A new approach to the mechanism of heterogeneously catalysed reactions: the oxydehydrogenation of ammonia at a Cu(III) surface, A. Boronin, A. Pashusky and M.W. Roberts, Catal. Lett. 16 (1992) 345.

The oxygen exposures (fig. 3) should be a factor of ten greater, i.e. the *x*-axis should read 500, 1000, 1500, 2000 L, not 50, 100, 150, 200 L.
