

ELSEVIER

Catalysis Today 60 (2000) 323–327

www.elsevier.com/locate/cattod

Subject index

Acetic acid

Recovery of dilute acetic acid through esterification in a reactive distillation column 147

Acrylonitrile

Catalytic technology assisted with ionization/ozonization phase for the abatement of volatile organic compounds 129

Activity

Synthesis of cyclohexylcyclohexanone on bifunctional Pd faujasites. Influence of the balance between the acidity and the metallic function 311

Adsorption–desorption

Dynamics of SCR reaction over a TiO₂-supported vanadia–tungsta commercial catalyst 73

Advanced reactor configuration

An advanced reactor configuration for the partial oxidation of methane to synthesis gas 63

Aldol condensation

Base-catalyzed condensation of citral and acetone at low temperature using modified hydrotalcite catalysts 297

Alkylation

Regioselective dialkylation of naphthalene 227

t-Butylation of 1,2-dihydroxybenzene over acidic zeolites 255

Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263

Basic sites

Base-catalyzed condensation of citral and acetone at low temperature using modified hydrotalcite catalysts 297

Bifunctional catalysis

Synthesis of cyclohexylcyclohexanone on bifunctional Pd faujasites. Influence of the balance between the acidity and the metallic function 311

Biphenyl

Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243

Bubble columns

Fibrous structured catalytic beds for three-phase reaction engineering. Hydrodynamics study in staged bubble columns 51

n-Butanol

Recovery of dilute acetic acid through esterification in a reactive distillation column 147

n-Butyl acetate

Recovery of dilute acetic acid through esterification in a reactive distillation column 147

Caesium vanadates

Diesel particulate abatement via catalytic traps 33

Catalysis

Modification of faujasites to generate novel hosts for “ship-in-a-bottle” complexes 193

Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263

Catalyst

Catalytic technology assisted with ionization/ozonization phase for the abatement of volatile organic compounds 129

Catalyst deactivation

Effect of H₂S on the stability of CoMo/Al₂O₃ catalysts during hydrodeoxygenation 83

Catalyst development

The six-flow reactor technology. A review on fast catalyst screening and kinetic studies 93

Heterogeneous catalysis for fine chemicals production 161

Catalyst testing

The six-flow reactor technology. A review on fast catalyst screening and kinetic studies 93

Catalytic combustion

Methane combustion over low-emission catalytic foam burners 21

Diesel particulate abatement via catalytic traps 33

Catalytic technology assisted with ionization/ozonization phase for the abatement of volatile organic compounds 129

Catalytic oxidation

The role of NO in the regeneration of catalytic ceramic filters for soot removal from exhaust gases 43

Catalytic processes

Heterogeneous catalysis for fine chemicals production 161

Catalytic steam reforming

Catalytic production of hydrogen from methanol 3

Catalytic washcoat

Catalytic production of hydrogen from methanol 3

Ceramic foam

Methane combustion over low-emission catalytic foam burners 21

Ceria-modification

Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243

Citral

Base-catalyzed condensation of citral and acetone at low temperature using modified hydrotalcite catalysts 297

- Enantioselective
 - Enantioselective hydrogenation of ethyl pyruvate. Long-term performance of chirally modified Pt/zeolite catalysts 167
- Enantioselective hydrogenation
 - The effect of oxygen and the reduction temperature of the Pt/Al₂O₃ catalyst in enantioselective hydrogenation of 1-phenyl-1,2-propanedione 175
- Environmental protection
 - Multicomponent reactions under clay catalysis 305
- Epoxidation
 - Heterogeneous tungsten-based catalysts for the epoxidation of bulky olefins 209
 - Catalytic epoxidation of unsaturated alcohols on Ti-MCM-41 219
- Esterification
 - Recovery of dilute acetic acid through esterification in a reactive distillation column 147
- Ethyl pyruvate
 - Enantioselective hydrogenation of ethyl pyruvate. Long-term performance of chirally modified Pt/zeolite catalysts 167
- External acid site
 - Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243
- FCC
 - Maximization of FCC light olefins by high severity operation and ZSM-5 addition 111
- Fibrous structured catalysts
 - Fibrous structured catalytic beds for three-phase reaction engineering. Hydrodynamics study in staged bubble columns 51
- Fine chemicals
 - Heterogeneous catalysis for fine chemicals production 161
- Fixed-bed reactors
 - Characteristics of metallic structured catalysts with high thermal conductivity 57

- Fluidized bed
Industrial experience of heat supply by catalytic installations 139
- Foam
Catalytic production of hydrogen from methanol 3
- Foam trap
Diesel particulate abatement via catalytic traps 33
- Green chemistry
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- H₂-chemisorption
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- Heat exchanger
Catalytic production of hydrogen from methanol 3
- Heat supply installations
Industrial experience of heat supply by catalytic installations 139
- Heterogeneous catalysis
Heterogeneous catalysis for fine chemicals production 161
Heterogeneous tungsten-based catalysts for the epoxidation of bulky olefins 209
Selectivity of large pore zeolites in the alkylation of naphthalene with *tert*-butyl alcohol: analysis of experimental results by computational modelling 235
- Heterogeneous catalysts
Industrial experience of heat supply by catalytic installations 139
- Heteropolyacids
Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263
- High severity operation
Maximization of FCC light olefins by high severity operation and ZSM-5 addition 111
- HIWAR
An advanced reactor configuration for the partial oxidation of methane to synthesis gas 63
- H-Mordenite
Regioselective dialkylation of naphthalene 227
Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243
- H₂S
Effect of H₂S on the stability of CoMo/Al₂O₃ catalysts during hydrodeoxygenation 83
- Hydrodeoxygenation
Effect of H₂S on the stability of CoMo/Al₂O₃ catalysts during hydrodeoxygenation 83
- Hydrosulfurization
Effect of H₂S on the stability of CoMo/Al₂O₃ catalysts during hydrodeoxygenation 83
- Hydrodynamics
Fibrous structured catalytic beds for three-phase reaction engineering. Hydrodynamics study in staged bubble columns 51
- Hydrogen peroxide
Decolorization of water for domestic supply employing UV radiation and hydrogen peroxide 119
Heterogeneous tungsten-based catalysts for the epoxidation of bulky olefins 209
- Hydrogen production
Catalytic production of hydrogen from methanol 3
- Hydrogenation
Enantioselective hydrogenation of ethyl pyruvate. Long-term performance of chirally modified Pt/zeolite catalysts 167
- Hydroquinone
Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263
- Hydrotalcite
Base-catalyzed condensation of citral and acetone at low temperature using modified hydrotalcite catalysts 297
- In situ pyrolysis
Methane combustion over low-emission catalytic foam burners 21
- Indole
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Industrial application
Heterogeneous catalysis for fine chemicals production 161
- Ion-exchange resin
Recovery of dilute acetic acid through esterification in a reactive distillation column 147
- iso*-amyl acetate
Recovery of dilute acetic acid through esterification in a reactive distillation column 147
- iso*-amyl alcohol
Recovery of dilute acetic acid through esterification in a reactive distillation column 147
- Isobutene
t-Butylation of 1,2-dihydroxybenzene over acidic zeolites 255
- Isomerization
Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243
- Isopropylation
Ceria-modification of H-mordenites. The deactivation of external acid sites in the isopropylation of biphenyl and the isomerization of 4,4'-diisopropylbiphenyl 243
- Kinetic diameter
Selectivity of large pore zeolites in the alkylation of naphthalene with *tert*-butyl alcohol: analysis of experimental results by computational modelling 235
- Kinetic studies
The six-flow reactor technology. A review on fast catalyst screening and kinetic studies 93
- Laboratory reactor
The six-flow reactor technology. A review on fast catalyst screening and kinetic studies 93

- LaMnO₃ perovskite
Methane combustion over low-emission catalytic foam burners 21
- Light olefins
Maximization of FCC light olefins by high severity operation and ZSM-5 addition 111
- MCM-41 materials
Heterogeneous tungsten-based catalysts for the epoxidation of bulky olefins 209
- Mesopores
Modification of faujasites to generate novel hosts for “ship-in-a-bottle” complexes 193
- Methane
Methane combustion over low-emission catalytic foam burners 21
- Methanol
Catalytic production of hydrogen from methanol 3
- Methyl-*tert*-butyl-ether
Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263
- Monoliths
Characteristics of metallic structured catalysts with high thermal conductivity 57
- Multicomponent reactions
Multicomponent reactions under clay catalysis 305
- Multi-phase reactions
Fibrous structured catalytic beds for three-phase reaction engineering. Hydrodynamics study in staged bubble columns 51
- Naphthalene
Regioselective dialkylation of naphthalene 227
- Nitrotoluene
Potential routes for the nitration of toluene and nitrotoluene with solid acids 275
- No effect
The role of NO in the regeneration of catalytic ceramic filters for soot removal from exhaust gases 43
- Olefin
Modification of faujasites to generate novel hosts for “ship-in-a-bottle” complexes 193
- Oxidation
Modification of faujasites to generate novel hosts for “ship-in-a-bottle” complexes 193
- Oxygen
The effect of oxygen and the reduction temperature of the Pt/Al₂O₃ catalyst in enantioselective hydrogenation of 1-phenyl-1,2-propanedione 175
- Partial oxidation of methane

- PdHFAU catalysts
Synthesis of cyclohexylcyclohexanone on bifunctional Pd faujasites. Influence of the balance between the acidity and the metallic function 311
- Peat
Industrial experience of heat supply by catalytic installations 139
- Photoreactor
Decolorization of water for domestic supply employing UV radiation and hydrogen peroxide 119
- Platinum
The effect of oxygen and the reduction temperature of the Pt/Al₂O₃ catalyst in enantioselective hydrogenation of 1-phenyl-1,2-propanedione 175
- Platinum supported catalysts
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- Prostaglandin-F intermediate
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- Pt/zeolite catalysts
Enantioselective hydrogenation of ethyl pyruvate. Long-term performance of chirally modified Pt/zeolite catalysts 167
- Pyrrole
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Pyrrolidine
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Quinoline
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Reactions in water
Multicomponent reactions under clay catalysis 305
- Reactive distillation
Recovery of dilute acetic acid through esterification in a reactive distillation column 147
Potential routes for the nitration of toluene and nitrotoluene with solid acids 275
- Reduction temperature
The effect of oxygen and the reduction temperature of the Pt/Al₂O₃ catalyst in enantioselective hydrogenation of 1-phenyl-1,2-propanedione 175
- Regeneration
t-Butylation of 1,2-dihydroxybenzene over acidic zeolites 255
- Regioselectivity
Regioselective dialkylation of naphthalene 227
- Salen
Modification of faujasites to generate novel hosts for “ship-in-a-bottle” complexes 193
- Selective catalytic reduction
Dynamics of SCR reaction over a TiO₂-supported vanadia-tungsta commercial catalyst 73
- Selectivity
Synthesis of cyclohexylcyclohexanone on bifunctional Pd faujasites. Influence of the balance between the acidity and the metallic function 311

- Shape-selectivity
Selectivity of large pore zeolites in the alkylation of naphthalene with *tert*-butyl alcohol: analysis of experimental results by computational modelling 235
- Silylation
t-Butylation of 1,2-dihydroxybenzene over acidic zeolites 255
- SiO₂
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Six-flow technology
The six-flow reactor technology. A review on fast catalyst screening and kinetic studies 93
- Solid acids
Potential routes for the nitration of toluene and nitrotoluene with solid acids 275
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Solid base catalysts
Base-catalyzed condensation of citral and acetone at low temperature using modified hydrocalcite catalysts 297
- Soot
Diesel particulate abatement via catalytic traps 33
- Soot abatement
The role of NO in the regeneration of catalytic ceramic filters for soot removal from exhaust gases 43
- Stability
Synthesis of cyclohexylcyclohexanone on bifunctional Pd faujasites. Influence of the balance between the acidity and the metallic function 311
- Structured catalysts
Characteristics of metallic structured catalysts with high thermal conductivity 57
- Sulfiding agents
Effect of H₂S on the stability of CoMo/Al₂O₃ catalysts during hydrodeoxygenation 83
- tert*-Butanol
Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263
- 2-*tert*-Butylhydroquinone
Alkylation of hydroquinone with methyl-*tert*-butyl-ether and *tert*-butanol 263
- Texture
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- Ti-MCM-41
Catalytic epoxidation of unsaturated alcohols on Ti-MCM-41 219
- TPO
The role of NO in the regeneration of catalytic ceramic filters for soot removal from exhaust gases 43
- Tungsten catalysis
Heterogeneous tungsten-based catalysts for the epoxidation of bulky olefins 209
- Unsaturated alcohols
Catalytic epoxidation of unsaturated alcohols on Ti-MCM-41 219
- UV radiation
Decolorization of water for domestic supply employing UV radiation and hydrogen peroxide 119
- Vapour phase nitration
Potential routes for the nitration of toluene and nitrotoluene with solid acids 275
- Vapour phase synthesis
Environment-friendly synthesis of nitrogen-containing heterocyclic compounds 289
- Vinyl chloride
Catalytic technology assisted with ionization/ozonization phase for the abatement of volatile organic compounds 129
- Volatile organic compounds
Catalytic technology assisted with ionization/ozonization phase for the abatement of volatile organic compounds 129
- V₂O₅–WO₃/TiO₂ catalyst
Dynamics of SCR reaction over a TiO₂-supported vanadia-tungsta commercial catalyst 73
- Washcoats
Simplified method of effectiveness factor calculations for irregular geometries of washcoats. A general case in a 3D concentration field 11
- Water decolorization
Decolorization of water for domestic supply employing UV radiation and hydrogen peroxide 119
- XPS
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- XRD
Diastereoselective hydrogenation of a prostaglandinic intermediate over chirally modified Pt/Al₂O₃ 185
- Zeolite beta
Potential routes for the nitration of toluene and nitrotoluene with solid acids 275
- Zeolites
Selectivity of large pore zeolites in the alkylation of naphthalene with *tert*-butyl alcohol: analysis of experimental results by computational modelling 235
t-Butylation of 1,2-dihydroxybenzene over acidic zeolites 255
- ZSM-5 addition
Maximization of FCC light olefins by high severity operation and ZSM-5 addition 111
