IVth International Symposium on Quantitative Luminescence Spectrometry in Biomedical Sciences

State University of Ghent, Belgium, May 27–31, 1991

Organizing Committee

Chairman: W. Baeyens

Laboratory of Pharmaceutical Chemistry
and Drug Quality Control, Pharmaceutical
Institute, Harelbekestraat 72, B-9000 Ghent

Members: D. De Keukeleire

Laboratory of Organic Chemistry
Krijgslaan 281, B-9000 Ghent

A. de Leenheer

Laboratory of Medical Biochemistry and
Clinical Analysis, Pharmaceutical Institute,
Harelbekestraat 72, B-9000 Ghent

Scientific Program

– London Diagnostics Chair on 'Education in Luminescence'

May 27, 1991

The purpose of the Chair is to emphasize a particular aspect of luminescence by means of a one-day top level

course, to be presented by an internationally recognized expert in the field; this year the course will be held by Prof. Dr. Frank McCapra, University of Sussex. The theme for this year will be "The Application of Chemiluminescence to Diagnostics" and should be particularly promising for immediate application in biomedical and clinical practice.

– Symposium on 'Quantitative Luminescence Spectrometry in Biomedical Sciences'
May 28–31, 1991

Invited plenary and keynote lectures, oral contributions and posters will cover the most important fields of fundamental and applied luminescence spectrometry. The Conference envisages a report on the current status and future developments in the field of quantitative luminescence techniques applied in drug quality control, clinical analysis, biochemical, toxicological and environmental analysis, and in related areas.
