

Subject index

Acetophenone

Hydrogenation of acetophenone using a 10% Ni supported on zeolite Y catalyst: kinetics and reaction mechanism 83

Adhesion

Gas–solid adhesion and solid–solid agglomeration of carbon supported catalysts in three phase slurry reactors 131

Agglomeration

Gas–solid adhesion and solid–solid agglomeration of carbon supported catalysts in three phase slurry reactors 131

Airlift

Modeling of acetophenone hydrogenation over a Rh/C catalyst in a slurry airlift reactor 161

Aqueous phase catalysts

Mass transfer effects on hydroformylation catalyzed by a water soluble complex 265

Autoxidation

Electrochemical assistance of catalytic oxidation in liquid phase using molecular oxygen: oxidation of toluenes 363

Batch reactor

Concomitant use of liquid–liquid batch and continuous plug flow reactors for kinetic model discrimination. Application to the Rh/TPPTS catalysed reduction of the C–C double bond in dimethylitaconate 211

Benzene

Selective hydrogenation of benzene to cyclohexene using a suspended Ru catalyst in a mechanically agitated tetraphase reactor 255

Bimetallic supported catalysts

Hydrogenation of carvone on Pt–Sn/Al₂O₃ catalysts 65

Biphasic catalysis

Chemically modified β -cyclodextrins in biphasic catalysis: a fruitful contribution of the host–guest chemistry to the transition-metal catalyzed reactions 245

Biphasic hydrogenation

Biphasic homogeneous hydrogenation of sorbic acid with water soluble ruthenium catalysts – aspects of mass transfer 273

Bisphenol A

The simulated moving-bed reactor for production of bisphenol A 199

Bubble column

Trends in catalytic reaction engineering 5

Bubble model

Improving conversion and selectivity of catalytic reactions in bubbling gas–solid fluidized bed reactors by control of the nonlinear bubble dynamics 185

Carbon

Magnetic catalyst bodies 329

Carbon monoxide

Copolymerization of ethylene and carbon monoxide using [(dppp)Pd(H₂O)(TsO)](TsO) as a catalyst precursor: rate equation 49

Carbon(active)

Three-phase reactors for environmental remediation: catalytic wet oxidation of phenol using active carbon 323

Catalysis

Copolymerization of ethylene and carbon monoxide using [(dppp)Pd(H₂O)(TsO)](TsO) as a catalyst precursor: rate equation 49

Reaction engineering of emerging oxidation processes 17

Selective hydrogenation of benzene to cyclohexene using a suspended Ru catalyst in a mechanically agitated tetraphase reactor 255

Catalyst carry-over

The mixing aspects of NiMo and CoMo hydrotreating catalysts in ebullated-bed reactors 229

Catalyst deactivation

Optimization of the reactor–regenerator system with catalytic parallel–consecutive reactions 175

Catalyst electrochemical activation

Electrochemical assistance of catalytic oxidation in liquid phase using molecular oxygen: oxidation of toluenes 363

Catalyst immobilisation

The behaviour of an intermeshing twin screw extruder with catalyst immobilised screws as a three-phase reactor 347

Catalyst potential

Catalytic oxidation of maleic and oxalic acids under potential control of platinum catalysts 291

Catalyst preparation

Mass transfer resistances in the palladium-catalysed hydrogenation of 1-methoxy-2,4-(nitrophenyl)-ethane 119

Catalyst regeneration

Optimization of the reactor–regenerator system with catalytic parallel–consecutive reactions 175

Catalyst regulation

Optimization of the reactor–regenerator system with catalytic parallel–consecutive reactions 175

Catalyst/liquid ratio

Overall rate of aqueous-phase catalytic oxidation of phenol: pH and catalyst loading influences 109

Catalytic and non-catalytic reactions

A homogeneous-heterogeneously catalysed reaction system in a loop reactor 139

Heck reaction

Carbohydrate-substituted phosphines as new ligands for two-phase catalysis – synthesis and application 279

Heterogeneous catalysis

Modeling of acetophenone hydrogenation over a Rh/C catalyst in a slurry airlift reactor 161

Homogeneous catalysis

Concomitant use of liquid–liquid batch and continuous plug flow reactors for kinetic model discrimination. Application to the Rh/TPPTS catalysed reduction of the C–C double bond in dimethylitaconate 211

Hydrocarboxylation

Chemically modified β -cyclodextrins in biphasic catalysis: a fruitful contribution of the host–guest chemistry to the transition-metal catalyzed reactions 245

Hydrodesulfurization

Deep desulfurization of diesel fuels: kinetic modeling of model compounds in trickle-bed 41

Hydroformulation

Hydroformylation in reverse micellar systems 237

Hydroformylation

Carbohydrate-substituted phosphines as new ligands for two-phase catalysis – synthesis and application 279

Chemically modified β -cyclodextrins in biphasic catalysis: a fruitful contribution of the host–guest chemistry to the transition-metal catalyzed reactions 245

Hydrogenation

Catalytic hydrogenation in a packed bed bubble column reactor 221

Gas–solid adhesion and solid–solid agglomeration of carbon supported catalysts in three phase slurry reactors 131

Hydrogenation of acetophenone using a 10% Ni supported on zeolite Y catalyst: kinetics and reaction mechanism 83

Kinetic experiments and modeling of a three-phase catalytic hydrogenation reaction in supercritical CO₂ 337

Mass transfer resistances in the palladium-catalysed hydrogenation of 1-methoxy-2,4-(nitrophenyl)-ethane 119

Selective hydrogenation of benzene to cyclohexene using a suspended Ru catalyst in a mechanically agitated tetraphase reactor 255

The behaviour of an intermeshing twin screw extruder with catalyst immobilised screws as a three-phase reactor 347

Trickle bed reactor diluted with fine particles and coiled tubular flow-type reactor for kinetic measurements without external effects 301

Vapor-phase kinetics and its contribution to global three-phase reaction rate in hydrogenation of 1-methylnaphthalene 31

Hydrotreating catalyst

The mixing aspects of NiMo and CoMo hydrotreating catalysts in ebullated-bed reactors 229

Inverse micelles

Hydroformylation in reverse micellar systems 237

Ion-exchange resin catalyst

The simulated moving-bed reactor for production of bisphenol A 199

Kinetic aspects

Biphasic homogeneous hydrogenation of sorbic acid with water soluble ruthenium catalysts – aspects of mass transfer 273

Kinetic models

Modelling of the kinetic of 2-chlorophenol catalytic photo-oxidation 357

Kinetic

Kinetic experiments and modeling of a three-phase catalytic hydrogenation reaction in supercritical CO₂ 337

Kinetics

Concomitant use of liquid–liquid batch and continuous plug flow reactors for kinetic model discrimination. Application to the Rh/TPPTS catalysed reduction of the C–C double bond in dimethylitaconate 211

Glucose oxidation in a three-phase stirred airlift reactor: experiments and model 125

Hydrogenation of acetophenone using a 10% Ni supported on zeolite Y catalyst: kinetics and reaction mechanism 83

Modelling of citral hydrogenation kinetics on an Ni/Al₂O₃ catalyst 57

Trickle bed reactor diluted with fine particles and coiled tubular flow-type reactor for kinetic measurements without external effects 301

Vapor-phase kinetics and its contribution to global three-phase reaction rate in hydrogenation of 1-methylnaphthalene 31

Liquid-liquid catalysis

Concomitant use of liquid–liquid batch and continuous plug flow reactors for kinetic model discrimination. Application to the Rh/TPPTS catalysed reduction of the C–C double bond in dimethylitaconate 211

Liquid-phase

Liquid-phase methanol synthesis in apolar (squalane) and polar (tetraethylene glycol dimethylether) solvents 93

Loop reactor

A homogeneous-heterogeneously catalysed reaction system in a loop reactor 139

Magnetic properties

Magnetic catalyst bodies 329

Maleic acid

Catalytic oxidation of maleic and oxalic acids under potential control of platinum catalysts 291

Mass transfer

Catalytic hydrogenation in a packed bed bubble column reactor 221

Gas–solid adhesion and solid–solid agglomeration of carbon supported catalysts in three phase slurry reactors 131

Modelling of heat and mass transfer during the polymerisation of olefins on heterogeneous Ziegler catalysts 101

The behaviour of an intermeshing twin screw extruder with catalyst immobilised screws as a three-phase reactor 347

Methanol synthesis

Liquid-phase methanol synthesis in apolar (squalane) and polar (tetraethylene glycol dimethylether) solvents 93

***p*-Methoxytoluene**
