

Contents

Preface	
P. Smirniotis and J.M. Keith	1
Experimental and theoretical investigation of the mass transfer controlled regime in catalytic monoliths	
D.H. West, V. Balakotaiah and Z. Jovanovic	3
Investigation of the oxidation behavior of diesel particulate matter	
A. Yezerets, N.W. Currier, H.A. Eadler, A. Suresh, P.F. Madden and M.A. Branigin	17
Catalyst deactivation during the liquid phase hydrodechlorination of 2,4-dichlorophenol over supported Pd: influence of the support	
G. Yuan and M.A. Keane	27
Catalytic wet air oxidation of wastewater containing ammonia and phenol over activated carbon supported Pt catalysts	
S. Cao, G. Chen, X. Hu and P.L. Yue	37
Interaction of anatase and rutile TiO ₂ particles in aqueous photooxidation	
B. Sun and P.G. Smirniotis	49
Residence time distribution of fluids in stirred annular photoreactor	
E. Sahle-Demessie, S. Bekele and U.R. Pillai	61
An investigation of nanostructured vanadia/titania catalysts for the oxidation of monochlorobenzene	
J.L. Graham, C.B. Almquist, S. Kumar and S. Sidhu	73
Direct catalytic formation of acetic acid from CO ₂ and methane	
E.M. Wilcox, G.W. Roberts and J.J. Spivey	83
