Preface	
J.S. Lee, W. Choi and Y. Okamoto.	1
Decomposition of NH_3 over Zn–Ti-based desulfurization sorbent promoted with cobalt and nickel	
H.K. Jun, S.Y. Jung, T.J. Lee, C.K. Ryu and J.C. Kim	3
Selective oxidation of hydrogen sulfide over mixture catalysts of V–Sb–O and Bi_2O_3	
B.-G. Kim, D.-W. Park, I. Kim and H.-C. Woo	11
Effects of support and additive on oxidation state and activity of Pt catalyst in propane combustion	
H. Yoshida, Y. Yazawa and T. Hattori	19
The nature of low temperature deactivation of CoCr_2O_4 and $\text{CrO}_x/\gamma\text{-Al}_2\text{O}_3$ catalysts for the oxidative decomposition of trichloroethylene	
K.-E. Jeong, D.-C. Kim and S.-K. Ihm.	29
NO removal by CH_4 on Co–NaX–CO and Ag–NaX catalysts in a dual-bed system	
J.-H. Lee, J.-G. Kim, J.-K. Lee and J.-H. Kim	35
Quantum-chemical study on the supported precious metal catalyst	
C. Jung, Y. Ito, A. Endou, M. Kubo, A. Imamura, P. Selvam and A. Miyamoto	43
Pd–Pt/ Al_2O_3 bimetallic catalysts for the advanced oxidation of reactive dye solutions	
S.-C. Kim, H.-H. Park and D.-K. Lee	51
Degradation of polystyrene waste over base promoted Fe catalysts	
J.-S. Kim, W.-Y. Lee, S.-B. Lee, S.-B. Kim and M.-J. Choi	59
Photoresponse and AC impedance characterization of $\text{TiO}_2\text{--SiO}_2$ mixed oxide for photocatalytic water decomposition	
T.-V. Nguyen and O.-B. Yang.	69
Photocatalytic activation of TiO_2 under visible light using Acid Red 44	
J. Moon, C.Y. Yun, K.-W. Chung, M.-S. Kang and J. Yi.	77
Photocatalytic performance of nanometer-sized $\text{Fe}_x\text{O}_y/\text{TiO}_2$ particle synthesized by hydrothermal method	
M. Kang, S.-J. Choung and J.Y. Park.	87
Synthesis of nanosized $\text{TiO}_2/\text{SiO}_2$ particles in the microemulsion and their photocatalytic activity on the decomposition of <i>p</i> -nitrophenol	
S.-S. Hong, M.S. Lee, S.S. Park and G.-D. Lee	99
Hydrodesulfurization over intrazeolite molybdenum nitride clusters prepared by using hexacarbonyl molybdenum as a precursor	
T. Kadono, T. Kubota and Y. Okamoto	107
In situ XAFS analysis of catalytically active cobalt species in porous clays for deep hydrodesulfurization	
M. Shirai, N. Iwasa, K.K. Bando and T. Kubota	117
Deactivation study on nitrated molybdena–alumina during hydrodesulfurization of dibenzothiophene by X-ray photoelectron spectroscopy	
M. Nagai and T. Arahata.	123
Tri-reforming of CH_4 using CO_2 for production of synthesis gas to dimethyl ether	
S.-H. Lee, W. Cho, W.-S. Ju, B.-H. Cho, Y.-C. Lee and Y.-S. Baek.	133

Role of sulfonic acids in the Sn-catalyzed transesterification of dimethyl carbonate with phenol H. Lee, S.J. Kim, B.S. Ahn, W.K. Lee and H.S. Kim	139
Synthesis of polymeric salen complexes and application in the enantioselective hydrolytic kinetic resolution of epoxides as catalysts M.-a. Kwon and G.-J. Kim	145
Partial oxidation of ethylene to ethylene oxide over nanosized Ag/ α -Al ₂ O ₃ catalysts Y.-C. Kim, N.-C. Park, J.-S. Shin, S.R. Lee, Y.J. Lee and D.J. Moon	153
New approach to environmentally benign epoxidation: the solid-phase-system using urea-H ₂ O ₂ and recyclable dodecatungstate on apatite J. Ichihara, K. Iteya, A. Kambara and Y. Sasaki	163
Liquid-phase hydrogenation of maleic anhydride over Pd-Sn/SiO ₂ S.M. Jung, E. Godard, S.Y. Jung, K.-C. Park and J.U. Choi	171
Kinetics of reaction of benzyl chloride with sodium acetate using tetrahexylammonium chloride as a phase-transfer catalyst S.-W. Park, T.-Y. Kim, D.-W. Park and J.-W. Lee	179
Theoretical study on vapour phase Beckmann rearrangement of cyclohexanone oxime over a high silica MFI zeolite M. Ishida, T. Suzuki, H. Ichihashi and A. Shiga	187
Preparation and characterization of zeolite catalysts for etherification reaction J.W. Kim, D.J. Kim, J.U. Han, M. Kang, J.M. Kim and J.E. Yie.	195
Catalytic dehydrogenation of ethylbenzene with carbon dioxide: promotional effect of antimony in supported vanadium-antimony oxide catalyst M.-S. Park, V.P. Vislovskiy, J.-S. Chang, Y.-G. Shul, J.S. Yoo and S.-E. Park	205
Solid acidity of metal oxide monolayer and its role in catalytic reactions M. Niwa, Y. Habuta, K. Okumura and N. Katada	213
Preparation of new solid superacid catalyst, zirconium sulfate supported on γ -alumina and activity for acid catalysis J.R. Sohn and D.H. Seo	219
Liquid phase methanol reforming with water over silica supported Pt-Ru catalysts T. Miyao, M. Yamauchi and S. Naito	227
Preparation of platinum-based electrode catalysts for low temperature fuel cell H. Kim, J.-N. Park and W.-H. Lee	237
Hydrogen production by oxidative methanol reforming on Pd/ZnO catalyst: effects of Pd loading S. Liu, K. Takahashi and M. Ayabe	247
Electrocatalytic reforming of carbon dioxide by methane in SOFC system D.J. Moon and J.W. Ryu	255
Previous Issues of Catalysis Today	I
