Erratum

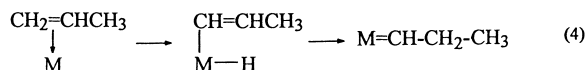

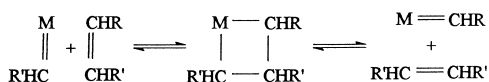

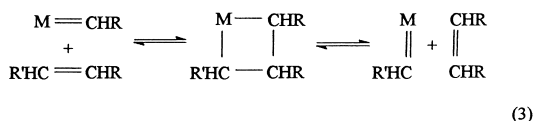

Erratum to “Olefin metathesis over supported rhenium oxide catalysts” [Catalysis Today 51 (1999) 289–299]★

Johannes C. Mol*

Institute of Molecular Chemistry, Universiteit van Amsterdam, Nieuwe Achtergracht 166, 1018 WV, Amsterdam, The Netherlands

As a result of a typesetting error the following corrections were omitted from the final published article. The Publisher regrets the mistakes and apologises to the author.

On page 291, Eqs. (3) and (4) should read as follows:

Page 291, right column, line 8: or- lead, should read, or -lead.

Page 293, right column, line 22: This sentence should read as follows; The adsorption of surface sites of ReO_4^- ions on *cus* Al^{3+} sites might result in the formation of new OH groups attached to these adsorbed Re centres, which could explain the slight increase in absorbance at low Re loadings.

Page 296, left column, line 32: This sentence should read as follows; Their spectrum of activated $\text{Re}_2\text{O}_7/\text{Al}_2\text{O}_3$ treated with 1% v/v $(\text{CH}_3)_4\text{Sn}$ shows, apart from rhenium bands at 996, 884 and 338 cm^{-1} , three new bands at 520, 547 and 777 cm^{-1} .

Page 296, right column, lines 3 and 8: $(\text{CH}_3)_3\text{SnReO}_3$, should read, $(\text{CH}_3)_3\text{SnOReO}_3$.
