Subject index

- Acetonitrile
- Heterogeneous sulfoxidation of thioethers by hydrogen peroxide over layered double hydroxides as catalysts 529
- Acidic proton
- Properties of chemisorbed hydrogen species on Ag-A zeolite partially reduced with hydrogen as studied by ^1H MAS NMR 81
- Active carbon
- Kinetics and mass transfer effects in the oxidation of ferrous sulfate over doped active carbon catalysts 447
- Ag-A
- Properties of chemisorbed hydrogen species on Ag-A zeolite partially reduced with hydrogen as studied by ^1H MAS NMR 81
- Alcohol oxidation
- Platinum catalysed aqueous methyl α -D-glucopyranoside oxidation in a multiphase redox-cycle reactor 191
- Aldolization
- Kinetics and phase equilibria of competing aldolization and elimination in a three-phase reactor 419
- Alkali promoters
- Selective hydrogenation of benzene to cyclohexene catalyzed by Ru supported catalysts. Influence of the alkali promoters on kinetics, selectivity and yield 363
- Alkane
- Iron as an effective additive for enhancement of catalytic performance of cesium hydrogen salt of molybdophosphoric acid for selective oxidation of isobutane, propane, and ethane under oxygen-rich and -poor conditions and the catalyst design 47
- Alkenes
- Mass transfer effects in the H_2SO_4 catalyzed pivalic acid synthesis 317
- Alkoxylation
- Novelties of liquid–liquid–liquid phase transfer catalysis.
- Alkoxylation of *p*-chloronitrobenzene 345
- π -Allyl oxidation
- Design of alkenes–($\text{O}_2 + \text{NO}$) cell system for the selective partial oxidation of alkenes 115
- Aqueous catalyst
- Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183
- Asymmetric synthesis
- Bidentate Lewis acids for organic synthesis 33
- Baker's yeast
- A general kinetic and mass transfer model to simulate the baker's yeast growth in bioreactors 437
- Bench-scale
- CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209
- Benzaldehyde
- Monolithic catalysts as more efficient three-phase reactors 157
- Benzene
- Skeletal isomerization of alkanes and hydroisomerization of benzene over solid strong acids and their bifunctional catalysts 123
- Benzyl alcohol oxidation
- Liquid phase selective oxidation of benzyl alcohol over Pd–Ag catalysts supported on pumice 271
- Bidentate Lewis acids
- Bidentate Lewis acids for organic synthesis 33
- Bifunctional catalysts
- Skeletal isomerization of alkanes and hydroisomerization of benzene over solid strong acids and their bifunctional catalysts 123
- Bioreactors
- A general kinetic and mass transfer model to simulate the baker's yeast growth in bioreactors 437
- Biphasic
- Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183
- Bubble columns
- A scale up strategy for bubble column slurry reactors 199
- Design and optimisation of a multi-stage bubble column slurry reactor for Fischer–Tropsch synthesis 241
- Bubble rise velocity
- A scale up strategy for bubble column slurry reactors 199
- Design and optimisation of a multi-stage bubble column slurry reactor for Fischer–Tropsch synthesis 241
- 1-Butene
- Selective dimerisation of 1-butene in biphasic mode using buffered chloroaluminate ionic liquid solvents — design and application of a continuous loop reactor 309
- Calcium hydroxide
- Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Capillary flow
- Mesoscale modeling in multiphase catalysis 249
- Carbon
- Agglomeration and adhesion of catalyst particles in gas–liquid reactors 263

- Carbonates**
Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355
- Carbonylation**
Carbonylation reactions catalyzed by homogeneous Pd–Co bimetallic systems 53
Kinetic modeling of homogeneous catalytic processes 371
- Carvone**
Effect of the support in Pt and PtSn catalysts used for selective hydrogenation of carvone 289
- Catalyst**
Carbonylation reactions catalyzed by homogeneous Pd–Co bimetallic systems 53
Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Catalyst deactivation**
A kinetic rate expression for the time-dependent coke formation rate during propane dehydrogenation over a platinum alumina monolithic catalyst 427
- Catalyst design**
Iron as an effective additive for enhancement of catalytic performance of cesium hydrogen salt of molybdophosphoric acid for selective oxidation of isobutane, propane, and ethane under oxygen-rich and -poor conditions and the catalyst design 47
- Catalyst layer thickness**
External and internal mass transfer effect on photocatalytic degradation 475
- Catalytic activity**
Heterogeneous sulfoxidation of thioethers by hydrogen peroxide over layered double hydroxides as catalysts 529
- Catalytic and non-catalytic oxidation**
Kinetics and mass transfer effects in the oxidation of ferrous sulfate over doped active carbon catalysts 447
- Catalytic hydrogenation**
Catalytic denitrification: direct and indirect removal of nitrates from potable water 503
- Catalytic packed bed**
CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209
- Catalytic reaction**
Catalytic reaction performed in the liquid–liquid system at batch and semibatch operating mode 325
- CFD simulation**
CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209
- Chemical vapor deposition (CVD)**
Anisotropic ordering of Mo species deposited on TiO₂(1 1 0) characterized by polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS) 97
- Chemisorption**
Effect of the support in Pt and PtSn catalysts used for selective hydrogenation of carvone 289
- p*-Chloronitrobenzene**
Novelties of liquid–liquid–liquid phase transfer catalysis. Alkoxylation of *p*-chloronitrobenzene 345
- Chromatographic reactor**
Dynamic methods and new reactors for liquid phase molecular catalysis 145
- Churn-turbulent flow regime**
A scale up strategy for bubble column slurry reactors 199
Design and optimisation of a multi-stage bubble column slurry reactor for Fischer–Tropsch synthesis 241
- Cinnamaldehyde**
Pt and Pt-alloy catalysts and their properties for the liquid-phase hydrogenation of cinnamaldehyde 277
Kinetics of cinnamaldehyde hydrogenation–concentration dependent selectivity 381
- Clear liquid height**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- Co-current tubular reactor**
Optimal temperature profiles for parallel-consecutive reactions with deactivating catalyst 461
- Coke formation rates**
A kinetic rate expression for the time-dependent coke formation rate during propane dehydrogenation over a platinum alumina monolithic catalyst 427
- Colloidal properties**
Agglomeration and adhesion of catalyst particles in gas–liquid reactors 263
- Column diameter influence**
A scale up strategy for bubble column slurry reactors 199
- Combined process**
Catalytic denitrification: direct and indirect removal of nitrates from potable water 503
- Computational fluid dynamics**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- Control approach**
Nonequilibrium thermodynamics for multiphase reacting systems: an optimal control approach 453
- Cu chromite**
Oxidation of phenol in aqueous solution with copper catalysts 511
- Cumene**
Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Cyclodextrin**
Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355
- Deactivating catalyst**
Optimal temperature profiles for parallel-consecutive reactions with deactivating catalyst 461
- Decay rate**
Optimal temperature profiles for parallel-consecutive reactions with deactivating catalyst 461
- Dehydrogenation**
Surface organometallic chemistry on metals in water. Chemical modification of platinum catalyst surface by reaction with hydrosoluble organotin complexes: application to the selective dehydrogenation of isobutane to isobutene 303

- Dimerisation**
Selective dimerisation of 1-butene in biphasic mode using buffered chloroaluminate ionic liquid solvents — design and application of a continuous loop reactor 309
- Direct electro-oxidation**
Electrochemical destruction of thiourea dioxide in an undivided parallel plate electrodes batch reactor 519
- Doped active carbon**
Kinetics and mass transfer effects in the oxidation of ferrous sulfate over doped active carbon catalysts 447
- Electrochemical reactor**
Electrochemical destruction of thiourea dioxide in an undivided parallel plate electrodes batch reactor 519
- Enantioselective hydrogenation**
Modeling of the enantioselective hydrogenation of 1-phenyl-1,2-propanedione over Pt/Al₂O₃ catalyst 411
- Engelhard Cu-0203T**
Oxidation of phenol in aqueous solution with copper catalysts 511
- Enhancement**
Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Equilibrium stage model**
Influence of column hardware on the performance of reactive distillation columns 225
- Esterification**
Esterification in a structured catalytic reactor with counter-current water removal 175
2-Methylpropylacetate synthesis via catalytic distillation 219
- Ethylene polymerization**
FI Catalysts: super active new ethylene polymerization catalysts 63
- Exothermic reaction**
Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Experiment**
2-Methylpropylacetate synthesis via catalytic distillation 219
- FI catalysts**
FI Catalysts: super active new ethylene polymerization catalysts 63
- Fischer-Tropsch reaction**
Design and optimisation of a multi-stage bubble column slurry reactor for Fischer-Tropsch synthesis 241
- Flotation**
Agglomeration and adhesion of catalyst particles in gas–liquid reactors 263
- Formation of carbon–carbon bonds**
Supported palladium as catalyst for carbon–carbon bond construction (Heck reaction) in organic synthesis 105
- Froth density**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- Froth height**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- FSM-16**
Ship-in-bottle synthesis and catalytic performances of platinum carbonyl clusters, nanowires, and nanoparticles in micro- and mesoporous materials 23
- Fuel cell**
Design of alkenes–(O₂ + NO) cell system for the selective partial oxidation of alkenes 115
- Gas-liquid–liquid**
Mass transfer effects in the H₂SO₄ catalyzed pivalic acid synthesis 317
- Group 4 transition metal complex**
FI Catalysts: super active new ethylene polymerization catalysts 63
- ¹H MAS NMR**
Properties of chemisorbed hydrogen species on Ag-A zeolite partially reduced with hydrogen as studied by ¹H MAS NMR 81
- Heck reaction**
Supported palladium as catalyst for carbon–carbon bond construction (Heck reaction) in organic synthesis 105
- Heteropoly compound**
Skeletal isomerization of alkanes and hydroisomerization of benzene over solid strong acids and their bifunctional catalysts 123
- Homogeneous catalysis**
Kinetic modeling of homogeneous catalytic processes 371
- HRTEM**
HRTEM study of the morphology of RuS₂ supported particles 91
- H₂SO₄**
Mass transfer effects in the H₂SO₄ catalyzed pivalic acid synthesis 317
- Hydroformylation**
Carbonylation reactions catalyzed by homogeneous Pd-Co bimetallic systems 53
Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183
Multifactorial analysis in the study of hydroformylation of oct-1-ene using supported aqueous phase catalysis 297
Kinetic modeling of homogeneous catalytic processes 371
- Hydrogen**
Properties of chemisorbed hydrogen species on Ag-A zeolite partially reduced with hydrogen as studied by ¹H MAS NMR 81
- Hydrogen peroxide**
Heterogeneous sulfoxidation of thioethers by hydrogen peroxide over layered double hydroxides as catalysts 529
- Hydrogenation**
Monolithic catalysts as more efficient three-phase reactors 157
Pt and Pt-alloy catalysts and their properties for the liquid-phase hydrogenation of cinnamaldehyde 277
Effect of the support in Pt and PtSn catalysts used for selective hydrogenation of carvone 289
Selective hydrogenation of benzene to cyclohexene catalyzed by Ru supported catalysts. Influence of the alkali promoters on kinetics, selectivity and yield 363
Kinetic modeling of homogeneous catalytic processes 371

- Hydrogenation of olefins in aqueous phase, catalyzed by polymer-protected rhodium colloids: kinetic study 389
- Kinetic and mass transfer in the hydrogenation of polyunsaturated organic compounds in the presence of supported Pd catalysts 403
- Hydroisomerization
- Skeletal isomerization of alkanes and hydroisomerization of benzene over solid strong acids and their bifunctional catalysts 123
- Hydrophobic
- Agglomeration and adhesion of catalyst particles in gas–liquid reactors 263
- Hydrotreatment
- HRTEM study of the morphology of RuS₂ supported particles 91
- Hysteresis
- Mesoscale modeling in multiphase catalysis 249
- Ibuprofen
- Kinetic modeling of homogeneous catalytic processes 371
- Image simulation
- HRTEM study of the morphology of RuS₂ supported particles 91
- Infrared studies
- New aspects of catalytic functions on sulfide catalysts 15
- Internal wetting
- Mesoscale modeling in multiphase catalysis 249
- Ion exchange
- Catalytic denitrification: direct and indirect removal of nitrates from potable water 503
- Ionic liquids
- Selective dimerisation of 1-butene in biphasic mode using buffered chloroaluminate ionic liquid solvents — design and application of a continuous loop reactor 309
- Iron
- Iron as an effective additive for enhancement of catalytic performance of cesium hydrogen salt of molybdophosphoric acid for selective oxidation of isobutane, propane, and ethane under oxygen-rich and -poor conditions and the catalyst design 47
- 1-(4-*iso*-Butylphenyl)ethanol
- Kinetic modeling of homogeneous catalytic processes 371
- Kinetic and mass transfer effects
- Kinetics and mass transfer effects in the oxidation of ferrous sulfate over doped active carbon catalysts 447
- Kinetic equations
- Nonequilibrium thermodynamics for multiphase reacting systems: an optimal control approach 453
- Kinetic simulation
- The influences of the gas rate dissolution and mass-transfer limitation at the interfaces on selectivity of gas–liquid processes in stirred reactors with a suspended catalyst 397
- Kinetic study
- External and internal mass transfer effect on photocatalytic degradation 475
- Kinetics
- Dynamic methods and new reactors for liquid phase molecular catalysis 145
- Esterification in a structured catalytic reactor with countercurrent water removal 175
- Kinetic modeling of homogeneous catalytic processes 371
- Kinetics of cinnamaldehyde hydrogenation–concentration dependent selectivity 381
- Hydrogenation of olefins in aqueous phase, catalyzed by polymer-protected rhodium colloids: kinetic study 389
- A kinetic rate expression for the time-dependent coke formation rate during propane dehydrogenation over a platinum alumina monolithic catalyst 427
- Lewis and Brønsted sites
- New aspects of catalytic functions on sulfide catalysts 15
- Liquid phase backmixing
- Design and optimisation of a multi-stage bubble column slurry reactor for Fischer–Tropsch synthesis 241
- Liquid–liquid catalysis
- Dynamic methods and new reactors for liquid phase molecular catalysis 145
- Liquid–liquid reaction
- Catalytic reaction performed in the liquid–liquid system at batch and semibatch operating mode 325
- Liquid–liquid–liquid system
- Novelties of liquid–liquid–liquid phase transfer catalysis. Alkoxylation of *p*-chloronitrobenzene 345
- Liquid-phase
- Pt and Pt-alloy catalysts and their properties for the liquid-phase hydrogenation of cinnamaldehyde 277
- Loop reactor
- Selective dimerisation of 1-butene in biphasic mode using buffered chloroaluminate ionic liquid solvents — design and application of a continuous loop reactor 309
- Magnesium hydroxide
- Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Mass transfer
- Dynamic methods and new reactors for liquid phase molecular catalysis 145
 - Monolithic catalysts as more efficient three-phase reactors 157
 - Mass transfer effects in the H₂SO₄ catalyzed pivalic acid synthesis 317
 - External and internal mass transfer effect on photocatalytic degradation 475
- Mass transfer with chemical reaction
- On the interfacial mass transfer and the location of the chemical reaction in a fluid/fluid reacting system at elevated temperatures and pressures 335
- Maxwell–Stefan equations
- Influence of column hardware on the performance of reactive distillation columns 225
- MCM-41
- Micelle templating for the formulation of silica at the nanometer scale 75
- Mediated electro-oxidation
- Electrochemical destruction of thiourea dioxide in an undivided parallel plate electrodes batch reactor 519

- Metal alkoxides**
Organometallic chemistry at the interface with materials science 3
- Metals**
Surface organometallic chemistry on metals in water. Chemical modification of platinum catalyst surface by reaction with hydrosoluble organotin complexes: application to the selective dehydrogenation of isobutane to isobutene 303
- Metathesis**
Organometallic chemistry at the interface with materials science 3
- Methyl α -D-glucopyranoside**
Platinum catalysed aqueous methyl α -D-glucopyranoside oxidation in a multiphase redox-cycle reactor 191
- Methyl *tert*-butyl ether synthesis**
Influence of column hardware on the performance of reactive distillation columns 225
- Methylcyclopentane**
Skeletal isomerization of alkanes and hydroisomerization of benzene over solid strong acids and their bifunctional catalysts 123
- 2-Methylpropylacetate**
2-Methylpropylacetate synthesis via catalytic distillation 219
- α -methylstyrene**
Monolithic catalysts as more efficient three-phase reactors 157
- α -Methylstyrene**
Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Micelle templating**
Micelle templating for the formulation of silica at the nanometer scale 75
- Microreactors**
Dynamic methods and new reactors for liquid phase molecular catalysis 145
- Mixing**
Mass transfer effects in the H_2SO_4 catalyzed pivalic acid synthesis 317
- Mo chain growth**
Anisotropic ordering of Mo species deposited on $TiO_2(1\ 1\ 0)$ characterized by polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS) 97
- Mo(CO)₆**
Anisotropic ordering of Mo species deposited on $TiO_2(1\ 1\ 0)$ characterized by polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS) 97
- Monolith**
Monolithic catalysts as more efficient three-phase reactors 157
Esterification in a structured catalytic reactor with counter-current water removal 175
- Monolithic catalyst**
A kinetic rate expression for the time-dependent coke formation rate during propane dehydrogenation over a platinum alumina monolithic catalyst 427
New non-traditional multiphase catalytic reactors based on monolithic structures 133
- MTS**
Micelle templating for the formulation of silica at the nanometer scale 75
- Multifunctional reactor**
New non-traditional multiphase catalytic reactors based on monolithic structures 133
Synthesis and purification of anthraquinone in a multifunctional reactor 167
- Multiphase**
Mass transfer effects in the H_2SO_4 catalyzed pivalic acid synthesis 317
- Multiphase flow maldistribution**
CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209
- Multiphase reacting system**
Nonequilibrium thermodynamics for multiphase reacting systems: an optimal control approach 453
- Multiphase reactions**
New non-traditional multiphase catalytic reactors based on monolithic structures 133
- Multiple steady states**
Influence of column hardware on the performance of reactive distillation columns 225
- Multi-stage column**
Design and optimisation of a multi-stage bubble column slurry reactor for Fischer-Tropsch synthesis 241
- Nanoparticle**
Ship-in-bottle synthesis and catalytic performances of platinum carbonyl clusters, nanowires, and nanoparticles in micro- and mesoporous materials 23
- Nanowire**
Ship-in-bottle synthesis and catalytic performances of platinum carbonyl clusters, nanowires, and nanoparticles in micro- and mesoporous materials 23
- Nickel**
Selective dimerisation of 1-butene in biphasic mode using buffered chloroaluminate ionic liquid solvents — design and application of a continuous loop reactor 309
- Nitrate removal**
Catalytic denitrification: direct and indirect removal of nitrates from potable water 503
- NO_x catalysis**
Design of alkenes-(O₂ + NO) cell system for the selective partial oxidation of alkenes 115
- Nonequilibrium stage model**
Influence of column hardware on the performance of reactive distillation columns 225
- Non-stationary operation**
Mesoscale modeling in multiphase catalysis 249
- Oct-1-ene**
Multifactorial analysis in the study of hydroformylation of oct-1-ene using supported aqueous phase catalysis 297
- Optimal temperature**
Optimal temperature profiles for parallel-consecutive reactions with deactivating catalyst 461

- Organic synthesis**
- Bidentate Lewis acids for organic synthesis 33
 - Organometallic chemical vapor deposition**
 - Organometallic chemistry at the interface with materials science 3 - Oxidation**
 - Oxidation of phenol in aqueous solution with copper catalysts 511
 - Oxidative dehydrogenation**
 - Iron as an effective additive for enhancement of catalytic performance of cesium hydrogen salt of molybdochosphoric acid for selective oxidation of isobutane, propane, and ethane under oxygen-rich and -poor conditions and the catalyst design 47 - Oxide/zeolite-supported palladium**
 - Supported palladium as catalyst for carbon–carbon bond construction (Heck reaction) in organic synthesis 105 - Packed column**
 - Influence of column hardware on the performance of reactive distillation columns 225 - Palladium**
 - Design of alkenes–(O₂ + NO) cell system for the selective partial oxidation of alkenes 115
 - Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355 - Pd catalysts**
 - Kinetic and mass transfer in the hydrogenation of polyunsaturated organic compounds in the presence of supported Pd catalysts 403 - Pd–Ag/pumice catalyst**
 - Liquid phase selective oxidation of benzyl alcohol over Pd–Ag catalysts supported on pumice 271 - Pd–Cu bimetallics**
 - Catalytic denitrification: direct and indirect removal of nitrates from potable water 503 - Pellet**
 - Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255 - Phase equilibria**
 - Kinetics and phase equilibria of competing aldolization and elimination in a three-phase reactor 419 - Phase transfer catalysis**
 - Novelties of liquid–liquid–liquid phase transfer catalysis.
 - Alkoxylation of *p*-chloronitrobenzene 345 - Phenol**
 - Oxidation of phenol in aqueous solution with copper catalysts 511 - Phenoxy-imine ligand**
 - FI Catalysts: super active new ethylene polymerization catalysts 63 - 1-Phenyl-1,2-propanedione**
 - Modeling of the enantioselective hydrogenation of 1-phenyl-1,2-propanedione over Pt/Al₂O₃ catalyst 411 - Phosphonate–phosphine**
 - Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183

Photocatalysis

 - External and internal mass transfer effect on photocatalytic degradation 475
 - Comparison of the efficiency of immobilized and suspended systems in photocatalytic degradation 487

Photocatalytic oxidation

 - Modelling of a photocatalytic reactor with a fixed bed of supported catalyst 467

Pivalic acid

 - Mass transfer effects in the H₂SO₄ catalyzed pivalic acid synthesis 317

Platinum

 - Platinum catalysed aqueous methyl α -d-glucopyranoside oxidation in a multiphase redox-cycle reactor 191

Platinum alumina

 - A kinetic rate expression for the time-dependent coke formation rate during propane dehydrogenation over a platinum alumina monolithic catalyst 427

Platinum carbonyl cluster

 - Ship-in-bottle synthesis and catalytic performances of platinum carbonyl clusters, nanowires, and nanoparticles in micro- and mesoporous materials 23

Platinum–tin catalysts

 - Surface organometallic chemistry on metals in water.
 - Chemical modification of platinum catalyst surface by reaction with hydrosoluble organotin complexes: application to the selective dehydrogenation of isobutane to isobutene 303

Polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS)

 - Anisotropic ordering of Mo species deposited on TiO₂(1 1 0) characterized by polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS) 97

Polyunsaturated organic compounds

 - Kinetic and mass transfer in the hydrogenation of polyunsaturated organic compounds in the presence of supported Pd catalysts 403

Porosity distribution

 - CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209

Porous media

 - Mesoscale modeling in multiphase catalysis 249

Post-metallocene

 - FI Catalysts: super active new ethylene polymerization catalysts 63

Potable water purification

 - Catalytic denitrification: direct and indirect removal of nitrates from potable water 503

Pt catalyst

 - Pt and Pt-alloy catalysts and their properties for the liquid-phase hydrogenation of cinnamaldehyde 277

Pt/Al₂O₃ catalyst

 - Modeling of the enantioselective hydrogenation of 1-phenyl-1,2-propanedione over Pt/Al₂O₃ catalyst 411

Pt/C catalysts

 - Kinetics of cinnamaldehyde hydrogenation–concentration dependent selectivity 381

- PtSn**
Effect of the support in Pt and PtSn catalysts used for selective hydrogenation of carvone 289
- Purification**
Synthesis and purification of anthraquinone in a multifunctional reactor 167
- Quantum yield**
Comparison of the efficiency of immobilized and suspended systems in photocatalytic degradation 487
- Quartz crystal microbalance**
Organometallic chemistry at the interface with materials science 3
- Radial velocity profiles**
A scale up strategy for bubble column slurry reactors 199
- Rate equation**
Kinetic modeling of homogeneous catalytic processes 371
- Reaction calorimeter**
Catalytic reaction performed in the liquid–liquid system at batch and semibatch operating mode 325
- Reactive distillation**
2-Methylpropylacetate synthesis via catalytic distillation 219
Influence of column hardware on the performance of reactive distillation columns 225
- Reactive solids**
Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Reactive stripping**
Esterification in a structured catalytic reactor with counter-current water removal 175
- Reactor volume**
Optimal temperature profiles for parallel-consecutive reactions with deactivating catalyst 461
- Redox cycle**
Platinum catalysed aqueous methyl α -D-glucopyranoside oxidation in a multiphase redox-cycle reactor 191
- Residence time distribution**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- Rhodium**
Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183
- Rhodium colloids**
Hydrogenation of olefins in aqueous phase, catalyzed by polymer-protected rhodium colloids: kinetic study 389
- Ru catalyst**
Selective hydrogenation of benzene to cyclohexene catalyzed by Ru supported catalysts. Influence of the alkali promoters on kinetics, selectivity and yield 363
- Ruthenium sulfide**
HRTEM study of the morphology of RuS₂ supported particles 91
- Saccharomyces cerevisiae***
A general kinetic and mass transfer model to simulate the baker's yeast growth in bioreactors 437
- Scale up**
A scale up strategy for bubble column slurry reactors 199
Design and optimisation of a multi-stage bubble column slurry reactor for Fischer–Tropsch synthesis 241
- Scaling down**
CFD modeling of multiphase flow distribution in catalytic packed bed reactors: scale down issues 209
- Selective hydrogenation**
Kinetics of cinnamaldehyde hydrogenation–concentration dependent selectivity 381
- Selective oxidation**
Iron as an effective additive for enhancement of catalytic performance of cesium hydrogen salt of molybdophosphoric acid for selective oxidation of isobutane, propane, and ethane under oxygen-rich and -poor conditions and the catalyst design 47
- Selectivity of gas–liquid reactions**
The influences of the gas rate dissolution and mass-transfer limitation at the interfaces on selectivity of gas–liquid processes in stirred reactors with a suspended catalyst 397
- Ship-in-bottle synthesis**
Ship-in-bottle synthesis and catalytic performances of platinum carbonyl clusters, nanowires, and nanoparticles in micro- and mesoporous materials 23
- Sieve tray column**
Influence of column hardware on the performance of reactive distillation columns 225
- Sieve trays**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233
- Silver hydride**
Properties of chemisorbed hydrogen species on Ag-A zeolite partially reduced with hydrogen as studied by ¹H MAS NMR 81
- Simulation**
2-Methylpropylacetate synthesis via catalytic distillation 219
- Slurry reactor**
Agglomeration and adhesion of catalyst particles in gas–liquid reactors 263
The influences of the gas rate dissolution and mass-transfer limitation at the interfaces on selectivity of gas–liquid processes in stirred reactors with a suspended catalyst 397
- Solid dissolution**
Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Stability**
Hydrogenation of olefins in aqueous phase, catalyzed by polymer-protected rhodium colloids: kinetic study 389
- Stirred cell for high pressure**
On the interfacial mass transfer and the location of the chemical reaction in a fluid/fluid reacting system at elevated temperatures and pressures 335
- Structured catalyst**
Esterification in a structured catalytic reactor with counter-current water removal 175
- Structured packing**
Hydrodynamics of reactive distillation tray column with catalyst containing envelopes: experiments vs. CFD simulations 233

- Substrate selectivity**
 Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355
- Sulfide catalysts**
 New aspects of catalytic functions on sulfide catalysts 15
- Sulfoxidation reaction**
 Heterogeneous sulfoxidation of thioethers by hydrogen peroxide over layered double hydroxides as catalysts 529
- Sulfur dioxide**
 Gas absorption into aqueous reactive slurries of calcium and magnesium hydroxide in a multiphase reactor 495
- Supercritical fluid**
 On the interfacial mass transfer and the location of the chemical reaction in a fluid/fluid reacting system at elevated temperatures and pressures 335
- Supported aqueous phase catalysis**
 Multifactorial analysis in the study of hydroformylation of oct-1-ene using supported aqueous phase catalysis 297
- Supported photocatalyst**
 Modelling of a photocatalytic reactor with a fixed bed of supported catalyst 467
- Surface organometallic chemistry**
 Organometallic chemistry at the interface with materials science 3
- Surface organometallic chemistry on metal**
 Surface organometallic chemistry on metals in water. Chemical modification of platinum catalyst surface by reaction with hydrosoluble organotin complexes: application to the selective dehydrogenation of isobutane to isobutene 303
- Surfactant micelles**
 Micelle templating for the formulation of silica at the nanometer scale 75
- Synthesis**
 Synthesis and purification of anthraquinone in a multifunctional reactor 167
- Temperature**
 Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Textile wastewater treatment**
 Electrochemical destruction of thiourea dioxide in an undivided parallel plate electrodes batch reactor 519
- Thermodynamics**
 Nonequilibrium thermodynamics for multiphase reacting systems: an optimal control approach 453
- Thioether**
 Heterogeneous sulfoxidation of thioethers by hydrogen peroxide over layered double hydroxides as catalysts 529
- Thiourea dioxide**
 Electrochemical destruction of thiourea dioxide in an undivided parallel plate electrodes batch reactor 519
- Three-phase reactor**
 Kinetics and phase equilibria of competing aldolization and elimination in a three-phase reactor 419
- TiO₂**
 External and internal mass transfer effect on photocatalytic degradation 475
- TiO₂(110)**
 Anisotropic ordering of Mo species deposited on TiO₂(1 1 0) characterized by polarization-dependent total reflection fluorescence EXAFS (PTRF-EXAFS) 97
- Trickle-bed**
 Monolithic catalysts as more efficient three-phase reactors 157
- Two-phase catalysis**
 Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355
- Urethanes**
 Substrate-selective catalysis in an aqueous biphasic system with per(2,6-di-*O*-methyl)- β -cyclodextrin 355
- Vaporization**
 Experimental study of vaporization effect on steady state and dynamic behavior of catalytic pellets 255
- Wacker oxidation**
 Design of alkenes-(O₂ + NO) cell system for the selective partial oxidation of alkenes 115
- Water pollution**
 Modelling of a photocatalytic reactor with a fixed bed of supported catalyst 467
- Water purification**
 External and internal mass transfer effect on photocatalytic degradation 475
 Comparison of the efficiency of immobilized and suspended systems in photocatalytic degradation 487
- Water-soluble catalyst**
 Water-soluble rhodium/phosphonate–phosphine catalysts for hydroformylation 183
- XPS study**
 Liquid phase selective oxidation of benzyl alcohol over Pd–Ag catalysts supported on pumice 271
- Zirconium**
 FI Catalysts: super active new ethylene polymerization catalysts 63
