Subject index

Activated carbon

Selective hydrogenolysis of CCl_2F_2 into CH_2F_2 over palladium on activated carbon. Kinetic mechanism and process design 221

Ageing

Combustion of methane on CeO_2 – ZrO_2 based catalysts 33

Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179

Aging

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

Alumina

Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287

Ammonia oxidation

Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH_3 -containing gasified biomasses 191

Automotive exhaust control

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

Average site activities

Steady-state isotopic transient kinetic analysis on Pd-supported hexaaluminates used for methane combustion in the presence and absence of NO 205

Barium hexaaluminates

Catalytic combustion of methane on substituted barium hexaaluminates 163

Boundary layer

A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47

Carbon disulfide

The low-temperature hydrolysis of carbonyl sulfide and carbon disulfide: a review 443

Carbonyl sulfide

The low-temperature hydrolysis of carbonyl sulfide and carbon disulfide: a review 443

Catalyst bed

Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75

Catalytic activity

Pt and Pd supported on glass fibers as effective combustion catalysts 61

Catalytic activity of Pt and tungstophosphoric acid supported on MCM-41 for the reduction of NO_x in the presence of water vapor 313

Catalytic combustion

Combustion of methane on CeO_2 – ZrO_2 based catalysts 33

A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47

Pt and Pd supported on glass fibers as effective combustion catalysts 61

Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75

Promotion of methane combustion activity of Pd catalyst by titania loading 87

Catalytic combustion of low heating value gas mixtures: comparison between laboratory and pilot scale tests 117

Experimental and numerical investigation on the influence of temporal fuel/air unmixedness on NO_x emissions of lean premixed catalytically stabilized and non-catalytic combustion 131

Hydrogen assisted catalytic combustion of methane on platinum 141

Catalytic combustion of methane on substituted barium hexaaluminates 163

Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179

Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH_3 -containing gasified biomasses 191

Catalytic combustion technology

Development of catalytic combustion technology for single-digit emissions from industrial gas turbines 95

Catalytic combustors

Mathematical modelling of catalytic combustors fuelled by gasified biomasses 151

Catalytic ignition

Hydrogen assisted catalytic combustion of methane on platinum 141

Catalytic oxidation

The activity and mechanism of uranium oxide catalysts for the oxidative destruction of volatile organic compounds 249

CCl_2F_2

Selective hydrogenolysis of CCl_2F_2 into CH_2F_2 over palladium on activated carbon. Kinetic mechanism and process design 221

- CeO₂–ZrO₂ mixed oxides
Modification of the oxygen storage capacity of CeO₂–ZrO₂ mixed oxides after redox cycling aging 373
- Ceria
New ceria-based catalysts for pollution abatement 387
- Ceria–zirconia solid solutions
Combustion of methane on CeO₂–ZrO₂ based catalysts 33
- CH₂F₂
Selective hydrogenolysis of CCl₂F₂ into CH₂F₂ over palladium on activated carbon. Kinetic mechanism and process design 221
- Chlorinated hydrocarbons
Cr-doped Zr, Si-mesoporous molecular sieves as catalysts of CH₂Cl₂ oxidation 241
- Chlorofluorocarbons
Group VI transition metal carbides as alternatives in the hydrodechlorination of chlorofluorocarbons 231
- Chromium catalysts
Cr-doped Zr, Si-mesoporous molecular sieves as catalysts of CH₂Cl₂ oxidation 241
- Co/Mo/Al₂O₃ catalyst
Hydrosulfurization of hindered dibenzothiophenes: an overview 423
- Cobalt
Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287
- Combustion
The application of “superacidic” metal oxides and their platinum doped counterparts to methane combustion 403
- CuZSM5
Potentialities and limitations of lean de-NO_x catalysts in reducing automotive exhaust emissions 279
- Deactivation
Group VI transition metal carbides as alternatives in the hydrodechlorination of chlorofluorocarbons 231
- Deep oxidation
Cr-doped Zr, Si-mesoporous molecular sieves as catalysts of CH₂Cl₂ oxidation 241
- de-NO_x
Potentialities and limitations of lean de-NO_x catalysts in reducing automotive exhaust emissions 279
Plasmacatalytic processes for environmental problems 411
- Dibenzothiophene
Hydrosulfurization of hindered dibenzothiophenes: an overview 423
- Diesel
NO_x sorption–desorption study: application to diesel and lean-burn exhaust gas (selective NO_x recirculation technique) 323
- Diesel engines
Urea-SCR: a promising technique to reduce NO_x emissions from automotive diesel engines 335
- DRIFTS
Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287
- A study of the mechanism of selective conversion of ammonia to nitrogen on Ni/γ-Al₂O₃ under strongly oxidising conditions 365
- Elementary heterogeneous
Numerical modelling of turbulent catalytically stabilized channel flow combustion 3
- Flame ignition
Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75
- Flue-gas conditioning
Pilot plant performance of a SO₂ to SO₃ oxidation catalyst for flue-gas conditioning 417
- Gasified biomass
Mathematical modelling of catalytic combustors fuelled by gasified biomasses 151
Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179
Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH₃-containing gasified biomasses 191
- Glass fibers
Pt and Pd supported on glass fibers as effective combustion catalysts 61
- Group VI carbide catalysts
Group VI transition metal carbides as alternatives in the hydrodechlorination of chlorofluorocarbons 231
- Hexaaluminate
Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75
Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179
Steady-state isotopic transient kinetic analysis on Pd-supported hexaaluminates used for methane combustion in the presence and absence of NO 205
- Homogeneous chemical reactions
Numerical modelling of turbulent catalytically stabilized channel flow combustion 3
- Honeycomb monolith
A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47
- Hydrochlorination
Group VI transition metal carbides as alternatives in the hydrodechlorination of chlorofluorocarbons 231
- Hydrosulfurization
Hydrosulfurization of hindered dibenzothiophenes: an overview 423
- Hydrogenolysis
Selective hydrogenolysis of CCl₂F₂ into CH₂F₂ over palladium on activated carbon. Kinetic mechanism and process design 221
- In situ SCR
A study of the mechanism of selective conversion of ammonia to nitrogen on Ni/γ-Al₂O₃ under strongly oxidising conditions 365

- Industrial gas turbines
Development of catalytic combustion technology for single-digit emissions from industrial gas turbines 95
- Iron
Catalytic combustion of methane on substituted barium hexaaluminates 163
- Kinetic mechanism
Selective hydrogenolysis of CCl_2F_2 into CH_2F_2 over palladium on activated carbon. Kinetic mechanism and process design 221
- Lean premixed
Experimental and numerical investigation on the influence of temporal fuel/air unmixedness on NO_x emissions of lean premixed catalytically stabilized and non-catalytic combustion 131
- Lean-burn exhaust gas
 NO_x sorption–desorption study: application to diesel and lean-burn exhaust gas (selective NO_x recirculation technique) 323
- Lean- NO_x
Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the $\text{NO}+\text{CO}$ and $\text{NO}+\text{CH}_4+\text{O}_2$ (lean- NO_x) reactions 347
- Low heating value fuels
Catalytic combustion of low heating value gas mixtures: comparison between laboratory and pilot scale tests 117
- Low-temperature hydrolysis
The low-temperature hydrolysis of carbonyl sulfide and carbon disulfide: a review 443
- Manganese
Catalytic combustion of methane on substituted barium hexaaluminates 163
Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179
- Manganese oxide
Combustion of methane on $\text{CeO}_2\text{–ZrO}_2$ based catalysts 33
- Mathematical modelling
Mathematical modelling of catalytic combustors fuelled by gasified biomasses 151
- Mesoporous material
Promotion of methane combustion activity of Pd catalyst by titania loading 87
- Mesoporous molecular sieves
Cr-doped Zr, Si-mesoporous molecular sieves as catalysts of CH_2Cl_2 oxidation 241
- Me-substituted hexaaluminate catalysts
Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH_3 -containing gasified biomasses 191
- Methane
Low temperature oxidation of methane over Pd catalyst supported on metal oxides 69
Promotion of methane combustion activity of Pd catalyst by titania loading 87
The application of “superacidic” metal oxides and their platinum doped counterparts to methane combustion 403
- Methane combustion
Methane combustion on perovskites-based structured catalysts 19
- Methylene chloride
Cr-doped Zr, Si-mesoporous molecular sieves as catalysts of CH_2Cl_2 oxidation 241
- Modeling
Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75
- Monolith
Methane combustion on perovskites-based structured catalysts 19
Pilot plant performance of a SO_2 to SO_3 oxidation catalyst for flue-gas conditioning 417
- Monolith catalysts
Mathematical modelling of catalytic combustors fuelled by gasified biomasses 151
- Monolithic perovskite catalysts
Combustion of volatile organic compounds in two-component mixtures over monolithic perovskite catalysts 269
- Multi-step surface reaction
Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75
- Natural gas
Combustion of methane on $\text{CeO}_2\text{–ZrO}_2$ based catalysts 33
- Navier–Stokes
A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47
- $\text{NH}_3\text{–SCR}$
Plasmacatalytic processes for environmental problems 411
- Ni/Mo/ Al_2O_3 catalyst
Hydrodesulfurization of hindered dibenzothiophenes: an overview 423
- Nickel
A study of the mechanism of selective conversion of ammonia to nitrogen on $\text{Ni}/\gamma\text{–Al}_2\text{O}_3$ under strongly oxidising conditions 365
- Nitrate
A study of the mechanism of selective conversion of ammonia to nitrogen on $\text{Ni}/\gamma\text{–Al}_2\text{O}_3$ under strongly oxidising conditions 365
- Nitrogen
A study of the mechanism of selective conversion of ammonia to nitrogen on $\text{Ni}/\gamma\text{–Al}_2\text{O}_3$ under strongly oxidising conditions 365
- NO_x
Experimental and numerical investigation on the influence of temporal fuel/air unmixedness on NO_x emissions of lean premixed catalytically stabilized and non-catalytic combustion 131
- NO
Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287
- NO_2
Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287

NO_x conversion

Catalytic combustion of low heating value gas mixtures: comparison between laboratory and pilot scale tests 117

NO_x emission

Catalytic combustion of low heating value gas mixtures: comparison between laboratory and pilot scale tests 117

Urea-SCR: a promising technique to reduce NO_x emissions from automotive diesel engines 335

NO reduction

Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH₃-containing gasified biomasses 191

NO_x reduction

Catalytic activity of Pt and tungstophosphoric acid supported on MCM-41 for the reduction of NO_x in the presence of water vapor 313

NO reduction

Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the NO+CO and NO+CH₄+O₂ (lean-NO_x) reactions 347

NO TPD

Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the NO+CO and NO+CH₄+O₂ (lean-NO_x) reactions 347

Non-thermal electrical discharge

Plasmacatalytic processes for environmental problems 411

Numerical modeling

A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47

Numerical simulation

Hydrogen assisted catalytic combustion of methane on platinum 141

O₂ TPD

Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the NO+CO and NO+CH₄+O₂ (lean-NO_x) reactions 347

Oscillations

Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the NO+CO and NO+CH₄+O₂ (lean-NO_x) reactions 347

Oxidation

Low temperature oxidation of methane over Pd catalyst supported on metal oxides 69

Combustion of volatile organic compounds in two-component mixtures over monolithic perovskite catalysts 269

The application of “superacidic” metal oxides and their platinum doped counterparts to methane combustion 403

Oxygen storage capacity

Modification of the oxygen storage capacity of CeO₂–ZrO₂ mixed oxides after redox cycling aging 373

Palladium

Promotion of methane combustion activity of Pd catalyst by titania loading 87

Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179

Selective hydrogenolysis of CCl₂F₂ into CH₂F₂ over palladium on activated carbon. Kinetic mechanism and process design 221

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

Pd

Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75

Pd catalyst

Low temperature oxidation of methane over Pd catalyst supported on metal oxides 69

Perovskites

Methane combustion on perovskites-based structured catalysts 19

Catalytic behavior of La–Sr–Ce–Fe–O mixed oxidic/perovskitic systems for the NO+CO and NO+CH₄+O₂ (lean-NO_x) reactions 347

Pilot scale tests

Mathematical modelling of catalytic combustors fuelled by gasified biomasses 151

Plasmacatalytic process

Plasmacatalytic processes for environmental problems 411

Platinum

Combustion of methane on CeO₂–ZrO₂ based catalysts 33

Ageing of palladium, platinum and manganese-based combustion catalysts for biogas applications 179

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

The application of “superacidic” metal oxides and their platinum doped counterparts to methane combustion 403

Plug flow

A critical evaluation of Navier–Stokes, boundary-layer, and plug-flow models of the flow and chemistry in a catalytic-combustion monolith 47

Process design

Selective hydrogenolysis of CCl₂F₂ into CH₂F₂ over palladium on activated carbon. Kinetic mechanism and process design 221

Propene

Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287

Pt

Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75

Pt/MCM-41

Catalytic activity of Pt and tungstophosphoric acid supported on MCM-41 for the reduction of NO_x in the presence of water vapor 313

Pt–γ-Al₂O₃

Potentialities and limitations of lean de-NO_x catalysts in reducing automotive exhaust emissions 279

PXRD

New ceria-based catalysts for pollution abatement 387

Reaction kinetics

Hydrogen assisted catalytic combustion of methane on platinum 141

Redox aging

Modification of the oxygen storage capacity of CeO₂–ZrO₂ mixed oxides after redox cycling aging 373

Rhodium

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

SCR

Potentialities and limitations of lean de-NO_x catalysts in reducing automotive exhaust emissions 279

Characterization and reactivity of pure TiO₂–SO₄^{2–} SCR catalyst: influence of SO₄^{2–} content 305

SCR catalysts

A study of the abatement of VOC over V₂O₅–WO₃–TiO₂ and alternative SCR catalysts 261

Selective ammonia oxidation

A study of the mechanism of selective conversion of ammonia to nitrogen on Ni/γ-Al₂O₃ under strongly oxidising conditions 365

Selective NO_x recirculation

NO_x sorption–desorption study: application to diesel and lean-burn exhaust gas (selective NO_x recirculation technique) 323

Silver

Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287

Single-digit emissions

Development of catalytic combustion technology for single-digit emissions from industrial gas turbines 95

SNCR

Preparation, characterization and reactivity of Me-hexaaluminate (Me=Mn, Co, Fe, Ni, Cr) catalysts in the catalytic combustion of NH₃-containing gasified biomasses 191

SO₂ abatement

Pilot plant performance of a SO₂ to SO₃ oxidation catalyst for flue-gas conditioning 417

Sol–gel synthesis

Catalytic combustion of methane on substituted barium hexaaluminates 163

Steady-state isotopic transient kinetic analysis

Steady-state isotopic transient kinetic analysis on Pd-supported hexaaluminates used for methane combustion in the presence and absence of NO 205

Structured catalysts

Pt and Pd supported on glass fibers as effective combustion catalysts 61

Sulfur dioxide oxidation

Pilot plant performance of a SO₂ to SO₃ oxidation catalyst for flue-gas conditioning 417

Sulphate

Mechanistic differences in the selective reduction of NO by propene over cobalt- and silver-promoted alumina catalysts: kinetic and in situ DRIFTS study 287

Superacids

The application of “superacidic” metal oxides and their platinum doped counterparts to methane combustion 403

Supported catalysts

Methane combustion on perovskites-based structured catalysts 19

Surface concentrations

Steady-state isotopic transient kinetic analysis on Pd-supported

hexaaluminates used for methane combustion in the presence and absence of NO 205

Surface lifetimes

Steady-state isotopic transient kinetic analysis on Pd-supported hexaaluminates used for methane combustion in the presence and absence of NO 205

Temperature programmed reduction

Catalytic combustion of methane on substituted barium hexaaluminates 163

Temporal analysis of products

The activity and mechanism of uranium oxide catalysts for the oxidative destruction of volatile organic compounds 249

Thermal combustor

Experimental and numerical studies on combustion characteristics of a catalytically stabilized combustor 75

Thermal stability

Catalytic combustion of methane on substituted barium hexaaluminates 163

Titania

Promotion of methane combustion activity of Pd catalyst by titania loading 87

Titania sulfate

Characterization and reactivity of pure TiO₂–SO₄^{2–} SCR catalyst: influence of SO₄^{2–} content 305

TPR

New ceria-based catalysts for pollution abatement 387

Tungstophosphoric acid

Catalytic activity of Pt and tungstophosphoric acid supported on MCM-41 for the reduction of NO_x in the presence of water vapor 313

TWC

Thermal aging of Pd/Pt/Rh automotive catalysts under a cycled oxidizing–reducing environment 395

Two-dimensional turbulent combustion modelling

Numerical modelling of turbulent catalytically stabilized channel flow combustion 3

Uranium oxide

The activity and mechanism of uranium oxide catalysts for the oxidative destruction of volatile organic compounds 249

Urea-SCR

Urea-SCR: a promising technique to reduce NO_x emissions from automotive diesel engines 335

VOC

The activity and mechanism of uranium oxide catalysts for the oxidative destruction of volatile organic compounds 249

A study of the abatement of VOC over V₂O₅–WO₃–TiO₂ and alternative SCR catalysts 261

Volatile organic compounds

Combustion of volatile organic compounds in two-component mixtures over monolithic perovskite catalysts 269

Plasmacatalytic processes for environmental problems 411

V₂O₅–WO₃–TiO₂

A study of the abatement of VOC over V₂O₅–WO₃–TiO₂ and alternative SCR catalysts 261
