/\text{SiO}_2/\text{TiO}_2$ loaded with V_2O_5 for the selective catalytic reduction of NO_x with ammonia 27

Advanced oxidation

Development of a new photocatalytic reactor for water purification 73

Ammonoxidation

Vanadium phosphorus oxides with $P/V=2$ used as oxidation and ammonoxidation catalysts 263

Barium-titanate

Photodegradation of phenol and 4-chlorophenol by $\text{BaO-Li}_2\text{O-TiO}_2$ catalysts 367

Biodegradation

Reactor development for biodegradation of pentachlorophenol 103

Bioreactor

Reactor development for biodegradation of pentachlorophenol 103

Butane oxidation

Comments on the nature of the active site of vanadium phosphate catalysts for butane oxidation 273

Butane oxidative dehydrogenation

Reducibility of undoped and Cs-doped $\alpha\text{-NiMoO}_4$ catalysts: Kinetic effects in the oxidative dehydrogenation of *n*-butane 229

Carbene

Transient kinetics investigations of reaction intermediates involved in CF_2Cl_2 hydrodechlorination 377

Catalysis

Oxidative dehydrogenation of ethane on the α and β phases of NiMoO_4 201

Catalyst formation

Vanadium phosphorus oxides with $P/V=2$ used as oxidation and ammonoxidation catalysts 263

Catalytic enhancement

Catalytically enhanced absorption of sulphur species from odorous air streams: A new technology for odour abatement 289

Catalytic oxidation

Catalytic oxidation of phenol in aqueous solutions 343

Catalytic

Effect of process conditions on co-liquefaction kinetics of waste tire and coal 307

Cesium doping

Reducibility of undoped and Cs-doped $\alpha\text{-NiMoO}_4$ catalysts: Kinetic effects in the oxidative dehydrogenation of *n*-butane 229

CF_2Cl_2

Transient kinetics investigations of reaction intermediates involved in CF_2Cl_2 hydrodechlorination 377

CFC

Transient kinetics investigations of reaction intermediates involved in CF_2Cl_2 hydrodechlorination 377

Chlorinated organic contaminants

Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387

Chlorinated VOCs

Catalytic oxidation of 1,2-dichlorobenzene over $\text{V}_2\text{O}_5/\text{TiO}_2$ -based catalysts 39

4-Chlorophenol

Photodegradation of phenol and 4-chlorophenol by $\text{BaO-Li}_2\text{O-TiO}_2$ catalysts 367

Co catalysts

Determination of reactivity distributions from steady-state isotopic transient data: A model study 171

Co-liquefaction

Effect of process conditions on co-liquefaction kinetics of waste tire and coal 307

Coal

Effect of process conditions on co-liquefaction kinetics of waste tire and coal 307

Deactivation

Catalyzing the carbonylation of methanol using a heterogeneous vapor phase catalyst 397

Fast catalytic oxidation of phenol in supercritical water 333

Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353

Dechlorination

Transient kinetics investigations of reaction intermediates involved in CF_2Cl_2 hydrodechlorination 377

Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387

- Dichlorobenzene
Catalytic oxidation of 1,2-dichlorobenzene over V_2O_5/TiO_2 -based catalysts 39
- Dioxin
Catalytic oxidation of 1,2-dichlorobenzene over V_2O_5/TiO_2 -based catalysts 39
- Enzymes
Reactor development for biodegradation of pentachlorophenol 103
- Ethane oxidative dehydrogenation
Oxidative dehydrogenation of ethane on the α and β phases of $NiMoO_4$ 201
- Fischer-Tropsch
Determination of reactivity distributions from steady-state isotopic transient data: A model study 171
- FTIR spectroscopy
Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- Fungi
Reactor development for biodegradation of pentachlorophenol 103
- Hollandite
Photodegradation of phenol and 4-chlorophenol by $BaO-Li_2O-TiO_2$ catalysts 367
- Hydrodechlorination
Transient kinetics investigations of reaction intermediates involved in CF_2Cl_2 hydrodechlorination 377
- Hydrogen donor
Effect of hydrogen donors on polymer degradation 321
- In situ laser Raman spectroscopy
Comments on the nature of the active site of vanadium phosphate catalysts for butane oxidation 273
- Iron
Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387
- Kinetic coupling
Recovery of high-valued products from styrene-based polymers through coprocessing: Experiments and mechanistic modeling 121
- Kinetics
Effect of process conditions on co-liquefaction kinetics of waste tire and coal 307
Fast catalytic oxidation of phenol in supercritical water 333
Oxidative dehydrogenation of ethane on the α and β phases of $NiMoO_4$ 201
Reactor development for biodegradation of pentachlorophenol 103
Reducibility of undoped and Cs-doped $\alpha-NiMoO_4$ catalysts: Kinetic effects in the oxidative dehydrogenation of *n*-butane 229
- Maleic anhydride
Comments on the nature of the active site of vanadium phosphate catalysts for butane oxidation 273
- Mathematical modelling
Determination of reactivity distributions from steady-state isotopic transient data: A model study 171
- Mechanistic modeling
Recovery of high-valued products from styrene-based polymers through coprocessing: Experiments and mechanistic modeling 121
- Methane
Characterization and temperature-programmed studies over Pd/TiO_2 catalysts for NO reduction with methane 3
- Methanol carbonylation
Catalyzing the carbonylation of methanol using a heterogeneous vapor phase catalyst 397
- Methyl acetate formation
Catalyzing the carbonylation of methanol using a heterogeneous vapor phase catalyst 397
- Molecular weight distribution
Effect of hydrogen donors on polymer degradation 321
- Monolith catalyst
Catalytic wet oxidation of acetic acid using platinum on alumina monolith catalyst 59
- Monolith froth reactor
Catalytic wet oxidation of acetic acid using platinum on alumina monolith catalyst 59
- Nanoscale bimetallic particles
Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387
- Ni catalysts
Determination of reactivity distributions from steady-state isotopic transient data: A model study 171
- Nickel molybdate
Oxidative dehydrogenation of ethane on the α and β phases of $NiMoO_4$ 201
Reducibility of undoped and Cs-doped $\alpha-NiMoO_4$ catalysts: Kinetic effects in the oxidative dehydrogenation of *n*-butane 229
- Nickel/activated carbon
Catalyzing the carbonylation of methanol using a heterogeneous vapor phase catalyst 397
- Nitrogen oxides
The sorption and reduction of nitrogen oxides by 12-tungstophosphoric acid and its ammonium salt 297
- No reduction
Characterization and temperature-programmed studies over Pd/TiO_2 catalysts for NO reduction with methane 3
- Odour removal
Catalytically enhanced absorption of sulphur species from odorous air streams: A new technology for odour abatement 289
- Organic pollutants
Photocatalytic oxidation of organic pollutants in water 85
- Oxidation
Catalytic oxidation of 1,2-dichlorobenzene over V_2O_5/TiO_2 -based catalysts 39

- Vanadium phosphorus oxides with P/V=2 used as oxidation and ammoxidation catalysts 263
- Palladium**
 Characterization and temperature-programmed studies over Pd/TiO₂ catalysts for NO reduction with methane 3
 Transient kinetics investigations of reaction intermediates involved in CF₂Cl₂ hydrodechlorination 377
 Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387
- Pentachlorophenol**
 Reactor development for biodegradation of pentachlorophenol 103
- Phenol oxidation**
 Catalytic oxidation of phenol in aqueous solutions 343
- Phenol water**
 Catalytic oxidation of phenol in aqueous solutions 343
- Phenol**
 Photodegradation of phenol and 4-chlorophenol by BaO–Li₂O–TiO₂ catalysts 367
- Photocatalysis**
 Photocatalytic oxidation of organic pollutants in water 85
 Photodegradation of phenol and 4-chlorophenol by BaO–Li₂O–TiO₂ catalysts 367
 Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- Photoreactor**
 Development of a new photocatalytic reactor for water purification 73
- Polymer degradation**
 Effect of hydrogen donors on polymer degradation 321
- Polymer resource recovery**
 Recovery of high-valued products from styrene-based polymers through coprocessing: Experiments and mechanistic modeling 121
- Polyoxide-based catalysis**
 Catalytic performance of Al₂O₃/SiO₂/TiO₂ loaded with V₂O₅ for the selective catalytic reduction of NO_x with ammonia 27
- Polystyrene degradation**
 Recovery of high-valued products from styrene-based polymers through coprocessing: Experiments and mechanistic modeling 121
- Pyridine adsorption**
 Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- Reactor design**
 Reactor development for biodegradation of pentachlorophenol 103
- Reduction**
 Reducibility of undoped and Cs-doped α -NiMoO₄ catalysts: Kinetic effects in the oxidative dehydrogenation of *n*-butane 229
 The sorption and reduction of nitrogen oxides by 12-tungstophosphoric acid and its ammonium salt 297
- SCR of NO_x**
 Catalytic performance of Al₂O₃/SiO₂/TiO₂ loaded with V₂O₅ for the selective catalytic reduction of NO_x with ammonia 27
- Semiconductor photocatalysis**
 Development of a new photocatalytic reactor for water purification 73
- Si and Al heteroatoms**
 Catalytic performance of Al₂O₃/SiO₂/TiO₂ loaded with V₂O₅ for the selective catalytic reduction of NO_x with ammonia 27
- Silica–titania**
 Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- Solar light**
 Photocatalytic oxidation of organic pollutants in water 85
- Sorption**
 The sorption and reduction of nitrogen oxides by 12-tungstophosphoric acid and its ammonium salt 297
- SSITKA**
 Determination of reactivity distributions from steady-state isotopic transient data: A model study 171
- Supercritical water**
 Fast catalytic oxidation of phenol in supercritical water 333
- Tetrachloroethene**
 Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387
- Thermal decomposition**
 Effect of hydrogen donors on polymer degradation 321
- TiO₂**
 Photocatalytic oxidation of organic pollutants in water 85
- Tire**
 Effect of process conditions on co-liquefaction kinetics of waste tire and coal 307
- Titania**
 Characterization and temperature-programmed studies over Pd/TiO₂ catalysts for NO reduction with methane 3
 Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- Titanium dioxide**
 Development of a new photocatalytic reactor for water purification 73
- Toluene oxidation**
 Relationship between the formation of surface species and catalyst deactivation during the gas-phase photocatalytic oxidation of toluene 353
- TPD**
 Characterization and temperature-programmed studies over Pd/TiO₂ catalysts for NO reduction with methane 3
- TPR**
 Characterization and temperature-programmed studies over Pd/TiO₂ catalysts for NO reduction with methane 3
- Transient experiments**
 Determination of reactivity distributions from steady-state isotopic transient data: A model study 171

Transmission electron microscopy

Comments on the nature of the active site of vanadium phosphate catalysts for butane oxidation 273

Trichloroethene

Treatment of chlorinated organic contaminants with nanoscale bimetallic particles 387

12-tungstophosphoric acid

The sorption and reduction of nitrogen oxides by 12-tungstophosphoric acid and its ammonium salt 297

T. versicolor

Reactor development for biodegradation of pentachlorophenol 103

Vanadia/titania

Catalytic oxidation of 1,2-dichlorobenzene over V_2O_5/TiO_2 -based catalysts 39

Vanadium phosphate catalysts

Comments on the nature of the active site of vanadium phosphate catalysts for butane oxidation 273

Vanadium phosphorus oxides with $P/V=2$ used as oxidation and ammoxidation catalysts 263

Waste treatment

Catalytic wet oxidation of acetic acid using platinum on alumina monolith catalyst 59

Waste water treatment

Catalytic oxidation of phenol in aqueous solutions 343

Wet oxidation

Catalytic wet oxidation of acetic acid using platinum on alumina monolith catalyst 59

XPS

Characterization and temperature-programmed studies over Pd/TiO_2 catalysts for NO reduction with methane 3
