

Publisher's note

We are delighted to inform you about an important development for the benefit of authors and readers of *Chemical Engineering Journal*.

Chemical Engineering Journal is included in a new initiative from Elsevier: 'Colourful e-Products'. Until recently, if an image was published in black and white in print, then so was the image on ScienceDirect or any other Elsevier website. As of *CEJ, volume 97, issue 1*, Elsevier will move beyond the printed journal in this respect. When colour images are received these will be the ones published on ScienceDirect, even though their black and white equivalents will in most cases still be used in the printed journal.

This new service provides a welcome step forward now that scientists increasingly access information online. Scientists in many disciplines need to be able to publish their work in colour, but the cost of colour printing in small, specialised journals can be prohibitive and we realise that not all scientists have appropriate funds to cover the charges. With 'Colourful e-Products', which is offered free of charge, we aim to provide an appropriate solution to authors and readers alike.

Authors wishing to make use of this facility should ensure that the artwork is in an acceptable format (TIFF, EPS or MS Office files) and at the correct resolution. In addition, for colour online and black & white in print, both colour and black & white artwork (file and/or hardcopy) should be provided. Further information on electronic artwork can be found at <http://authors.elsevier.com/artwork>.

To view the articles online please access the journal from the ScienceDirect website: <http://www.sciencedirect.com>

Your feedback and comments are welcome.
