Correction

T. Masukawa, J. Goto and H. Iwata: Impaired metabolism of arachidonate in selenium-deficient animals, Experientia 39 (1983) 405.

In table 3, page 405, there is a misprint. Table 3 should correctly read:

Effect of dietary selenium on the generation of PGl₂-like substance in rat aorta

Diet	% Inhibition of ADP-induced platelet aggregation
Se(-)	16.45±3.28 (8)
Se(+)	31.93±6.21* (8)

Each value represents mean \pm SEM of 8 experiments. Significantly different from selenium-deficient group (*p < 0.05).

Instructions to Authors

Experientia is a monthly journal of natural sciences devoted to publishing articles which are interdisciplinary in character and which are of general scientific interest. Considered for publication will be hitherto unpublished papers that fall within one of four categories:

Reviews (one-man and multi-author reviews)
Full Papers (in-depth reports not exceeding 4-6 printed pages)
Mini-reviews (1-2 printed pages)

Short Communications (1-2 printed pages)

Papers reporting on work that is preliminary in nature, or wherein animal experiments have been conducted without the appropriate anesthesia, will not be accepted.

Manuscripts (including all tables and figures) must be submitted in triplicate and must be in English. Title pages should bear the author's name and address (placed directly below the title), a brief abstract (of approximately 50 words for short communications) mentioning new results only, and a listing of key words. Footnotes must be avoided. Tables, and then figures, are to follow the body of the text and should be marked with self-explanatory captions and be identified with the author's name. All data should be expressed in units conforming to the Système International (SI). Drawings are to be on heavy bond paper and marked clearly in black. Photographs should be supplied as glossy positive prints. References for Short Communications should be numbered consecutively and presented on a separate page. Bibliographic listings for all other papers should be arranged alphabetically and include full article titles. Please consult a current issue of Experientia or inquire at the editorial office for details on form.

Authors are requested to specify under which section heading they would wish their communication to appear:

- 1. Chemistry, Physics, Biomathematics
- 2. Physiology, Pathophysiology
- 3. Biochemistry
- 4. Anatomy, Histology, Histochemistry
- 5. Pharmacology, Toxicology
- 6. Molecular Biology
- 7. Immunology
- 8. Cellular Biology
- 9. Genetics, Developmental Biology, Aging
- 10. Oncology
- 11. Endocrinology
- 12. Neurobiology, Behavior
- 13. Environment, Ecology
- 14. New methods and apparatus

All incoming manuscripts are acknowledged immediately. Authors will be notified of the editorial board's publishing decision once their manuscripts have been evaluated by a minimum of two field experts. Fifty reprints of papers accepted for publication will be sent to authors free of charge; additional reprints may be ordered. Manuscripts and all communications to the editors should be addressed to:
