Preface	75
Oxidative dehydrogenation of propane on pure and silica-dispersed multimetallic oxides based on vanadium and niobium prepared via hydrolytic and non-hydrolytic sol–gel methods P. Moggi, M. Devillers, P. Ruiz, G. Predieri, D. Cauzzi, S. Morselli and O. Ligabue.	77
The selective oxidation of propane on Mo-V-Te-Nb-O catalysts. The influence of Te-precursor J.M. López Nieto, P. Botella, B. Solsona and J.M. Oliver	87
An attempt to explain the role of CO ₂ and N ₂ O as gas dopes in the feed in the oxidative dehydrogenation of propane. Role of dissociative species during the reaction F. Dury, M.A. Centeno, E.M. Gaigneaux and P. Ruiz	95
Hydrogen formation during dehydrogenation of C ₂ –C ₄ alkanes in the presence of oxygen: oxidative or non-oxidative? M.Yu. Sinev, Z.T. Fattakhova, Y.P. Tulenin, P.S. Stennikov and V.P. Vislovskii	107
Valuable oxygenates by aerobic oxidation of polymers using metal/bromide homogeneous catalysts W. Partenheimer	117
Correlation of alkane oxidation performance with STM and tunneling spectroscopy measurements of heteropolyacid catalysts I.K. Song, J.E. Lyons and M.A. Barteau.	137
The surface chemistry of hydrocarbon partial oxidation catalysis F. Zaera	149
Kinetic study of oxidative dehydrogenation of propane over Ni-Co molybdate catalyst M.M. Barsan and F.C. Thyron	159
The partial oxidation of propane to formaldehyde using uranium mixed oxide catalysts S.H. Taylor, G.J. Hutchings, M.-L. Palacios and D.F. Lee	171
Silica and boron nitride supported molybdenum and vanadium oxide catalysts for propane oxidation S.H. Taylor and A.J.J. Pollard	179
Heteropolyacid-based catalysts for selective alkane oxidation: mechanism of formation of maleic anhydride from propane C.J. Dillon, J.H. Holles, M.E. Davis and J.A. Labinger	189
Preparation of vanadium phosphate catalysts using water as solvent J.K. Bartley, J.A. Lopez-Sanchez and G.J. Hutchings	197
New insight into the role of gas phase reactions in the partial oxidation of butane S. Marengo, P. Comotti and G. Galli	205
The effect of varying the duration of the butane/air pretreatment on the morphology and reactivity of (VO) ₂ P ₂ O ₇ catalysts K.C. Waugh and Y.-H. Taufiq-Yap	215
Efficient oxyfunctionalization of <i>n</i> -hexane by aqueous H ₂ O ₂ over a new TS-PQ TM catalyst I. Halasz, M. Agarwal, E. Senderov and B. Marcus	227
Recent developments in the selective oxidation of propane to acrylic and acetic acids J.C. Védrine, E.K. Novakova and E.G. Derouane	247
The structure–activity relationships of methane mono-oxygenase mimics in alkane activation P.-P.H.J.M. Knops-Gerrits and W.A. Goddard III	263

Nanoengineered catalysts for high-temperature methane partial oxidation J. Schicks, D. Neumann, U. Specht and G. Veser	287
Peculiarities of ethane oxidation on V_2O_5/SiO_2 catalysts with different silica structure and morphology A.V. Kuchero, A.V. Ivanov, T.N. Kuchero, V.D. Nissenbaum and L.M. Kustov	297
Previous Issues of Catalysis Today	I
