

ELSEVIER

Catalysis Today 62 (2000) 391–395

www.elsevier.com/locate/cattod

Subject index

- Acetic acid oxidation
Catalytic oxidation of odorous organic acids 347
- Activated carbon
Bimetallic Pt–Sn catalysts supported on activated carbon. II. CO oxidation 337
- Activated carbon support
Bimetallic Pt–Sn catalysts supported on activated carbon. II. CO oxidation 337
- Adsorption
Investigation of simultaneous adsorption of SO₂ and NO_x on Na- γ -alumina with transient techniques 319
- Alumina
Investigation of simultaneous adsorption of SO₂ and NO_x on Na- γ -alumina with transient techniques 319
- Array microreactors
Application of combinatorial catalysis to the selective reduction of NO by C₃H₆ 281
- Asymmetric catalysis
Axially chiral monophosphine ligands (MOPs) and their use for palladium-catalyzed asymmetric hydrosilylation of olefins 3
- Autoexhaust emissions control
Application of combinatorial catalysis to the selective reduction of NO by C₃H₆ 281
- Automotive catalysts
Twenty-five years after introduction of automotive catalysts: what next? 35
- Autothermal operation
Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91
- Base catalyzed double bond isomerization
Environmentally benign manufacturing of fine and intermediate chemicals 115
- BASF-citral-process
Environmentally benign manufacturing of fine and intermediate chemicals 115
- BASF-*tert*.-butylamine-process
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Beckmann-rearrangement
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Benign
Heterogeneous catalysis in supercritical water 167
- Benzene hydrogenation
Bimetallic Pt–Sn catalysts supported on activated carbon. II. CO oxidation 337
- Brønsted acidity
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- n*-Butane isomerization
n-Butane and *n*-pentane isomerization over mesoporous and conventional sulfated zirconia catalysts 255
- 1-Butene
Structure/function relationships for basic zeolite catalysts containing occluded alkali species 241
- Butyric acid oxidation
Catalytic oxidation of odorous organic acids 347
- Catalyst deactivation
Catalytic hydrodehalogenation as a detoxification methodology 355
- Catalyst optimization
Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91
- Catalytic combustion
Environmental catalysis for stationary applications 51
- Catalytic degradation
Catalytic degradation of polystyrene into styrene and a design of recyclable polystyrene with dispersed catalysts 67
- Catalytic hydrodebromination
Catalytic hydrodehalogenation as a detoxification methodology 355
- Catalytic hydrodechlorination
Catalytic hydrodehalogenation as a detoxification methodology 355
- Catalytic oxidation
Catalytic oxidation of odorous organic acids 347
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Catalytic process
Catalysis science and technology for cleaner transportation fuels 77
- Catalytic wet oxidation
Catalytic wet oxidation of phenol over Pt_xAg_{1-x}MnO₂/CeO₂ catalysts 379

- Cerium and manganese oxides
Catalytic wet oxidation of phenol over $\text{Pt}_x\text{Ag}_{1-x}\text{MnO}_2/\text{CeO}_2$ catalysts 379
- Cerium oxide catalysts
Ceria-based catalysts for the recovery of elemental sulfur from SO_2 -laden gas streams 145
- Cesium
Structure/function relationships for basic zeolite catalysts containing occluded alkali species 241
- Chlorinated volatile organic compounds
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Chlorofluorocarbons
Hydrodechlorination of chlorofluorocarbons $\text{CF}_3\text{--CFCl}_2$ and $\text{CF}_3\text{--CCl}_3$ over Pd/carbon and Pd black catalysts 269
- CO oxidation
Bimetallic Pt–Sn catalysts supported on activated carbon. II. CO oxidation 337
- Combinatorial catalysis
Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91
- Combinatorial heterogeneous catalysis
Application of combinatorial catalysis to the selective reduction of NO by C_3H_6 281
- Combustion
Catalytic combustion of methane on Pd–Cu/SiO₂ catalysts 209
- Copper
Catalytic combustion of methane on Pd–Cu/SiO₂ catalysts 209
- Copper oxide
Ceria-based catalysts for the recovery of elemental sulfur from SO_2 -laden gas streams 145
- Cu/Al₂O₃
Catalytic oxidation of odorous organic acids 347
- CuO/ γ -Al₂O₃
The effect of oxygen concentration on the reduction of NO with propylene over CuO/ γ -Al₂O₃ 303
- Cyclopentane oxidation mechanism
Oxidative catalytic removal of hydrocarbons over Pt/Al₂O₃ catalysts 189
- p*-Cymene production
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Deactivation
Isobutane/butene alkylation: regeneration of solid acid catalysts 135
- Dehalogenation kinetics
Catalytic hydrodehalogenation as a detoxification methodology 355
- Deposition method
The performance in a fluidized bed reactor of photocatalysts immobilized onto inert supports 175
- Dichlorobenzene
Catalytic oxidation of 1,2-dichlorobenzene over ABO₃-type perovskites 329
- 1,2-Dichloroethane
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Direct oxidation to nicotinic acid
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Direct oxidation to phenol
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Dispersed catalysts
Catalytic degradation of polystyrene into styrene and a design of recyclable polystyrene with dispersed catalysts 67
- Elemental sulfur
Ceria-based catalysts for the recovery of elemental sulfur from SO_2 -laden gas streams 145
- Enones
Novel heterobimetallic asymmetric catalysis directing toward enzymatic function 17
- Environmental catalysis
Environmental catalysis for stationary applications 51
- Environmental friendly dopant
An environmental friendly dopant for the high-temperature shift catalysts 201
- Environmental protection
Environmentally benign manufacturing of fine and intermediate chemicals 115
- Enzymatic function
Novel heterobimetallic asymmetric catalysis directing toward enzymatic function 17
- Epoxyketones
Novel heterobimetallic asymmetric catalysis directing toward enzymatic function 17
- Evolutionary approach
Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91
- Fluidized beds
The performance in a fluidized bed reactor of photocatalysts immobilized onto inert supports 175
- Fuel processing
Selective catalytic oxidation of CO in H₂: fuel cell applications 249
- Graphitic carbon growth
Catalytic hydrodehalogenation as a detoxification methodology 355
- Heterobimetallic asymmetric catalysis
Novel heterobimetallic asymmetric catalysis directing toward enzymatic function 17
- Heterogeneous catalysis
Twenty-five years after introduction of automotive catalysts: what next? 35
- Heterogeneous catalysis in supercritical water 167

- High-throughput testing
Application of combinatorial catalysis to the selective reduction of NO by C₃H₆ 281
- H-MOR
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- H-type zeolites
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- H-Y
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Hydrocarbon combustion
Oxidative catalytic removal of hydrocarbons over Pt/Al₂O₃ catalysts 189
- Hydrodechlorination
Hydrodechlorination of chlorofluorocarbons CF₃–CFC1₂ and CF₃–CCl₃ over Pd/carbon and Pd black catalysts 269
- Hydrosilylation
Axially chiral monophosphine ligands (MOPs) and their use for palladium-catalyzed asymmetric hydrosilylation of olefins 3
- H-ZSM-5
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Immobilized photocatalysts
The performance in a fluidized bed reactor of photocatalysts immobilized onto inert supports 175
- Infrared spectra of CO on Pt
A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101
- Infrared spectroscopy
The effect of oxygen concentration on the reduction of NO with propylene over CuO/γ-Al₂O₃ 303
- Isobutane alkylation
Isobutane/butene alkylation: regeneration of solid acid catalysts 135
- Magnetite
An environmental friendly dopant for the high-temperature shift catalysts 201
- Mass spectrometry
Application of combinatorial catalysis to the selective reduction of NO by C₃H₆ 281
- Mesoporous
n-Butane and *n*-pentane isomerization over mesoporous and conventional sulfated zirconia catalysts 255
- Metallocenes
Polymerization catalysis 23
- Metal–support interaction
A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101
- Methane
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
Catalytic combustion of methane on Pd–Cu/SiO₂ catalysts 209
- Methane oxidation mechanism
Oxidative catalytic removal of hydrocarbons over Pt/Al₂O₃ catalysts 189
- Methane reforming processes
Stability promotion of Ni/α-Al₂O₃ catalysts by tin added via surface organometallic chemistry on metals. Application in methane reforming processes 231
- Methanol chemisorption
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Methanol oxidation
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Molybdenum oxide catalyst
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Monolith
Selective catalytic oxidation of CO in H₂: fuel cell applications 249
- Monophosphine ligands
Axially chiral monophosphine ligands (MOPs) and their use for palladium-catalyzed asymmetric hydrosilylation of olefins 3
- Neopentane hydrogenolysis
A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101
- Nickel
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
- Nickel/silica
Catalytic hydrodehalogenation as a detoxification methodology 355
- Nitrate formation
The effect of oxygen concentration on the reduction of NO with propylene over CuO/γ-Al₂O₃ 303
- NO_x
Investigation of simultaneous adsorption of SO₂ and NO_x on Na-γ-alumina with transient techniques 319
- NO reduction
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
The effect of oxygen concentration on the reduction of NO with propylene over CuO/γ-Al₂O₃ 303
- NO/O₂ adsorption
The effect of oxygen concentration on the reduction of NO with propylene over CuO/γ-Al₂O₃ 303
- Noble metal promotion
Catalytic wet oxidation of phenol over Pt_xAg_{1–x}MnO₂/CeO₂ catalysts 379

O₂ effect

The effect of oxygen concentration on the reduction of NO with propylene over CuO/ γ -Al₂O₃ 303

Olefins

Axially chiral monophosphine ligands (MOPs) and their use for palladium-catalyzed asymmetric hydrosilylation of olefins 3

On-board fuel processing units

Twenty-five years after introduction of automotive catalysts: what next? 35

Organic acids

Catalytic oxidation of odorous organic acids 347

Organometallic catalysts

Polymerization catalysis 23

Oxidation

Catalytic oxidation of 1,2-dichlorobenzene over ABO₃-type perovskites 329

Oxidative dehydrogenation of ethane and propane

Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91

Oxygen storage

Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145

Palladium

Catalytic combustion of methane on Pd–Cu/SiO₂ catalysts 209

Palladium catalyst

Axially chiral monophosphine ligands (MOPs) and their use for palladium-catalyzed asymmetric hydrosilylation of olefins 3

PCDD/ PCDF

Catalytic oxidation of 1,2-dichlorobenzene over ABO₃-type perovskites 329

Pd black catalyst

Hydrodechlorination of chlorofluorocarbons CF₃–CFCI₂ and CF₃–CCl₃ over Pd/carbon and Pd black catalysts 269

Pd/carbon catalyst

Hydrodechlorination of chlorofluorocarbons CF₃–CFCI₂ and CF₃–CCl₃ over Pd/carbon and Pd black catalysts 269

PEM fuel cells

Selective catalytic oxidation of CO in H₂: fuel cell applications 249

***n*-Pentane isomerization**

n-Butane and *n*-pentane isomerization over mesoporous and conventional sulfated zirconia catalysts 255

Perovskites

Catalytic oxidation of 1,2-dichlorobenzene over ABO₃-type perovskites 329

Petroleum feedstocks

Catalysis science and technology for cleaner transportation fuels 77

Phenol oxidation

Catalytic wet oxidation of phenol over Pt_xAg_{1–x}MnO₂/CeO₂ catalysts 379

Photocatalyst performance

The performance in a fluidized bed reactor of photocatalysts immobilized onto inert supports 175

Polymerization

Polymerization catalysis 23

Polyolefins

Polymerization catalysis 23

Polystyrene

Catalytic degradation of polystyrene into styrene and a design of recyclable polystyrene with dispersed catalysts 67

2-Propanol

Structure/function relationships for basic zeolite catalysts containing occluded alkali species 241

Propylene pulse

The effect of oxygen concentration on the reduction of NO with propylene over CuO/ γ -Al₂O₃ 303

Pt catalyst

Selective catalytic oxidation of CO in H₂: fuel cell applications 249

Pt EXAFS

A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101

Pt XANES

A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101

Pt/Al₂O₃ catalysts

Oxidative catalytic removal of hydrocarbons over Pt/Al₂O₃ catalysts 189

Pt/LTL catalysts

A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101

Pt–Sn/activated carbon

Bimetallic Pt–Sn catalysts supported on activated carbon. II. CO oxidation 337

Rare-earth-oxide-based catalysts

Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91

Reaction mechanism

The effect of oxygen concentration on the reduction of NO with propylene over CuO/ γ -Al₂O₃ 303

Redox catalysts

Ethylene and propene by oxidative dehydrogenation of ethane and propane. 'Performance of rare-earth oxide-based catalysts and development of redox-type catalytic materials by combinatorial methods' 91

Reducing agents

Comparison between methane and propylene as reducing agents in the SCR of NO over Pd supported on tungstated zirconia 291

Refining industry

Catalysis science and technology for cleaner transportation fuels 77

Regeneration

Isobutane/butene alkylation: regeneration of solid acid catalysts 135

SCR catalyst

Sulfated zirconia and tungstated zirconia as effective supports for Pd-based SCR catalysts 159

- Selective catalytic reduction
Environmental catalysis for stationary applications 51
The effect of oxygen concentration on the reduction of NO with propylene over CuO/ γ -Al₂O₃ 303
- Selective oxidation of CO
Selective catalytic oxidation of CO in H₂: fuel cell applications 249
- Selectivity
Performance of zeolites and product selectivity in the gas-phase oxidation of 1,2-dichloroethane 367
- Shape resonance
A new model for the metal–support interaction. Evidence for a shift in the energy of the valence orbitals 101
- Shift reaction
An environmental friendly dopant for the high-temperature shift catalysts 201
- Single site catalysts
Polymerization catalysis 23
- SO₂
Investigation of simultaneous adsorption of SO₂ and NO_x on Na- γ -alumina with transient techniques 319
- SO₂ reduction
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
- Structure sensitivity
Catalytic hydrodehalogenation as a detoxification methodology 355
- Styrene
Catalytic degradation of polystyrene into styrene and a design of recyclable polystyrene with dispersed catalysts 67
- Sulfated zirconia
Sulfated zirconia and tungstated zirconia as effective supports for Pd-based SCR catalysts 159
n-Butane and *n*-pentane isomerization over mesoporous and conventional sulfated zirconia catalysts 255
- Sulfated zirconias
Comparison between methane and propylene as reducing agents in the SCR of NO over Pd supported on tungstated zirconia 291
- Sulfur recovery
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
- Supercritical water
Heterogeneous catalysis in supercritical water 167
- Support treatment
The performance in a fluidized bed reactor of photocatalysts immobilized onto inert supports 175
- Surface active sites
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Surface organometallic chemistry
Stability promotion of Ni/ α -Al₂O₃ catalysts by tin added via surface organometallic chemistry on metals. Application in methane reforming processes 231
- Synthesis gas
Stability promotion of Ni/ α -Al₂O₃ catalysts by tin added via surface organometallic chemistry on metals. Application in methane reforming processes 231
- Tin nickel catalysts
Stability promotion of Ni/ α -Al₂O₃ catalysts by tin added via surface organometallic chemistry on metals. Application in methane reforming processes 231
- TPRS
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Transient techniques
Investigation of simultaneous adsorption of SO₂ and NO_x on Na- γ -alumina with transient techniques 319
- Transportation fuels
Catalysis science and technology for cleaner transportation fuels 77
- Tungstated zirconia
Sulfated zirconia and tungstated zirconia as effective supports for Pd-based SCR catalysts 159
- Tungstated zirconias
Comparison between methane and propylene as reducing agents in the SCR of NO over Pd supported on tungstated zirconia 291
- Turnover frequency
Quantitative determination of the number of active surface sites and the turnover frequencies for methanol oxidation over metal oxide catalysts. I. Fundamentals of the methanol chemisorption technique and application to monolayer supported molybdenum oxide catalysts 219
- Valeric acid oxidation
Catalytic oxidation of odorous organic acids 347
- VOC oxidation
Catalytic oxidation of odorous organic acids 347
- Water-gas-shift
Ceria-based catalysts for the recovery of elemental sulfur from SO₂-laden gas streams 145
- Zeolite
Structure/function relationships for basic zeolite catalysts containing occluded alkali species 241
- Zeolites
Isobutane/butene alkylation: regeneration of solid acid catalysts 135
