

Subject index

- Acetaldehyde
Supported liquid phase catalysis in selective oxidation 433
- Acetoxylation
Supported liquid phase catalysis in selective oxidation 433
- Acid catalysis
Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73
- Acid-basic catalysts
Microcalorimetric characterisation of acid–basic catalysts 179
- Acidity
Spectroscopic characterization of the acid properties of metal oxide catalysts 191
- Acrylonitrile
Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457
- Active sites
Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111
- Adsorption
Spectroscopic characterization of the acid properties of metal oxide catalysts 191
- Adspecies
Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457
- Alkane
Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457
- Alkanes
Photocatalyzed oxidation in zeolite cages 297
Electrochemical cells as reactors for selective oxygenation of hydrocarbons at low temperature 311
- Alkylaromatics
Photocatalyzed oxidation in zeolite cages 297
Selective gas-phase oxidation at oxide nanoparticles on microporous materials 409
- Ammoximation
Oxidation with no-redox oxides: ammoximation of cyclohexanone on amorphous silicas 443
- Amorphous silica
Oxidation with no-redox oxides: ammoximation of cyclohexanone on amorphous silicas 443
- Benzene to phenol
Generation of active oxygen species on solid surfaces. Opportunity for novel oxidation technologies over zeolites 365
- Benzene
Electrochemical cells as reactors for selective oxygenation of hydrocarbons at low temperature 311
- Biomimetic oxidation
Generation of active oxygen species on solid surfaces. Opportunity for novel oxidation technologies over zeolites 365
- Calorimetry
Microcalorimetric characterisation of acid–basic catalysts 179
- Carbonaceous products
Oxidation with no-redox oxides: ammoximation of cyclohexanone on amorphous silicas 443
- Catalysts
New possibilities and opportunities for basic and applied research on selective oxidation by solid catalysts: an overview 287
- Catalytic properties
Application of modeling in zeolite science 41
- Ceramic pastes
Preparation and characterization of extruded monolithic ceramic catalysts 87
- Clays
Preparation and catalytic properties of cationic and anionic clays 53
- Co or Ni ion impregnation
Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111
- Complexation
Sol–gel synthesis of heterogeneous catalysts from aqueous solutions 3
- Condensation
Sol–gel synthesis of heterogeneous catalysts from aqueous solutions 3
- Crystal size
Zeolites as tailor-made catalysts: Control of the crystal size 37
- Crystallisation
Zeolites as tailor-made catalysts: Control of the crystal size 37

CVD Fe/Mo/DBH

Selective gas-phase oxidation at oxide nanoparticles on microporous materials 409

Cyclohexanone oxime

Oxidation with no-redox oxides: ammoximation of cyclohexanone on amorphous silicas 443

Define polymerization

From homogeneous to supported metallocene catalysts 149

Electron transfer

Reactive intermediates formed upon electron transfer from the surface of oxide catalysts to adsorbed molecules 239

Environmental catalysis

Preparation and catalytic properties of cationic and anionic clays 53

Epoxidation

Bio-inorganic approach to hydrocarbon oxidation 327

EPR

Reactive intermediates formed upon electron transfer from the surface of oxide catalysts to adsorbed molecules 239

EXAFS

Characterisation of heterogeneous catalysts by EXAFS 261

Extrusion

Preparation and characterization of extruded monolithic ceramic catalysts 87

FeZSM-5

Generation of active oxygen species on solid surfaces. Opportunity for novel oxidation technologies over zeolites 365

FT-IR spectroscopy

Spectroscopic characterization of the acid properties of metal oxide catalysts 191

Fuel cell

Electrochemical cells as reactors for selective oxygenation of hydrocarbons at low temperature 311

Gas-phase O₂ oxidation

Selective gas-phase oxidation at oxide nanoparticles on microporous materials 409

Heterogeneous catalysis

Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73

Preparation and catalytic properties of cationic and anionic clays 53

Heteropolycompound

Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73

Heteropolyoxometalate

Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73

Hg porosimetry

Surface area and pore texture of catalysts 207

Homogeneous catalysis

Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73

HRTEM

Surface sites of microcrystals: Coordination and reactivity 229

HTHP reactions

Spectroscopic methods for the study of inter-phase zones under reaction conditions 277

Hydrolysis

Sol-gel synthesis of heterogeneous catalysts from aqueous solutions 3

Hydroprocessing catalysis

Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111

Hydrotalcites

Preparation and catalytic properties of cationic and anionic clays 53

Hydroxylation

Bio-inorganic approach to hydrocarbon oxidation 327

In site X-ray diffraction

Characterization of heterogeneous catalysts by X-ray diffraction techniques 251

Infrared

Surface sites of microcrystals: Coordination and reactivity 229

IR spectroscopy

Spectroscopic methods for the study of inter-phase zones under reaction conditions 277

Light alkanes

Electrochemical cells as reactors for selective oxygenation of hydrocarbons at low temperature 311

Mechanism of oxidation

Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457

Metal catalyst

Supported metal catalysts preparation 129

Metal clusters

Supported metals derived from organometallics 139

Metal oxides

Spectroscopic characterization of the acid properties of metal oxide catalysts 191

Metallocenes

From homogeneous to supported metallocene catalysts 149

Microporous catalysts

Standard reaction tests for microporous catalysts characterisation 221

Microporous materials

Characterization of heterogeneous catalysts by X-ray diffraction techniques 251

Mixed oxidex

Characterization of heterogeneous catalysts by X-ray diffraction techniques 251

The chemistry of oxidation catalysts based on mixed oxides 21

Modeling

Application of modeling in zeolite science 41

Modelling

Surface sites of microcrystals: Coordination and reactivity 229

- Molecular sieves microporosity
 - Standard reaction tests for microporous catalysts characterisation 221
- Molybdate impregnation
 - Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111
- Molybdenum
 - The chemistry of oxidation catalysts based on mixed oxides 21
- Monoliths
 - Preparation and characterization of extruded monolithic ceramic catalysts 87
- Monoxygenase
 - Bio-inorganic approach to hydrocarbon oxidation 327
- MoS₂
 - Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111
- Nitric oxide abatement
 - Supported oxides: Preparation, characterization and catalytic activity of CrO_x/ZrO₂, MoO_x/ZrO₂ and VO_x/ZrO₂ 95
- Nitrogen adsorption
 - Surface area and pore texture of catalysts 207
- Nitrous oxide
 - Generation of active oxygen species on solid surfaces. Opportunity for novel oxidation technologies over zeolites 365
- Olefins
 - Photocatalyzed oxidation in zeolite cages 297
- Organometallics precursors
 - Supported metals derived from organometallics 139
- Oxidation catalysis
 - Heteropolycompound-based catalysts: A blend of acid and oxidizing properties 73
- Oxidation of hydrocarbons
 - Generation of active oxygen species on solid surfaces. Opportunity for novel oxidation technologies over zeolites 365
- Oxidation
 - Electrochemical cells as reactors for selective oxygenation of hydrocarbons at low temperature 311
 - New possibilities and opportunities for basic and applied research on selective oxidation by solid catalysts: an overview 287
- Oxide nanoparticle
 - Selective gas-phase oxidation at oxide nanoparticles on microporous materials 409
- Oxides
 - Reactive intermediates formed upon electron transfer from the surface of oxide catalysts to adsorbed molecules 239
 - Surface sites of microcrystals: Coordination and reactivity 229
- Palladium
 - Supported liquid phase catalysis in selective oxidation 433
- Pd/Au
 - Supported liquid phase catalysis in selective oxidation 433
- Photooxidation
 - Photocatalyzed oxidation in zeolite cages 297
- Pillared clays
 - Preparation and catalytic properties of cationic and anionic clays 53
- Pore volume
 - Surface area and pore texture of catalysts 207
- Poresize
 - Surface area and pore texture of catalysts 207
- Porous metal oxides
 - Supported metals derived from organometallics 139
- Powder X-ray diffraction
 - Characterization of heterogeneous catalysts by X-ray diffraction techniques 251
- Preparation
 - Supported metal catalysts preparation 129
- Probe molecules
 - Surface acidity and basicity: General concepts 169
- Promoter effect
 - Genesis, architecture and nature of sites of Co(Ni)–MoS₂ supported hydroprocessing catalysts 111
- Raman spectroscopy
 - Spectroscopic methods for the study of inter-phase zones under reaction conditions 277
- Reductive activation of dioxygen
 - Bio-inorganic approach to hydrocarbon oxidation 327
- Rietveld analysis
 - Characterization of heterogeneous catalysts by X-ray diffraction techniques 251
- Selectivity
 - New possibilities and opportunities for basic and applied research on selective oxidation by solid catalysts: an overview 287
- Sol-gel
 - Sol-gel synthesis of heterogeneous catalysts from aqueous solutions 3
- Solid acids
 - Preparation and catalytic properties of cationic and anionic clays 53
- Solid bases
 - Preparation and catalytic properties of cationic and anionic clays 53
- Spectroscopy
 - Characterisation of heterogeneous catalysts by EXAFS 261
- Standard reactions
 - Standard reaction tests for microporous catalysts characterisation 221
- Structure of catalysts
 - Characterisation of heterogeneous catalysts by EXAFS 261
- Supported catalysts
 - From homogeneous to supported metallocene catalysts 149
- Supported metal catalysts
 - Supported metals derived from organometallics 139
- Supported
 - Supported metal catalysts preparation 129
- Surface acidity
 - Surface acidity and basicity: General concepts 169

Surface area

Surface area and pore texture of catalysts 207

Surface basicity

Surface acidity and basicity: General concepts 169

Surface sites

Surface sites of microcrystals: Coordination and reactivity 229

Synthesis

Application of modeling in zeolite science 41

Zeolites as tailor-made catalysts: Control of the crystal size 37

Vanadium

Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457

The chemistry of oxidation catalysts based on mixed oxides 21

Vinyl acetate

Supported liquid phase catalysis in selective oxidation 433

VPO

Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457

VSbO

Modification of the surface reactivity and selectivity of mixed oxides in oxidation reactions due to coadsorbate species 457

Zeolite

Supported metals derived from organometallics 139

Application of modeling in zeolite science 41

Photocatalyzed oxidation in zeolite cages 297

Zeolites as tailor-made catalysts: Control of the crystal size 37

Zirconia support

Supported oxides: Preparation, characterization and catalytic activity of $\text{CrO}_x/\text{ZrO}_2$, $\text{MoO}_x/\text{ZrO}_2$ and VO_x/ZrO_2 95
