

Contents

Preface	1
A survey of the mechanism in catalytic isomerization of alkanes Y. Ono	3
Synthesis of solid superacids and their activities for reactions of alkanes K. Arata, H. Matsushashi, M. Hino and H. Nakamura	17
H ₂ -reduced Pt/MoO ₃ as a selective catalyst for heptane isomerization T. Matsuda, H. Sakagami and N. Takahashi	31
Skeletal isomerization of <i>n</i> -heptane and hydroisomerization of benzene over bifunctional heteropoly compounds A. Miyaji and T. Okuhara	43
Modern refining concepts—an update on naphtha-isomerization to modern gasoline manufacture H. Weyda and E. Köhler	51
Development of Pt/SO ₄ ²⁻ /ZrO ₂ catalyst for isomerization of light naphtha T. Kimura	57
Skeletal isomerization of light FCC naphtha D. Li, M. Li, Y. Chu, H. Nie and Y. Shi	65
Previous Issues of Catalysis Today	I
