

## CORRIGENDA

Throughout this article (including in the tables), the values given for variant F87L/A328I should be reassigned to variant F87A/A328V and vice versa.

Furthermore, in Table 3, in the top row of column 4, compound label **9** should be replaced by **10**, and in the top row of column 5, compound label **10** should be replaced by **9**. The authors apologise for these mistakes.
