Preface	307
Mid-IR spectroscopy for rapid on-line analysis in heterogeneous catalyst testing O.M. Wilkin, P.M. Maitlis, A. Haynes and M.L. Turner	309
Application of combinatorial catalysis for the direct amination of benzene to aniline P. Desrosiers, S. Guan, A. Hagemeyer, D.M. Lowe, C. Lugmair, D.M. Poojary, H. Turner, H. Weinberg, X. Zhou, R. Armbrust, G. Fengler and U. Notheis	319
Accelerating lead discovery via advanced screening methodologies J. Klein, W. Stichert, W. Strehlau, A. Brenner, D. Demuth, S.A. Schunk, H. Hibst and S. Storck	329
Fundamental insights into the oxidative dehydrogenation of ethane to ethylene over catalytic materials discovered by an evolutionary approach G. Grubert, E. Kondratenko, S. Kolf, M. Baerns, P. van Geem and R. Parton	337
Application of combinatorial chemistry and high-speed experimentation concepts to the study of titanium-silsesquioxane catalysts P.P. Pescarmona, J.C. van der Waal and T. Maschmeyer	347
Optimal on-line sampling of parallel reactions: general concept and a specific spectroscopic example G. Rothenberg, H.F.M. Boelens, D. Iron and J.A. Westerhuis	359
A modified robotic system for catalyst preparation by wet or dry impregnation G. Grasso, B. Harji, E. Xue, S. Belochapkin and J.R.H. Ross	369
Fast preparation and testing methods using a microstructured modular reactor for parallel gas phase catalyst screening A. Müller, K. Drese, H. Gnaser, M. Hampe, V. Hessel, H. Löwe, S. Schmitt and R. Zapf.	377
Can artificial neural networks help the experimentation in catalysis? J.M. Serra, A. Corma, A. Chica, E. Argente and V. Botti	393
Multivariate approach to zeolite synthesis M. Tagliabue, L.C. Carluccio, D. Ghisletti and C. Perego	405
Advances in catalyst development for oxidative ethylbenzene dehydrogenation S. Geisler, I. Vauthey, D. Farusseng, H. Zanthoff and M. Muhler	413
Styrene from toluene by combinatorial catalysis J.M. Serra, A. Corma, D. Farrusseng, L. Baumes, C. Mirodatos, C. Flego and C. Perego	425
Selective combinatorial catalysis; challenges and opportunities: the preferential oxidation of carbon monoxide W. Li, F.J. Gracia and E.E. Wolf	437
Listening to catalysis—a real time parallel method for high throughput product analysis T. Johann, A. Brenner, M. Schwickardi, O. Busch, F. Marlow, S. Schunk and F. Schüth	449
High-throughput experimentation in catalyst testing and in kinetic studies for heterogeneous catalysis J.A. Moulijn, J. Pérez-Ramírez, R.J. Berger, G. Hamminga, G. Mul and F. Kapteijn	457
Selective oxidation of propylene to propylene oxide using combinatorial methodologies T. Miyazaki, S. Ozturk, I. Onal and S. Senkan.	473
Feedforward neural networks in catalysis. A tool for the approximation of the dependency of yield on catalyst composition, and for knowledge extraction M. Holeña and M. Baerns	485

Discovery of new paraffin isomerization catalysts based on $\text{SO}_4^{2-}/\text{ZrO}_2$ and WO_x/ZrO_2 applying combinatorial techniques A. Corma, J.M. Serra and A. Chica	495
Selection of optimum chromium oxide-based catalysts for propane oxidehydrogenation S.M. Al-Zahrani, B.Y. Jibril and A.E. Abasaeed.	507
Holographic research strategy for catalyst library design. Description of a new powerful optimisation method L. Végvári, A. Tompos, S. Göbölös and J. Margitfalvi	517
Previous Issues of Catalysis Today	I
