

Subject index

- Acetic acid
 Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
- Acid–base sites
 Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Activation
 Propane ammoxidation over gallium-modified MFI zeolites 129
- Active sites
 Propane ammoxidation over gallium-modified MFI zeolites 129
- Alumina
 A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
- Ammoxidation
 Propane ammoxidation over gallium-modified MFI zeolites 129
- Annular reactor
 Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103
- Autothermal reactor
 Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103
- Basicity modulus
 Novel glass crystal catalysts for the processes of methane oxidation 59
- Bimetallic catalysts
 Comparative study on hydrogen-assisted “one-step” methane conversion over Pd–Co/SiO₂ and Pt–Co/NaY catalysts 91
- Buffer
 Investigation of biocatalytic properties of soybean seed hull peroxidase 233
- 1,3-Butadiene
 Experimental procedure for kinetic studies on egg-shell catalysts. The case of liquid-phase hydrogenation of 1,3-butadiene and *n*-butenes on commercial Pd catalysts 205
- Carbon dioxide
 Kinetic study of the catalytic reforming of methane with carbon dioxide to synthesis gas over Ni/La₂O₃ catalyst 83
- Catalysis
 General expression for primary characterization of catalyst activity using TAP pulse response experiment 227
- Catalyst attrition
 Catalyst attrition in ebullated-bed hydrotreater operations 297
- Catalyst deactivation
 Kinetics of carbon oxide evolution in temperature-programmed oxidation of carbonaceous laydown deposited on wet oxidation catalysts 163
- Catalyst stability
 Methane combustion over unsupported iron oxide catalysts 43
 A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
- Catalytic activity
 Effect of third-phase properties on benzyl-*n*-butyl ether synthesis in phase transfer catalytic system 279
- Catalytic combustion
 Simulation and interpretation of catalytic combustion experimental data 239
- Catalytic dehydrogenation
 On the link between intrinsic catalytic reactions kinetics and the development of catalytic processes. Catalytic dehydrogenation of ethylbenzene to styrene 151
- Catalytic hydrogenation of xylose
 Three-phase catalytic hydrogenation of xylose to xylitol — prolonging the catalyst activity by means of on-line ultrasonic treatment 271
- Catalytic partial oxidation of natural gas
 Catalytic partial oxidation of natural gas at elevated pressure and low residence time 9
- Catalytic properties
 Investigation of biocatalytic properties of soybean seed hull peroxidase 233
- Catalytic reforming
 Kinetic study of the catalytic reforming of methane with carbon dioxide to synthesis gas over Ni/La₂O₃ catalyst 83
- Catalytic wet oxidation
 Pd-based catalysts for catalytic wet oxidation of combined Kraft pulp mill effluents in a trickle bed reactor 289
- Cenosphere
 Novel glass crystal catalysts for the processes of methane oxidation 59
- CH₄
 A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
- Chemical reaction
 Effect of third-phase properties on benzyl-*n*-butyl ether synthesis in phase transfer catalytic system 279
- CO
 A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69

- “Coke” burn-off kinetics
Kinetics of carbon oxide evolution in temperature-programmed oxidation of carbonaceous laydown deposited on wet oxidation catalysts 163
- “Coke” morphology
Kinetics of carbon oxide evolution in temperature-programmed oxidation of carbonaceous laydown deposited on wet oxidation catalysts 163
- Computed tomography
Hydrodynamics of churn turbulent bubble columns: gas–liquid recirculation and mechanistic modeling 253
- Deactivation
Silicon nitride supported platinum catalysts for the partial oxidation of methane at high temperatures 51
Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309
- Deep oxidation
Novel glass crystal catalysts for the processes of methane oxidation 59
- Detailed modeling
Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103
- Detoxification
Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309
- Dilution technique
Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333
- Dimerization
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Down flow
Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333
- DRIFT spectroscopy
Catalytic partial oxidation of natural gas at elevated pressure and low residence time 9
- Ebullated-bed
Catalyst attrition in ebullated-bed hydrotreater operations 297
- Energy transfer
Methanol synthesis: a short review of technology improvements 3
- Equilibrium modelling
Equilibrium modelling of catalytic steam reforming of methane in membrane reactors with oxygen addition 141
- Ethane
Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217
- Ethene
Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
- Ether synthesis
Effect of third-phase properties on benzyl-*n*-butyl ether synthesis in phase transfer catalytic system 279
- Ethylbenzene
On the link between intrinsic catalytic reactions kinetics and the development of catalytic processes. Catalytic dehydrogenation of ethylbenzene to styrene 151
- Ethylene
The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217
- Fixed/fluidized bed reactors
On the link between intrinsic catalytic reactions kinetics and the development of catalytic processes. Catalytic dehydrogenation of ethylbenzene to styrene 151
- Fluidization
Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309
- Fluidized bed reactors
The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217
- Formaldehyde
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- FTIR characterization
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Ga-modified zeolites
Propane ammoxidation over gallium-modified MFI zeolites 129
- Gas oil
Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333
- Gas–liquid flow
Hydrodynamics of churn turbulent bubble columns: gas–liquid recirculation and mechanistic modeling 253
- Gas–liquid recirculation
Hydrodynamics of churn turbulent bubble columns: gas–liquid recirculation and mechanistic modeling 253
- Gas–liquid upflow
Liquid back-mixing in packed-bubble column reactors: a state-of-the-art correlation 321
- Gas-phase polymerization
Measurement of hydrodynamic data of gas-phase polymerization reactors using non-intrusive methods 189
- Gold
A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
- Heat distribution
Partial oxidation of methane. Effect of reaction parameters and catalyst composition on the thermal profile and heat distribution 21
- Heterogeneous versus homogeneous reactions
Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103

- Heterogeneous wet oxidation
Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309
- Heteropoly acid
Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
- High temperature
Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103
- High-pressure reactivity
Catalytic partial oxidation of natural gas at elevated pressure and low residence time 9
- Hydrocarbon formation
Comparative study on hydrogen-assisted “one-step” methane conversion over Pd–Co/SiO₂ and Pt–Co/NaY catalysts 91
- Hydrosulfurization
Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333
- Hydrodynamic characteristics
Measurement of hydrodynamic data of gas-phase polymerization reactors using non-intrusive methods 189
- Hydrogen
Equilibrium modelling of catalytic steam reforming of methane in membrane reactors with oxygen addition 141
- Hydrophobic catalyst
Ethanol oxidation in a trickle-bed reactor using a hydrophobic catalyst. Effect of dilution with hydrophilic particles 347
- Hydrotalcites
Partial oxidation of methane. Effect of reaction parameters and catalyst composition on the thermal profile and heat distribution 21
- Hydrotreating catalyst
Catalyst attrition in ebullated-bed hydrotreater operations 297
- In situ MAS NMR
Propane ammoxidation over gallium-modified MFI zeolites 129
- Intrinsic kinetics
On the link between intrinsic catalytic reactions kinetics and the development of catalytic processes. Catalytic dehydrogenation of ethylbenzene to styrene 151
- Investment
Methanol synthesis: a short review of technology improvements 3
- IR thermography
Catalytic partial oxidation of natural gas at elevated pressure and low residence time 9
Partial oxidation of methane. Effect of reaction parameters and catalyst composition on the thermal profile and heat distribution 21
- Iridium
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
- Iron oxide
Methane combustion over unsupported iron oxide catalysts 43
- Kinetic parameters
Oxidation of toluene to benzaldehyde over VSb_{0.8}Ti_{0.2}O₄. Effect of the operating conditions 179
- Kinetics
General expression for primary characterization of catalyst activity using TAP pulse response experiment 227
- Laboratory reactors
Experimental procedure for kinetic studies on egg-shell catalysts. The case of liquid-phase hydrogenation of 1,3-butadiene and *n*-butenes on commercial Pd catalysts 205
- Liquid back-mixing
Liquid back-mixing in packed-bubble column reactors: a state-of-the-art correlation 321
- Magnetic microspheres
Novel glass crystal catalysts for the processes of methane oxidation 59
- Mechanism
Propane ammoxidation over gallium-modified MFI zeolites 129
- Mechanistic reactor modeling
Hydrodynamics of churn turbulent bubble columns: gas–liquid recirculation and mechanistic modeling 253
- Membrane catalytic reactors
On the link between intrinsic catalytic reactions kinetics and the development of catalytic processes. Catalytic dehydrogenation of ethylbenzene to styrene 151
- Membranes
Equilibrium modelling of catalytic steam reforming of methane in membrane reactors with oxygen addition 141
- Metal oxides
A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
- Methane
Silicon nitride supported platinum catalysts for the partial oxidation of methane at high temperatures 51
Novel glass crystal catalysts for the processes of methane oxidation 59
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
Equilibrium modelling of catalytic steam reforming of methane in membrane reactors with oxygen addition 141
The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217
Simulation and interpretation of catalytic combustion experimental data 239
- Methane combustion
Methane combustion over unsupported iron oxide catalysts 43
- Methane decomposition
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
- Methane partial oxidation
Partial oxidation of methane. Effect of reaction parameters and catalyst composition on the thermal profile and heat distribution 21

- Methanol**
Methanol synthesis: a short review of technology improvements 3
- Methyl formate**
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Micro-reactor**
Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333
- Modeling**
Simulation and interpretation of catalytic combustion experimental data 239
- Molybdenum oxide**
Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
- Monoliths**
Short contact time oxidative dehydrogenation of propane 113
Simulation and interpretation of catalytic combustion experimental data 239
- Morphology**
Novel glass crystal catalysts for the processes of methane oxidation 59
- Multiphase reactions**
Experimental procedure for kinetic studies on egg-shell catalysts. The case of liquid-phase hydrogenation of 1,3-butadiene and *n*-butenes on commercial Pd catalysts 205
- Natural gas**
Kinetic study of the catalytic reforming of methane with carbon dioxide to synthesis gas over Ni/La₂O₃ catalyst 83
- Neural network**
Liquid back-mixing in packed-bubble column reactors: a state-of-the-art correlation 321
- Ni/La₂O₃ catalyst**
Kinetic study of the catalytic reforming of methane with carbon dioxide to synthesis gas over Ni/La₂O₃ catalyst 83
- Nickel**
Partial oxidation of methane. Effect of reaction parameters and catalyst composition on the thermal profile and heat distribution 21
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
- Non-intrusive methods**
Measurement of hydrodynamic data of gas-phase polymerization reactors using non-intrusive methods 189
- One-step methane conversion**
Comparative study on hydrogen-assisted “one-step” methane conversion over Pd–Co/SiO₂ and Pt–Co/NaY catalysts 91
- Organic solvents**
Investigation of biocatalytic properties of soybean seed hull peroxidase 233
- Oxidation**
A comparative study of the oxidation of CO and CH₄ over Au/MO_x/Al₂O₃ catalysts 69
Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121
- Oxidative coupling**
The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217
- Oxidative dehydrogenation**
Production of olefins via oxidative dehydrogenation of light paraffins at short contact times 103
Short contact time oxidative dehydrogenation of propane 113
- Oxide catalysts**
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Packed- and slurry-bubble column**
Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309
- Packed-bubble column**
Liquid back-mixing in packed-bubble column reactors: a state-of-the-art correlation 321
- Palladium**
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
- Parameter fitting**
Simulation and interpretation of catalytic combustion experimental data 239
- Partial oxidation**
Methanol synthesis: a short review of technology improvements 3
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
Silicon nitride supported platinum catalysts for the partial oxidation of methane at high temperatures 51
Mechanistic evidences of the synthesis of methyl formate from methane and air on oxide catalysts 97
- Particles wettability**
Ethanol oxidation in a trickle-bed reactor using a hydrophobic catalyst. Effect of dilution with hydrophilic particles 347
- Pd catalysts**
Pd-based catalysts for catalytic wet oxidation of combined Kraft pulp mill effluents in a trickle bed reactor 289
- Pd/Al₂O₃ catalyst**
Experimental procedure for kinetic studies on egg-shell catalysts. The case of liquid-phase hydrogenation of 1,3-butadiene and *n*-butenes on commercial Pd catalysts 205
- Phase transfer catalyst**
Effect of third-phase properties on benzyl-*n*-butyl ether synthesis in phase transfer catalytic system 279
- Platinum**
Transient response of catalyst bed temperature in the pulsed reaction of partial oxidation of methane to synthesis gas over supported group VIII metal catalysts 31
Silicon nitride supported platinum catalysts for the partial oxidation of methane at high temperatures 51

- Promoter effect
A comparative study of the oxidation of CO and CH₄ over Au/
MO_x/Al₂O₃ catalysts 69
- Propane
Short contact time oxidative dehydrogenation of propane 113
Propane ammoxidation over gallium-modified MFI zeolites 129
- Pt/10%Rh gauze catalyst
Short contact time oxidative dehydrogenation of propane 113
- Pt/ γ -Al₂O₃ catalyst
Production of olefins via oxidative dehydrogenation of light
paraffins at short contact times 103
- Pulp and paper effluents
Pd-based catalysts for catalytic wet oxidation of combined Kraft
pulp mill effluents in a trickle bed reactor 289
- Pulsed reaction
Transient response of catalyst bed temperature in the pulsed
reaction of partial oxidation of methane to synthesis gas over
supported group VIII metal catalysts 31
- Radioactive particle tracking
Hydrodynamics of churn turbulent bubble columns: gas–liquid
recirculation and mechanistic modeling 253
- Radioactive tracer studies
Hydrodynamics of churn turbulent bubble columns: gas–liquid
recirculation and mechanistic modeling 253
- Raney nickel catalyst
Three-phase catalytic hydrogenation of xylose to xylitol —
prolonging the catalyst activity by means of on-line ultrasonic
treatment 271
- Reaction engineering
Simulation and interpretation of catalytic combustion experi-
mental data 239
- Reaction mechanism
Mechanistic evidences of the synthesis of methyl formate from
methane and air on oxide catalysts 97
- Reaction parameters
Partial oxidation of methane. Effect of reaction parameters and
catalyst composition on the thermal profile and heat distribu-
tion 21
- Reforming
Equilibrium modelling of catalytic steam reforming of methane
in membrane reactors with oxygen addition 141
- Rhodium
Partial oxidation of methane. Effect of reaction parameters and
catalyst composition on the thermal profile and heat distribu-
tion 21
Transient response of catalyst bed temperature in the pulsed
reaction of partial oxidation of methane to synthesis gas over
supported group VIII metal catalysts 31
- Ruthenium
Transient response of catalyst bed temperature in the pulsed
reaction of partial oxidation of methane to synthesis gas over
supported group VIII metal catalysts 31
- Selective hydrogenation
Experimental procedure for kinetic studies on egg-shell cata-
lysts. The case of liquid-phase hydrogenation of 1,3-butadiene
and *n*-butenes on commercial Pd catalysts 205
- Short contact time
Production of olefins via oxidative dehydrogenation of light
paraffins at short contact times 103
- Short contact time processes
Catalytic partial oxidation of natural gas at elevated pressure and
low residence time 9
- Silicon nitride
Silicon nitride supported platinum catalysts for the partial
oxidation of methane at high temperatures 51
- Sintering
Methane combustion over unsupported iron oxide catalysts
43
- Slurry bubble column
Hydrodynamics of churn turbulent bubble columns: gas–liquid
recirculation and mechanistic modeling 253
- Soybean seed hull peroxidase
Investigation of biocatalytic properties of soybean seed hull
peroxidase 233
- Steam reforming
Methanol synthesis: a short review of technology improve-
ments 3
- Structure
Selective oxidation of ethane over hydrothermally synthesized
Mo–V–Al–Ti oxide catalyst 121
- Synthesis gas
Methanol synthesis: a short review of technology improve-
ments 3
Silicon nitride supported platinum catalysts for the partial
oxidation of methane at high temperatures 51
Kinetic study of the catalytic reforming of methane with carbon
dioxide to synthesis gas over Ni/La₂O₃ catalyst 83
- TAP pulse response technique
General expression for primary characterization of catalyst
activity using TAP pulse response experiment 227
- Thermal profile
Partial oxidation of methane. Effect of reaction parameters and
catalyst composition on the thermal profile and heat distribu-
tion 21
- Third phase
Effect of third-phase properties on benzyl-*n*-butyl ether synth-
esis in phase transfer catalytic system 279
- Titania
Transient response of catalyst bed temperature in the pulsed
reaction of partial oxidation of methane to synthesis gas over
supported group VIII metal catalysts 31
- Toluene oxidation
Oxidation of toluene to benzaldehyde over VSb_{0.8}Ti_{0.2}O₄. Effect
of the operating conditions 179
- Trickle bed
Catalytic wet air oxidation with a deactivating catalyst analysis
of fixed and sparged three-phase reactors 309
- Trickle bed reactor
Pd-based catalysts for catalytic wet oxidation of combined Kraft
pulp mill effluents in a trickle bed reactor 289
Ethanol oxidation in a trickle-bed reactor using a hydrophobic
catalyst. Effect of dilution with hydrophilic particles 347

Two-phase theory

The effects of kinetics, hydrodynamics and feed conditions on methane coupling using fluidized bed reactor 217

Ultrasonic treatment

Three-phase catalytic hydrogenation of xylose to xylitol — prolonging the catalyst activity by means of on-line ultrasonic treatment 271

Up flow

Effect of diluent size on the performance of a micro-scale fixed bed multiphase reactor in up flow and down flow modes of operation 333

Vanadium antimonate

Oxidation of toluene to benzaldehyde over $\text{VSb}_{0.8}\text{Ti}_{0.2}\text{O}_4$. Effect of the operating conditions 179

Vanadium oxide

Selective oxidation of ethane over hydrothermally synthesized Mo–V–Al–Ti oxide catalyst 121

VMgO catalyst

Short contact time oxidative dehydrogenation of propane 113

Wastewater

Catalytic wet air oxidation with a deactivating catalyst analysis of fixed and sparged three-phase reactors 309

Wastewater treatment

Pd-based catalysts for catalytic wet oxidation of combined Kraft pulp mill effluents in a trickle bed reactor 289

Wet ethanol oxidation

Ethanol oxidation in a trickle-bed reactor using a hydrophobic catalyst. Effect of dilution with hydrophilic particles 347

Wet oxidation

Kinetics of carbon oxide evolution in temperature-programmed oxidation of carbonaceous laydown deposited on wet oxidation catalysts 163

Xylitol

Three-phase catalytic hydrogenation of xylose to xylitol — prolonging the catalyst activity by means of on-line ultrasonic treatment 271
