

Subject index

Ab initio molecular dynamics

Towards more realistic computational modeling of homogenous catalysis by density functional theory: combined QM/MM and ab initio molecular dynamics 479

First-principles molecular dynamics study of small molecules in zeolites 501

Acid site

First-principles molecular dynamics study of small molecules in zeolites 501

Acid sites in USY

Influence of the acidity of USY zeolite on the sulfur tolerance of Pd–Pt catalysts for aromatic hydrogenation 63

Adsorption

Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567

Hartree–Fock periodic study of the chemisorption of small molecules on TiO₂ and MgO surfaces 541

AIMD

Towards more realistic computational modeling of homogenous catalysis by density functional theory: combined QM/MM and ab initio molecular dynamics 479

Alloying

Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175

Alumina

Carbon versus alumina as a support for Co–Mo catalysts reactivity towards HDS of dibenzothiophenes and diesel fuel 9

Transition metals to sulfur binding energies relationship to catalytic activities in HDS: back to Sabatier with first principle calculations

Hydrotreating of residue oil over aluminum borate-supported CoMo and NiMo catalysts 57

Anionic vacancies

Studies of the cerium-metal–oxygen–hydrogen system (metal= Cu, Ni) 247

Aromatic hydrogenation

Influence of the acidity of USY zeolite on the sulfur tolerance of Pd–Pt catalysts for aromatic hydrogenation 63

ATTM

A new method for preparing highly active unsupported Mo sulfide. Catalytic activity for hydrogenolysis of 4-(1-naphthyl-methyl)biphenyl 19

Bifunctional catalysts

Computer-assisted mechanistic modeling of *n*-hexadecane hydroisomerization over various bifunctional catalysts 159

Binding

Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567

Black thunder Wyodak coal

Liquefaction catalysis of Wyodak coal impregnated with water soluble iron and molybdenum precursors 141

Boudouard reaction

On the mechanism and energetics of Boudouard reaction at FeO(1 0 0) surface: 2COC+CO₂ 579

Brønsted acid site

Methanol in microporous materials from first principles 525

Carbon dioxide reforming

The role of metal–support interactions in CO₂ reforming of CH₄ 87

Carbon filaments

Carbon deposition in Pd/CeO₂ catalyst: TEM study 237

Carbon monoxide hydrogenation

Effects of highly dispersed ceria addition on reducibility, activity and hydrocarbon chain growth of a Co/SiO₂ Fischer–Tropsch catalyst 413

Carbon monoxide

Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381

Catalyst

Characterization of model automotive exhaust catalysts: Pd on ceria and ceria–zirconia supports 309

Transformation of phosphomolybdic acid into an active catalyst with potential application in coal liquefaction 149

Catalysis

Theoretical studies of surface reactions on metals. I. Ethyl to ethylene conversion on Ni(1 0 0). II. Photodissociation of methane on platinum 603

Catalytic activity

A new method for preparing highly active unsupported Mo sulfide. Catalytic activity for hydrogenolysis of 4-(1-naphthyl-methyl)biphenyl 19

Catalytic wet oxidation

The utilization of ceria in industrial catalysis 353

CeM_xO_y mixed oxides

Studies of the cerium-metal–oxygen–hydrogen system (metal= Cu, Ni) 247

CeO₂

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

- The utilization of ceria in industrial catalysis 353
Use of CeO₂-based oxides in the three-way catalysis 285
- Ceria redox properties
Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227
- Ceria
Ceria films on zirconia substrates: models for understanding oxygen-storage properties 343
Characterization of model automotive exhaust catalysts: Pd on ceria and ceria–zirconia supports 309
IR study of polycrystalline ceria properties in oxidised and reduced states 207
Oxygen-18 isotope exchange and equilibration processes over preoxidised and promoted ceria. Part I. ¹⁵N¹⁸O_(g) or (¹⁸O₂+¹⁶O_{2(g)}) 429
Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299
The utilization of ceria in industrial catalysis 353
- Ceria–alumina
Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227
- Ceria–zirconia
Characterization of model automotive exhaust catalysts: Pd on ceria and ceria–zirconia supports 309
Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299
- Cerium aluminate
Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227
- Cerium dioxide
The utilization of ceria in industrial catalysis 353
- Cerium oxide catalysts
Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381
- Cerium oxide
Effects of highly dispersed ceria addition on reducibility, activity and hydrocarbon chain growth of a Co/SiO₂ Fischer–Tropsch catalyst 413
- Chemical vapor deposition
CVD preparation of alumina-supported tungsten nitride and its activity for thiophene hydrodesulfurization 29
- Chemisorption
Ab initio cluster model comparative study of atomic oxygen and sulfur chemisorption on Pt(1 1 1) surface: relevance to heterogeneous catalysis 613
Hartree–Fock periodic study of the chemisorption of small molecules on TiO₂ and MgO surfaces 541
- Cluster approach
First-principle molecular dynamics study of small molecules in zeolites 501
- Cluster model calculations
Adsorption and reactions at the (0 1 0) V₂O₅ surface: cluster model studies 553
- Cluster models
Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567
- CO-oxidation
Ceria films on zirconia substrates: models for understanding oxygen-storage properties 343
- Coal liquefaction
Transformation of phosphomolybdic acid into an active catalyst with potential application in coal liquefaction 149
- Cobalt complexes
Insights into homogeneous catalysis from first-principles theory: density functional studies of inorganic cobalt complexes 669
- Cobalt
Effects of highly dispersed ceria addition on reducibility, activity and hydrocarbon chain growth of a Co/SiO₂ Fischer–Tropsch catalyst 413
- Cobalt–molybdenum catalysts
Carbon versus alumina as a support for Co–Mo catalysts reactivity towards HDS of dibenzothiophenes and diesel fuel 9
- Coking
Carbon deposition in Pd/CeO₂ catalyst: TEM study 237
- Combustion
The utilization of ceria in industrial catalysis 353
- Composite catalysts
Diffusion and reaction in ZSM-5 and composite catalysts for the methanol-to-olefins process 637
- Constrained space orbital variation
Ab initio cluster model comparative study of atomic oxygen and sulfur chemisorption on Pt(1 1 1) surface: relevance to heterogeneous catalysis 613
- COOP
The adsorption of methyl on Rh₁₀ clusters: selective C–H bond weakening 621
- Coordinatively unsaturated sites
High pressure (≤5.1 MPa) DRIFT study on surface structure of Co–Mo/Al₂O₃ and Ni–Mo/Al₂O₃ using NO as probe molecule 3
- Copper and cerium oxide
Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381
- Coprecipitation
Preparation of zirconia–ceria materials by soft chemistry 261
- Crystallographic changes
Textural and phase stability of Ce_xZr_{1–x}O₂ mixed oxides under high temperature oxidising conditions 271
- Cu-ZSM-5
Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125
- CuCl₂
Higher activity of CuCl₂/HZSM-5 prepared by dispersion method in selective catalytic reduction of NO by propylene (SCR-HC) at lower temperature 117
- DeNO_x
The utilization of ceria in industrial catalysis 353
- Density functional calculations
Transition metals to sulfur binding energies relationship to catalytic activities in HDS: back to Sabatier with first principle calculations 629

- Density functional theory
Theoretical studies of pentene cracking on zeolites: C–C β -scission processes 517
Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567
- DeSO_x
The utilization of ceria in industrial catalysis 353
- DFT
Insights into homogeneous catalysis from first-principles theory: density functional studies of inorganic cobalt complexes 669
- Dibenzothiophene
Improving kinetic analysis of sequential and parallel reactions of hydrodesulfurization of dibenzothiophenes by establishing reasonable boundaries for reaction rate constants 49
- Diesel
Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125
The utilization of ceria in industrial catalysis 353
- 4,6-Dimethyldibenzothiophene
Carbon versus alumina as a support for Co–Mo catalysts reactivity towards HDS of dibenzothiophenes and diesel fuel 9
- Dimethylether
Catalytic routes to transportation fuels utilizing natural gas hydrates 97
- Dispersion
Higher activity of CuCl₂/HZSM-5 prepared by dispersion method in selective catalytic reduction of NO by propylene (SCR-HC) at lower temperature 117
- Doped ceria
Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299
- Electronic effects
Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175
- Electronic structure
Adsorption and reactions at the (0 1 0) V₂O₅ surface: cluster model studies 553
- Elemental sulfur
Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381
- Environmental
Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299
- Ethyl cation
Theoretical studies of pentene cracking on zeolites: C–C β -scission processes 515
- Ethylbenzene
The utilization of ceria in industrial catalysis 353
- Ethylene
Theoretical studies of surface reactions on metals. I. Ethyl to ethylene conversion on Ni(1 0 0). II. Photodissociation of methane on platinum 605
- FCC
Production of reformulated gasoline in the FCC unit. Effect of feedstock type on gasoline composition 73
The utilization of ceria in industrial catalysis 353
- Feedstock properties
Production of reformulated gasoline in the FCC unit. Effect of feedstock type on gasoline composition 73
- First principles molecular dynamics
Methanol in microporous materials from first principles 525
- First-principles theory
Insights into homogeneous catalysis from first-principles theory: density functional studies of inorganic cobalt complexes 669
- Fischer–Tropsch synthesis
Effects of highly dispersed ceria addition on reducibility, activity and hydrocarbon chain growth of a Co/SiO₂ Fischer–Tropsch catalyst 413
- Fischer–Tropsch diesel
Catalytic routes to transportation fuels utilizing natural gas hydrates 97
- FT-IR spectroscopy
IR study of polycrystalline ceria properties in oxidised and reduced states 207
- Gasoline composition
Production of reformulated gasoline in the FCC unit. Effect of feedstock type on gasoline composition 73
- Heterogeneous
Heterogeneous catalysis: looking forward with molecular simulation 451
- Heterophase exchange process
Oxygen-18 isotope exchange and equilibration processes over preoxidised and promoted ceria. Part I. ¹⁵N¹⁸O_(g) or (¹⁸O₂+¹⁶O_{2(g)}) 429
- Hexadecane
Computer-assisted mechanistic modeling of *n*-hexadecane hydroisomerization over various bifunctional catalysts 159
- Homophase equilibrium process
Oxygen-18 isotope exchange and equilibration processes over preoxidised and promoted ceria. Part I. ¹⁵N¹⁸O_(g) or (¹⁸O₂+¹⁶O_{2(g)}) 429
- Hydrodemetalation
Hydrotreating of residue oil over aluminum borate-supported CoMo and NiMo catalysts 57
- Hydrodesulfurization
CVD preparation of alumina-supported tungsten nitride and its activity for thiophene hydrodesulfurization 29
Hydrotreating of residue oil over aluminum borate-supported CoMo and NiMo catalysts 57
Improving kinetic analysis of sequential and parallel reactions of hydrodesulfurization of dibenzothiophenes by establishing reasonable boundaries for reaction rate constants 49
- Hydrogen adsorption and hydrocarbons interaction with V₂O₅
Adsorption and reactions at the (0 1 0) V₂O₅ surface: cluster model studies 553
- Hydrogen sulfide
Adsorption and interaction of H₂S/SO₂ on TiO₂ 39
- Hydrogenolysis
A new method for preparing highly active unsupported Mo sulfide. Catalytic activity for hydrogenolysis of 4-(1-naphthylmethyl)biphenyl 19

Hydroisomerization

Computer-assisted mechanistic modeling of *n*-hexadecane hydroisomerization over various bifunctional catalysts 159

Hydrotreating catalysts

High pressure (≤ 5.1 MPa) DRIFT study on surface structure of Co–Mo/Al₂O₃ and Ni–Mo/Al₂O₃ using NO as probe molecule 3

Hydrotreating

Hydrotreating of residue oil over aluminum borate-supported CoMo and NiMo catalysts 57

In situ

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

Influence of chlorine

Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227

Infrared spectroscopy

Higher activity of CuCl₂/HZSM-5 prepared by dispersion method in selective catalytic reduction of NO by propylene (SCR-HC) at lower temperature 117

Inorganic membranes

Application of integrated computational chemistry system to the design of inorganic membranes 651

IR study

IR study of polycrystalline ceria properties in oxidised and reduced states 207

Iron and molybdenum precursors

Liquefaction catalysis of Wyodak coal impregnated with water soluble iron and molybdenum precursors 141

Isotope exchange

Oxygen-18 isotope exchange and equilibration processes over preoxidised and promoted ceria. Part I. ¹⁵N¹⁸O_(g) or (¹⁸O₂+¹⁶O_{2(g)}) 429

Knudsen flow

Application of integrated computational chemistry system to the design of inorganic membranes 651

Liquefaction catalysis

Liquefaction catalysis of Wyodak coal impregnated with water soluble iron and molybdenum precursors 141

Magnetic study

Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227

Maleic anhydride

Towards understanding the mechanism for the selective hydrogenation of maleic anhydride to tetrahydrofuran over palladium 589

MeOH

Catalytic routes to transportation fuels utilizing natural gas hydrates 97

Metal decoration

Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175

Metal dusting process

On the mechanism and energetics of Boudouard reaction at FeO(1 0 0) surface: 2COC+CO₂ 579

Metal–oxide interaction

Carbon deposition in Pd/CeO₂ catalyst: TEM study 237

Metal–support interactions

The role of metal–support interactions in CO₂ reforming of CH₄ 87

Metal/support interaction

Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175

Methane combustion

Effect of ceria on palladium supported catalysts for high temperature combustion of CH₄ under lean conditions 399

Methane

Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381

The role of metal–support interactions in CO₂ reforming of CH₄ 87

Methanol decomposition

Decomposition of methanol on Pt-loaded ceria 369

Methanol to gasoline

Methanol in microporous materials from first principles 525

Methanol-to-olefin process

Diffusion and reaction in ZSM-5 and composite catalysts for the methanol-to-olefins process 637

MgO

Surface reactivity of MgO oxygen vacancies 533

Mo sulfide

A new method for preparing highly active unsupported Mo sulfide. Catalytic activity for hydrogenolysis of 4-(1-naphthyl-methyl)biphenyl 19

Modeling

Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125

Production of reformulated gasoline in the FCC unit. Effect of feedstock type on gasoline composition 73

Molecular dynamics

Application of integrated computational chemistry system to the design of inorganic membranes 651

Predicting locations of non-framework species in zeolite materials 661

Molecular simulations

Heterogeneous catalysis: looking forward with molecular simulation 451

Molybdenum catalyst

Hydrotreating of residue oil over aluminum borate-supported CoMo and NiMo catalysts 57

Molybdenum oxides

Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567

Mulliken charges

Methanol in microporous materials from first principles 525

Neutron diffraction

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

NM/CeO₂ catalysts

Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175

NMBB

A new method for preparing highly active unsupported Mo sulfide. Catalytic activity for hydrogenolysis of 4-(1-naphthyl-methyl)biphenyl 19

NO_x

Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125

Non-framework species

Predicting locations of non-framework species in zeolite materials 661

Orbitals

The adsorption of methyl on Rh₁₀ clusters: selective C–H bond weakening 621

Oxidative coupling

Simulation of a solid oxide fuel cell for oxidative coupling of methane 109

Oxygen storage capacity (OSC)

Use of CeO₂-based oxides in the three-way catalysis 285

Oxygen storage capacity

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

Oxygen storage

Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299

Oxygen vacancies

Surface reactivity of MgO oxygen vacancies 533

Oxygen-storage properties

Ceria films on zirconia substrates: models for understanding oxygen-storage properties 343

Palladium on ceria

Carbon deposition in Pd/CeO₂ catalyst: TEM study 237

Partial oxidation

Catalytic routes to transportation fuels utilizing natural gas hydrates 97

Pd–Pt catalysts

Influence of the acidity of USY zeolite on the sulfur tolerance of Pd–Pt catalysts for aromatic hydrogenation 63

Pd-supported catalysts

Effect of ceria on palladium supported catalysts for high temperature combustion of CH₄ under lean conditions 399

Pd/CeO₂ catalyst

Carbon deposition in Pd/CeO₂ catalyst: TEM study 237

PdO decomposition/separation

Effect of ceria on palladium supported catalysts for high temperature combustion of CH₄ under lean conditions 399

PdO species

Effect of ceria on palladium supported catalysts for high temperature combustion of CH₄ under lean conditions 399

Pentene cracking

Theoretical studies of pentene cracking on zeolites: C–C β-scission processes 517

Pentyl carbenium ion

Theoretical studies of pentene cracking on zeolites: C–C β-scission processes 517

Phosphomolybdic acid

Transformation of phosphomolybdic acid into an active catalyst with potential application in coal liquefaction 149

Photodissociation

Theoretical studies of surface reactions on metals. I. Ethyl to ethylene conversion on Ni(1 0 0). II. Photodissociation of methane on platinum 603

Platinum catalyst

Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227

Platinum

Ab initio cluster model comparative study of atomic oxygen and sulfur chemisorption on Pt(1 1 1) surface: relevance to heterogeneous catalysis 613

Studies of the oxygen release reaction in the platinum–ceria–zirconia system 299

Pt/CeO₂

Decomposition of methanol on Pt-loaded ceria 369

QM/MM

Towards more realistic computational modeling of homogenous catalysis by density functional theory: combined QM/MM and ab initio molecular dynamics 479

Quantitative structure-property relationship

Heterogeneous catalysis: looking forward with molecular simulation 451

Quantum chemical calculations

Surface reactivity of MgO oxygen vacancies 533

Quantum chemistry

Theory, spectroscopy and kinetics of zeolite catalysed reactions 511

Reaction

Density functional studies of the electronic structure and adsorption at molybdenum oxide surfaces 567

Redox behavior

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

Redox mechanism

Redox chemistry over CeO₂-based catalysts: SO₂ reduction by CO or CH₄ 381

Reducibility

Effects of highly dispersed ceria addition on reducibility, activity and hydrocarbon chain growth of a Co/SiO₂ Fischer–Tropsch catalyst 413

Reduction by H₂

Magnetic study of the interaction of hydrogen with a Pt/CeO₂–Al₂O₃ catalyst: influence of the presence of chlorine 227

Reformulated gasoline

Production of reformulated gasoline in the FCC unit. Effect of feedstock type on gasoline composition 73

Reoxidation effects

Some recent results on metal/support interaction effects in NM/CeO₂ (NM: noble metal) catalysts 175

Rhodia

Oxygen-18 isotope exchange and equilibration processes over preoxidised and promoted ceria. Part I. ¹⁵N¹⁸O_(g) or (¹⁸O₂+¹⁶O_{2(g)}) 429

Sabatier principle

Transition metals to sulfur binding energies relationship to catalytic activities in HDS: back to Sabatier with first principle calculations 629

 β -scission processes

Theoretical studies of pentene cracking on zeolites: C–C β -scission processes 517

Selective catalytic reduction

Kinetics of the selective catalytic reduction of NO with NH_3 over $\text{MnO}_x/\text{Al}_2\text{O}_3$ catalysts at low temperature 133

Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125

Selective catalytic reduction of NO (SCR-HC)

Higher activity of $\text{CuCl}_2/\text{HZSM-5}$ prepared by dispersion method in selective catalytic reduction of NO by propylene (SCR-HC) at lower temperature 117

Selective hydrogenation

Towards understanding the mechanism for the selective hydrogenation of maleic anhydride to tetrahydrofuran over palladium 589

Sintering process

Textural and phase stability of $\text{Ce}_x\text{Zr}_{1-x}\text{O}_2$ mixed oxides under high temperature oxidising conditions 271

Soft chemistry

Preparation of zirconia–ceria materials by soft chemistry 261

Sol–gel method

Preparation of zirconia–ceria materials by soft chemistry 261

Solid oxide fuel cell

Simulation of a solid oxide fuel cell for oxidative coupling of methane 109

Spectroscopy

Theory, spectroscopy and kinetics of zeolite catalysed reactions 511

State of Pt

Decomposition of methanol on Pt-loaded ceria 369

Steady-state kinetics

Kinetics of the selective catalytic reduction of NO with NH_3 over $\text{MnO}_x/\text{Al}_2\text{O}_3$ catalysts at low temperature 133

Styrene

The utilization of ceria in industrial catalysis 353

Sulfides

Transformation of phosphomolybdic acid into an active catalyst with potential application in coal liquefaction 149

Sulfur dioxide reduction

Redox chemistry over CeO_2 -based catalysts: SO_2 reduction by CO or CH_4 381

Sulfur recovery

Redox chemistry over CeO_2 -based catalysts: SO_2 reduction by CO or CH_4 381

Sulfur tolerance

Influence of the acidity of USY zeolite on the sulfur tolerance of Pd–Pt catalysts for aromatic hydrogenation 63

Supported catalyst

CVD preparation of alumina-supported tungsten nitride and its activity for thiophene hydrodesulfurization 29

Surface fine structure

High pressure (≤ 5.1 MPa) DRIFT study on surface structure of Co–Mo/ Al_2O_3 and Ni–Mo/ Al_2O_3 using NO as probe molecule 3

Surface reactivity

Surface reactivity of MgO oxygen vacancies 533

Surfaces

Theoretical studies of surface reactions on metals. I. Ethyl to ethylene conversion on Ni(1 0 0). II. Photodissociation of methane on platinum 603

Synergetic effects

Transition metals to sulfur binding energies relationship to catalytic activities in HDS: back to Sabatier with first principle calculations 629

Tetrahydrofuran

Towards understanding the mechanism for the selective hydrogenation of maleic anhydride to tetrahydrofuran over palladium 589

Textural and phase stability

Textural and phase stability of $\text{Ce}_x\text{Zr}_{1-x}\text{O}_2$ mixed oxides under high temperature oxidising conditions 271

The Claus reaction

Adsorption and interaction of $\text{H}_2\text{S}/\text{SO}_2$ on TiO_2 39

Three-way catalysts

Use of CeO_2 -based oxides in the three-way catalysis 285

 TiO_2 and MgO surfaces

Hartree–Fock periodic study of the chemisorption of small molecules on TiO_2 and MgO surfaces 541

Titania

Adsorption and interaction of $\text{H}_2\text{S}/\text{SO}_2$ on TiO_2 39

The role of metal–support interactions in CO_2 reforming of CH_4 87

Transition metal oxides

On the mechanism and energetics of Boudouard reaction at FeO(1 0 0) surface: $2\text{COC} + \text{CO}_2$ 579

Transition metal sulfides

Transition metals to sulfur binding energies relationship to catalytic activities in HDS: back to Sabatier with first principle calculations 629

Tungsten nitride

CVD preparation of alumina-supported tungsten nitride and its activity for thiophene hydrodesulfurization 29

TWC

The utilization of ceria in industrial catalysis 353

USY zeolites

Influence of the acidity of USY zeolite on the sulfur tolerance of Pd–Pt catalysts for aromatic hydrogenation 63

 V_2O_5

Adsorption and reactions at the (0 1 0) V_2O_5 surface: cluster model studies 553

Wavefunction

The adsorption of methyl on Rh_{10} clusters: selective C–H bond weakening 621

 WCl_6

CVD preparation of alumina-supported tungsten nitride and its activity for thiophene hydrodesulfurization 29

Working state

High pressure (≤ 5.1 MPa) DRIFT study on surface structure of Co–Mo/Al₂O₃ and Ni–Mo/Al₂O₃ using NO as probe molecule 3

X-ray diffraction

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

Studies of the cerium-metal–oxygen–hydrogen system (metal=Cu, Ni) 247

YSZ

Ceria films on zirconia substrates: models for understanding oxygen-storage properties 343

Yttria stabilized zirconia (YSZ)

Simulation of a solid oxide fuel cell for oxidative coupling of methane 109

Zeolite

First-principles molecular dynamics study of small molecules in zeolites 501

Numerical modeling of the reduction of nitric oxide by ethylene over Cu-ZSM-5 under lean conditions 125

Predicting locations of non-framework species in zeolite materials 661

Theory, spectroscopy and kinetics of zeolite catalysed reactions 511

Zirconia

Ceria films on zirconia substrates: models for understanding oxygen-storage properties 343

Zirconia–ceria

Preparation of zirconia–ceria materials by soft chemistry 261

ZrO₂

In situ X-ray and neutron powder diffraction studies of redox behavior in CeO₂-containing oxide catalysts 329

Use of CeO₂-based oxides in the three-way catalysis 285

ZSM-5 zeolite

Higher activity of CuCl₂/HZSM-5 prepared by dispersion method in selective catalytic reduction of NO by propylene (SCR-HC) at lower temperature 117

ZSM-5

Diffusion and reaction in ZSM-5 and composite catalysts for the methanol-to-olefins process 637
