

## Erratum

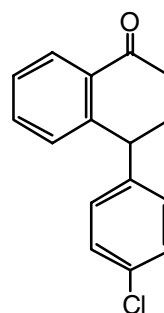

Volume 87, number 3–4 (2003) in the article “*Superacidic trifluoromethanesulfonic acid-induced cyclization of aromatics*” by G. K. S. Prakash\*, P. Yan, B. Török and G. A. Olah, page 110 4,7-dichloro-3-phenyl-indan-1-one should be replaced by 3-(2,5-dichlorophenyl)indan-1-one. On page 111, the structures in table 2, entry 1, 2 and 7 were misrepresented. The actual structures are the following:

Entry 1

Entry 2

Entry 7

These products can be easily rationalized by initial alkylation followed by acylation on the electron-rich phenyl ring.
