Bergström et al. "Sex pheromone of the pine sawfly *Diprion pini* (Hymenoptera: Diprionidae): chemical identification, synthesis and biological activity": *Experientia* 51/4 (1995) 370–380.

We very much regret the printing error in figure 1 on page 375. We here publish the correct figure with the gas chromatograms a, b and c positioned in an analogous way, that is with the main peaks corresponding to the SRR-isomer vertically aligned.

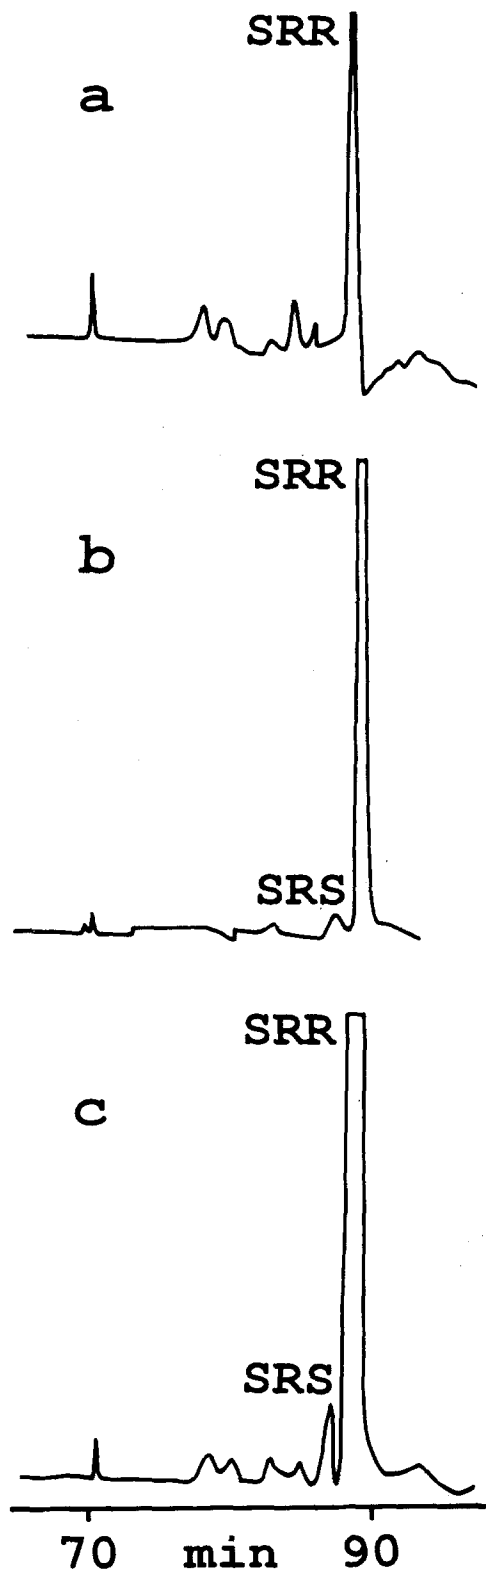

Figure 1. Diastereomeric analysis of perfluorobenzoyl esters. *a* An extract of French *D. pini* females, *b* synthetic (2*S*,3*R*,7*R*)-3-7-dimethyl-2-tridecanol, *c* a co-injection of natural material and synthetic reference. Chromatographic conditions: columns, Sil-88, 50 m × 0.25 mm I.D. and 25 m × 0.25 mm I.D. coupled in series; 150 °C isothermal; carrier gas N<sub>2</sub> 75 kPa.
